

As an Internet professional, I find this situation completely unacceptable. It is time that the public air waves actually become public again. If you continue to allow the big corporations complete control over OUR air waves you are doing nothing more than stifling growth, innovation and community for your fellow Americans. I don't recall anything in the constitution that says for the corporations over the people. In case you have forgot, YOU WORK FOR US!!

You must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

I sincerely thank you for your time and attention to this matter!
