

Please don't doom the internet..

For a good internet connection through the cable company I am also forced to pay for a cable package to get a better deal- Still I am charged almost 70 dollars a month!

I think American has a major problem when it comes to internet access. Having lived overseas for a while I am able to see this more clearly. In Japan, where everything is expensive, I paid about 5 dollars a month for a high speed cable internet connection! Why is this not possible in America?

Please don't give all the control to the people who have been dominating for so long already.

Thank you,
