

Keep the New Internet Open to All:

We need diversity of opinion or we cannot have a democracy. The brilliance of the internet in providing that has been miraculous - don't stifle this, don't end it - prevent this tragedy!

It would be a big mistake to hand over these wireless airwaves to the very same phone and cable companies that dominate the market: TV, radio, newspapers - now. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.
