

I am writing to express my opinion that the Sirius/XM merger is good for consumers and should be approved. I base my opinion on the robust competition in the industry - the biggest competition coming from National Broadcasters - and new technologies such as IPODS,MP-3 devices, Internet radio, Slacker (the other Satellite radio company, cell phones and Cable Television Music stations and selections. Additionally, the campaign by the NAB against this merger is dishonest and unlawful. I would strongly encourage the FCC to enforce its regulatory powers and sanction the NAB for intentionally misleading and outright lying to the FCC and Congress for the benefit of its members.

Very Truly yours,

Christopher L. Fletcher, Attorney at Law
