

Protect our airwaves!

America has fallen behind in the world in regards to high speed internet. Big Companies like AT&T, Verizon and Comcast are gouging customers on price to maximize their profits.

The American airways are the property of the American People, not AT&T.

Please set aside at LEAST 30 MHz of spectrum for open and non-discriminatory public access. We need competition in this market to propel America back to the forefront of internet access and availability.

The FCC must act to ensure that our children will have open, quick and reasonable priced internet access. This will be vital to ensure American competitiveness in the new century.
