

911 Compliance Status Report)
Zone Telecom, Inc.)
April 11, 2007) WC Docket No. 05-196

Background:

Subsequent to the Zone Telecom, Inc. (“Zone”) Compliance Letter dated November 28, 2005, filed with the FCC,, ownership of Zone’s *callEverywhere* brand and interconnected Voice over Internet Protocol (“VoIP”) customer base was acquired on August 1, 2006 by Voicecom Telecommunications, LLC, d/b/a Intelliverse (“Intelliverse”), of 5900 Windward Parkway, Suite 500, Atlanta, GA, 30005. From that date, Zone ceased all interconnected VoIP operations and no longer offers such services.

Based upon that development, Zone hereby provides updated information as requested by the FCC as follows:

- Provision of Compliant 911 Service: A quantification, on a percentage basis, of the number of subscribers to whom you are able to provide 911 service in full compliance with the rules established in the *VoIP 911 Order*.

Response: Not applicable. Zone no longer offers interconnected VoIP services and does not have any Interconnected VoIP subscribers.

- 911 Coverage: To the extent you have not achieved full 911 compliance with the requirements of the *VoIP 911 Order* in all areas of the country in which you are providing interconnected VoIP service to subscribers: (i) list each PSAP serving such areas of the country; and (ii) describe in detail your plans for coming into full compliance with the requirements of the order, including your anticipated timeframe for such compliance.

Response: Not applicable. Zone no longer offers interconnected VoIP services and does not have any Interconnected VoIP subscribers.

- 911 Routing Information/Connectivity to Wireline E911 Network: Provide a statement as to whether you are transmitting, as specified in Paragraph 42 of the

VoIP 911 Order, “all 911 calls to the appropriate [Public Safety Answering Point (PSAP)] designated statewide default answering point, or appropriate local emergency authority utilizing the Selective Router, the trunk line(s) between the Selective Router and the PSAP, and such other elements of the Wireline E911 Network as are necessary in those areas where selective routers are utilized.” If you are not transmitting all 911 calls to the correct answering point in areas where Selective Routers are utilized, this statement should include: (i) a quantification, on a percentage basis, of the number of subscribers whose 911 calls are not currently being routed to the appropriate PSAP) via the dedicated Wireline E911 Network; and (ii) a detailed explanation why not.

Response: Not applicable. Zone no longer offers interconnected VoIP services and does not have any Interconnected VoIP subscribers.

- New VoIP Customers and/or Marketing of VoIP Service in Non-Compliant Areas: State whether you have stopped accepting new customers and marketing your VoIP service in non-compliant areas, and, if so, the date on which you stopped. If you have continued to accept new customers for its service and/or market your VoIP service in areas where you are non-compliant, explain how these actions are consistent with the Commission rules. Further, indicate the overall number of subscribers currently served in each of your non-compliant areas, and the number of those subscribers that received their initial service after November 28, 2005.

Response: As noted in our Compliance Letter to the FCC of November 28, 2005 , during the period of time when Zone offered an interconnected VoIP product, it was marketed only in compliant areas where Zone was able to provide 911 service in compliance with the *VoIP 911 Order* to 100% of new subscribers. As noted above, since August 1, 2006 Zone no longer offers interconnected VoIP services and does not have any Interconnected VoIP subscribers.
