Re: *Ex Parte* Communication, CC Docket 94-102

Dear Ms. Dortch:

In accordance with Section 1.1206(b) of the FCC's rules, this letter serves as notice that, on behalf of CTIA – The Wireless Association® (“CTIA”), I had a telephone conversation with Fred Campbell, Chief of the Wireless Telecommunications Bureau on April 20, 2007, concerning potential FCC action on testing requirements for Enhanced 911 (“E-911”) technologies.

During the conversation, I noted reports regarding the Commission's consideration of a testing requirement for E-911 technologies that could impose new, more granular accuracy testing by wireless carriers, as originally put forward in a Request for Declaratory Ruling filed by the Association of Public-Safety Communications Officials - International (“APCO”). I expressed CTIA members' willingness to work with the Commission and Public Safety groups to pursue feasible, more-accurate testing methods, but highlighted our procedural concerns with the Commission issuing a Declaratory Ruling without seeking notice and comment from interested parties on the APCO Petition.

Pursuant to Section 1.1206 of the Commission's Rules, this letter is being electronically filed with your office. If you have any questions regarding this submission, please contact the undersigned.

Sincerely,

/s/ Christopher Guttman-McCabe

Christopher Guttman-McCabe
