

Sir/Madam,

I am writing to urge the acceptance of the proposed Sirius/XM merger. I believe that Satellite radio competes mostly with conventional radio and that there is little pricing power for Sirius and XM. As a Sirius subscriber, I would like to be able to get Baseball games without spending another \$12.95. I would also like to be able to filter some stations (per Mr. Karmazin). The NAB's fierce unrelenting push to destroy Sat. radio is clear evidence that they are direct competitors. Thank you
