

Perserve a free, fair and open Internet!

Net Neutrality is essential to free speech, equal opportunity and economic innovation in America.

The FCC must ensure that broadband providers like AT&T, Verizon and Comcast -- who want to be the gatekeepers do not decide what I can see, where I can go and what I can do online! These corporations are becoming more and more direct instruments of this privatizing, profiteering government in breach of our free speech rights and in direct detriment to democracy! Do not block, interfere with,channel or discriminate against any lawful Internet traffic based on its ownership, source, volume or destination.
