

PSAP Deployment Spreadsheet:

The customer PSAP deployment spreadsheet highlights the specific PSAPs that have been deployed and for those that have not been deployed it lists the target dates and the specific reason for delay. This is subject to change, as the team reviews schedules. Below captures the definitions of the different statuses listed in the spreadsheet:

Status	Explanation
Deployed	PSAP is Deployed
Deployed - Basic	PSAP is Deployed - Routes to 24/7 Line
Deployed - Basic - Multi - ESN	PSAP is Deployed - Routes to 24/7 Line; Will Deploy Multi-ESN in Future
Deployed - Multi - ESN	PSAP is Deployed - Multi-ESN Solution
Deployed - Voice Only	PSAP is Deployed - Will only Display Shell
In Testing	PSAP is in Testing Phase
No SR Access	Intrado does not have Connectivity to the Selective Router
Non Ops Delay	PSAP is Not Deploying - Out of Ops Control
	PSAP Won't Provide MSAG
