

Big Money from Little Minds

Net Neutrality is important to me. In a country where we are supposed to be free, almost all our freedoms are gone! It's not fair that big corporations should own the internet and use it for their purposes, leaving smaller companies and websites to whatever is left. They(the corporations) would use the internet to promote only their interests, charge exorbitant rates, and generally take away the freedom of the internet. Please save net neutrality, our only source of unbiased information!
