

we need a government for the people not private interest . big business, this is another example of what could be a huge slap in the face to the people if in fact you do not hear our voice. we (the people)are not the sleeping sheep we once were. It is time to step up for US in the U.S. I use the internet for so many things and as far as i can see so do many oothers. is this why you want to control and momopolize . the greed in this governement is gross. Stand up for the PEOPLE!!!

The government must protect our airwaves from the same corporate gatekeepers that have stifled innovation and competition in Internet markets.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.
