

I am doing an organic make-up line(organics are becoming a big threat to the trillion dollar cosmetic industry and I want to know that my right to sell my CLEAN PURE product is not interferred with by my competitors in the big pharma/beauty biz.The government must protect our airwaves from the same corporate gatekeepers that have stifled innovation and competition in Internet markets.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.
