Re: **AM Directional Antenna Performance Verification Coalition  
Supplement to *Ex Parte* Presentation in MM Docket No. 93-177**

Dear Ms. Dortch:

On May 4, 2007, the AM Directional Antenna Performance Verification Coalition (“Coalition”) filed an *ex parte* request that the Federal Communications Commission (“FCC”) refresh the record in MM Docket No. 93-177, *An Inquiry Into the Commission’s Policies and Rules Regarding AM Radio Service Directional Antenna Performance Verification*, 16 FCC Rcd 5635 (2001), to consider and request public comment on certain proposed modifications to existing FCC rules and proposed new rules that would permit the use of computer modeling using moment method analysis to proof and maintain AM directional antenna arrays, and to evaluate the effects of potential nearby reradiating objects on AM antenna systems.

Coalition members represent the broadcast, broadcast engineering consulting and broadcast equipment manufacturing industries, and all are experts in the science of AM directional antenna design and/or have extensive experience in the adjustment and maintenance of AM directional arrays.

The purpose of this Supplement to notify the FCC that The Walt Disney Company/ABC Radio supports the Coalition’s effort and has been added to the list of participating broadcasters. An updated list of Coalition members is attached.

Ms. Marlene H. Dortch
