

Over the years there has been a lot of rhetoric about "anti-trust" situations and breaking up monopolies. Now when there is a simple way to assure free trade, the FCC is considering auctioning off our public air waves to just those companies that already have a monopoly on the communication lines. We have fallen behind other countries in speed of our communication lines and cost. We need new alternatives not just more of the same corporate greed. The FCC must use this wireless opportunity to connect more Americans to an open, neutral and accessible Internet.

The government must protect our airwaves from the same corporate gatekeepers that have stifled innovation and competition in Internet markets.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.
