

ATT Does Not Have My Best Interests at Heart

Please don't let ATT (or any giant corporation) take over any portion of the public airwaves. The internet connects millions of active & concerned citizens in common cause & makes it easier to get our voices heard. American citizens need & deserve an equal, accessible forum for our collective voices. ATT or any other phone or cable company would have a vested interest in silencing our voices and preventing our message from reaching other concerned citizens. Keep the internet open, neutral & accessible to all!

The government must protect our airwaves from the same corporate gatekeepers that have stifled innovation and competition in Internet markets.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.
