Sirs:

I would like to take this opportunity to express my support for RM-11306. I actually support the original version; however the revised version is at least a start.

This move will benefit, in the long run, almost all amateur operators.

I ask that you not let a concerted mis-information campaign by a few disgruntled amateurs to adversely affect your judgment. The feelings expressed in this campaign actually represent those of a rather few (but very vociferous) amateurs with a particular axe to grind, so to speak.

Please take the time to review and analyze the sources of all responses and take this into consideration.
