

## GIVE THIS COUNTRY BACK TO THE PEOPLE

I am tired of a government that cares more about corporate profits (and wealthy people) than it does about restoring a healthy middle class and shrinking the poverty class. I am tired of being told that my privacy doesn't matter, but that government can't even look at what a CEO gets paid or what happens to wages and benefits.

It is no surprise that there is so much anger in our world: we all know that we are being screwed by the corporations and their supporters in the government. It's time to put a stop to it, and protecting the public airwaves for the public good is a good place to start.
