Re: M2Z proposal to provide fast, free, family-friendly wireless broadband internet access to all Americans

Dear Secretary Dortch,

Helping small businesses run more efficiently and provide greater services to customers will have a great and positive effect on the economy. In the proposal by M2Z Networks, Docket #07-16, free, fast, family-friendly wireless broadband internet access will be available to all Americans. I believe allowing more access to broadband internet access will increase the productivity and sales for small businesses.

As co-owner of Stewart-Buchanan Interiors, I know the importance of online marketing and advertising and the great opportunity the Internet provides for small businesses. Businesses that are unable to receive broadband now, whether located rurally or because the cost for internet service is too great, will be able to go online with fast, free and reliable service if Docket #07-16 is approved. These small businesses will be able to market online and use the internet for valuable resources that can improve their business.

I know that the service provided by M2Z Networks would lift a huge burden off of my back as a business owner and I would greatly appreciate the service and opportunity to advertise online and use the internet to build Stewart-Buchanan Interiors. A strong economy depends on successful small businesses. I hope you will support this proposal to provide free, fast wireless broadband internet access to all Americans

Sincerely,

Jerry W. Hoffman
