

I am a Sirius Satellite Radio subscriber and I want to say that I feel that if Sirius and XM are not allowed to merger then both companies will fail in the next 10 years. Please allow these two companies to merger so that satellite radio will be around in 15 years. Also, I generally hate corporate mergers, but I feel this one is good for consumers is such that free radio is still an option for people, which makes satellite radio differnt from most mergers.
