RE: M2Z's Application for **20 MHz of Broadband Spectrum**. . .Docket # 07-16

Dear Chairman Martin:

I **am** writing to voice my support for M2Z Networks' plan to provide free Internet access throughout the United States and **to** ask the **FCC to** grant M2Z's proposal by making available to them the broadband spectrum they need in order to make free nationwide Internet a **reality**.

As the mayor of culturally and economically diverse city I know **all** too well that many of my constituents **do** not have access to the Internet because it is just too expensive for **them**. Likewise, many **small** family-owned businesses in my community **are** struggling to make ends meet and cannot **afford** the high price of a broadband Internet connection. M2Z's plan will not only enable **all** of the residents and businesses in **my** City to access the Internet, it will **also** provide much needed safety measures such as filters that will help parents protect children from indecent material. **Our** children and **small** business should not be allowed to fall behind children and businesses in other countries where affordable broadband is widely available.

Please approve the application by M2Z Networks and provide them broadband spectrum they need to bring the Internet **to** **all** **Americans**. The result can **only** be a more educated and productive **American** people.

Sincerely,

Brenda Salas
Mayor, City of Banning, CA
