

Ref: Petition - Anthony R. Gordon. There is no basis for Mr. Gordon's argument that keeping the Morse code requirement will assist in the fight against terrorism. Voice communications can serve that end more efficiently. A reversal of the Commission's decision to eliminate the Morse code requirement will discourage those who are currently working to upgrade their licenses. The Commission's correct decision to eliminate the Morse code requirement was based on appropriate study of the issues involved and should not be reversed.
