

I am an ARRL member and I am OPPOSED to all the part 97 modifications in RM-11306.

We do not need any sort of modifications to our amateur rules for modes like pactor and winlink, we need INNOVATION. Giving these modes more bandwidth and telling these operators that they can transmit wherever they want to whenever they want to (even over existing communications) is like putting duct tape on the issue. We need innovators to fix this problem, not rule changes.

I urge the commission to see that RM-11306 is NOT in the best interest of the amateur community.
