

I have been working actively in the Internet media arena since the very beginnings and now work for a major local media company in Chicago, Chicago Sun-Times Media Group.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.
