You are supposed to look out for me. You are NOT supposed to be an arm of the soulless corporate interests. YOU ARE A FEDERAL AGENCY. You have the power to protect me and other REAL Americans or to sell out for a corrupt pay-off by the telecommunications corporation. One look at the boards of Directors tells the story about "competition" in an age of mergers. Have a sense of PUBLIC SERVICE instead of the very common impulse to enrich oneself by corrupt Government.

Use the public airwaves for the public good. Do not turn them over to big companies who will stifle competition, innovation, and the wireless Internet revolution.

Glenn D. Kuehn
Las Cruces, NM 88005
The airways belong to the public, and I am opposed to auctioning them off to private companies to enable greater profits for their shareholders. Once the airwaves are gone, they are far more difficult to get back. I prefer a more thoughtful approach, with significant input from Congress and U.S. voters.

Companies already make enough money. Don’t be taxing the people more.

The internet should remain free to all who use it without restrictions placed by telecommunications companies.

Wages are going down, cost of living and transportation is going. Many people can’t even afford a landline phone. But somebody is making a lot of money and it’s time to equalize the public’s power with that of the private utility company. How are we going to compete in the world marketplace when we as a people can’t easily have access to the knowledge and communication tools of the modern age?

Freedom of choice, Freedom of speech and ways to carry that out is what the US is about. Or WAS?

Keep the airwaves free...we all deserve wireless access in a wireless world!

Collected by MoveOn.org Civic Action
Think of the consumers. Stop helping the rich get richer. Stand up for competition and fair prices. Do NOT hand over these air-waves to big companies.

Megan Siarkiewicz  
New Lenox, IL 60451

The airwaves should not be given away, but should be used to inform a true democracy—something that won’t happen if big corporations are given them.

Pamela Myers

In broadcasting’s infancy, decisions were made to maintain the airwaves for the public, to inform, to entertain, and to be alerted to matters of imminent danger. This has been a fortuitous decision for our nation. Freedom of open communication in the United States is protected by this doctrine. Why sell that freedom to the highest bidder? We couldn’t retrieve it, once bargained away. And what would we get in return? A compromised system, rigidly controlled by the industry itself. We frequently hear the call to “let the marketplace work”. Providing a bandwidth monopoly for communications interests strips consumers of their rights to reasonable and cost-effective access.

A few years back, individuals running low-frequency television operations were denied access to certain bandwidths, the very kind of access these huge companies now seek. Will communications giants snap up the bandwidths, then sit on them to prevent further competition? Why not “let the marketplace work” in this situation? More competition benefits the consumer. The last time I placed an order for telephone service with a major telephone company, my order was lost between five computers. Increased competition would place a higher value on a customer’s patronage and produce a more effective business model, and a better industry overall.

Dear FCC:
It is my hope that your organization won't once again fall into disgrace like so many others (Justice Department, SEC, EPA, CIA, etc...) during the Bush Administration. Abuse of power has been a common theme, one to which the FCC has already succumbed during Michael Powell’s tenure as FCC Commissioner. Just because Alberto Gonzalez is in hot water and getting lots of attention, don't think that your actions will go un-noticed if you establish policy that benefits corporate interests over the interests of average Americans.

You are being watched and will be held accountable.

The last time I checked, "FCC" isn’t an acronym for ”Fat Cat Collaborators”.

Randall Horton
Yonkers, NY 10701

As we've seen so many times innovation happens when small, fast-moving companies are given the opportunity to access all forms of communication. Handing over the airwaves to large, slow moving, conglomerates will only hasten the move to making the USA a third world country - as India and China quickly move past us in terms of innovation.

Stop eroding our Constitutional rights! Privacy is and protection of our First Amendment right is explicitly stated in the Constitution. Any and all attempt to stifle it, is by very definition treason. Treason in our nation is not legally defined to be an act against the State or its Executive Branch; it is an act or conspiracy to attack or destroy our founding document.

Bush co. and their cronies had an easy run to quid pro quo their rich buddies for too long. And if Democratically led Congress fails to protect the internet and the public air waves, they could kiss their second term majority goodbye. They’ve failed their constituents time and time again. Either you, the Congress and FCC, the servants, you’re not leaders of anything, forget your rightful civic duties, or go sell shoes, as Hagel has recently opined.

One of the largest sources of inequalities in our country is to be found in access. The poor generally don't have access, while the well-off do. This can be access to quality schools, to their elected representatives, and to information. Just as we see fit to provide access to everyone, regardless of ability to pay, in our parks, in our public television stations and radio stations, in our schools, etc, it is IMPERATIVE that we continue to encourage and make certain that those with minimum access have the access that is provided that by the free airwaves that currently exist. Simply selling them off to private interests will only, in the long term, ensure further deterioration of the access of those who need it the most. Thank you for your time and consideration.

Brian Taylor

I find it frightening how much communication today is controlled by corporations. Please help protect what little communication freedoms we now have. Do NOT expand this influence.

Gail Dana
San Diego, CA 92115

I want the airwaves to remain publicly controlled. This is very important to me.

Tom Heinz
Irvine, CA 92603

The airwaves are a public resource, and they have been continually turned over to corporations who view them as "property they own". These corporations have a responsibility to the public as a whole. Their track record is not good, look at the monopolies they hold over cable, phone, and existing cell coverage. The internet should be "the great equalizer" where individuals can get their message out, but we are dangerously close to squelching only the corporate view, like we have with television.

Edward R. Peery
Tucson, AZ 85718

It is your duty to protect the right of citizens to receive unbiased reporting. When corporations own our media–this is no longer possible. Say no to corporations and yes to the American people.

Internet Access is perhaps the single most valuable asset members of the public have for educational purposes, innovation and commerce. This precious resource should be made available free of charge to every American. No other single resource that an American can possess has a greater potential for improving American lives or those lives around the globe.

Jaime Ray
Martinez, CA 94553

The airwaves belong to people, not corporations...

Joseph Jozkowski
New Hyde Park, NY 11040

I am urging the FCC to protect the public good by setting auction rules that prohibit anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable companies should not be able to keep innovative companies off the public airwaves.

Lorin Weymouth
Corvallis, OR 97330

Whatever happened to what the FCC used to require? Every year, the FCC turns into more of a big business partner, rather than the entity it was supposed to be: a watchdog looking out for the interests of American citizens. Please look back at the legislation that created the FCC & get back to it!

Over the past 5 years, it’s been obvious to most people that the public can not trust corporate America to protect their interests. From Wall St., Enron and energy policy, war profiteers, to the Internet, we need to protect the public from those who seek to re-establish monopolies and position their companies for outlandish profits, including squatting on the public’s airwaves. The FCC should represent the public, not the lobbyists from Verizon and AT&T.

I understand the long practice of auctioning the airwaves, but the public good should be first and foremost and remain chief concern in the fostering of innovation. Small business in this country is where most of the innovation comes from not the mahogany board rooms of corporate America (as much as the Fortune 500 would like to have us believe otherwise).

Keith Johnston

Chicago, IL 60625

These newly available PUBLIC airwaves are a once-in-a-lifetime opportunity to revolutionize American citizens’ access to the Internet via high-speed transmission to every corner of America. In addition, this access will be at more affordable prices than those of current Internet Service Providers (ISPs). The BIG, commercial telephone and cable companies DO NOT want this competition to their Internet service & expensive ”bundled service packages”; they’d rather purchase these airwaves at auction and THEN sit on them, thus stifling any competition, innovation, and the wireless Internet revolution. These public airwaves should ONLY be used for the advancement of the public good!

As an employee of a financial services company, I understand that commerce plays a large part in the success of both our country and its economy. However, the idea that these companies (one of which was forced to break up due to monopolistic tendencies...AT&T) are seeking to not just dampen but stamp out further competition is a terrible manipulation of the rules. I don't claim to know the whole story regarding this issue, but purchasing something in order to prevent others from using it seems a pretty dastardly way to keep prices high.

Private gain does not equal Public good. For once the government needs to step up and force profit-motivated companies to stand back and make way for what is best for the public. Please remember We The People... we deserve to be free but we need freedom protected, that is what the government is for... For The People. "Selling" airwaves is a crass and disgusting transgression against humanity. The Internet is now the greatest, most free method of communication the world has ever known... it must not be sold to the highest bidder. Freedom and the public interest vastly more important than private companies who only care about how much money that make.

M. Reisenauer

We are already dying from corporate greed and control. Let the imagination of our people speak.

Donald Nitz
Kalamazoo, MI 49008

Is the US becoming a Fascist dictatorship with Bush as Il duce and his minions as black shirts?

Jeff
Denver, CO 80222

the airwaves belong to all of us, with priority to "first responders"

George Sutton
Tucson, AZ 85719

the airwaves should remain PUBLIC!!!!!

Heidi Chretien
santa rosa, CA 95405

Public airways should remain PUBLIC!!!!!
Not another big business giveaway! In just over thirty years the republican party of the rich and mega rich have destroyed the fabric of what made America great. By changing the tax codes to shift the burden away from the upper 5% of citizens to the upper-middle and middle classes they have impoverished our nation while allowing the corporations and ultra wealthy to increase their wealth exponentially. The FCC has been a willing participant all the way. By letting Rupert Murdoch to illegally purchase Fox Media, you have sounded the death knell for free speech in America and now you want to shut off the last vestiges of a voice of the people and turn over mass communication to BIG BROTHER! I say no! And I know there are millions who feel just as I do, but who are unaware of the rampant rate at which their rights and freedoms are being trampled. I could go on, but, unlike those born with silver spoons in their mouths, I have to go to work. I depend on the integrity and honor of those in leadership roles to take action to support the majority of our citizens and not just the privileged few.

Samuel E. Steverson
Sam Steverson
Cave Junction, OR 97523

The public owns the airwaves. The FCC should only be for the public good.

John Langton
Ancramdale, NY 12503

Those airways belong to the American people. Keep it that way

William Brown
Edmond, OK 73013

A Free Press is the oxygen of Democracy. The airwaves and the internet belong to the people of the United States, not any private corporation.

Gordon Glick
Bremerton, WA 98312

i'm opposed to using public airways for the gain of private companies.

We’re urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves.

It is critical that the principle of Internet neutrality be preserved. We users of the Internet already pay for our access to the net. The value of that access should not be compromised by FCC decisions giving some users better service than others.

Kenneth Deed
Southbury, CT 06488

Anna Bobko
Sarasota, FL 34233

What has happened to protecting consumers? We need to be able to rely on public officials to make sure that the freedom of America is protected now and for the future. Big Business is only interested in profit and control of the marketplace. I hope that we as citizens of this great country can rely on the FTC to stand up to special interest groups and corporations that seek their own interests at the expense of everyone.

With the direction that multinational corporations are taking these days, even though technically it appears otherwise, what has happened has been the creation of monopolies on the airwaves and newsmedia. Don’t further that awful Agenda. Keep America the land of FREE SPEECH, and not the land of corporate GateKeepers, mouthpieces and censors.

HAVE YOU NO SHAME!!!!!!!!!!!!!!!!
Anorene Townsend
CARSON, CA 90746

The consolidation of media in this country has not been this extreme since the age of William Randolf Hearst. American citizens have witnessed multiple effects, including a lack of diversity of content and being lied to about the Iraq War. Now the FCC and large media corporations wish to excise a large portion of the spectrum which should be used to enrich the diversity of Internet providers. The synergistic implications of totalizing media regulation bode ill for the future of democracy in the U.S. I sign this petition and ask you to carefully consider your stance on Network Neutrality and make a decision that is in accord with the essential democratic as well as free market principles on which our country was founded.
Sincerely,
Mario Rodriguez

Communications should be for the public, not for the private interests of AT&T, Verizon and Comcast. It is not in their interest to either increase competition or increase public internet access at low cost. It is vital that the public airwaves remain public, not go to private interests with no controls on what they can do.

Permitting a few big companies to monopolize the airwaves would enable them to arbitrarily block the free flow of information, ideas, opinions, innovation, and public discourse, by blocking public access to websites, web servers, as well as radio and television stations, that wish to broadcast viewpoints that may be disapproved by those monopolistic, oligarchic, megacompanies. Permitting monopolistic practices in the public broadcasting market would endanger genuine participatory democracy, in America, and throughout the world, as well as blocking productive, transformational, innovation in all sectors of society, by preventing the public from having access to alternative, innovative, viewpoints, companies, and services, arbitrarily excluded from the airwaves and the internet. I respectfully urge the FCC to enact policies that defend the public interest by preserving maximum diversity on the airwaves, and throughout the public broadcast market, rather than catering to excessive monopolistic greed and potentially tyrannical, dictatorial, exclusion of alternative viewpoints from access to public discourse.

You cannot privatize something as widely used and publically available as the Internet. Your ethics are all wrong and you'll only use this to your advantage–not ours!

Virginia Magnuson
Omaha, NE 68132

So many of our utilities and services have already been privatized- from electric companies to hospitals- and all with disastrous results. Our government is steadily moving away from stronger controls on corporations and capitalist competition, while at the same time restricting our citizens' personal and individual freedoms and liberty. This is the EXACT OPPOSITE of what we need to be doing! Privatizing the internet and our public airwaves can only lead to further restrictions on free speech and free press, the cornerstones of our democratic system. Please do not allow this to happen!

Bruce Atkinson
Chicago, IL 60646
We hear from Washington how important the free market place is for competition and innovation to thrive for the benefits of the American people. A small number of large corporations have a history in stifling competition and maximizing corporate profits to a small number of individuals who have the financial resources to invest heavily in these "fee market enterprises." Promote true competition by opening the airwaves to multiple competitors that can truly compete versus limiting the airwaves to AT&T, Verizon, and Comcast.

History has shown auctioning off the public airwaves does not result in more freedom of speech, but rather what the corporations who own the airwaves want to air. Please do not make the same mistake again. Our airwaves are for the public not greedy predator corporations.

R D Bartlow
Northridge, CA 91325

Broadcast signals are the primary thread that allowed U.S. citizens to find community in this modern world. Were it not for public airwaves there would be no way to ensure that entire geographic regions did not de-evolve socially. Imagine if Georgia was allowed to determine what media content would be allowed into their state rather than adhere to federally mandated content standards. This current proposed change to FCC regulations would create the system necessary to "secede" socially from the United States. In less than 3 generations we would have a "programmed" generation of individuals very akin to the militant fundamentalists we are battling elsewhere.

Public airwaves enabled Americans to be connected to community through the largest population increase in history. It would be a crime against humanity to ignore this now, being encouraged to do so by purely temporary conditions.

Jeffrey Trott
Cuyahoga Falls, OH 44221

The internet should be a public resource. Information and communication is power and it should be for the masses!

Caron House
Houston, TX 77004
The public airwaves should be just that, PUBLIC.

John Gaines
Broken Arrow, OK 74012

The public airwaves are public property. They should be free to be used by the public and selling them to the major corporate companies will result in the opposite.

Warner De Gooijer
San Francisco, CA 94130

Mary Hanrahan
rockwall, TX 75087

The public paid for the development of the internet. It should not be given to a specific company for profit.

Competition is essential to good business and lower prices for consumers. We are simply paying too much for too many things today. PUBLIC airwaves should not be one of them.

Joanna Kenyon

To the FCC: By privatizing airwaves, you will add to the eventual complete annihilation of any true culture within our society, and that will destroy society as we know it. The people must have a voice, and nothing else can replace that voice. This slippery slope is so dangerous that I am alarmed. As a professor and an artist, I can say that it doesn’t take a genius to figure out that what this could do to America would have devastating consequences. Please don’t do this.

You’ve tried this before. You must think that we have short memories, or are distracted by this useless “war”. Nice try, my corpulent corporate “friends”. Vote for ownership of the PUBLIC airwaves by the PUBLIC!!

Tom Moriarty
Kansas City, MO 64108

It is never a good idea to have a few commercial entities controlling or monopolizing the market. Do not sign away our airwaves!

Van Law
Honolulu, HI 96816
Sarah Barr
Niantic, CT 06357

I think it is imperative and crucial to allow public airwaves be used for the good of the people and as such be accessible by them. If private corporations are allowed control of this access they will ultimately hinder progress and the flow of business that the internet is capable of. Simply put if the vote goes for the major companies you will be putting the profits of three major companies over the thousands of companies small medium and large that are accessible online currently and in the future. This seems obviously unfair.

The ISM wireless band has sparked a new generation of creativity and opportunity. The large customers who are buying up spectrum at auction have had almost nothing to do with fostering this new era of wireless connectivity. Please encourage creativity and new economies by putting the new spectrum resources where they will do the most good, namely in the hands of the innovators and small companies. These are the people most at a disadvantage under current auctions rules as administered by the FCC.

Portage, IN 46368

The division between the Public and Private sectors was designed to maintain the health of our culture by generating a dialogue between two perspectives. It is the responsibility of the Public Sector to maintain this structure and ensure that debate and dialogue regarding the greater good continues. One way that government protests this need is to maintain the structures that generate competition. The Public Airways are critical components of our right to free speech and ought not be placed outside of the control of the Public Sector.

For all of its history, the airwaves have been free, aside from licenses. I had a novice license when I was in 10th grade, and I actively use the Internet now as a Science teacher at the high school level. If my students and I can't have free access to the information we want (or need), if we're to be barraged with only what a certain company wants us to see above what we would normally be able to see, then the Internet would lose its effectiveness as a communications or research tool.

I use on-line videos from the Mechanical Universe (at www.learner.org), as well as other education videos to enhance my students' classroom experience without "breaking the bank". And the kids do a lot of experimenting themselves. Where would "ham radio" have been if people weren't free to experiment and test limits?

Please do NOT bow to companies' greed. Let there still be ONE thing on which that Americans can innovate without having to be biased by one company or another. Please let each ISP be free to develop its own web content without having to bend to the will of giant conglomerates.

The public airwaves must remain just that. Turning over control to corporations will increase the risk of control over content depending on the views of those heading those corporations.

The short term gain of licensing public spectrum to private corporations for profit will have long term consequences, hobbling our ability to innovate and train a new generation of engineers. Come on FCC, free the airwaves!

Lee Colleton  
seattle, WA 98102

Collected by MoveOn.org Civic Action
One of the first things tyrants try to do is control the flow of information. Please do not let our public airwaves be controlled by corporate greed. Thank you very much.

Harold S. Wood
Dallas, GA 30157

Please decide on the side of the public good. It doesn’t seem to happen much anymore that the public good trumps powerful corporations. Communication and access to modes of communication and information technology is important and key to keeping our nation’s economy and innovation at the forefront.

More complete access, healthy competition, neutrality of the airwaves, and keeping their use for the public good IS for the public good. Let us not be short-sighted. Keep the public airwaves public.

Thank you.

Kelly Cohen
Sacramento, CA 95827

Keep the public airwaves PUBLIC! These companies do not need any more handouts and freebies.

John W. Zupansic
Superior, WI 54880

Public land, roads and the air was belong to the people at-large. Don't sell them to the large corporate interests. Freedom begins at home and with each individual.

Keep fast Internet access available to the people, it is the last saving grace of freedom. Without it, we will lose what little grasp we have on freedom, and will no longer be a country governed "of the people, by the people and for the people.” Keep the USA, and our Internet access, free from corporate AND undue administrative control.

Having a Cable/DSL internet connection is all but required as a student, and yet these prices are at times insurmountable (nearly $80/month after taxes/fees). Instead of granting the public airwaves to private corporations, I would prefer to see some regulation on the Time-Warner/Comcast monopolies that may lead to reduced prices towards the consumer.

Richard Rhee
Seattle, WA 98103

Ronald Bruce
Romulus, MI 48174

These are my airwaves as well as all the people of our great country. In my opinion, you guys have really screwed-up as of late. DO NOT turn over our airwaves to companies. They don’t belong to you. You are only their guardians. KNOCK IT OFF!

Axel Olsen
Garden Grove, CA 92840

At the core of the American experiment is access to a VARIETY of opinions and sources of information. Keeping the airwaves open and competitive is essential to retaining democracy in any form. Thanks.

In recent years I would say that big companies have stifled competition and have been suited more to the greed of a few versus the majority in our country. It has interfered more with our personal freedom and it seems we are living more in a totalitarian government than anything. Enough is enough. I already know a lot of my news is only what the greedy people want me to believe so when the sheep cries "wolf" what can I truly believe in? I rely on my heart and this country has lost a lot of heart at the top and I am fearful of it trickling down to the rest of us.

Jeraldine Kunimura
Honolulu, HI 96813

Currently, I have very limited choice of carriers and service and only with complicated bundles of services I don't want, can I lower my Internet Access costs. Even between Cable and Satellite TV, there is very little price differences, suggesting monopoly pricing power. New spectrum should open up competition and innovation, not maintain current market positions.

The electromagnetic spectrum is a limited resource. To my knowledge, the Federal Communication Act of 1934 has not been revoked. I believe it was the U.S. Congress that said media should serve Public Interest”, “Convenience”, and “Necessity. At what point did the FCC lose sight of these basic principles and decide that businesses who are owned by the extreme minority should instead have these rights instead of the American public? Please consider the future in your decision.

Jennifer Overstreet
OH 44107

Our tax dollars are paying for the satellites that allow for access to these airwaves. They should not be sold to private industry. When are we going to stop lining the pockets of the rich and start thinking of the everyone. Have we learned anything from the past? Roman history, just for one example, should teach us the working for the civic good instead of the mighty dollar will be what saves a democratic nation. Please do not sell these airwaves to the corporate sector.

Thanks.
Bonnie Dill
Bonnie Dill
Kennebunk, ME 04043

Our country was founded on competition - let's not forget where we came from or where we want to go. Big business is killing America one sector at a time - let's not give them the opportunity to do it again.

Joanna Laforet
Albuquerque, NM 87111

These mega giants are so silly! They cannot own the public airwaves any more than they can own the sea or sun. It is your responsibility to remind them of this. All americans’ tax dollars paid for the development of the internet web. Please represent the MAJORITY (not the wealthiest) of citizens and do not allow this madness to prevail.

Thank-you

The current republic we live in is becoming more and more each day a totally Capitalistic society. The internet was designed to be a free technology for the use of all, yet companies found ways to make people pay to use it by creating internet services. Now these same and other companies are trying to do the same thing again but with wireless connection. Do not allow them to do this. Keep the airwaves as free as possible for public use.

Handing over the public airwaves to private companies is the wrong thing to do. Handing them over to a few powerful companies like AT&T is criminal and WILL NOT serve the public good. DON'T DO IT!!

Skip Adams
Venice, CA 90291

Steve Henry
New York, NY 10014
New business models are emerging. It is no longer competition for control of limited production resources but competition for user attention. Your decision will either enable large corporations to continue along a path that ultimately will fail - doing them a disservice. Keep the infrastructure open and let companies compete with superior content. Your plan is akin to building the Berlin Wall - it can only work for a few years, cause lots of suffering and ultimately need to be taken down. Save everyone's energy please.

THis is not a democratic society any longer... it's a beaurocratic society, where "screw thy brother" should be the next motto on the $1 bill... not "in God we trust” or even ”one nation under God”, or anything close to that. (When you die with the most gold, what do you win, anyway? You sure can't take it with you!)

I am tired of the big corporations running this country. It is time it is given back to the people.

Capitalism must eb the same for everyone -equal access -not just the big guys - the internet belongs to everyone, not just greedy corporations

It is imperative to keep free and open airwaves which are not under corporate control. Competition is essential for adequate dissemination of non-regulated information.
Please don’t sell the band width to private corporations for private gain. Let the public benefit from additional band width.

Lindsay Sharpe

How much more money will this administration steal from the people of the United States and give to Corporate Interests? When will this administration take seriously the concerns of the AVERAGE American, instead of taking up the causes of the rich elite...the allowance of gas prices to rise unchecked has put many small businesses under...so if we can’t drive to where we have to go, at least we could internet our way there. I see the Government is bent on taking away that right as well and giving it to the Corporations whose only concern is profit. What happened to my country? Isn’t there anyone left in Washington who CARES about the common people like me? DO NOT GIVE OUR INTERNET TO THE CORPORATE THIEVES...

I understand the theory behind privatization, but given the limited number of telecommunication companies who would end up controlling these frequencies, this would lead to a near-monopoly situation that would not produce an optimal outcome.

Please don’t sell us down the river. Enough of that's going on anyway. The internet is changing our ability to communicate with each other. If you let a private company control the airwaves, their goal will be "profit, profit, more profit" - for themselves.

Additionally, the last decade has already seen enormous deregulation of media companies, subsequent consolidation of media companies, and a general homogenization of news and information. This has gone too far already, and must stop.

Keep our airwaves for public good rather than letting corporate interests hord them for their own selfish interests.

Keep the airwaves out of corporate hands!

Unlike many other countries who provide very inexpensive or free Internet to everyone, the policies of giving enormous control over telecommunications to greedy corporations in the US actually stifles innovation and growth of our economy. Students and citizens could be advancing America’s lead over other countries, instead of losing our edge, as we are now. Investing in the future of Americans, rather than consolidating power and wealth among the few, is not only true to American principles, it’s good for America’s future!

Ric Lobosco
San Rafael, CA 94912

Preserve the public airways, or lose our freedoms. We are a nation of people, not corporations

Vincent Snodgrass
San Diego, CA 92122
I live in the middle of an expensive area of Los Angeles. The telephone wires have never been updated. So Time-Warner has an absolute monopoly on high speed transmission and any TV reception. This area is in the hills and most of us cannot get satellite transmission. The public airwaves are already in too hands limiting new access.

Janet Kennington
Los Angeles, CA 90077

The internet, even if not originally intended to be so, is a social 'equalizer'. It gives everyone, regardless of age, sex, class or ability, access to information. We have always been told knowledge is power. If this is true, you must make every effort to keep the playing field level, by assuring as broad and as inexpensive and competitive access to this information by holding bandwidth for the public good, not for corporate profit.

"Servants of the People of these United States"

Notice that I have put the phrase in quote marks, because if you are anything like the rest of the Bush administration, then you too are as crooked as a bent pretzel, and have no regard for protecting the public good, just dollars. Do your damn job, keep the air-waves open and free to the public, as the 1933 Federal Communications Act stated. Enough greed, if you can’t or won’t do your jobs to protect the public interest, then it is time for change as BD said in Blown’n In the Wind.

a taxpaying citizen of these United States,

The Internet is critical to promoting democracy. An informed citizenry puts the values of the Constitution to work. Uninformed citizens are slaves. You must preserve our democracy by keeping the public airwaves and Internet free from corporate control. If you don’t, you will be remembered as the ones who turned their backs on democracy.

Ken Simpkins

FGC:

I am traveling in Asia and it is embarrassing to see how far behind we are technologically. I once worked for BBN, the company that invented all the essential internet technology for DARPA. How is it that we should be so put to shame as this? Competition and capitalism is supposed to spur innovation and modernization, but not if the government mishandles policy. Free the airwaves from the grasp of a few.

Protect the public good by setting auction rules that prohibit anti-competitive behavior. Don’t turn over our public airwaves to companies like AT&T, Verizon, and Comcast who will use them for private gain instead of the public good.

Peter Reynolds
Springfield, VA 22151

Geriann Elliott
Lakewood, CO 80228

Wireless internet could potentially have a huge impact US citizens, including making it much easier to work from off-site, leading to less congestion on roads and less air-pollution. It’s win-win as long as the public has as much access as possible to wireless technology. Remember, competition is the bedrock of our society.

Carol Van Hulle

We Have Murdock Monopoly News already. Stop letting BIG Corp control everything.

Public is public, like a public park. That is for the good of all people.

Our media opportunities need to remain open! Our Founding fathers realized the need for an ACCESSIBLE OPEN FORUM if we are to be a INFORMED PUBLIC. Establishing private ownership will ensure that only the wealthy can inform us or be informed.

Enough is enough. Perform your responsibilities. Remaining airwaves must be reserved for organizations who will truly operate in the public interest (this bar has been lowered to embarrassing levels) and broaden access and content. There is a history of broken promises here. We need a time out on the giveaways. We get enough junk from these guys. They have pretty much proved through past performance they aren’t the ones to take communication forward. There are only interested in retaining and improving their own competitive advantage. They should not be rewarded for the job they have done to date. That why we have government, to create a typography where companies actually have to perform in the public interest to be rewarded. I need other, drastically different choices. I’m changing providers and narrowing my communications footprint just so I don’t support these guys anymore. I have to almost go back to a mid 90’s footprint to avoid them. So I’m reduced to this … and your going to give them more airwaves on my behalf. I don’t think so. Every thinking individual feels more or less the same way.

The first and highest purpose of all American government is to protect our freedom, including our freedom to communicate. Literally giving the air to corporations to buy and sell at corporate prices is a violation of public trust that will do irreversible harm to our democracy. Less government is better, but only if it serves to keep individual freedom and power in the hands of actual individuals.

In Ohio, I have seen discrimination in radio programming by large companies that have a narrow political agenda. Clear Channel has cancelled programs that were successful and replaced them with a format that is now drawing less listeners. Big corporations often do things that are not good for the average person. Public air waves should serve all the people not just the agenda of big companies.

The benefits of the internet globally have been enormous to date; please don’t stifle the growth of the "freedom of information" that has swept across the world - in spite of what governments have tried to do!

John Mccauley
New York, NY 10028

Carol Morrison
Tucson, AZ 85745

The third estate demands freedom to post on the internet without corporate profit takers controlling access. On the Acropolis every body had the opportunity to speak. That is a Democracy’s first need.

Ted Pateas
Huntington Bay, NY 11743

The reason that our government is of, by, and for the corporation rather than the people today is because the public airwaves are making a huge profit by running 30-second campaign ads for which our elected officials have to spend an inordinate amount of time soliciting funds to pay for the next campaign. They are paid by lobbyist and solicit funds from businesses to pay money for TV campaign ads. A complete circle. Who loses? The people and our supposed democratic system. I’ve unplugged the TV, which exists to hold us for the next commercial, other than PBS. Look to England, which forbids campaign ads that are not of sufficient substance/length and provides them without cost.

Candice Basham
Sunnyvale, CA 94089

PLEASE PLEASE PLEASE public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market

Keep the public airwaves public.
   Ralph Silberstein
   Grass Valley, CA 95945

   Debra Zannelli
   Exeter, RI 02822

These airwaves are in the public domain, and the FCC has the obligation to find a better use for them than making them for sale to greedy companies that will just horde them and use them for their proprietary purposes. Please please please, offer up instead some public project for these airwaves and perhaps have companies bid on those projects. How about using the frequencies for a national low cost internet? How about leaving some of the frequencies to the public for public consumption and broadcast? How about using the frequencies for vehicle-to-vehicle communications? Point is ... we need more controls around the amount of remaining bandwidth that is sold off and for what purposes it can be used!!

Don't forget the under-privileged who can't afford the high cost of Internet access!

Public utilities are public property. Why would you idiots at the FCC think any other way? Oh I know, you are all Bushies. It is similar to the Airline industry regulating itself; if regulators were acting in the interest of the public, reinforced pilot doors would have been installed years before 9/11.

The public is best served when the air waves are kept "public".

The public airwaves should be kept for public access and not turned over to large corporations that will restrict access.

Please help keep the airwaves free and not under the control of big business.

The public airwaves should always be used for public good....no corporate ownership!
Missing this opportunity to keep airwaves free for the citizenry would be a huge mistake. Think like a citizen!

Kay Gering

"Government is not reason. It is not eloquence. It is a force, like fire: a dangerous servant and a terrible master". -George Washington

OUR Government MUST NOT continue to serve the interest of big business, over the rights and freedoms of the people of the United States. OUR Government MUST recognize that by giving control of public airwaves to private companies that will use that control for private financial gain by limiting competition, they are stifling the rights of every American citizen. The American people are sick and tired of OUR Government trampling heedlessly on their needs and rights, in it's own pursuits of power and financial gain through protecting the interests of big business lobbyists in Washington.

Public airways are just that, public. Large companies should not be giving a free ticket to buy them and sit on them, that amounts to a monopoly.

FCC must protect the public’s interest.

Dear Commissioners,
On the upcoming decision, please keep in mind that airwaves are a public good and that companies that purchase rights to them are still beholden to the public (that is general population of US, real people not corporate entities deemed individuals via incorporation). To end, it is in the best interest of the general public to ensure that the airwaves coming available are auctioned to companies that intend to use them, not to oligopolistic baby bells and cable companies trying to create an artificial shortage.

Sincerely,
C Jack

Hey, Those air waves are MINE and the PEOPLE’s. You can’t just give them away without MY permission, and I’m NOT giving it!!

No roadblocks on the electric highway...certainly not big business!

I for one am not interested in a corporation controlling the airwaves.

America: Once a "Great Democracy--now a faccious tool to corporate interest--punctuated by our elected officials!
The American people are "sick" of being used by Corporate interest--we pay and we get nothing. Our representatives need to represent us, not money. We are watching and listening.
With all the tax dollars that went into build the system in direct research and tax breaks it is not like the American people have not already paid for their share. Of course with all the money these companies have paid for lobbying it it not like these companies have not already bought and paid for the polies that regulate them.

This would allow these companies to make the rates what ever they wish. Like big oil companies and long distance phone. America is a free market and we should be able to purchase anything at a lower rate if we wish to do that. What’s next all fast food goes private and a hamburger at Wendys is the same price as one at Hot and Now???

The FCC has already sold the public interest down the river by relaxing multiple-station ownership rules to the point of absurdity. It is way past time to begin putting the public interest first again. Please promote competition instead of corporate welfare in this and other upcoming decisions.

Jonathan Mills
Accokeek, MD 20607
The airwaves over our heads should not be sold to companies; they belong to everyone, not just one company who can afford to buy it all up, then charge us exorbitant prices to use it. This is supposed to be a government by the people for the people, not just AT&T

Public airwaves should remain public and should be used for the benefit of the PUBLIC! A sale to a pseudo-monopoly is not in the interest of this country. Do not allow private corporate concerns to outweigh those of the publics.

Mark Jordan
east falmout, MA 02536

Jan Gosse
Denver, CO 80203
The public airways are for the public to use for educational and personal enrichment. To think that they may be turned over to private businesses is outrageous! The airways belong to the public, not to a handful of businesses who can manipulate the use to their own benefit.

Gwen Price
Douglassville, PA 19518

I believe that the with upcoming release of "airwave" space the FCC has the chance to both release about 50% of this space for public good and the remainder for companies to bid upon. I feel that the groups who oppose the release of airwave space to for-profit organizations fail to realize this country is largely built upon capitalism and continues to be. To think otherwise seems an attempt to return to socialistic "hippie" days (they were fun but not very realistic).

I would hope that the FCC at this juncture would allow the sharing of airwave space between low/no profit public use and commercial enterprise.

As a librarian, I firmly believe that information should be accessible by the public. It is key for democracy to work. Do not shut off the American people based on what they can pay.

Jennifer Roster
Toledo, OH 43615

Kelly Miland
Neptune Beach, FL 32266

Please consider the effects of numbing our society with a universal voice of the media. The public voice is one that is rarely heard with mass media entities being controlled by large corporations. We need these outlets to promote the public opinions.

Robert Lapier
Wilson, WY 83014

I live in a rural area and am totally dependent on the internet for nearly every kind of information, research, and the cost of getting anything -television, radio, phone are all additional and expensive. Please democratize the airwaves so we can all participate in shaping our country.

More innovation! Prices are high enough already. More competition and tinkering can give us even better and new services. These companies are only as good as we make them be. Public airwaves are for the public, not to be controlled by corporations.

Public airwaves should not be auctioned off to the highest (corporate) bidder!!!!!
Let the incumbent telco’s have their way on the airwaves. I work in this industry and I have stock in them too. We investors have to believe we can get a return on our money. How would this be possible if everyone could offer the newest technology? My company, Verizon, is spending billions on lightwave equipment to deliver the best that’s available at the moment. If a new innovation becomes available then our investment will have been washed down the drain and everyone would lose their job. I’m a member of Moveon and I’m able to support them because I have a job that pays me a fair living wage. What would I retrain for? A PHD in medicine? A nursing degree? I’ve got 28 years in this industry and I’ve paid my dues by climbing telephone poles in all kinds of weather, year after year, building and maintaining the best communications network in the world. Vonage has stolen our patents and is still in business. How is this fair? Maybe those at Moveon.org should consider how many good paying jobs will be lost if their idea came to fruition!

Please, please, please do not hand over the internet to a few huge corporations. The internet powers small businesses everywhere. These businesses are the livelihoods of hardworking Americans. These businesses WILL FAIL if huge, wealthy corporations stand in the way of internet access. Preserve American Free Enterprise and keep the internet out of the hands of big corporations. For our survival, I beg this.

The internet should be available to ANYONE - not just corporations!

Jamie Sarche
Denver, CO 80237

Yes, this government definitely has the RESPONSIBILITY to protect our airwaves! I am sick, sick, sick of corporate gatekeepers whose only interest is their interest and not ours. For corporate gate keepers it is all about greed. I am angry with Verizon for lying about listening to our calls and would drop them immediately, except for the contract. AT&T’s business practices are dishonest and I could write a novel about the difficulties I had in canceling their services. Neither of these companies has any integrity and should NOT be allowed to control the public airwaves.

John Banks
Parker, CO 80134

The internet has such a possibility to be an amazing source of information and wisdom. We need to keep it free from large corporation and keep it solely for the public good. Thank you

To me, it is a worthless idea to make the public airways turn over to private companies who will use them for their own enrichment instead of for the public good. I urge you not to turn these rights over to private companies.

Collected by MoveOn.org Civic Action
These airwaves need to be open. Not amount of short term money is worth this level of monopolization.

Many people in rural America will benefit from this: people like my parents, who are not even served by the large communications companies and whose phone company refuses to extend Internet access to their home, even though it is only a few miles from the nearest town (which does have Internet access); people like my wife and I, who have no real choice of wireless phone carriers because only one carrier (who chooses to only allow a few locked-down phones to run on their network) will service our area effectively. There are millions of us who are seriously limited by the lack of competition because it is not possible for the large companies to run lines to our homes, businesses, even towns, because there are too few potential subscribers for them to make a large enough profit to meet their shareholders' demands. In short, opening up the airwaves would allow smaller companies to step in to serve the areas that the large companies refuse to serve. We should not be denied the services enjoyed by those in the large cities simply because of where we choose to live.

First we find that we may lose online access to our radio stations, now we may lose even more of our broadcast bandwidth to big corporations. These are OUR airwaves and YOU want to give them to big business who will then charge us for using OUR airwaves! I don't think so!

Dear FCC,
I firmly believe that the greatest good and greatest technical and social progress will be made by keeping a large portion of the airwaves (particularly web-based wireless technology) in public hands. I am opposed to further corporate giving to companies like AT&T, Verizon, and Comcast. Sincerely,

David Stout
Santa Fe, NM 87505
This is getting really scary!! The public airwaves MUST be kept as they are...for the public good. Greed is taking over our country.

This is getting really scary!! The public airwaves MUST be kept as they are...for the public good. Greed is taking over our country.

Please don’t foster this monopoly; make life better and more affordable for Americans!

NO MORE CORPORATE CONTROL. DO GOOD FOR THE COMMON MAN/WOMAN FOR A CHANGE.
Non profit organizations are the only way to get fair and balanced news. I heavily support NPR and similar organizations. I will personally boycott any corporation that threatens public radio and urge family and friends to do the same.

Keep the internet free. Don't put a price on information.
Please do not give away our public property to private interests.

Darlene Marlow
Trinidad, CA 95570

Internet access should be available to everyone and it should be free. Please do not allow corporations to buy up these airwaves in order to make huge profits at the public's expense.

Judith Albano
Stony Brook, NY 11790

As an employee of a small telecom in Maine, I have noticed first hand how the larger telecoms stifle competition. This method of purchasing spectrums at auctions is part of their larger anti-competitive strategy and I urge the FCC to put a stop to it by setting it aside for the public.

Shelly Photiades
Portland, ME 04103

We don't need more corporate owned and operated commercials.

Tim Sime

Do not give away public airwave assets! I pay 4 times as much as citizens in other countries for internet speeds, that at 15 times slower. For gods-sakes, Korean's pay less than 20$/month for 100/mbs service while I pay $75/mo for 5/mbs service to Comcast. What a rip-off. Our tax dollars paid for the invention and creation of the Internet, which the government has managed to squander that investment and give it away to the monopolistic TeleCos. Stop this madness now!

Do NOT sell out on the "public" airwaves...pls read on...
If you live in the Bay Area, you'll see an atrocity of a bill-board that pollutes the entrance to the Bay Bridge; this is just what will happen to the airwaves IF we let corporations say that they'll donate $$ to the public good IF they are given control. WRONG!
Thanks for letting me speak!

Kathleen Ard
Wheaton, IL 60187

The air waves absolutely must not be turned over to private for profit companies. Please protect the public's rights to freedom of the air waves.
Eileen Jackley
Meadview, AZ 86444-0536

The FCC is ultimately under the Constitution of the United States and morally responsible to the Declaration of Independence as well. It may seem expedient to let the giant telecommunications companies have these airwaves, but I believe they must be available to the people if we are going to continue to be Lincoln's government by, for and of the people.
Lois Jean Odabas
Glenside, PA 19038

We need to save something for 'the commons'.
Shari Barnhardt
Seattle, WA 98146

Democracy will only remain viable when small companies have a fair chance to compete in this field.

Competition is in the best interest of consumers, like me.

I think FreePress.net described this issue best. I quote: "After years of phone and cable company control over Internet access, the United States has fallen to 16th in the world in high-speed Internet rankings, with few choices and some of the highest prices for the slowest speeds in the world. We will continue this decline as long as we let AT&T, Verizon and Comcast dictate the terms of Internet access for the majority of Americans. These phone and cable giants refuse to open their networks to competitive applications and services. They lobby Washington to stifle new innovations like Internet phone service and to destroy Net Neutrality, the one principle that protects equal opportunity and free choice on the Web."

Public airwaves must be allocated for the public good. We live in a democracy, not an oligarchic autocracy, which is what will happen if net and wireless neutrality is not required and enforced!

Why monopolize this resource? It should be able to be accessed by all.
To whom it may concern,
This issue is of the greatest importance. As I scan the newspaper headlines I have recently seen multiple articles condemning the governments of Russia and Venezuela for acting to stifle free radio and television broadcasting. A free press has been an essential component of the American way. In the modern age, this must include broadcasting by radio, television, internet, and satellite. It is essential that the public airways are maintained for the public good through public access and competitive practices.

Privatization may be good for business in the short run, but it's not always in the long term interest of the country. Witness the trouble we're in because big oil was protected by not insisting that our automobiles get better mileage. If you want to hold the country back, sell the airwaves to private companies.

Philip H. Ehret

I am against the sale of any portion of the electromagnetic spectrum. I consider the spectrum to be the property of the American people. I further wish to recall to the public domain all the parts of the spectrum thus far which have been turned over to private interests. Any such sale of the assets of the American people should be provided with more opportunity than a short notice in the Federal register and in trade journals of those who would bid. For a long time, forward thinking administrations did their best to preserve natural and national assets for us all and forr posterity.

Ruth & George S. Ginsburg
Nashua, NH 03063-2517

I am so full of outrage that I can hardly write this email. How can you even think about turning over the airwaves to big business. The whole country is up for sale. This is no democracy any more. you people in charge are willing to sell anything. In just a few years you will complete the destruction of this country. I am opposed to selling the public airwaves.

Lawndale, CA 90260

my concern is that once sold, we will never have the opportunity to reverse this decision. i believe large corporations, like fox, at&t, verizon, etc. are not non-partisan, and will force their personal agendas on everyone. keep the public airwaves public. do NOT sell out!!

I am deeply concerned about ensuring that the Internet, public airwaves, satteleite radio, and the like and their continued progress and development will provide the broadest possible access for EVERYONE at the best possible price. As a struggling low middle-income single divorced father of 2 teenagers, it is a challenge to be able to provide effective access for myself and my children, while many still have little or no access at all. Please do the right thing for the public! Thank you.

Lance Colie

It is disgraceful that the FCC even consider turning over the rights to public airways. Whether the motivations behind this change are uninformed, fascistic, or simply bought & paid for by the corporations that will benefit the most from it is moot, the fact remains that the FCC isn't interested in regulating the airwaves to serve the public good anymore.

Consider this initiative as nothing less then an add for their new, corporate-friendly mindset.

Wireless airwaves must not be turned over to major corporations. Instead, they should be for the public good. This is what America is about—the good of the people—not the major profits of a few giant corporations.

Greg Doyon  
East Haven, CT 06512

Should we turn the airwaves over to self-serving corporations or use them for the betterment of the public? Do we have to ask? This country is going to need its best and most creative minds for the coming crises ahead. Cutting this off by giving the corporations yet another free ride is undemocratic—a blow to our freedom, our creativity, and our future. The public is fed up with these government give-aways. It is clear that "we the people" are considered expendable by our own government, just like all the governments we're trying to convert to democracy. Freedom of the airwaves has been one of the defining elements of our democracy. Why would anyone want to give that away? Government has gone from protecting the people, which is its real role, to protecting large corporations. That's a quick way to lose it all.

The public airwaves have already been compromised too much with the law B. Clinton signed when he was President. This is the reason why our elections have gone through the roof in terms of cost. Candidates should be allowed to take their message to the people on OUR airwaves without the exorbitant costs that make the elections sold to the highest bidder. Now these private companies want to control new air power. We should not allow this.

Eva Pellegrini
Brooklyn, NY 11215

Keeping public will advance our entire Nation...including the over all economy. Privatizing this access in full, would stifle a majority of entrepeneurs. I can barely afford these services.

The public airwaves should remain public. I think this is a travesty.

Susan Bernard
Los Angeles, CA 90064

The reason for public airwaves is not to answer to private corporations or to repeat government propoganda.

MJ
Chicago, IL 60605

The airwaves are a common resource, like the water and air we breathe. While corporations should be compensated for the technology we use to access those airwaves, they should have no control over access to the airwaves. Would we grant corporations the right to determine who can drink the water or breathe the air? Of course not.

George Laumann
Arlington, VA 22204

We need to keep the airways free for innovation, monopolies end up costing us in the end.

Jan O'Brien
Corte Madera, CA 94925

Pearl Nickel
Sewell, NJ 08080

William E. Winston
Washington, MO 63090

Kira Gangsei

Please uphold your oath to act in the public good by excluding the media monopolies from buying up all of the public airwaves.

Christian Nelson
S. Deerfield, MA 01373

The airwaves are a public holding. Let’s keep it that way.

Jeremy Meyer
Oxnard, CA 93035

Comcast is taking on average 100 per month per American household it has as a subscriber, in certain areas, there is no competition from other providers leaving Comcast to do as it will, terrible service, higher bills, no support. Same is true for AT&T in areas where it monopolizes service. There really are no real alternatives, if its bad now, I can only imagine what unlimited power would mean for these giants.

Mario Gonzalez

I want the public space to be public and not owned by large corporations.

I am tired of the government selling us out to corporate greed.

- Kevin Jarrell
  Rittman, OH 44270

- Mark Wheat
  Seattle, WA 98118

In addition, the airwaves are often given away at far below the market value and nowhere near the kind of profit the companies extract from their monopoly use of a portion of the natural radio spectrum. Since they are given a government mandated monopoly, they should be required to give at least some public service as well, rather than simply using the public airwaves for their private profit.

Although cable TV has been filtered and homogenized to represent the lobbyists in Washington’s idea of what information is “safe” for the public, the internet allows us the freedom to information that might otherwise not be available. World news is watered down and almost neglected on our evening news. It’s tales of celebrities, gossip and horror on our city streets. With all that is going on in the world, it is CRUCIAL that unbiased information be made available to the public. Let us decide how we feel about the truth.

Auctioning off the rights to wireless internet gives large companies an unfair advantage and stifles entrepreneurs who can deliver a better product at a more competitive price than the large dinosaurs. Further, having a truly competitive and dynamic spectrum keeps us competitive with other countries that are embracing the wireless economy, and so far, leading the way.

Public airwaves have to remain public and the government should not sell out to private companies for corporate gain as they do not have the public’s interest at heart. Please keep the airwaves for the public, we need to guarantee freedom of information that should not be controlled by corporations.
Thank you,
Sarah Sweeney

Phone companies need incentive to keep their prices down and competition is the only effective incentive. Please do not give them any more power than they already have. Technology improvements should be encouraged and supported as they benefit the public. Companies can suppress new innovations that will hurt their competitive edge in a market. Make sure that the American people as a whole and not just the stockholders of a particular communications company benefit from the use of these airwaves.
Heather Grills Joplin MO

Lawrence Malito
palos park, IL 60464

As Japan and Korea share data faster and more reliably, they also share it at a lower cost. This allows the businesses of those nations to share innovations faster as well. If this nation does not truly make its airwaves public, and get true competition, the eastern countries are going to outcompete us. It is a matter of DO IT or DIE! In the short term, we are on top of the heap, but in the long term, we are DIEING to China, Japan, and Korea. STEP UP to the plate!!!!!!

The job of the FCC is to protect the public interest in the public airwaves. Please, do your job.

This spectrum-give-away is another Bush administration attempt to line the pockets of their friends. Please fight it!

There must be interest in keeping some things simply for the greater good. Can't we see that putting all the things we have in private hands has only degraded them and lead to greater cost.
Please don’t let the big corporation take charge of the airwaves. They’ve done enough damage to the average person.

Dale Speer
Elgin, MN 55932

Navy MARS and Amateur HAM Radio Provide a thankless and valuable service For the good of the American public. If the use of these airwaves is going to be expanded it is imperative that their use is available to all Americans in the format of expanded access to affordable internet, cable and telephone access. Not Sold to megacorporations to hold hostage the access to these Public Airwaves. Think like the founding Fathers of the FCC and look to the use for the good of American Public.

The internet is still one of the finest bastions of democracy available to citizens today. As Americans, honoring our democratic heritage, we should preserve these airwaves as a true public forum rather than ceding more and more ground to corporations that are primarily interested in their own financial success rather than the success of the public. These wireless frequencies are the future of communications - we should be extremely cautious in ceding influence over them to any organization.

I think it is obvious by looking at the areas that have been open to effective competition (long distance, dialup internet access) are the areas that have provided the most competitive services to consumers. Areas that are effectively monopolies (such as cable television and local telephone service) do not provide competitively priced services and will only do so when threatened with new technologies.

Tina Franks
Baltimore, MD 21224

Marilyn Oser
Port Washington, NY 11050

I have recently purchased a laptop computer with wireless technology for a new business that I am beginning. It is critical for me to have wireless access wherever I go, not just through my home network or an internet cafe. If the airwaves are available to me in a park or my children's schools, at my church, or other places where I spend time in activities or waiting to pick up my kids, I could be much more productive. This would also give my business a much greater chance of success. Please do not overlook the "little guy" (or gal, in this case)by allowing large companies to profit from the monopoly of these airwaves. Thank you for looking out for the public good!

Martha Armstrong-Benjamin
Centerville, OH 45459

Keep the Airwaves FREE!! - It’s the capitalistic American WAY!

Chris Hansen
Boulder, CO 80305

We the People have suffered enough from corporations thwarting innovation and stifling our voices. Wireless internet should be a public utility blanketing the entire country provided and protected by the FCC and free to all, completely uncensored - Our fragile democracy depends on it.

Bil Bowen
Brooklyn, NY 11231

please do not sell us out anymore than you already have. since we no longer have any control i can only beg!

Jameson Ellis
Sag Harbor, NY 11963
We need a decision for the COMMON good, which is not identical to the CORPORATE good.

The FCC needs to turn back the tide towards private ownership of every tangible and intangible asset that this country possesses. One of the assets best kept in the public realm are the public airways.

The airwaves are a limited PUBLIC resource and as such need protection from private interests.

It is essential that public airwaves be maintained for free public access.

I believe in "Public Airwaves for the Public Good !!!!

Keep America (and the Internet) quit giving America’s assets away to big corporations.
I am usually OK with privatization, but in this case, I am totally against it. The airwaves must remain open to ensure a free and honest society. Please do NOT allow the public airwaves be bought and controlled by private companies.

The airwaves have always been public domain and they should remain thus. The communication companies already gouge the American public for both phone and internet services. My monthly bill - WITHOUT a cell phone or long distance - is already $150 per month!!!! If that isn't enough, then what will be? I firmly believe that we need MORE competition and more public airwaves dedicated to the public good...specifically in regards to the Internet. Given today's global reach in communication, having an inexpensive, universal means of accessing the 'Net is almost as important as a good education. Are you going to auction that off, too? Keep those airwaves public and bring inexpensive access to all Americans.

Rebecca Schneider
Mesa, AZ 85203-8931

Kathleen Annunziata
Phoenix, AZ 85015

Who died and made you God!!!! How dare you give away the public's property to more Corporate thieves. I know these are your buddies (birds of a feather flock together) but have you given any thought???? to the fact that you are stealing from your own children and grandchildren......What is wrong with you fat sob's..............Stop being crooks and stealing what IS NOT YOURS. You are suppose to be guardians of the public good. Aren't you ashamed that your children and grandchildren will have to live with your rotten legacy........DO NOT GIVE OUR AIRWAVES AWAY FOR THE "MONEY"

"Congress shall make no law... abridging the freedom of speech" - The first amendment to the Constitution of the United States. How much plainer can it get? The airwaves are the last domain of freedom of speech. They belong to no one, let alone the bought and paid for government of the United States. It is the right of any person or company to use them for business, and to use them to compete. How can concentrating the control of them in the hands of a few rich corporations not be a violation of the laws against monopolies and infringement of trade. Such an act would be un-American and undemocratic. I personally would like to see anyone voting for such a travesty impeached and sent to prison for violating his oath of office and committing a crime against against the American people.

I strongly feel that privatizing public properties such as the airwaves is wrong. They should be used for the PUBLIC benefit, not that of corporations. Corporations will have plenty of opportunity to make a profit when they externalize liabilities, as they always do (ie, use public highways). But handing them public properties is the wrong thing to do.

Dennis Ferguson
Two Rivers, WI 54241

It's bad enough we pay for what our tax dollar funded originally with phone lines and then came the underground cables....we paid for them with tax dollars and then paid the increases they charged for laying the new cable...now cable television is the same way..........when will it ever be time to look out for the citizens of this country struggling to keep up with all the increases thrown at us....please don't add insult to injury...do the right thing for a change!

It is the Public, not corporations, that the FCC should protect. As a former Republican I believe this Administration is overrun with by the neocons and totally unresponsive to the wishes of the people. These neocons believe that the free market is the answer to every issue. They have ruined this country in many ways and will continue to do so until voted out. I have no faith.

I only use the most basic technology but insist on keeping the FCC public. Do not allow the privatization of our airwaves.

Please use the public airwaves for the public good only. It is important to do the right thing. Thank you.

Keep the use of the airwaves free from corporate control. They already have more than is justified!!

Collected by MoveOn.org Civic Action 1378
Please do not give our public airwaves to corporate entities. They are for everyone to use and not for corporate gain only.

Thanks... D. Randall

The public airwaves belong to us, We the People, and not to the corporations that use them with our ‘implied consent’. It is the paramount duty of the Commissioner of the FCC to be a steward for our benefit, not for the major broadcast corporations. Yet, We the People have virtually no access to the airwaves we own and which are ostensibly protected for our benefit. The FCC panders to the corporate interests which use them to further their own agenda at the expense of ours. Internet neutrality guarantees that We the People can freely exchange ideas. This ability is the condition sine qua non of any democracy. Therefore, we must enjoin against any entity that prevents this free flow ideas. Do not hand over our airwaves to the corporatists.

Denise Gibson  
Cleveland, OH 44102-6028

Collected by MoveOn.org Civic Action
Privatization of communication is a serious infringement on freedom of speech, which is the sacred cornerstone of democracy. We already pay these companies for their services, but the airwaves themselves MUST be reserved for the People. Our country is quickly becoming the doormat of corporate interests. Corporations may have legal personhood, but they do not have the right to own the country’s freedom of speech. They have the right to express their corporate opinions, but not the right to restrict everyone else’s by restricting access to the means of communication. Stand for the people, stand for democracy—leave the public airwaves for the public good.

Net neutrality is an example of free speech. Taking away freedom of internet use is a big corporate grab and violates the 1st amendment. ATT and the likes did not want anything to do with the establishment of the internet but want to now steal it, with Washington’s help now that it is proven and so successful. Corporate takeover is equal to censorship, unless individuals want to pay dearly and the vast majority of American citizens will be unable to afford the net if taken over.

FCC: Do the right thing, keep the Internet revolution thriving and expanding.

Andrew Stark
Midland Park, NJ 07432
This information is a few years old, but I feel the argument is still relative.
The Federal Communication Commission decided on June 2, 2003 to loosen the existing barriers of control against the concentration of media outlets. The FCC and supporters of the relaxing of these restrictions (many of them are media companys part of, or associated with, the top five media conglomerates) argue that, the rules are outdated and have limited companies’ growth and competitiveness in a world changed by cable television, satellite broadcasts and the Internet. Supporters also believe that broadcast ownership limits in general are unconstitutional, a violation of their First Amendment rights. The opponents to these regulatory changes argue that lessening these restrictions will sharply reduce the diversity of views on the airwaves, further limit opportunities for women and minorities, discourage coverage of local issues, keep customers from receiving diverse programming and create oligarchies in most of the nations media markets. The changes implemented on June 2, 2003, by the FCC, regarding restrictions on media concentration, from the previous restrictions regulating media ownership, will concentrate already dense television and radio markets, lower competition, reduce program diversity and lead to the control of information and entertainment presented by large media companies in the Eugene and national market, as a whole.
The rules governing television and radio ownership were first instituted in 1934 with the Communications Act of 1934, which created the Federal Communications Commission. For our argument, the new regulations are amendments to four previous rulings that the Federal Communications Commission had handed down in the past 62 years. The first being the, Local Radio Ownership Cap of 1941, which restricted the number of radio stations a company may own in a market, also in 1941 was the National TV Ownership ruling which prohibited any national television company from reaching more than 35 percent of the market place. The next regulation was implemented in 1964, in a move to lessen the restrictions imposed by the Dual Television Network Rule of 1946, the FCC passed a rule stating that, a single company may own two television stations in a single market only if one or
These airwaves belong to the American people . . . as a representative of the people, we are counting on you to protect us . . . do not sign our rights over to private corporations.

Allowing companies to take over the airwaves would seriously jeopardize the freedom of expression that is so essential to our democratic way of life. Please, please see to it that the airwaves are used for the public good and not for corporate enrichment.

Please, please see to it that the airwaves are used for the public good and not for corporate enrichment.

Eunice Hafemeister
Minneapolis, MN 55407

No I do not want the major telecommunications companies to have all the rights to our airwaves.
Margaret Williams
Roswell, GA 30075

Please keep the corporations out of our public airwaves. Our democracy is being lost to too much corporate/government control.
Margaret Marshall
Bainbridge Island, WA 98110

Please think about the PUBLIC GOOD, instead of corporate profits.
Megan Vega
Scottsbluff, NE 69361

If we are to have a democracy, communication must be easily available to everyone. The public good must be protected.
Sharon Welton
Discovery Bay, CA 94514

The FCC should be ashamed of its continual surrender to Big Media. The "deregulation" so loved by "Free-Market" apologists should be called what it is: rapacious greed.
Rather than auction off more of these priceless assets, the FCC should return the airwaves to their rightful owners - the people.
A good place to start would be to force vendors to make all cell-phones compatible with a simple insertion of a competitors ID chip.
Tom Cordle
Tellico Plains, TN 37385

Please think about the PUBLIC GOOD, instead of corporate profits.

Airwaves are a "common" and should not be privatized by corporations.

Leigh Mangum
Salt Lake City, UT 84102

The public airwaves should be protected for public use from corporations which would block competition in the Internet market. Many innovative companies want the opportunity to move forward with high-speed wireless networks and other innovative wireless features. But the old phone and cable companies want it all for themselves! Without access to the public airwaves, wireless innovators can't enter the marketplace. AT&T, Verizon, and Comcast want to buy the administrative rights of our airwaves at auction and then use those rights to block competition.

FCC: protect the public good! Prohibit this anti-competitive behavior. Big phone and cable companies should not be able to block innovative companies from our airwaves.

Dinah Kudatsky
Amherst, MA 01002

the public airwaves are for the public, not for company to make money off them

Cheryl Baillargeon
Howland, ME 04448

Glendafarrar

The airwaves should be retained for the public good. Your job is to serve your customers needs.

Jane Cohn
Sherman, CT 06784
Without access to the public airwaves, wireless innovators can't enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auction and then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks. In June, the Federal Communications Commission (FCC) will make a major decision: Use the public airwaves for the public good, or turn them over to big companies who will stifle competition, innovation, and the wireless Internet revolution. The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market. We're urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves. Please block corporate control of the airways. This is America where freedom of choice should remain the rule. Please promote a healthy economy by blocking corporate control. Thank you.

Do it the way you did the first cellular licenses in the 80's. Lotteries. If not lotteries, let the frequencies be used for the public good.

Sam Butler
MIAMI, FL 33166

Collected by MoveOn.org Civic Action
Since the Internet was developed at public expense, I see no reason for it to be turned over to private companies who would jeopardize its use by the general public. I feel the same way about satellite communications. I thought that the ones who put up the R & D money for any advances were the ones who were supposed to reap the profits, yet companies are charging us exhorbitant rates to provide a service for which we paid the R & D costs. This is demonstrably unfair.

when you claim to be selling public airwaves and others claim to be buying them, it is a facade...an imagination. airwaves can no more be bought and sold than the land or the ocean. yet, we pretend and others go along with the game and this game of imagination has very real effects. money changes hands and fewer and fewer people are exerting more and more control over the rest of us. it will all end on it's own eventually as nothing lasts forever, but you at the FCC have the choice to act decently and humanly and for the common good.

Do we have any proof that Global corporate business concerns based in the U.S. (for now) will benefit US taxpayers with this deal? The trend now is for these companies to benefit their bottom line on an international basis, rather than local. This creates an untenable playing field for local (read: U.S.) supply/demand economics for both small-business entrepreneurs and citizens alike. We need to stop giving away the store to global corporations, who take resources without a clear return potential from them. After all - what’s to stop AT&T, or Verizon, or Comcast, from moving their operations offshore so they can avoid paying taxes, like Haliburton?

Technology thrives when it is NOT hindered by large corporations who want to control it. Corporations can only improve when there are lower barriers to entry for emerging technologies (hence the Internet as it is today). If controlled, entrepreneurialship - the backbone of American innovation - will be lost as well as any new technologies and the livelihood of many Americans.

What's good for the people is usually good for business in the long run.

This move by the FCC ultimately is not in the best interest of the public contrary to the stated intent.

Corporations are taking control of our country. Please don’t let them control any more of the airwaves than they already do.

please do the right thing
Free enterprise is not supposed to mean that the largest corporations control the market place, and especially the public airwaves. It is essential that the internet remain free and open to new ideas and technological advances. Do not bury the possible benefits of private enterprise and entrepreneurial spirit by assigning these opportunities to a few established large companies.

THE CORPORATIONS WANT TO CUT DOWN THE TREE AND USE IT FOR LUMBER BEFORE IT HAS HAD TIME TO BEAR FRUIT. THE FRUIT OF THIS TREE (CONSUMER ACCESS TO A FREE AND INTELLIGENT MARKET) IS MUCH MORE VALUABLE THAN ITS PARTS. CORPORATE OWNERSHIP OF THE AIRWAVES WILL KILL THE GREATEST MARKET IN THE GREATEST COUNTRY. PROTECT THE COMMONS AND YOUR NAME WILL STAND ALONG SIDE THOSE OF EDISON, WRIGHT, SALK, ETC. THE CORPORATIONS WILL BENEFIT FROM FREE AIRWAVES, THEY'RE JUST TOO SHORT-SIGHTED TO SEE IT.

Jeff L. Snyder
Charlottesville, VA 22902

There needs to be some regulations on the big corporations to prevent them from owning everything we use and cashing in on our slave status to them. Allow the airwaves to remain free and open to progress.

Internet service in the US is abyssmal compared to that in Europe. These frequencies should be used for public benefit that will ultimately improve our ability to compete in the world.

Mr. & Mrs. Robert T. Joyce
Knoxville, TN 37931-1819

I teach online courses for the State University of New York. I often work while I travel, stopping in coffee shops, libraries, bookstores etc. Opening more airwaves to public use, for instance, through municipal networks, would make education easier for my students and me. The Internet has been such a rich source of interaction and communications thus far and opportunities for the future are limitless. For an educator, the free flow of ideas is the key to learning. Please keep the flow open to all by keeping newly available public airwaves open to public use.

Marjorie Robison
Hamden, CT 06517

The spectrum belongs to the people. We must use it to connect them together. Open systems that serve the people, not closed systems that serve big telecom.

Peter Kahn
Southborough, MA 01772

Collected by MoveOn.org Civic Action
Our problems with global warming, war, etc will not be solved by corporations and government alone. We, as citizens must have access to each other through high-speed internet. Not every thing can be about money for our world to survive and thrive. Please don’t give these signals to AT&T, Verizon and Comcast - make them available to the public for the public good.

It is bad enough that these same companies have effectively erased competition in the broadcast and internet industry. Please do not allow them to erase competition in the public airwaves area.

do not regulate the internet

Collected by MoveOn.org Civic Action
Public airways need to stay with the public and not be controlled by big business. I only watch public TV and listen to public radio because I do not want the constant advertising for things I neither want or need or want to listen to mindless chatter. WE the people deserve to have public access to the airways without commercialism.

Innovation and competition divulge their fruits in the long run; let's not set up a new frontier with the mindset of profit for a few corporations. Now is the time to realize that competition will bring in money from more corners of the populace, distributed amongst more of the populace. Let us use foresight for the common good. Thank you.

Keep public stations PUBLIC! Do not let corporations take over public television or radio. I value public stations over all other media, because there are interesting shows on history, the arts, politics, our natural world and other places and people. It offers educational shows as well as entertainment.

I thought we’d already covered this! No, DON’T give our airwaves away to AT&T, Verizon and Comcast. You know as well as the rest of us that these companies won’t use these airways for anything but distorting news and commercial gain. DON’T DO IT.

PUBLIC AIRWAVES MUST BE USED FOR THE BENEFIT OF THE PUBLIC. WE MUST NOT STIFLE COMPETITION IN THE WIRELESS INTERNET MARKET.
The true potential of the internet can only be realized by allowing unfettered access.

John M Jensen
West Fargo, ND 58078

Ellin Feld
Garrison, NY 10524

A vote for keeping public airwaves for the public good is a vote for the free enterprise system, the capitalistic system on which our nation was founded. Remember when the federal government finally broke up Ma Bell, well, this is akin to this: preventing a monopoly. Let’s not forget that these same companies were complicit in the eavesdropping policies that so invaded our privacy and resulted in minimal information provided to thwart terrorism. We need a democracy not Big Brother!

Keep the airwaves public.

Richard Hiersch  
Berkeley, CA 94705

Imagine this: four or five large transportation corporations demand that our national highways be made private, for use by their trucks only. Ridiculous, isn't it? But that's what the FCC wants to do with our airwaves. Think how vastly our economy will be affected by allowing a handful of big phone and cable companies to suffocate the "wireless revolution". Europe, China, and India will bound on ahead of us, leaving the United States languishing in the dust once again. Also—we call this a "free market economy"!

Please help make it so.

Airwaves should be used for the good of the public, not for big business to make a buck.  
Julia Hutchins  
Orlando, FL 32811
It seems like every week there is one thing or another that always belonged to the public, that somehow was now controlled by huge mega-corporate companies. Particularly in the communication sector. Do not, under any circumstances allow this to happen here. The internet system is our last chance to keep something like this in the public domain. In fact, what would really be the right thing for you,(the FCC) to do would be to reverse all of the horrible decisions that have driven so many great systems from the public to the private sector. Actually, when hearings for proposed actions like this are held, the only ones testifying should be from the general public and not from any multi-branded corporation.

with families separated more than ever for work and cost of living, keeping in touch becomes more costly. With gas prices at their highest the need for inexpensive ways to visit over internet or phone lines becomes necessary.

Please keep our airwaves and phone service affordable by not letting big business grab up our airwaves and hold us hostage to their greediness. We don't need another Enron in the airwave and public communications. Thank you for voting for public rights to these airwaves. Keep corporate america out of our pockets.

Please ensure some significant percentage of the bandwidth auction is sold to companies that do not have a vested interest in keeping this bandwidth out of service.

Hal Jennings
Austin, TX 78727

Peggy Anne Crane
Grand Blanc, MI 48439
America's Middle Class is breaking down fast. Look at history and see what has happened to countries when that happens.

No way should our last bastion of public discourse be sold to private concerns who will effectively control the public domain.

Let's keep the public airwaves public!

Public control over public airwaves are a sacred trust and must be preserved. This is our voice and it must not be sold off to corporate interests.
We already have given the "public" airwaves to the private companies in the form of NBC, ABC, and CBS. Do not sacrifice us again to the corporate gods. Remember, you work for the American people, not the American corporations.

Keep the public airwaves PUBLIC!!

Keep the Internet fast, free, and readily available! It's our bulwark against tyranny and the further degradation of the Bill of Rights.
The FCC has an obligation to protect citizen’s best interests by maintaining the Internet as an open and neutral information highway that will keep all users on equally accessible, net neutral airwaves. Let’s keep our public’s interests protected and allow public airwaves to serve our nation’s public and commercial interests in ways that the large media and communication corporations are stifling. Their corporate greed has created here in Idaho an Internet Divide that separates the public from receiving High-Speed Internet services, due to the refusal by AT&T, Verizon, and Comcast to invest in giving rural Idaho’s public high-speed wireless internet connections, instead they cherry pick cities and ignore our largely rural public’s needs to have real competition and access with wireless internet connections.

Maintain public airwaves for the American people to access and manage in full consideration of the needs of local municipal governments. Rights of way, local land use, fostering of invention and innovative use of emerging technology at the city level is the fairest and most democratic use of our resources. Follow the principles developed by the National League of Cities and the state municipal leagues, like the League of California Cities. Contact our leaders at CACities.org and use the wisdom and energy of local government leaders to build the future of communications in America.

In this day and age of all the technology I think some of the companies have gotten greedy and want more of the pie so to speak. It is hurting the little guy. Which means that people who can just make ends meet, cannot afford the technology of today due to greedy people. We should think about the young people who should have the same opportunity as the rich.

Please do not allow Corporations to monopolize our public airwaves.

The big companies have enough airwaves. Keep public airwaves for the public good – PLEASE!

Public airwaves are for the public good NOT private interests, which will eventually control what we hear and limit a broad spectrum of information. This is another step of government control. What’s next?
It is the government’s responsibility to keep the airwaves free from corporate interests.

Gregory Doc Rossi
Waterford, MI 48329

Pkease leave the public airways public and not sell them to the cable companies. You all seem to just keep getting rid of all of the things that are public........Don’t you understand the word public? It does not mean privately owned and we do not want to be privately owned by anyone......even you!

The airwaves belong to the public and the public good can only be realized if the airwaves are open to everyone on an equal playing field

Mark Breedon
Gardnerville, NV 89460

Public airwaves, like public parks, public roadways, and public buildings, should remain available to the public, not locked away by the monopolistic practices of self-interested corporate goons. Innovation in communications technology is of absolute importance to the future growth of this country and the world. That innovation cannot occur when public resources are sold to special interests already exerting monopolistic control over the existing communication grid. Do not allow innovative, new American technological entrepreneurs to be muzzled and the American public denied the benefits of new technology. Public airwaves must remain available to all companies and devices the American public wishes to support.

THE PUBLIC AIRWAYS BELONG TO THE PUBLIC NOT TO PRIVATE/COMMERCIAL CONGLOMERATES.

Elle And John Cottrell
Bellingham, WA 98228
To the extent that diversity of opinion has already been stifled in public broadcasting channels, what sense is there, what economic imperative so important as to further burden our abilities, as Americans, to communicate freely amongst ourselves? Clearly, our airwaves are increasingly corrupted by monopolistic companies like Westinghouse, General Electric, and News Corp. FCC has a responsibility to the people of this country to maintain the fidelity of the public space for open discussion, so that we may communicate as freely as possible with one another. The proposal to turn over the commons to megacorporations, with the cavalier hope that they would act as better stewards of the public good is as wrongheaded and reckless as any idea I've yet heard.

Deregulation of the public utilities in my area (Philadelphia) has led to a single situation: monopoly. We’re paying $60 per month for phone and internet. Despite the promises of choice of providers, we've ended up with no choice whatsoever. And now the same kind of service consolidation is going to occur with wireless? This proposal is fundamentally flawed. Come to your senses.

Why anyone in our government would even consider giving these companies EVEN MORE authority over our communication systems is beyond belief. We already must deal with almost complete monopolies when it comes to internet, cable and long distance service in cities throughout America. I don’t have cable, so my ONLY option for high-speed internet is through AT&T. And if I did have cable, I could “choose” between cable with Comcast or satellite with Direct TV or again AT&T. How is this capitalism?? I don’t need cable, but I do need a home phone and internet service, and the company that I get this service from is already chosen without the chance to be a responsible consumer by geographic location and lack of competition. Please, please, please don’t sell off even more types of communication to these companies, they need to be split up as it is, NOT made bigger!!!

Although I am a Verizon customer, I do not wish this company, with which I do business, to have this kind of control over public airwaves.

Claire McMurtry
Berkeley, CA 94705

There are many innovative companies jumping at the opportunity to forge ahead with the wireless Internet revolution bringing us high-speed wireless networks from coast to coast and all sorts of innovative wireless devices. But the old phone and cable companies are aggressively trying to block this progress. They’ve spent billions laying wires, and they enjoy having their customers locked in with few alternatives.

Without access to the public airwaves, wireless innovators can’t enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auction and then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks.

We’re urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves.

They also shouldn’t be able to tell their wireless Internet customers which websites they can access as they do now. And just as phone companies can’t tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.

Adrianne Middleton
Boulder, CO 80305
Rights to land are one thing, but the right to deny others the use of the air and water is too much. Capitalism does not have to be anathema to the public good. Make the right call here.

At all times, regardless of the extent of ownership by major corporations, a certain portion of the public airwaves should be set aside for public use. The grass roots aspect of the use of our airwaves is an essential aspect of democracy in the American way and the selling off of this publicly owned commodity is, in fact, un-American. The major corporations already own too much of what should remain in the public domain. Don't sell off anymore of what rightfully belongs to us all to them. In many cases these corporations have multi-national interests which further removes them from the public interests of America.

Brent A. Schoenfeld

I would like to see the cost of using the internet decrease. The FCC should not sell public assets but should make them available to the public.

Andrew Wilson
State College, PA 16801

Robin Reams
Berea, KY 40403

Corporations are not in business for the public good. They are profit driven and should not own or restrict the internet, the airwaves nor the public's access to information or the speed with which that information is sent. I am sad that so much of the media is concentrated in the hands of a few. Our democracy is under threat from the mismanagement of information.

Leticia Davies
Leticia Davies
Amherst, MA 01002
Sure business is good for the economy, sure the marketplace is a good place to insure competition. But with all the huge multi-national communications companies making untold millions or billions on cell phones, cable, high speed internet etc, etc, why is it that when something can be done for the public good without costing the public another arm and leg we hear that the good ole dollar may win out. Well this public citizen wants you to know I think it stinks and I want you to think of the common man/women/child on the street that could use a break here. So dome on FCC think of us the citizens and don’t be swooned by all those high class lobbyists that are smoozing you and telling you such wonderful stories. Just a little guy...

The new frequencies should be available for public use.

The government should not auction off the radio frequencies to the highest bidder just to temporarily balance the budget. These frequencies are much more valuable for use as public safety, amateur, and CB type use. The radio and television broadcast industry claims there is a shortage of broadcast frequencies while we see in many areas of the nation a broad expanse of AM and FM frequencies totally void of use. There are numerous technologies available to allow the commercial companies to put more signals in a given bandwidth without interference if they want to pursue these technological advances.

Dear FCC I cannot even believe that it would be a consideration to let these HUGE companies have control over the public’s airwaves. It is for the people to control and run and own not big companies that only care about money... like everything else in this country that is going to big corporations that are only interested in money and not the people. This would be just another reason to lose faith in the America and another reason for wanted to leave this mislead country. dont do it.

The public airwaves are for Public gain not private greed.
When private corporations control anything it becomes their property to droll out as they will. Internet, Radio and Cable TV are only possible by finding a balance between public use and private investment.

Kim Allbritain
Valrico, FL 33594
To ensure the public welfare, the airwaves must not come under the monopoly of any small group. The people's property must be protected. Any surrender of the airwaves by writ of the FCC would be a dereliction of duty on the part of all parties whose responsibility is to protect the American people from such detriment. Charges of nonfeasance, misfeasance, perhaps malfeasance, would ensue. Do the right thing, the first time.

Monopoly by corporate entities of airways available for the general public is the very antithese of democracy. Keeping freedom alive in any society requires free and truthful distribution of information openly shared and universally available. I strongly disapprove of the federal government giving corporations like AT&T, Comcast, Verison, or other corporate bodies who can buy up air space or otherwise impose limitations on the nature of information which the public has every right go have.

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market. Thank you for protecting the public good and not giving away to the corporate conglomerates.

There are many innovative companies jumping at the opportunity to forge ahead with the wireless Internet revolution bringing us high-speed wireless networks from coast to coast and all sorts of innovative wireless devices. But the old phone and cable companies are aggressively trying to block this progress. They've spent billions laying wires, and they enjoy having their customers locked in with few alternatives. Without access to the public airwaves, wireless innovators can't enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auction and then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks.

It is sad that the federal government is willing to help the big companies get bigger rather than being concerned about fairness, encouraging real competition, and guarding against monopolies.

Nancy Weiss-Fried
Cranston, RI 02910

Why do we keep giving these kind of public properties to corporations to use as they please? Are we going to give water rights to a corporation to profit from next? I fear that that will enrich the already rich and powerful at the expense of those who have lost so much in the last few decades. That is the path to civil unrest.

Kathleen Parker
Maynard, MA 01754

As a member of the general middle income public and a daily internet user, I feel it is only fair that the public as a whole should benefit from the usage of public airwaves. We have seen just how unfair a system of airwave control hurts those who don't have the millions and billions of dollars to buy radio and television stations, internet, newspaper and other media outlets to place their content out there in mass form, therefore dictating what the majority sees, reads and hears. Please protect our public airwaves and keep it out of megacorporate hands. Thank you.

G. Schlegel
Fontana, CA 92335

Brenda Flanagin
Somers, MT 59932

Section 1 of the Communications act of 1934 states: "For the purpose of regulating interstate and foreign commerce in communication by wire and radio so as to make available, so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex, a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges, for the purpose of the national defense, for the purpose of promoting safety of life and property through the use of wire and radio communications, and for the purpose of securing a more effective execution of this policy by centralizing authority heretofore granted by law to several agencies and by granting additional authority with respect to interstate and foreign commerce in wire and radio communication, there is created a commission to be known as the "Federal Communications Commission", which shall be constituted as hereinafter provided, and which shall execute and enforce the provisions of this chapter."

This clearly shows intent that the FCC is to protect the airwaves for the public good. For personal and business use I pay AT&T (formally Cingular) wireless over $450.00 per month; I do this as a personal choice.

The internet is becoming the last bastion of free public communication and it is the FCC's responsibility to protect this free and important resource and help make it available to all Americans. Please protect our rights and do not let the wireless corporations exploit the few remaining available airwaves.

Chuck Godfrey

Let's keep the airways public so all may share and not be tied up only by big business interests.

Wava Osborne
Marion, VA 24354

The internet was founded by the U.S. Govt and funded by Tax Payers. To have the Govt even consider selling off such air rights for internet access to Corporations which would not serve the public good at all is wrong. These airwaves belong to the public—it's a public asset that is funded by us and should be used to serve the good of the public at large. Companies can still compete with their own technologies. This country is about Free Enterprise. So the Companies are free to compete against the Govt, but they are not free to control what the public owns.

As someone who spent over 25 years working in the telecom industry (ATT, MCI, BBN for Internet, etc.) I strongly oppose these few companies gaining control of our communications destiny. In the "old days" there were still many folks who selflessly put the good of people ahead of corporate profits. That's no longer the case, and these old-fud, good old boy companies shouldn't be entitled to these grants.

Since Colonial times there has been free access to information. (Town Criers, etc.)

This has changed since the beginning creep of corporate fascism in the 1980's. Never has the United States of America reminded me so much of the Soviet Union that I was so appalled to observe when I began listening to shortwave radio broadcasting in the 1970's. Their access to information (and ability to broadcast uninhibited) was severely restricted by their oppressive governments. (Which are in no way preferable in my opinion to oppressive industrial conglomerates, military or otherwise.) I am not keen to see us further de-evolve into an oppressive corporately dominated government to any greater degree than we know find ourselves.

If there are ANY patriots or statesmen left in Washington, DC, let them now stand to oppose these heinous proposed policies that are nothing more than the sad continued vivisection of the fabric of our precious Democracy. Please allow the public airwaves to remain the property of the commonwealth that they were intended to serve.

Also, Please take this opportunity to note that I vehemently oppose any proposed dismantling of Analog FM broadcasting. (HD-FM is okay as long as it can be made to NOT degrade the analog signal, a goal not yet realized) The Analog FM broadcasting standard has worked well for us since Edwin Armstrong invented the format. This has been true (less so in recent years) in spite of shameful acts of industrial warfare and espionage that frankly was a disservice to the public and a deeply patriotic Armstrong, then as now. (See Sarnoff,RCA, FM bandwidth wars, etc.) These policies threaten to set the stage for the complete strangulation of vigorous and unfettered exchanges of information in such a way as to mirror our former enemies in Fascist/Communist/Totalitarian regimes around the world. (Bandwidth Jamming, etc.) It would also be a great step forward to reactivate the legislation that kept corporations from controlling too many public service media trusts as they presently do. Protecting the portion of it that the FCC oversees would be an excellent start.

Rick Price
Mount Holly, NC 28120
I am totally agreed.

Adriana Jones
San Diego, CA 92168

Keep the airwaves for the people.

America will be shooting itself in the foot with this capitulation to the media giants. We already lag way behind a lot of the world in the high-speed internet race. I saw on PBS that Japan has bandwidth that is up to 40 times faster than what is available here at about the same price and the reason is that the phone companies promised us AND WERE PAID FOR a fiber-optic network that they have yet to deliver! The FCC ought to be looking out for the people’s interests, not AT&T.

The airwaves belong to the people of the United States, not private industry. The FCC was created to protect this resource not dole it out to those who would use it for their own gain. There are some things that do not belong to private industry. That's why we have a government, to protect the resources of the people. It is not socialism, it our heritage. We are Americans whose free speech should not be controlled by the highest bidder. Would you sell out to another country that could offer more than these companies? Of course not. So why would you sell out to companies who have repeatedly compromised pensions and customer service, especially these past six years? They do not have and cannot have the interest of the people of the United States in mind. But you do. Thank you. Les Crandell, Denver, Colorado.

Commissioners,
I actually hold a few shares of both AT&T and Comcast securities yet I am not in favor of a decision that would in effect allow corporations like Verizon or others mentioned to maneuver into a position where the neutrality of the Internet would certainly be compromised. Control of public airwaves should never be auctioned away. Please defend public airwaves for the public good and improve citizen access to all services. This would also go a long way towards respecting everyone's First Amendment rights. Thank you.

I want to see easy public access cable space and don't want that to change. It's very important to me and the general population. Help!!

Ms Jeri
Dayton, OH 45402

Do not turn ANY portion of the internet, however small, to the private companies. It will be the old "baloney game" with all of our freedoms to communicate lost bit by bit. What they are asking now is unnecessary anyway. We are doing just fine without them. If we can keep them out entirely, we will have a fantastic future "online." They just don't want any competition, to say nothing of their hunger to control our internet. PHOOEY!!!!

WE MUST BE PROTECTED FROM THE CORPORATE GATEKEEPERS WHO WILL STIFLE COMPETITION AND INNOVATION IN THE WIRELESS INTERNET MARKET!! OUR AIRWAVES MUST BE KEPT FOR PUBLIC USE AND FOR THE PUBLIC'S GOOD!! I AM A 78 YEARS YOUNG FEMALE WHO LIVES ON A FIXED INCOME AND DEARLY ENJOYS THE ABILITY TO CORRESPOND WITH FAMILY AND FRIENDS AT A FAIRLY REASONABLE PRICE FOR THIS SERVICE. PLEASE KEEP OUR AIRWAVES PUBLIC!!!! I'M CERTAIN THERE ARE A LOT OF SENIOR CITIZENS WHO FEEL LIKE I DO AND WILL BENEFIT FROM THE USE OF OUR PUBLIC AIR WAVES!!!!

Go ahead and make this mistake. You won’t see a Republican in office for a VERY LONG TIME.
Robert Ziebell
Castroville, TX 78009

Eric Kramer
Philadelphia, PA 19125-4127

I believe the right to free speech should be available to the public. We live in a democratic republic that holds freedom of speech as a primary value. I think the internet should belong to all who want to be heard, not just those with the deepest pockets. They have enough clout with their money. Sincerely, Diane B. Frederick
Diane Frederick
Snohomish, WA 98296

As a reminder: when the airwaves were originally GIVEN to commercial use there was a requirement to do public service for the privilege. We should still be expecting that. These mega-companies are making billions and think they, not the public, own the airwaves.
Burton R. Bell
Barre, VT 05641-3914

I didn’t add my own statement when I petitioned with Free Press. I want to tell you that I own stock in AT&T, Verizon, and Comcast (mostly because the basis will be a pain when I sell them), but I feel so strongly about this matter that I want you to save the airwaves for competitive companies. We Americans believe in antitrust; I hope you do too.
Clotilda G. Devlin
Bernardsville, NJ 07924

George Stone
Seattle, WA 98117

Eli Ruhf
GROSSE POINTE PARK, MI 48230

The public airwaves should be reserved for the public’s use and not auctioned to the highest bidder, e.g., AT&T, Verizon, or Comcast et al. Prices are going to be prohibitive if public airwaves are "owned" by private corporations.
Lois Philon
Massanutten, VA 22840-3200

Collected by MoveOn.org Civic Action
In the aftermath of 9/11, conglomerates like Entercom issued a "Don't Play List" to their numerous radio stations, which classified songs such as John Lennon’s "Imagine" as subversive or unpatriotic. Fox News is little more than a propaganda arm of the GOP. Congress should not further encourage such anti-competitive, censorious privatization.

Paul Burns
Kansas City, MO 64108

In the early years of radio a politician not long before he himself became President warned about the commercial nose of a business camel sticking his nose into the tent of the free and public airwaves. That wise politician was Herbert Hoover.

Harold S. Horan
Charlottesville, VA 22903-7876

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

Gary Downing

The Internet has become the new public square on which the AMerican system of free speech and free association and free information is dependant. I urge the members of the FCC to resist the temptation to submit to the monopolization of the airwaves by a few megaliths who do not have a free and informed American public as their highest priority.

Randy Rolfe
West Chester, PA 19382

Keep the airwaves public

Ernie Frobese
Billerica,, MA 01821
This is a DEMOCRACY and as such the people demand continued public airwaves for the public good, not privatized use of our public airwaves. This is the commonwealth.

Leesa Stanion-Mcdermid
Mountain View, CA 94040

Public airways should not be auctioned off. They should be free to everyone.

Melody Hart
Cleveland Heights, OH 44106

The airways belong to the public commons for the public good.

Howard S. Hamilton
Rancho Cordova, CA 95670

Chris Dawson
Portland, OR 97214

The United States was built through homesteading - allowing individuals to settle the land with nearly no capital. Today's homesteading is done on the internet. Airwaves must be kept public for the public good.

Marjorie Strom
Cresskill, NJ 07626

Just because your 'boss' is dishonest doesn't mean you have to be, too! Those 'airwaves' belong to us - THE PEOPLE! you have no right to give them away, sell them, or bestow them on your personal benefactors!!!@!!!!

I am part owner, and demand that you begin to act like a servant of 'We, The People', and stop being more of the same 'lackeys' and 'court jesters' that have been flooding our sacred halls of government for the past seven years!

Dorothy B. D'Aprix
Miami, FL 33177

The public airwaves belong to the public. They are for the public good, not for the enrichment of a few and the control of the rest of us as in "buy, buy, buy."

Thanks for listening,
Bob Judd
Menlo Park, CA 94025

Public airways should not be auctioned off. They should be free to everyone.
There is such a thing as the public good; unlimited greed is not the only policy allowable under law. Let the airwaves serve the cause of freedom and free expression, and end the monopoly on the exercise of speech.

David Noziglia
Alexandria, VA 22306

Even in a system as “open” as cable television is, big scale economic entities dominate and steer content away from the unorthodox or the controversial and towards what providers consider safe, mainstream entertainment. Niche marketers aim for safe, mainstream niches as well. If corporate gatekeepers are able to subject the wireless Internet market to the same sort of economic-driven decisions about what content will be made accessible and what content will not, consumers as individuals and the public generally will suffer.

William T Street
Saginaw, MI 48602

You work for the people, not the corporate interests. Do the right thing.

Dave Elliott
Baltimore, MD 21236

Major industry, in conjunction with big government, has hurt this country in the past few decades. Innovation and competition have been stifled and we’re nowhere near the country we once were. We’ve gone so far backward, it’s scary! Please do not give the major phone companies yet another opportunity to hurt the average American and stifle even more forward thinking ideas!

Christine Grawe
Jonesborough, TN 37659

Please take a minute and think about the American consumer.

Pat Noonan
Aurora, CO 80014

Collected by MoveOn.org Civic Action
Dear FCC:

Please help the American public enjoy the benefits of the internet and its future growth by NOT allowing the few big corporations to dictate the means by which I use the internet. The public airwaves are just that, available to the public for the better good of information, education, business and entertainment. Your choice to curtail the auction system on behalf of the general public and NOT large corporations is greatly desired and much appreciated. Thank you for your consideration.

Lisa York
Nashville, TN 37204

Please do not let our airways be given away.

Angela Macewen
San Jose, CA 95123

Do I want these air waves signed over to private companies? NO! How does this affect me specifically? Well, how much more specific can something be, the loss of opportunity for free exchange of ideas, without corporate interference. It doesn't get any more serious than this, folks.

Kathleen Miles
Fresno, CA 93728

Ric Huston
Springfield, OR 97478

David Hamilton
Huntington Beach, CA 92649

Don’t even think of turning over our airwaves to corporate interests. Do the right thing for once.

<td>It wasn’t until I was in a Master of Science in Library and Information Science that I realized how eroded our public airwaves have been by the FCC, under the leadership of Michael Powell and conservative political appointees like him. The mere fact that the FCC has been wined and dined by media outlets is enough to convince me that they are NOT objective. Placing accountability on the FCC to steer clear of media lobbyists and &quot;perks&quot; (under the guise of having an honest and open dialogue) would be a good start. Another would be to eliminate political partisanship in appointments at the FCC. These issues undermine the very impartiality of our public airwaves.</td>

"The give-away of the public airwaves to private for-profit corporations MUST STOP! Either we are a nation that moves forward together or we continue down the road of greed, exclusion, "privatization" and the widening gap between rich and poor. The choice is stark, and if we are to honor the "Founding Fathers" exhortations for government to "provide for the common good" and "promote the general welfare", then the unbridled, greedy and inhumane capitalism/corporatism that has run rampant during the admn of Geo W Bush MUST be reigned in! KEEP the PUBLIC AIRWAVES PUBLIC!"

Victor Tiship
Putnam Valley, NY 10579

Many of those in power today do not understand much about the Internet, and I think that is a shame. The Internet is a wonderful innovation, and with the exception of young children I don't believe there should be any restrictions on its use. This includes restrictions due to high prices, or to companies unwilling to run cables to communities. I think these airwaves being sold to competitive companies would lower prices and allow many rural and poor areas to access the Internet, and let these areas catch up with the rest of the nation (and the world).

Teresa Butler

One thing that used to distinguish our country from others was a recognition that some services were basic enough to warrant public good over profit. The ability to communicate affordably was once such a service. Frankly, I personally won’t be affected terribly if prices for wireless decrease, but the opportunity to make this available to thousands or millions of others seems like a decent and American thing to do.

Ken Marx

There are many innovative companies jumping at the opportunity to forge ahead with the wireless Internet revolution—bringing us high-speed wireless networks from coast to coast and all sorts of innovative wireless devices. But the old phone and cable companies are aggressively trying to block this progress. They’ve spent billions laying wires, and they enjoy having their customers locked in with few alternatives. Without access to the public airwaves, wireless innovators can’t enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auction and then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks.

I urge the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves.

They also shouldn’t be able to tell their wireless Internet customers which websites they can access as they do now. And just as phone companies can’t tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.

The opportunity to revolutionize the Internet and wireless world is at our fingertips. The only question is whether our government will embrace it, and whether regular people will fight for it.

Bernard Lin
Basking Ridge, NJ 07920

Gerald D. Dixon
Dunnellon, FL 34431

The government or corporations should not be the keeper of information and tell the public what they are allowed to hear. I do not believe any TV news as I know the government tells them what they may report so I rely on Air America, link TV and other media not controlled by anyone other than truth. With all the lies and deception our government currently uses to keep the war going and to hide criminal actions, the last news I would ever listen to is a station owned by government or corporations. If the internet is controlled, then perhaps its time for a revolution!!!

Corporate America has far too much influence on the stream of information we receive over every single method of communication we now enjoy and, on our government policy makers. It already pollutes and corrupts the so called information we receive every quarter. Our freedoms of speech, the press and information is sorely threatened. The move should be to get the insatiable greed mongers out of the people’s daily diet of corporate sludge and let us drink at the fountain of unbiassed truth.

It’s about time the FCC recognized the public interest. The airwaves belong to all of us and should benefit all of us, not just a few large corporations.

George Cortright
Delray Beach, FL 33445

Thom St. Martin
Denver, CO 80220
It is absolutely essential that public airwaves remain public. Corporate control and administration certainly would not be in the best interest of the people who as end-users must retain a viable system of communications, NOT one controlled by corporate greed, manipulation, control, and price fluctuations to serve their own desires. As Americans, we all believe in a free enterprise system affording honest, reasonable profits. However, corporate examples demonstrate the continuing demand by those corporations not merely for a profit, but windfall profits as we currently experience with oil, pharmaceutical, and insurance companies. To outsource our most valuable resource, creditable and open communication available to the mass public, to private corporations would indeed limit valuable and much needed communication to many, negatively impacting an open society.

Dale L. Madsen

Gayle Erdman  
Hinesburg, VT 05461

All public resources that are environmentally pervasive should be held exclusively for the public good, be it air or pervasive electromagnetic radiation (radio spectrum). This should be public infrastructure, not private, and should benefit all people, not just the wealthy. The benefits of open access will create wealth far beyond the corporate wealth represented by a handful of currently existing corporations. Monopolistic plays are seldom good for long term economic health. Any corporate control of the airwaves amounts to government granted monopolies and trusts and must be avoided at all costs.

Michael Forster  
Portland, OR 97229

It is your responsibility to act in our (my, we the people) best interest, do not auction these airwaves!

Public airways should not be privatized. Our government was set up to protect us from the few ruling. We’ve been heading towards greater dangerous policies for years now, since the 70’s. If this doesn’t stop we will look no different from those we attack as lacking human rights. It’s a frightening and serious situation. I do not support this change.

Carol R. Heffer
South Burlington, VT 05403

Hi,
I just learned about a really important issue, and signed a petition about it. The federal government is on the verge of turning over a huge portion of our public airwaves to companies like AT&T, Verizon, and Comcast–who will use them for private enrichment instead of the public good.

These newly available airwaves are a once-in-a-lifetime opportunity to revolutionize Internet access – beaming high-speed signals to every park bench, coffee shop, workplace, and home in America. Phone and cable companies don’t want this competition to their Internet service–they’d rather purchase the airwaves at auction and sit on them.

You can sign the petition I signed here - urging the government to make sure the public airwaves are used for the public good:

The airwaves have been and should continue to be the property of the public as a whole. Privatizing this is an obscene violation of the public trust, and is unwarranted.

The public airwaves should not be controlled or owned by private corporations with concern only for their own interests. The public airwaves should be used for public good.

Too often, to the large corporations go the spoils. The FCC should be looking out for the interests of the people; not major corporations.
Let's work together to build a democracy that works for all humanity and all life. We can each commit and work toward a goal to communicate before it's too late.

Hello, The internet as it is now is far too valuable a commodity to interfere with. It has enabled the majority of the population to access a truly vast and invaluable store of information and our access to that cannot be handed over to the large providers of access for them to use as they see fit.

Teh internet works very well as it is and should not be messed with. Not only this, but broadband access must be made available to more of the public and prices should be rolled back as they are in most of the rest of the world. Here in the US we ought to be in the lead in internet technology, but as it is we are so far behind the world leaders that we ought to be ashamed. Lets start by getting rid of the Bush, Cheney, Rove troika by impeaching and/or firing the bunch of them.

Charles J Etheridge  
Atlanta, GA 30329-3804

Teresa Bacheler

The federal government’s alliance with Big Business has already cost the American people in many areas of life especially jobs and health care. America ia a FREE country for all Americans, rich and poor. Have our big business leaders become so obsessed with making a profit that they have forgotten that? Well, they better put on their memory cap and realize that Americans can destroy their business if they go overboard in abusing us.

Gail Munford
Las Vegas, NV 89119

Use the public airwaves for the public good!! NOT for Corporate Greed and Control of them.

This country is in decline and should not fold, under any circumstances, to corporate greed. We are already behind the world leaders in our technology speed, access, and cost for service. This affects the education of our children and contributes to our decline in performance. Keeping the masses from access only perpetuates the growing divide between the classes and the shrinking middle class which is what helped to build this country. Please do the right thing. The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

America was built on free enterprise and innovation. We have laws against monopolies. Please recognize this for what it is. Big businesses like AT&T, Verizon, Comcast and others who want to use their huge profits made from the little guy consumers like me to prevent less expensive more innovation companies from entering into a free and truly competitive marketplace by purchasing the public airwaves which they intend to hold onto just to stifle competition. This not what America is all about. It also creates a marketplace with few competitors and higher than necessary costs and hidden fees. Please help Americans who can’t afford the current giants prices. We are far behind other nations in the amount of access provided to our poorest citizens.

The airwaves have always been and should always be public property. Please don’t turn over this asset to any private company.

Rama Olson
Forest Grove, OR 97116

Karen Jacques
sacramento, CA 95816

The FCC should realize that anything less than full public access to the Internet including the wireless spectrum will only result in the corporate sector finding ways to monopolize and profit. Please don’t be fooled by any arguments ATT, Verizon, and Comcast might make about how they will compete, make this affordable, develop it and/or set aside programs for low income populations. Their track records over the years prove they will say anything, but will only act in ways the help themselves profit!

Eric Johnston
Arcata, CA 95518
Internet access should not go to giant corporations, especially as it improves. Verizon, I know for a fact, in the most cheating and worst company in the United States. I had to cancel their service after they told me that while I was in Canada last summer, I could call to the US for a small fee. But when I got back I was told that I had misunderstood their sales pitch and I had a cell phone bill of over $300. As NY Telephone and as Verizon this is a very bad company that does nothing but gouge the public and their customers. Their DSL service is billed as better than Cablevision, but it is not. AT&T is not far behind Verizon as a company that cons the public and exploits their customers shamefully with both bad service and high profits. Both companies constantly war with their labor unions and try to cheat workers as well. One should think of abolishing these companies using anti-trust laws or laws that were applicable to Enron (yes, they are that bad) rather than handing them more control over the media in our society.

<td>Equal and unfettered access to the Internet allows everyone, not only the wealthy or well connected, to enjoy the freedoms and information available nowhere else. To allow companies whose only interest is maximizing profits, or who have a distinct ideological bent, to control the US public's access to the Internet would, frankly, be immoral, unethical, and possibly criminal. Many bad decisions have been made in the past few years that we as a nation have come to regret. Please don’t let this decision be another. Keep access to the Internet on a level playing field for all users.</td>

You are in existence to insure that businesses and corporations will not harm the citizens of the United States. I respectfully that you do your job, and protect the people not the profits of big corporations.

William & Donna Pellegrini
Hollywood, FL 33020

This is where corporations like AT&T gain the upper hands (read: stanglehold) on all the rest of us and choke the life out of our democracy.

Bill Laurence
Abiquiu, NM 87510

Frances K. Wolf
East Hills, NY 11577

We're falling behind the rest of the world in internet access. We need to catch up quickly!

Hayes Morehouse
Oakland, CA 94621

I also provide free WiFi access to my community and am VERY concerned of commercial interests trumping community interests and a government that has become a commercial interest.

Jp Cohen
Alameda, CA 94501

Airwaves are supposed to be public. Let's keep them that way

Christopher S. Smith
Santa Monica, CA 90404

Let's use the public airways for public good.

Matt Rollefson
Redwood City, CA 94061-3455

If you believe in competition and the free market you will promote competitive media, not allow competition to be stifled.

Neil Stahl
Chapel Hill, NC 27514-1836

Collected by MoveOn.org Civic Action
High speed wireless networks represent a revolutionary opportunity for untold numbers of citizens, communities, institutions, public safety and information professionals, and private innovators and their companies. This only holds true if the access to these services is not restricted by limitations imposed by large telecommunications conglomerates such as ATT, Verizon and Comcast who can afford to purchase, and subsequently restrict access to wireless networks through a number of means. These include requirement of dedicated protocols only made available to their network subscribers, restrictive use of revenue and access plans, warehousing of frequencies in the exercise of undue control, & limiting innovation around the access to these airwaves. FCC should act to prevent these and similar private or public companies from controlling wireless communications.

Frederick Ravid
Atlanta, GA 30329

Jake Page
lyons, CO 80540

Only the fear of a corrupt administration would try to regulate public airways. Is it an admission of guilt to corruption and private agendas which guides policy making, or is it the fear that adults are unable to decide right from wrong on their own that motivates government interference? Bush and his coterie need impeached, nothing short of that will restore freedom to this godforsaken land.

William J. Granche
Ridgway, PA 15853

Julia Glynn
Mount Vernon, OH 43050

Edward Gomez
los angeles, CA 90027

It is decisions like these that will determine if the United States is just another has-been empire with a small, rich and powerful ruling class plundering it’s resources until nothing of value is left or continue to flourish because power is still with the people. Sound like I’m making too much of a simple, little issue? Think about it.

Jeffrey Brown
Minneapolis, MN 55426

The airways do NOT belong to the corporations. I don’t want them to have control over everything like a ”Big brother”

Ron L’Heureux
San Diego, CA 92115

If you really wish to honor and respect middle class America, then don’t sell the most viable means of information exchange to the highest bidder. I point to the ”entertainment” which passes for news to give you a clue how this will be treated. Not everyone can afford the rates these companies will charge.

Carol Cook
Portland, OR 97202

Helen Altman
Oyster Bay, NY 11771

"The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.”

Robert Leventhal
silver spring, MD 20903-1512

Someone remind the FCC that they work for Americans, not corporate America.

Robert Kazenel
austin, TX 78704

Florence Michaud
Spokane, WA 99223

1583
 briefly. The fear is that the internet will become a controlled medium, like television, where only certain voices are heard and the public is denied access to a wide range of perspectives. As a result, the internet could lose its role as a force for democratic participation and become a tool for propaganda and manipulation by powerful interests.

J. Gordon Levey
Saratoga, CA

The FCC was founded on the principle of public trust. Don’t betray that trust.

Rene Wilson
Bluemont, VA 20135

The internet is an international democratic communitarian force that creates a thirst for freedom of information and connection. It should not be controlled by sociopathic American corporations motivated by greed. If this occurs, instead of exporting the values of freedom and democracy, the internet will create resentment and hatred of America and its corporate overlords.

Angela Zehava
Portland, OR 97202

The giveaway to corporate interests has been in full swing for 6+ years. It seems ”anti-trust” has become an anachronism. Soon, one corporation for each service and product. Wonderful.

This country is at a crucial point in deciding if we will continue to strive to be a democracy that believes in individuals, their rights and the worth of their contributions. Innovation and creativity dies if we deny freedom to the people. Our planet is becoming so populated and developed that physical freedom is more limited than in the past making it essential that we retain and foster spiritual and intellectual freedom. The vast communication possibilities of the internet is of vital importance to cultivating this type of freedom. Let’s not give it away to big corporations that have proven over and over again how little they genuinely care about the fabric of our society.

On what basis does the FCC think selling our airwaves rights to telecom companies in any way serves the public (WE the People) interests???

Please move to protect WE the People by attaching provisions that clearly hold all purchasers of these airwave rights responsible for providing full access to all citizens, allowing and encouraging competition, et cetera. FCC is to act as an oversight agency to insure full compliance and provid citizens with a path to complaint and correction.

Do not privatize the internet. I believe that this will stifle the open use of this very important media. We have already seen the power of the internet through its use in the last congressional election. I would hate to think that is the reason behind the move to silence voices on-line. Please recognize that most Americans want hands off the internet and really do not know the possibility of its being turned over to big business. Verizon, At&T and other businesses already control much of the communications industry. Please keep the internet open and free.

Christopher Nelson
Houston, TX 77008

It is critical that we the public not be hemmed in by the all powerfull (rich). I was appalled to recently find out that the United States is still in the stone age as far as the internet is concerned. Japan and other european countries enjoy internet speeds 20 times faster than we do. We are supposed to be the world leaders not followers. I was also appalled to see the legal battle Lafayette Louisians is having to battle to supple their citizens with their own internet access. The citizens voted to pay for it and the cable companies do not want them to have it. Does the cable company set policy or the public they serve? Do deprive the public of the rights you are supposed to protect.

Michael Rachal
Gretna, LA 70056

Please don't sell out the American citizens again...get some cahonies and stand up for us!

Collected by MoveOn.org Civic Action
Public policy is too often made in light of corporate interest over the common good. Any legislation that continues to prioritize profit over access epitomizes this trend. The internet is the greatest tool for and by democracy—please do not allow it to become instead a tool by and for plutocracy.

Freedom of the press includes Freedom of the Airways. This kind of consolidation of broadcasters will not be good for our democracy.

Roberta Silliman
Decatur, GA 30030

Mike Beckwith
Dalton Gardens, ID 83815
Please keep public assets public! They belong to all of us, and should not be used for one-time gain. Why sell now? The wireless landscape is just beginning to form and must be open to future opportunities! Thanks

Steve Brakebill
Simi Valley, CA 93063

The public airwaves are a Public Trust in which there is an inherent Public Interest. It would be a grave misconduct for the FCC to subrogate its legislative purpose to a few private companies in return for their financial support of the current administration.

William C. McCarthy, Jr.

Corporate monopolization of the airwaves by these huge conglomerates keeps down necessary competition, particularly in smaller markets such as where I live. We have little to no choice for cable or phone in our area, and we don’t want internet service to be the same way.

The FCC should not allow private corporations to own the airwaves. Keep them public!

A long time ago very smart people decided that we as Americans had a common right to a number of resources including the airwaves. I realize that current sensibilities tend to favor private interests. I strongly encourage you to resist these private interests and to protect public access and control of the public airwaves.

Dear FCC and Staff,

There was a time in this country when the needs of the many outweighed the needs of the few. And yet, we as innovative and freedom loving Americans found a way to protect the rights of those few anyway. It is a sad day because such things exist no more. Today, it is becoming more apparent that it is the whims of the rich outweighing the needs of everyone else. What a sad sad country we live in. Mega business can go to hell! And if you side with them, you can too!

The citizens of European countries have high-speed internet access that is affordable and available to every workplace and home. Americans should have the same low cost Internet service as other developed countries. I urge the FCC not to turn over the public airwaves to big companies who will deny the public the right to this low-cost service. Internet access will ensure a better educated citizenry. Americans should not be deprived of this opportunity!!

Barbara Geer
Bennington, VT 05201

Please ensure that the airwaves remain open to all, and that competition is not stifled.

When free speech is subordinated to big business, our very important access to what is really happening in the world is subverted. An educated public is one who can an should be one who chooses the right decisions. Look at countries who do not have that right and how women are relegated to the home with no voice in world affairs. No wonder most of the middle east is considered third world countries. Don't let that happen here.

The airwaves do not belong to any one interest group – and that includes the Federal and State governments! They belong to the people who will most benefit them, the public. Don’t do another land grant thing like was done in the 1800’s which benefited a select, and ambitious, few. And, of course, the government gave away land that did not belong to it. So, protect the wide open spaces so all of us can pioneer and enjoy the airwaves.

Hello, Please step up and be the person who makes the decision that alters the Internet landscape for the positive. If conglomerates are allowed to own these available airwaves, competition is stifled. How un-American is that?? It’s one of the cornerstones of our country. Please do not lose sight of all the good this can do for everyone...not just the wealthy. Thank you for your consideration.

The public airwaves belong to no one but the people at large, and should be used only for the public good.

Please keep this a public resource. Thanks.

There are far too many big breaks for big business with Bush at the helm. Of course the public airwaves should remain public.

We are having enough problems with our first amendment rights, and I’ve had enough of this type of control. It is time for a revolution, just like 200+ years ago. William Pomeroy Boulder, Co

It's time for the federal government to start working for the American people instead of for soulless business conglomerates. If AT&T, Verizon and Comcast succeed in monopolizing the wireless airwaves, they will be able to stifle creativity and innovation, in effect closing out their competition, to the detriment of the consumer. Why are these companies allowed to dictate what products and services we, the consumer are allowed to use and receive? Please help preserve our free market system by blocking the unfair and anti-competitive tactics these companies intend to use at the airwaves auction.

Please keep our airwaves out of the hands of big corporations.

Kath Dunsmore
Ashland, VA 23005

The mission of the FCC is not to protect the interests of huge corporations, but to keep the public airwaves available to promote free speech. Right? In what way does handing these riches over to corporate monoliths promote free speech?

Paula Melton
Brattleboro, VT 05301

Why is it so important for a handful of companies to own the airwaves? Other people have other views that deserve to be heard.

Nicole
South Orange, NJ 07079

The public airwaves are part of the freedom of communication in the U.S. Commercialization of everything is completely out of hand. Stop with this.

Sandi Combest
Denton, TX 76205

My grandfather used to express disbelief that people would pay for a bottle of water. He’d say, ”It’ll be the end of the world when they start charging for air.” I know he meant the air we breathe, but how is that any different - really - than the air through which we can communicate?

America has always been at the forefront of new technology. Under the Republican regime, we lost a valuable foothold as innovators and world-class scientists thanks to moralizing under the guise of ”responsible science.” This is but one way to regain a foothold while preserving the essential building blocks of a true ”free enterprise” society.

Kerri-Leigh Grady
Escondido, CA 92025

The public airwaves should be used for the public good

Although capitalism is not always perfect, this is one example of where it should be applied. Pure capitalism inspires new ideas and innovations, and with technology changing so rapidly this is not a time to block such innovation with corporate communism. Capitalism is what made the US the most powerful nation in the world, but corporate greed and corporate sponsored political pawns have been allowing stagnation of US technological growth. Other countries have advanced beyond the US in many areas of technology and will continue to do so, unless we stop blocking such innovation. Please put your conscience and America’s well being above your political agenda when you consider this issue, and most importantly, BE A LEADER NOT A PAWN!

I heartily agree with the petition. As a frequent traveler, I have had the misfortune of staying in hotels that chose to wring every penny they could out of their guests, charging for wireless access (separately) both in hotel rooms and in the lobby bar. Or airports that charge outrageous ($10/hr plus) rates that just aren’t worth it for a quick e-mail fix while waiting to board a flight. While I don’t expect my Internet access to be completely free, I expect the companies I deal with to offer reasonable rates, not soak their customers.

Gary Ehrlich

America needs to lead the way in supporting small new wireless innovation companies (not the AT&Ts of the world) to help the less fortunate improve their lives through the power of wireless technology. To favor giant corporations at this time should be unconscionable - please care for your fellow human beings and make the decision to help them! Don’t let the corporated lobbyists buy your soul.

The real importance of a democracy is to have a voice to speak truth that may differ from the majority. To live in a dynamic democracy, we must not only allow but encourage differences of opinions from all sides of an issue. Diversity is critical to this process.

Lori Sortino-Williams
Alta Loma, CA 91737

Dear FCC Commissioners, Please protect the public good and do not sell the public airways to the major communications companies. The airwaves belong to the people. Please.

Big Telephone and cable companies already have way too much power over what we consumers do. I am so unhappy with companies like ATT and Comcast, that I’m doing what ever I can to not use them. I have 17 businesses phone sa nd one home phone and I use a reseller of phone service as I depise the treatment I get from ATT. As for Comcast, we are currently looking into other options for our TV and internet connection.

Public airwaves for public good; Not for private profiteering!

Donald F. Bill
Palmyra, VA 22963

Why are we having elections if we are giving all our freedoms away? This is American, we must keep public airwaves open to the public!!!

Dolores
Peoria, AZ 85382

Glenn Shiroma
CULVER CITY, CA 902306206

PUBLIC AIRWAVES implies public use which in turn implies public good...privitizing PUBLIC airwaves could equally be constituted as PRIVATE use and NOT for the Public good. The FCC is supposed to lookout for the PUBLIC GOOD by regulating Private Industry in the Communications Field. Its time to live up to your PUBLIC mandate and act in the best interests of the PUBLIC...Private corporations do not need FCC help or protection, as they are perfectly capable of looking after themselves with their army of lawyers and lobbyists, so leave the wolves to face off against the lion who protectsthe lambs!

It is important that our individual constitutional rights are upheld and protected. The government doesn't have the right to sell my individual freedoms and liberties to corporations. The airwaves are suppose to be public domain and used in the publics best interest. I do not support the federal government in a plan to hand over a huge portion of our public airwaves to large corporations who will then profit from them. Instead, have those companies lease/rent air-time/space from the people and use that money to pay down the national debt, provide health insurance for all, provide our troops with the best equipment possible, educate equally, develop alternative fuel sources, etc. Don’t sell out by falling to corporate enticement. Our individual rights are essential for a democracy. If you continue to sell out we will be prisoners in our own country with skyrocketing communication prices. Protect our airwaves because an American corporation today using our free airwaves could sell out to a foreign investor tomorrow. Then America will again, like the oil industry, have to find a way out of a mess that hurts AMERICA. Our elected officials owe it to all Americans to serve the publics best interest and that doesn’t include selling out.

To prevent open access or privatize for gain will violate our right to freedom of speech.

To prevent open access or privatize for gain will violate our right to freedom of speech.

The first duty of government is to protect its citizens; this includes protection from corporations that act not for the public good, but for the benefit of their own ends. What is good for AT&T et al. is not necessarily good for the country.

It's bad enough that Rupert Murdock is using FOX to jam his politics down our throats. We need a place where we can get real information from real people.

Heather D'Amico
Grand Prairie, TX 75052

ALL the airwaves were originally intended for the public good. Big business has stolen them and profits from them by churning out obnoxious, stupid content just to float advertisement ever since. The stuff we're exposed to at their hands is insulting to our intelligence, encourages violence, greed, selfishness, consumerist values, mean spirited competitiveness, submission, passivity, and a general feeling of disempowerment. ALL the airwaves belong to and should be returned to the people, to be used for the good of our cultures and societies.

Dear FCC
Please send us a much needed message that the our government works for the people and will make sure that our rights to equal access and privacy in communications will be protected.

thank you

Kimberley Jordan
Bellevue, WA 98005

Quit giving away all of the public's resources to greedy, care-nothing companies. All of you elected officials, republicrats, democans, and appointees, you're all in deep doo-doo anyway come the next elections, so, why don't you try to redeem yourselves so maybe you won't all go to hell and continue to take the entire country with you. The airwaves belong to the general public, not the companies who want to leverage it for their stockholders. Get real. Except for career, government workers who follow the letter of the law and are stewards of what is right, not their personal beliefs.

The airwaves are one of the last few things that we have that are free and belong to the people. If corporations take over, they won’t be "public" airwaves anymore now will they? The corporations already rule the television media. Radio is the last standing form of mass media that people can actually express themselves. People have the right to know the public’s opinion. It also functions as a form of art and expression musically and that should never be censored. I’m tired of constantly having to fight for my constitutional rights and watching politicians sneak under the wire allowing things like this to happen. For what? Money? It’s too high of a price to pay. Why are we over in Iraq fighting for our freedom when it seems like the greatest fight for freedom is right here in our own nation. Don’t sell off our rights and don’t censor us, PLEASE!

There was once a European country who had one party, merged with corporations, and together they controlled all the public sources of information. It was called Nazi Germany. When only one side of the story is heard, when big business owns all sources of information, you have a fascist dictatorship, no matter how else you try to paint it, spin it, or what you want to call it.

The airwaves have been considered "public" for all of my lifetime. To change that now is abhorrent. Please keep the airwaves being abandoned by analog signals in the public arena, to be used by all. Bidding them out to the large companies puts us one step closer to "big brother" type control. The document that I skimmed indicated that digital to analog conversion needed to be readily available. It is not. The cable companies are controlling the equipment necessary to do so. I find it impossible to purchase such and item, only to rent it from the cable company with a permanent financial drain. This is not "available" in my book. Why should we be forced to abandon all our current equipment just to line the pockets of the big guys? Do not bid out our airwaves - leave them open for public usage.

Richmond, CA 94805

The internet needs to be open and available to the public. It is wrong to allow companies to control it for profit. Companies already have control over most of the airwaves with TV and radio (with the exception of Public radio and TV stations). The internet has been a free exchange of information. Do not allow this to be dominated by companies for profit. They have enough profit!

Cindy Buxton
Narragansett, RI 02882

Sarah Bennison

you can't take our freedom of speech..leave our freedom alone!!!

Greg Curtis
east earl, PA 17519

Collected by MoveOn.org Civic Action
The public airwaves by their very nature belong to the public. To turn them over to private corporations flies against the ideals that this country stands for and would only stifle competition and free expression in the name of corporate greed. These airwaves MUST remain in the hands of the people, not companies.

Daniel O’Malley
Austin, TX 78704

Betsey Stevens
Alhambra, CA 91801

Please do not surrender the future of communications by the many to the control of a few.

Michael Crooks
Edmonds, WA 98026

The Wireless spectrum is a public resource just giving it to the cable and phone companies will not favor competition or serve the public

Peter Silverman
Evanston, IL 60202

we need LESS big corporation control and MORE public access.

Lorraine V. Brilliant
tacoma, WA 98405

Carole Reardon

G.M. Rakes
Lauderhill, FL 33319

Mel Cox
Livermore, CA 94551

Dale Olon-West
Fredonia, NY 14063

Giving our public airwaves to large profit-driven media providers will surely limit access for many, many Americans. Because of this limited access, the content of the airwaves will be reduced to the most profit-producing common denominator instead of the wealth of innovation and creativity that could otherwise flourish. If we auction our airwaves off to corporations –organizations that are definitively ruled by profit margin–we concede to the notion that turning a profit is of higher value than an a widely accessible communication system. In essence, we choose private gain over community access. A sad day for America.

Sarah Stein
Madison, WI 53703

The FCC should not auction wireless spectrum unless Carterphone rules for attachments are applied, network neutrality is observed, full disclosure is required, and industry standard application platforms are defined, preferably by a third-party such as the W3C.

Dan Evans
Nowhere, NY 11803

Robin Kennedy
Hancock, NH 03449

Sharon L. Frye
Osprey, FL 34229

Marie Rita Eaton
Cave Junction, OR 97523

We don’t want or need more control. We need and expect more innovation, creativity, expansion and opportunity.

Christina Wynne Torkay, D.D., Ph.D.
San Diego, CA 92110
Lack of communication is often cited as a significant cause for failure in every genre of human effort where more than one person is involved. Large corporations can and will stifle competition...ALL competition for their product or service...and this in turn will stifle communication.

DO NOT ALLOW THE LITTLE GUY TO BE STIFLED OR IGNORED OR INHIBITED FROM OFFERING ALTERNATIVES!!! The internet has increased the public's desire and ability to express thought and COMMUNICATE. Its a GLOBAL necessity that we do so. Please mandate that competition and innovation cannot by stifled!

As a customer of AT&T (long Distance), Verizon (home phone and cell) and Comcast (cable and HSI) Yes, all three. I hate monopolies..and hope to keep the big 3 competing against each other for a long time. I believe that I pay my fair share (an even more so) for the service I receive. Under no condition should public airwaves be turned over to any private company, unless they plan on giving their service to us for free.

Ithaca, NY 14850

It is the responsibility of the FCC to see that the airwaves are controlled by the public as much as possible because this country is a democracy. If the airwaves are controlled by the few then it is not a democracy. Protect the rights of the people and you can consider yourself on the way to your "Improving the FCC" initiative.

Collected by MoveOn.org Civic Action
For America to remain the home of innovation and maintain its position in the increasingly competitive world marketplace where knowledge is the most important raw material it is critical that we take this once in several lifetimes opportunity to ensure that these precious frequencies are used to establish universal and economical internet access for every citizen. That access can serve to reduce our dependence on expensive wired infrastructure while providing an open platform for the development of new wireless internet based applications free from the anti-competitive tendencies of the telecommunications industry.

The public airwaves should remain public
Benjamin Adams Trueheart
Washington, DC 20010

The airwaves do not belong to this administration or the FCC, they belong to the public. They are in your trust. Please be trustworthy.
Ramona Hamblin
Newton, MA 02460

The public airwaves are supposed to be used for the public good. This does not mean profits for private corporations at the expense of our citizens. Newly available airwaves are a once-in-a-lifetime opportunity to revolutionize Internet access by beaming high-speed Internet signals to every park bench, coffee shop, workplace, and home in America at more affordable prices than current Internet service. Please don’t let the major phone and cable companies stifle this competition to their Internet service, and thus limit consumers to a very few choices and inflated prices. The FCC should protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

It is bad enough that where I live there is no competition for cable services and the cost of high speed internet has increased at 15-20% per year. These companies need lower cost competition and options so more people can access the internet. DO NOT allow these corporations to purchase new airwaves and sit on them or make larger profits. There needs to be lower cost options made available.

Mark Becker
Winfield, IL 60190

Cyrille Duperret
Centennial, CO 80112

These are public airwaves, do not privatize them and further stifle technology innovations and communications by setting up corporate gatekeepers. Giving away the control of more communications will further limit the ability of small firms to prosper and defeats the purpose of a free market.

I believe the internet as a public service would provide knowledge and information. Those who would no be able to afford internet would be of great benefit and eventually could participate and contribute to society. Privatizing this essential service in our changing world would only set back our nation and move the the already rich corporations whol would capitalize on internet. The internet should be a public forum or space for anyone to access

America stands at a crossroad. Whose interests and well-being is more important? - The American people or the private companies. The ownership of public airwaves is just one issue of many but the answer is clear; the good of the people is paramount!

Marten Tegnestam  
Brooklyn, NY 11218

Collected by MoveOn.org Civic Action 1712
While I fully understand the principles behind the recent trend towards privatization, there are certain industries in which so-called "natural monopolies" prevail—and rather than allocating these monopolies to private firms, I support governmental (public) ownership. While there are some that may claim that this courts inefficiency, my argument is that it is necessary to promote good stewardship of the resources that we as a society intend to protect. Market failures do occur, often resulting in the selection (in an evolutionary sense) of technologies that are substandard (e.g., VHS versus Beta in the video-cassette marketplace). I would hate to see similar mechanisms at work with regard to the allocation of our usable electromagnetic spectrum. Many thanks for your time and consideration. - R.D.

Regan Damron

This country is run by people not corporations. Please remember, 80% of new jobs are created by small businesses in this country. For the good of the economic engine and the future job creation needed for our youth, do not auction all the bandwidth to a couple of conglomerates. Entrepreneurs abound in this country. Keep some of the airwaves for the public good. Keep some of the airwaves for the federal government and the military so we don't have spend exorbinant amounts later to rent it from corporations. Please allow the people of this country an opportunity to be heard on this issue and on the airwaves you plan to sell.

I've never known throughout history about the American government being as bought and sold as it is today. the TX governor is bought and paid for and if the US government does not start doing more for the "people" instead of "the Man"(big companies) than we can start comparing the US government to Mexico's government which was sold off a long time ago. we give enough money to these ultra rich big companies, lets not give them more, they have more than their share of the wealth.

Jose Espinoza
Garland, TX 75041

There's nothing else to add to this: "The public airwaves should be used for the public good."

I urge the federal government not to turn over public airwaves over to big private corporations who will undoubtedly stifle all forms of competition. We are the type of country we are today because of competition and the public wants to keep it that way. We ask the government to listen to voters like me because I will make it to the poll on all elections.

The airwaves, like all public commons, are for public use not private use. If there is excess capacity after all public needs have been met then the remainder should be leased with renewable leases. STOP GIVING AWAY OUR PUBLIC RESOURCES WHEN WE SO CLEARLY HAVE A PUBLIC NEED FOR PUBLIC INTERNET SYSTEMS AND POLITICAL CAMPAIGNS THAT ARE FREE OF COST CONTRAINTS TO LIMIT US TO LISTENING ONLY TO THE RICHES CANDIDATES.

Our communication technology is far behind the rest of the world. Put this in the hands of people who will bring us forward, not keep us stagnant. The present oligopoly is killing us.

Fletcher Dennison
Los Angeles, CA 90028

The FCC should promote competition, not inhibit it. Selling or giving the airwaves over to companies already in a controlling, oligopolistic market will keep the US in it's current state, not enhance the public good. The FCC should limit the amount of airwaves that any one entity can have to prevent us from moving backwards relative to mobile communications. Already it is nearly impossible to get any wireless carrier to sell a direct connection to the network. Already, the walled garden environment that exists today inhibits real enterprise from happening. Enough is enough - do not turn over these airwaves. If you do, let's just put AT&T back together again and admit Judge Greene made a mistake!

Steven M. Peloso
Stirling, NJ 07980

Nothing should have greater priority than PUBLIC OWNERSHIP OF THE AIRWAVES...and public free access to information. The airwaves should NOT BE PRIVITIZED and exploited for private profit!!!(Any more than it already is.)

There are many innovative companies jumping at the opportunity to forge ahead with the wireless Internet revolution bringing us high-speed wireless networks from coast to coast and all sorts of innovative wireless devices. But the old phone and cable companies are aggressively trying to block this progress. They’ve spent billions laying wires, and they enjoy having their customers locked in with few alternatives.

Without access to the public airwaves, wireless innovators can’t enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auction and then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks.

I’m urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves.

They also shouldn’t be able to tell their wireless Internet customers which websites they can access as they do now. And just as phone companies can’t tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.

My cheapest package with Comcast costs me $18 a month. I need more access to news and affordable programming. The only worthwhile channel with this package is PBS. The at&t telephone service is exhorbitantly expensive. There are added charges for everything constantly padding the monthly bill to their own financial gains. The service is getting worse with automated “press 1, press 2, etc. responses”. I hope to have real (not virtual) ears listening to our complains.

"The danger arises because there is, in most markets, a very small number of broadband network operators. These operators have the structural capacity to determine the way in which information is transmitted over the Internet and the speed with which it is delivered. And the present Internet network operators—principally large telephone and cable companies—have an economic incentive to extend their control over the physical infrastructure of the network to leverage control of Internet content. If they went about it in the wrong way, these companies could institute changes that have the effect of limiting the free flow of information over the Internet in a number of troubling ways," excerpt from The Assault on Reason by Al Gore. Our democracy depends on the free flow of information. Any threat to that free flow is a threat to our national security.

Cheryl Capacchione
Philadelphia, PA 19128
We need to have our airwaves for the good of the public. Instead of having Verzion, Cable Company or AT&T and any other company to take over the airwaves and double or triple the price of being able to use them. It seems everything is being priced so high now that many people would not be able to have some enjoyment out of life if this becomes so high we can not afford it.

Tori Lutz
Richmond, VA 23236

AT&T has already begun the process of acquiring the self-same companies it was once compelled to divest itself of. I trust them not at all. Verizon, once the old GTE, made no bones about selling its presence in rural areas to go after the more lucrative suburban and urban markets.

I can’t speak to Comcast’s track performance but if it’s been anything like either of the two previous companies; profit, not service, will drive policy.

It’s time for the FCC to understand that corporate ownership does not necessarily translate into the common weal.

Decatur, GA 30033

My husband and I have an on-line bookstore and this move would be disastrous for us and for countless others like us. The internet has been democratic—one of the very few totally democratic features in an increasingly corporate society. Please keep it that way. I am also a college professor and we need to keep the net democratic for such programs as on-line degrees and supplemental course—one of which I teach. This would have an enormous impact upon educational use of the internet.

Marian J Hollinger

Keep corporate gatekeepers from monopolizing internet access!

Diana Skill  
Kansas City, MO 64112

Vincent T Tihoni  
Orlando, FL 32811

Once again the government has overshadowed the logic of progression. Once again, business has intervened where natural order should rain. Once again you will disappoint the American people. You may not know who I am, but there are a lot of angry people searching for an answer, and the answer won't be violence. It will be systemic annihilation of all of the right through a grassroots campaign fueled solely by the will to see good prosper. I only hope you future outlook can grasp the reality of the progression of time and the soberness of age and wisdom. Don't sell access, make it free and give hope instead.

Cyrbryle Hunter  
New Orleans, LA 70152

The keystone of capitalism is competition. Do not allow the airwaves to be monopolized. Do not allow yourselves to be bought, sold and duped by unscrupulous corporate greed.

Sheila Birdsall  
paw paw, MI 49079

These are the public airwaves. Quit selling them off like this. As technology allows the changing of the frequencies there is less reason to sell frequencies. Lease them if you must, for short periods.

Christian Holtje  
Pittsburgh, PA 15217

Mike Lamm  
Indianapolis, IN 46220

It is critical that public airwaves be kept public. To ‘sell’ out to private sector would be like selling ‘air’ to a corporation from whom we would have to purchase ‘air’ in order to breathe. This is wrong! The FCC is bound to uphold public access to public airwaves … including satellite radio, internet, etc.!

Karney E. Waltzer  
Bonita Springs, FL 34135

Return the airwaves to the people and quit trying to control the internet.
Dale Johnson
Blackey, KY 41804

The Internet is the way in which people are assembling peacefully, speaking freely, expressing religious views, petitioning and reporting news and opinion. The Internet is as fundamental as the press in disseminating information; it is as fundamental as free speech in the expression by the individual; it is now the place where people assemble peacefully; it is one place in which religious views can be debated without violence; it is now the door-to-door manner of collecting signatures from people of common views for the redress of grievance. These rights must be protected. Do not sell my right to peaceful assembly, free speech, press, and my ability to petition to the highest bidder.
James G. Lindberg
Des Moines, IA 50310-4541
The radio is the ONLY place I can go to without the barrage of HYPE that is strangling our "public square." If big corporations take over a significant portion of the airwaves, I will be much less likely to turn to or participate in radio programming* in the future.

*I have recently had an NPR reporter (Sean Corcoran) do a profile on me teaching a drawing class at Cape Cod Community College for the sequel series he is airing in June of this year. I listen ALL the time to Public Radio, and sometimes call in to talk-shows and listener lines. The radio feels like the last place where there is freedom to not be INUNDATED with the whole SELL mentality.

Anne H. Flash
Harwich, MA 02645

Let's keep the govt out of this one shall we!
Cj Sternisha
Fredonia, NY 14063

Comcast and Verizon already have a huge monopoly on the industry. Many people don't understand how they are allow to monopolize the industry, giving the consumer limited choices and fees to choose from. I can't believe the government would even consider giving them more power. Wake up - a government by the people for the people does not want private owners running the public airwaves.

Everytime I turn around, the FCC is trying to sell off the PUBLIC airwaves and without ensuring that those who have use of those airwaves are actually following the rules ensuring equal time as regards, for instance, the media and political announcements.

Now you’re trying to sell off even more PUBLIC airwaves to corporate entities who have made sure we all know they WILL use our PUBLIC AIRWAVES FOR PRIVATE GAIN INSTEAD OF PUBLIC GOOD and they will TAX the user, in effect. THIS IS JUST PLAIN WRONG AND IT IS WRONG OF THE FCC TO EVEN CONSIDER OF TURNING IN THIS DIRECTION.

DON'T DO IT!
DON'T DO IT! DON'T DO IT!
DON'T DO IT! DON'T DO IT! DON'T.

Sherie Helstien
Roosevelt Island, New York, NY 10044

The airwaves are a public resource. Don’t hand them over to the fat cats to use as their own private money-making machine.

Brent Costain

Public airways NEED to remain just that: PUBLIC.
If the federal government continues to consistently concede to the desires of large greedy corporations... It will be necessary to change the words of our National Anthem. We will no longer be living in: "THE LAND OF THE FREE". The absurd twist is that we will no longer be living in: "THE AIR OF THE FREE", either.
The FCC needs to recall the basic fundamentals this country was based on and follow through in upholding conscious decision making that strengthens these values.
KEEP PUBLIC AIRWAYS FOR THE PUBLIC GOOD!

Please keep these airwaves public.

It would be a form of censorship, only people with money would be able to use internet, and those in power could easily access merit information. K. Arthur

Please find ways to make the lives of citizens better not more expensive.

My daughter is scared of watching a "war" (id est, "invasion") that we cannot justify.

I am opposed to any permanent assignment of broadcast frequencies to commercial enterprises; where appropriate, they should be leased to the highest bidder for short periods (up to 5 years.) Internet-carrying frequencies should never be assigned in any way to commercial enterprises.
Kathryn Jones  
Springtown, PA 18081

Roald Henderson  
Chicago, IL 60613

Robert L. Jones

Well the greedy are at it again, something else to be taxed on as if we don’t have enough of that to contend with, an most of them are illegal, but may the administration is going broke, who knows as they don’t tell. The list of taxation goes on and on beyond most everyone’s imagination. We need to reinstall the Constitutional form of taxation and not go beyond those limits. This would eliminate most of the parasites and give we the people a chance to breath again.

The day of the behemoth corporation being perceived as the benevolent provider is over. It is clear that once the big boys have destroyed competition they don’t look for ways to save the consumer money, rather they look for every way to maximize profit, knowing that consumers are easily duped and unable to fight the corporate legal departments. It’s time to protect the consumer. The marketplace clearly will not protect the great societal good. End these corporate giveaways and monopolies. Competition is good. Monopoly is in itself self-serving and good for only the party holding the monopoly. Our airwaves belong to everyone.

The general public is just now becoming computer and internet literate as a large cross-section of people from all walks of life. The Internet is the greatest tool for creating opportunities for people since the invention of the telephone. At the same time, costs for access to the Internet and telephone are mushrooming, and this is no time to make it more difficult or expensive for the common man to participate.
PLEASE, do not allow the huge commercial conglomerates to control access! Air space for this kind of communication should not cost anything more than people pay already for their internet and phone access. And we can be sure that if the corporations own this airspace, we will pay and pay and pay. Please don't allow the large corporations to take over airspace that could be used for the public good at minimum or no additional cost to the user.

It is in no way in the public’s best interest to let huge corporations monopolize the airwaves. These airwaves should be used to bring affordable internet services to everyone. Once these huge companies have control over all the airwaves we’ll never get them back. Its like deregulating energy prices. They would have huge control over what we all paid for our internet service. Please do the right thing and use these airwaves for public good.

Prairie Sievers

We should be tired by now of the monopolistic practices encouraged by the Bush administration. Neil Bush was responsible for the banking deregulation that has resulted in a one bank system, W has been lax on monopolistic regulation with the re-formation of AT&T as an example, Oil Companies and Agri-business additionally has eroded independent or family activity. Walmart has been allowed to grow unchecked, union free and globally outsourced and the expanded Network, newspaper, radio ownership makes Big Brother a plausible reality. Now the Airways are up for grabs -I for one say no!! No More!!

This portion of our public airwaves should not be turned over to companies like AT&T, Verizon and Comcast. They will use them for private enrichment instead of the public good. These newly available airwaves are a once-in-lifetime opportunity to revolutionize internet access—beaming high-speed signals to every park bench, coffee shop, workplace and home in America at more affordable prices than current internet service. Unfortunately telephone and cable companies don't want this competition to their internet service—they'd rather purchase the airwaves at auction and sit on them. Please mandate that whoever wins the auction cannot stifle competition and innovation.

Please, the internet helps us have an independent press which our Constitution protects please consider this for the sake of all of us American citizens.

Carol Johnson
Kansas City, MO 64113

My father was an FCC Comm and authored the BLUE BOOK, the fairness doctrine, and channels set aside for public radio/tv. FCC role is to manage the peoples airways in the public interest and give voice to the public. It must maintain competition and protection against corporate control, power, concentration, and thought. Protect 1st Amendment rights. BE Fair!

These airways belong to the people/nation and cannot be sold, only licensed for a period to time. And relicenced if deliver fair product in the public interest not advertizers.

Ann Durr Lyon
Mechanicsburg,, PA 17055

Please do not allow huge super companies like AT&T, Verizon, or Comcast have control over public communications. This would be a vital mistake that would forever change the landscape of public communications in our country, and would most likely be difficult to change. Let’s keep some things free from walmartization in America!

Tara Winters
Worthington, MA 01098
It should be implicitly obvious that the free flow of information is the essential backbone of a functional democracy. Our country is currently challenged in this arena, because of the monopolization of television airwaves by a few large communications companies. The internet, although far too many Americans still do not have internet access, represents a communications arena where ideas and information can flow in an unfettered manner. This has already been challenged by the mega-corporations efforts to strike down net-neutrality. I would hope the FCC would recognize this latest challenge to free communications for what it is, nothing less than a challenge to the very foundation of democracy in this country. Public airwaves for the public good is a necessity in a democratic nation.

Stephen Ludwig
Pacifica, CA 94044

Robyn Towner
hollywood, FL 33019

The FCC must see to it that the value of this public asset is maximized. Whether or not this bandwidth is sold to private entities, the FCC must maintain vigilant oversight of the use to which this asset is applied. If it is not well exploited by the successful bidder(s), then the rights to this bandwidth should be cancelled.

A free country is important, too - not just a "free" market.

Don't sell out the internet to big business.

We the People need our airwaves free of censorship and special interests. We have seen the harm they do.

Do not allow the airwaves to be taken over by AT&T.

Keep the internet free and open!!!

Why do we need to further privatize free air. Make the internet even more affordable.
keep the internet free

The average broadband download speed in the US is only 1.9 megabits per second, compared to 61 Mbps in Japan, 45 Mbps in South Korea, 18 Mbps in Sweden, 17 Mbps in France and 7 Mbps in Canada, says the Communication Workers of America. Big firms like Verizon and Comcast have done a lousy job of making service affordable and accessible to many Americans. Time to welcome some new blood.

Please make the decision that is right for the public good, not for the corporate bottom line.

Please keep the airwaves open!!

Please don’t sell our airways!!

Public is PUBLIC and commercial is commercial. We need BOTH. For the future’s sake, let’s keep it that way technologically. Remember, the earth (and all that’s in it) is LENT to us by our children.

Isn’t our government of, by, and for the people as opposed to of, by, and for big corporations. Protect the public trust not the profits of business.

Collected by MoveOn.org Civic Action
In this day of corporate greed at the expense of the common man, The FCC needs to take care of all the people, not just the those who want to get HUGE amounts to retire or move on to another company as a powerbroker.

L & M Hurst
Greencastle, IN 46135-8845

The public airwaves MUST (not "should") ALWAYS be used for the public good. That is why there is an FCC! Awarding newly opened frequencies such as vacated by analog TV must not be to a few large companies, especially those who have services they want to protect from competition.

The airways belong to the PEOPLE of the United States, not to CORPORATIONS. Regardless of the specious conclusions the Robber Barons drew from the 1886 Santa Clara decision, corporations are NOT people. The government of the United States is supposed to PROTECT the interests of its citizens, not to BETRAY those interests, though that’s all they’ve done for as long as I can remember.

If the FCC allows the corporatists to steal these new frequencies so they can not only ”...stifle innovation and competition...,” but so they can charge the American people exorbitant fees for the use of that which belongs to us, it will only add to the ever-growing burden the citizens of America are being forced to bear so a very few can get rich while working men and women see the American dream being stolen from them with the complicity of their government. Sooner or later, common men and women will realize how you have betrayed them, and the will rise up and crush the traitors who stole their country from them.

Keep your hands of Public Airwaves.
Mik Cribben
NYC, NY 10003

It is critical that Public Airwaves are used both to generate revenue for the gov’t and for the public benefit. All auctions should maximize revenue, but also be limited to a time frame and beneficial use then expire for resale by the gov’t. Fees should be collected on a timely basis or right forfeited and resold promptly. This will ensure the public gains rev for the gov’t forever and corporations do not sit on unused spectrum for years.

It’s time for the FCC to protect the public and not cave to large businesses!

Dorothy Miles
Brookfield, CT 06804

All you have to do is look at what has happened to radio, television, and newspapers in this country to see the effects of large corporations controlling our access and transmission of information. I recognize that these large corporations aren’t inherently evil, however I also recognize that their priority is not to the public, it’s to their shareholders. Recent history has shown that you can’t trust large public companies to do what’s best for the public, the only hope is for government to step in and keep everything neutral. Thank you for reading.

Michael Baran

Please don’t sell out our public airwaves to huge corporations.

Carol Knox
Tallahassee, FL 32301

Why should I have to pay someone to use for my own and for public benefit a resource I already own? Why should I pay a fee, a portion of which is directed without my concurrence to buy political influence, to help someone else use a resource I already own to lease it back to me in perpetuity? It makes no sense. This country is far behind Japan and Europe in offering broadband service and the corporations likely to win this auction will continue to squeeze as much profit out of my pocket as possible while slowing investment in the faster services the public needs to grow our economy and educate our children. If this FCC does not mandate responsible corporate use of our public resource, a change in leadership will have to be made.

Daniel Pirofsky
Portland, OR 97232

Tammy Larson
San Jose, CA 95125

Bret Kuhne
Brooklyn, NY 11226

Privatizing public airways will continue the current high costs of internet access for the middle class. Where I live, there is only one option for cable/internet, and it costs nearly $100 a month for the basic service. Although privatization theoretically drives down the cost of services through competition, these monopolies will continue and the I, the middle class American, will continue to pay outrageous costs for what has essentially become a necessity. Once privatization occurs, there is no going back, and you will only have hindsight to show you what you should have done. Please make public airways public permanently. Don’t give into big business, whose Bottom Line and Stockholder Accountability signify the lack of morality in American business today.

the public airways should be for the public and not the big companies.

Sherry Preston
GRAND JUNCTION, MI 49056

We’re urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves. They also shouldn’t be able to tell their wireless Internet customers which websites they can access as they do now. And just as phone companies can’t tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.

Linda Whitsett
Alexandria, VA 22303

Quit stepping on the little guys!

I believe we need to protect the public access to the internet, just as we protect it in other communication avenues.
Jill Hai
Lexington, MA 02421

Honestly, now, is the government just trying to stifle the internet? First that whole net neutrality issue, now this? Competition keeps big companies on their toes and makes sure that business stays honest and fair in its dealings with the people. Let the people have the air, and let the big companies compete for their share of it like they should. Just giving it to them, whatever the price tag, allows them less responsibility to the public.

Rev. John Byrne

The public portions of the radio spectrum are already overcrowded to the point of being unusable in some urban areas. With the future of technology moving towards the wireless, the public in general will require more available spectrum in order to meet these needs. The large wireless corporations can utilize the comparatively vast spaces more efficiently and still meet their own needs without crowding out the public.

Windstream - my phone provider - just raised my bill by $10 monthly for internet access. This will give me nothing – it would just take away internet access if I drop the service. This is an yet another outrage and I want to see something done about this one. Please respond.

The free access to the internet by the public is our best hope to keep an informed citizenry who participate in democracy. Corporations should once again be held responsible to prove to congress annually that they are operating for the public good or have their charters revoked. Corporations and the present administration (G.W. Bush) have reached a fascist level of connection that is rapidly eroding democratic governance.

Enough of the privatization of common space. There are some things that it should be impossible to fence off as private property; clean water, clean air and the airwaves are just some of them. We are witnessing a process in which every bit and piece of America is being auctioned off to corporations, who (unlike governments) by definition have ZERO responsibility, even in theory, to the public (except in their role as consumers). Handing over public space to enormous, private hands is therefore EXTREMELY dangerous. Unlike corporations, the FCC DOES have a responsibility to be vigilant of the common interest (and NOT the interest of corporations). I strongly urge the FCC to take this point into consideration and defend that shred of public space that is the airwaves by making these off-limits to private for-profit interests.

We’ve given radio away to big business-only college stations and a handful of independent stations provide diversity. Internet radio was our only hope—but the increased royalties will kill that. The vast majority of that money will go to big business—eliminating exposure for true musicians. Now is the time to allow the public access again to the frequencies—not homogenized big business.

Paul Hoeschen
Santa Clara, CA 95050

Jack Grossman

It is so wonderful to be able to access on the Web all types of information written by people and companies of all levels of education and experiences. It is wonderful to be able to upload information to the web and know that your organization or company or personal blog has the same chance of being reached as other companies and organizations. Please keep the public airwaves for the public good and not just for the benefit of large corporations and businesses. Thank you.

Jan Newton
Wi, VA 23188

Keep the airwaves public and out of the hands of AT&T, Verizon etc.

Catherine M Podolin
Milwaukee, WI 53217

As a librarian I can say with certainty that most people still do not have Internet access at home. They use our computers exclusively. If libraries are soon to be faced with increased costs for access we will have to stop offering service. Please think before you act on this.

Leanna Cowan
Alvarado, TX 76009

Anything that has ANYTHING to do with "public good" is a threat to the Bush regime. I can only imagine what goes on behind closed doors between the White House higher ups and their clinger-ons.

Jimmy Carter was right. Bush is the worst president in the history of the United States. I am just sorry former president Carter so tried to apologize. That is something I would never do.

I believe the airwaves should be used for the public to remain affordable. If given to private companies the prices will spin out of control. Just look back what happen to cable TV. Almost every year prices are increasing. We were told that most of the channels would remain free of advertisement. Now look what has happened, not only do we have to endure more advertisement, no the price of watching these has been unloaded to us.

Rolf J. Theurich
Dyer, IN 46311

This form of communism and monopoly by big companies must stop! Every day the act of “Freedom of Speech” is further strangled by restraining our sources. End this corruption today! Without the customers these companies are nothing.

It is essential now to prevent large corporate interests from stifling a healthy and creative diversity in broadcasting. Our free press and free expression are in serious - even dire - peril, to the detriment of innovation and invention. Don't allow this to happen - there is a better solution.

Dear FCC, the air waves belong to us not the
Roland Farmer
Charlotte, NC 28270

If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves.

Dear FCC, the flow of information is about to become as paramount to progress as electricity was in the 1900's. The newly available radio spectra must not be "given away" to private commercial interests. It must be protected and remain available for public consumption, in the spirit of HAM radio, GPRS, Wireless internet devices, etc.

It is time to give the American public some advantages and voice. Big money is stealing the rites of citizens.

Do the right thing, FCC. For once.
Justin Ferguson

I have little faith that the FCC, like all other government programs that are supposed to act on behalf of the people, will act in manner that benefits the people and not corporations, I only hope my cynicism is not again confirmed.

Government of for and by the people or of for and by the corporation...seems their money has made that choice for you.

Keep air waves public

Do not vote for this, these big corporations are making enough money as things are now. We are all squeezed down to nothing. We cannot allow these people to control even more and make us pay more for what should be free.

IT IS IMPERATIVE THAT THE FCC MAKE THE NEW HIGH SPEED SIGNALS AVAILABLE TO THE PUBLIC WITHOUT AT&T USING THEM FOR CORPORATE ENRICHMENT.

Reuben Starkman
BOYNTON BEACH, FL 33432

Please protect the public assets from being completely overrun by corporate interests.

Darlene Cohn
Valparaiso, IN 46383

The very thought of turning over airtime to major corporations is despicable and shows the level of corruption and greed in our government! Hasn’t the Bush Administration been destructive enough? The FCC should KNOW the ramifications of this act and forbid such blatant corporate monopolies!

Anne Marshall
Hollywood, FL 33023

Please retain the public airwaves for the public! Please do not "give away" our legacy of using the public airwaves for the good of the public. Without oversight and through the legal, but deceptive agendas of corporate America, our public airwaves will be subverted to predatory corporate capitalism, and benefit the greedy who really aren’t interested in these airwaves for the public good - unless there is money in for them.

Remember, the Oil crisis we’ve been experiencing for the last twenty five years? The Oil Barons have already set up their fall back positions on energy. When the fossil fuel future begins to crumble as to supply, no problem. The Oil monopolies very quietly bought up all the coal supplies when coal energy became a bad source of fuel. However, they have just shelved the supply waiting for the moment when coal resurfaces as a fuel source. The monopoly game then begins all over.

The auctioning of our legacy and airwaves to corporate America will go the same way as the coal supply takeover plan, which is a work plan ready and waiting to happen. Please do allow another of our precious resources be "outsorced" to the highest bidder. Government has a responsibility to serve its citizens, and this is one such time and issue, in which, we need our government to protect us, the citizens. Thank you.

Queen Creek, AZ 85242
Turning over public airwaves to private Enterprises will result in the loss of public airwaves. We NEED PUBLIC airwaves in an OPEN society ... trying close things down on us Big Brother?

Robert Scheffel
brewster, NY 10509

Peter Zummo
Staten Island, NY 10301

Sam Clemens
encinitas, CA 92024

Public means for the public! It does not mean that private industry can scoop up a resource and then charge for the public to use what is supposed to be theirs to begin with. This country is being run by businesses, not politician doing the will of the people, and the attempt to steal the freedom of the airwaves is yet another piece of proof of my allegation. Donna Presnell

The Internet needs to be controlled by a non-commercial entity.

Furthermore, freedom of expression can be limited by corporate control. Corporate control can also be responsive to government propaganda.

Please keep our public airways public. don’t sell or give them away to big communication giant businesses for their profits.
FCC: You are a PUBLIC Agency charged with seeing that the public airwaves are used for the public good. Do NOT turn them over to big companies. I urge the FCC to mandate that whoever wins the air wave auction be kept, by law, from stifling competition and innovation.

To Whom It May Concern,
Time is running out for the greedy ones of this world, they soon will face their day with the Lord. You can't profit off of everything and keep expecting people to go along with your plans of more power and money eventually those who are passive will explode and war will begin. You and your shareholders have more than enough, it is time to realize who really is running the show are the same ones you continually steal from. I pray for you and hope you see the damage you are doing and that one day you can give back what you have taken, that is the only redemption there is. Gandhi said it well. God Bless you all and again I pray that whoever is reading this has a change of heart and starts doing things for all the right reasons and not because of greed and power.

God Bless you,

In a time when information and access to it are becoming increasingly valuable commodities, it would be imprudent to curtail the economic, educational, and democratic benefits that could arise from providing public access to more airwaves. The rise of the internet over the last decade and a half has revolutionized commerce, primary, secondary and post-secondary education, and even how the media and government are run. The key to this growth is increased public access - please accelerate that process.

Please help keep true freedom of expression and individuality available for public and don't let the corporations have sole rights over what we can do. I know it would benefit the companies, but these multi-billion dollar companies don’t need unfair advantages to make their billions of dollars at the cost of my freedom, or to my disadvantage. I am of the generation that lives on the internet, always keyed in with wireless devices and telecommunications. I don’t mind paying for some services but there should still be room left for innovation, small businesses, and free services everywhere. Otherwise acts of censorship would be permissible and unstoppable. We need free press to speak out on our beliefs and on our behalf. Please let us keep our freedoms!

Michele Hill  
los angeles, CA 90046
the airwaves are a public trust - or at least that was the way they were viewed when I was growing up. I’d like to see them viewed that way again. Its important that we not give away for cash today a resource that we may well want to use in more productive ways in the future. I support a limited lease of the space with firm requirements for equal access by all the public and for equal time provisions for all advocacy undertaken on the public spectrum.

Vincent Casalaina
Berkeley, CA 94704

Without public airways we could never have had Radio Free America which aided spirits, truth, and freedom all over the world!

Jennifer Pence
Mountain View, CA 94043

With the current trend in media and communications being one of more and more consolidation and less diversity it troubles me that the FCC is so willing to sell off what is left of the public airwaves to these company's who have shown time and time again that they can not be trusted with great public asset. I think the FCC needs set aside some the bandwidth for Civic and Public use and not sell it all off to a few large corporations.

David Claver

The public airwaves should be used for public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market!

Keep the "public" in "public airwaves." They belong to everybody not just those companies with tons of money.

The internet is a human resource that should be the same cost to everyone, regardless of size. Don't let it be monopolized by those with money!! All the character and individuality will be lost! Remember, Time Magazine made "YOU" the person of the year this year – for a darn good reason. The internet has enabled a human revolution; don't stop that!

Annette Gallagher
Nashua, NH 03062

Hello,
Please. Let's not allow the federal government, who is supposed to be working for the best interests of the public, to sell our airwaves to the big behemoths. It's not good for the masses to stifle innovation and competition. That's not what America is all about.

Thank you for your time and let's make sure we do the right thing here, okay? (-:

Sincerely, Tony Huszar

Make sure the internet stays free and open to all. The big carriers are already too big, and need no favors from government.

John H. Sadler
Baltimore, MD 21210

The public needs to have the ability to be protected from the private interests from big companies. The private institutions have a duty to their shareholders, not the American public. It is the duty of the FCC to provide barriers to these kinds of actions. We cannot allow this legislation to go through.

Sincerely,
Clifford C. White

The rich get richer and the poor get taxes ... I pay plenty for the benefits I derive from cable, Internet access, phone service, cell phone service, and long distance. Then I pay TAXES on all of this as well. The FCC is supposed to protect my interests from corporate greed. Giving huge companies the opportunity to block competition is NOT in my interest or the interest of a free market.

A.E. Stenzel
El Cerrito, CA 94530

The first amendment to the US Constitution guarantees freedom of speech. Keep the public airways free and public. Do not allow privatization of our airways.

Lawrence Essmann
Ballwin, MO 63011

Mark Miceli
Crestwood, KY 40014

In Frederick, MD, Comcast (was Aldelphia) is the only cable provider. The prices are high and the service is poor. I constantly battle with the thought of disconnecting my cable and internet. But my profession relies on a high-speed internet connection and with the lack of choices (or any choice) I am stuck with only one option. I don't understand why the cost of cable is so high? As technology becomes more available prices generally lower. I have only seen the price of cable and internet increase every year.

A reasonable portion of the airwaves and broadband must be maintained for public access. Loss of this is indeed a threat to our democracy as open expression of differing views will be sanitized by what will amount to state run media. Do not allow this to happen. You, the FCC, are tasked with regulating the use of broadcast media therefore you should insure that that regulation is properly instituted for all of the people and not for a select few who agree to do the bidding of a small group. If a select group gets all of the benefit then they should be the only ones required to pay for it. If the rest of our voices and opinions cannot be fairly heard then we should not be billed a single cent to support a narrow margin or narrower minds.

My grandchildren live outside of Richmond Virginia in an area that does not have internet access. This is only 20 minutes from the city limits mind you not a great distance. I want them to have what seems to be needed in this society now, access to the internet. By the way this is not even 90 miles outside of Washington DC. So get a grip and work for our children everywhere in this country! Lora Lynne

Lora Lynne

I have only ONE option in my neighborhood for decent internet service which is critical for my job. It is outrageously expensive, but I have no alternative. I am a prisoner of Comcast. I do not want to add AT&T, or any other corporation to that list. I want affordable, fast internet service from a provider that cares about fairness and the public good. I spend time each month researching other options for internet service and there is nothing out there yet. It is time to give US, the American public, CHOICES. Give the corporations the power and you let us know who really matters to you. And that says A LOT about you. We elect you. Not corporations. Think about your impact. Think about who you should be working for. It is time to think about us.

Communication is the backbone of this country. It was already compromised when the antitrust laws for the media were sacrificed, leading to hostile takeovers of companies that were once the watchdogs and voice of the people. Don’t allow us to go further down this route. Protect American citizens’ ability to communicate with one another!
Laura Lin

I live in a remote area, where I'm unable to get affordable internet service that isn't dial-up. Don't make it even harder for people like me.

Please don't allow theft of our public airwaves. They should be for common good, not profiteering!

The FCC has blown it for years - allowing corporations like NewsCorp (Fox News) to propagandize and spread outright lies on and across our public airwaves. STOP!!

keep the public airways free and public!

the public airwaves are just that for the public good. Let's keep it the way it is. Everytime government wants "progress" it usually means that the public is screwed.

Collected by MoveOn.org Civic Action
HELLO! Can anybody hear me? In my half dozen decades on this planet I have witnessed unbelievable advances in global communication, and more recently a great divide in the electronic broadcasting sector. Hopefully, my children will become adults in a United States which protects their constitutional rights. The First Amendment is irrevocably linked to public control of most airwaves.

Incline Village/Lake Tahoe, NV 89451

Big business shouldn’t be getting any more perks then they are getting now. Keep these airwaves public and free
Lynn Gipson
Walled Lake, MI 48390

Chad Hensley
Elk Creek, VA 24326

Jackie Hickey
Chico, CA 95926

no more big business
Blair A. Rieckmann
Holland, MI 49424

Jennie Johnson
Austin, TX 78746-7439

What is happening to this country? Does everyone have a price now? This country is falling apart because people care more about who wins American Idol than what’s happening in our own country. Our young people don’t have the knowledge or guts to stand up to idiots who run big organizations like the FCC. Shame on you - some day when this all comes apart, you can all blame yourself as will your family.
Irene M. Best
Lima, NY 14485

The "AIR" is Free, We need to allow the "Airwaves" to be used by the public, NOT by a limited few to make excess billions of dollars.
I am so tired of OUR Government "allowing" big businesses to charge us for every little thing, and we have no choice but to pay.
Charles E. Bishop
Burleson, TX 76028

Clara Sharp
marietta, GA 30008

Manchester, NH 03102

Stifling innovation will hurt our country in the long run.
Chelsea Johnson
Santa Cruz, CA 95060

I am tired of the government trying to find ways of shirking its responsibility to the people of this country by continually outsourcing anything and everything. If public airwaves are turned over to private corporations to manage, it is the same thing as outsourcing labor. The more outsourcing of government responsibility, the less American the United States of America become. If you’re going to outsource the government, we might as well become English colonies again.
Kimberly S Augustson
Chicago, IL 60618-1672

Raymond Soto  
Carolina,Puerto Rico, PR 00924

These airwaves are for the public only... Not for corporate profits. The TV and radio waves need to go back to the public and the Fairness Doctrine needs to be reinstated. No ads during news, either.

Tim Harris  
Hollywood, FL 33021

Dick Fischbach  
Arvada, CO 80004

Joerg Rieger  
Dallas, TX 75243

"The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless market."

Samuel Rouslin  
salem, OR 97304

Tom Martin  
Bulls Gap, TN 37711

I urge you to keep the public airwaves public and not turn them over to the corporations.

Joan Mceldoon  
Mount Vernon, WA 98274

Public Airwaves are Public Airwaves not Private Airwaves.

Richard Meister  
Batavia, IL 60510

Mark A. Libecki  
Vermontville, MI 49096

James D. Llewellyn  
Springfield, MA 01109

We must allow for freedom of competition on our airwaves. People need to have REAL and plentiful choices, and as such corporations need to be held at bay for the public interest.

David Paul  
Turlock, CA 95380

Judy H. Cockrell  
Whitefish, MT 59937

The airwaves should be open to all citizens and not in the monopoly of large companies.

Stanley Wilson  
Austin, TX 78745

Look no further than Big Oil and what limited competition has done for the oil industry and to the consumers. The same will happen in the communications industry if Mega companies are allowed to buy up all the competition and sit on un used air frequencies.

William Currie  
daly city, CA 94015

IF YOU DECIDE TO HOG OUR PUBLIC AIR WAYS, I WILL LOOK FOR DIFFERENT SERVERS.....

Ferenc Gyulafia  
DENVER, CO 80223

Andrea Jayasekera  
Los Angeles, CA 90065

Dear FCC-
Please use all public airways for the public good!
Large private companies generally operate to maximize their profit, with little concern for the public good. Please don't let that happen to the public airways.

Donna Poulos

To Whom it may concern,
I am very alarmed and quite concerned to know that the Federal Government is considering Corporatizing those airwaves currently considered public domain. I feel this is not in the public interest and will benefit the very few that sit on the board of Directors to a selected few companies as well as those that are priviledged enough to have discretionuary cash to purchase stocks in those companies that would benefit from such a corporate handout. Please consider the needs of the people, not, in this case, the needs of the CEO.
   Michael Ewing
   Richmond, ME 04357

Brian Flaherty
Mountain Grove, MO 65711.
Keeping the public airwaves available for public use means more affordable access to information (i.e., the internet). That in turn means more an informed populace and more democracy! Obviously the thing to do is protect that resource, not hand the henhouse over to the fox.

Alison Maynard
Denver, CO 80222

We’ve seen what happens when all public space becomes a source of revenue for private corporations-only customers who can generate money get the service. The public airwaves should be public and not “sold to the highest bidder.”

Connie Knapp
Ossining, NY 10562

The public airwaves are, by definition, the property of the public. As such they must remain in the public domain, unless - by some highly unlikely event - the results of a nationwide referendum (not yet held) were to indicate that a majority of US citizens is willing for these airwaves to be sold off to commercial interests. This country stands for freedom and the rights of the individual. A national public property, such as is under discussion here, MUST be retained as a general public resource from which all citizens can benefit. Selling off this unique resource to wireless and cell phone companies would control and severely restrict public access to this efficient, community-building, educationally important means of communication, which in the long run, if it remains free and open to the use of all, can have a very beneficial effect on the entire nation and its future economic and social development.

Thank you for this opportunity to comment on this issue of ownership of the nation’s airwaves.

The airwaves belong to the people!! Keep it that way!! Bring competition into the bidding process. The cable industry is a classic example of why the airwaves should remain in the hands of the public that it belongs to! There is NO competition in cable, we are forced to pay exhorbitant prices for products we don’t even use and we can do nothing about it because there is no competition! Do the RIGHT THING and stop big communications corporations from owning the airwaves. People are angry out here - START LISTENING NOW!!!!

Rafael Morataya
mpls, MN 55414

If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves. This is just the sort of anti-competitive behavior that leads to monopolization and price fixing/gouging by the large corporations looking to make a buck, regardless of how they hinder development and future accessibility.
They also shouldn’t be able to tell their wireless Internet customers which websites they can access–as they do now. And just as phone companies can’t tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.

Tony Doty

When I purchased my cell phone many years ago it was with cingular which has been "taken over" by AT&T. When my son in Washington DC was looking for an internet provider he had little if any "choices" and is paying premium not just for internet but cable and long distance telephone - all "bundled" with comcast I believe is the provider and at a high cost. Because I live in a rural area of northwest conn. I also have little choice in internet provider especially if I want high speed connection. This is an abomination - the consumer is once going to get the bum deal and the almighty corporations and their stockholders will reap the "rewards" - enough!

Quit giving our airwaves to big corporations for money grabbing.

Use the public airwaves for public good, not private profit.

It is important that we don't block competitive entrants into the marketplace.

Public airwaves are being used and abused by advertisers. The rate I pay for Comcast services is outrageous. Our country needs to keep pace with Korea, Finland, etc. We are behind the curve. Public airwaves should be used for the public good.

Companies are already out pricing cable, high speed, land line phone service and anything else they can get their hands on, please don't let them do this to wireless internet!!!
Please keep the public airwaves public, and do not turn over to corporate interests

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

I'M TIRED OF BIG COMPANIES ELIMINATING COMPETITION FOR THEIR OWN FINANCIAL GAIN. QUIT SCREWING THE AVERAGE CONSUMER FOR ONCE... JUST ONCE THINK ABOUT THE MIDDLE TO LOWER CLASS CONSUMER WHO ALWAYS GETS SCREWED IN THE END. I WILL DROP AT&T LONG DISTANCE AND HIGH-SPEED INTERNET IF THIS MEASURE PASSES. AIRWAVES SHOULD BE PUBLIC, NOT PROPRIETARY; IT'S NOT LIKE THESE BIG COMMUNICATION COMPANIES AREN'T RIPPING OFF ALREADY.

The public must be allowed to have access to these channels, not blocked by greedy corporations who only look out for them selves, don't care about their customers much less the people working for them. This must not be allowed to happen. Major corporations already control what we hear and see on major television and on the news, lets keep the air waves free so something like the free speach ammendment doesn't get shut down because of the lack of funds available to get someone online in the first place.
    Corey Baumgardt

I urge you not to turn over any portion of public airwaves to corporations. These must remain public domain!

George Gomes
Roseville, CA 95661

Consider the ratio of frequencies assigned to public service, excluding the military. Without the military we would not need airways.
The public sector has not proven to be good stewards of what they have. Note the drivel and outlandish behavior of their programming.
The Public with the exception of local news the only TV channels that I watch are in the public sector and are too few. The same for Radio! I just finished a 9 hour car trip from Florida to NC and spent most of the time looking for NPR!
I would prefer that 99% of the remaining stations were eliminated entirely, not proliferated.
Do not sell, it is a cheap stupid idea.
You see why I am not a politician, but I do pretty well in business.

People - The auctioning off of the air-waves to companies like Comcast, AT&T and Verizon is the would lead to a disappearance of free internet service as we know it. Many poor folk would suffer by having to pay for usage time. The computer as a schooling tool would be curtailed, and for those for whom the internet is their only means of communications with the outside world it would mean isolation. Please, please do not allowed the airwaves to be auctioned away to corporations whose concept of controlling the internet would be contrary to the public interest.

I am a Verizon customer and I use BOTH MySpace and Facebook. Please DO NOT let this happen and give these public airwaves to those greedy companies. I want Internet access to evolve even more, and the companies won’t let that happen if the airwaves are given to them.

Renee
Hampton, VA 23320

I am an artist and I communicate with other artists via the Internet and World Wide Web. It is of prime importance to my work to be able to access the community of artists and to be able to show documentation of my work. The airways should be primarily for the public good and public access. Allowing broad commercialization of it which limits access and increases costs should not be allowed. Please do not allow this to happen!

Sincerely

Not everything can be bought and sold. Capitalism only works when it has checks and balances, and selling airwaves to limited companies undermines America's original concept of capitalism that gives every person an equal chance to succeed. By privatising to big business, we are creating a strict class and money based society and limiting the public good— in this case, education and information. Selling the airwaves would be halting the progress the founding fathers set rolling years ago.

Why isn’t there one channel on radio and on TV and that is given over to electoral debates so that no candidate has to mortgage their souls to corporations? Then they know the public could listen to their points of view without having to raise millions of dollars for ad campaigns that are only sound bytes and not real thought? How about that for a great public service from the government. Never mind giving the corporations one more nail in the coffin of free speech.

Jesse Kaufmann
Hillsborough, NC 27278

The airwaves must be for all Americans if we as a nation want to move ahead of globalized industry.

The United States of America is of the people, by the people and for the people. It is the nature of our unique political experiment and led our government to acknowledge that the air we breathe, as the water we drink, as the airwaves carried over our free American skies, belonged to the public domain. Once a benevolent monopoly was given to the Bell telephone company for the military safety of the Union, and then it was taken away for the good of the people. Without a free World Wide Web free press in this country will be affectively silenced, it is the last bastion of accessible grass roots communication. It is fundamental to our philosophical grounding as Americans that it should be protected and not given away to the already too powerful corporations. It is always prudent in the face of great power to reserve some kind of balance in the event that power becomes a danger to the common good. To give up the current World Wide Web is dangerous beyond belief.

Stop giving away public property which belongs to the American people, not the President and not any political party.

Gerald Teran
Paxton, MA 01612

First, I believe in capitalism, and that doing business is good for the economy, but when the big companies want to monopolize our very communications and stifle new business, that is NOT good for business. Please set up rules to keep the big boys from having the whole pie. Leave some for the little guys who WORK for a living.

James R. Jackson
Havre de Grace, MD 21078

With deficits running high (especially if looked at with normal accounting methods), with expenses for the Iraq and Afghanistan wars and other "top priority" issues continuing to increase - can you please tell me why the FCC would be supporting a sale of broadband at fire-sale prices? Please do not simply hand these over to private companies who are only interested in acquiring them to squelch competition. This should be a market-based economy - sell the airwaves for a realistic price - to the highest bidder, but for the public good. These are a national resource and it would be bordering on criminal for a governmental agency to give these away simply to safeguard the near monopoly our large telcos hold over the existing airwaves.

Thank you.

Darren Smith
Bainbridge Island, WA 98110

## The Communication Revolution

The communication revolution is more and more getting to be helpful only to the richest Americans. Once again, corporations, whose motivation are profits and the control over people's choices, are making a bid to maintain their control and block access for millions of people who cannot afford their services. The public good is not served by corporations. We are going to have to guard against this greed and ensure that public rights are safe guarded. Please, carefully consider what you are going to decide because it will affect us for generations to come.

Thank you.

Linda Knudson
Gig Harbor, WA.

The Internet has been the great equalizer in the media conglomeration over the last 10-15 years. It is imperative that access to the internet remains Net-Neutral. Media consolidation is already a threat to our democracy - the airwaves - be they Radio or Television or the Internet are part of the "commons" and therefore belong to every American and every American should have equal access to and to present written and video content without restriction, be that restriction physical or monetary.

Thanks for you considered attention to this matter - Dr. Janet McMahon

Chet Zebroski
Ignacio, CA 94949

This is one more step toward a completely fascist state. Taking away public airwaves is outrageously un-American. I have been forced to become a Comcast customer because there was not an alternative. This is extremely frustrating, as well as disturbing that there can such incredibly large conglomerates, which own multiple media outlets. Capitalism is about competition, when business is done the way it has been for the last ten plus years, the system does not work.)The decision to hand communication outlets to the few you will greatly decrease the freedom of all Americans. I am absolutely appalled at how far the FCC has gone already. The craziness needs to stop here.

Des Moines, WA 98198

Collected by MoveOn.org Civic Action 1973
I believe that widespread access to public airwaves is critical to the strength and vitality of our democracy. Private companies should not have control over this valuable public resource. I demand that the FCC take specific actions to prevent private companies from dominating the development and innovation of the public airwaves, which must be preserved for the public good.

Please make the public airwaves openly accessible in a fair and competitive framework, allowing for journalism that serves the common good. I will advocate firing/impeachment of the FCC decision makers if the public good is not served.

Bobbi Bailin
Falmouth, MA 02541
Protect these airwaves for public benefit! Emergency responders need clear and open channels for coordinating their vital work for humanity. This is a critical problem around the nation. America doesn’t need more corporate controlled “infotainment”. Our civic dialogue is very sick, with extremely few avenues available for the possibility of substantive challenge to inaccuracies and distortions, and for the wholesome, energetic dialogue of Reason; the basic foundation of a Democracy.

Allowing corporations to buy up and hold the airwaves further strangles our democracy by their “gate keeping” of thoughts and information. This includes the Internet. Indeed, the remaining public ability or reflex of independent thought and critical analysis is at stake.

We must protect our airwave channels, kept free for the public, for free speech and expression of rational thoughts, vital to our local communities and our nation.

If you, FCC reader of my statement, do not understand this, you must recuse yourself from making these decisions, as you are not fit or able to be in such position of authority.

How much are we going to SELL OUT before it all ends! SELLING anything that belongs to the American people was not what was intended by the Declaration of Independence or the Constitution. WE THE PEOPLE have fought, died and sacrificed for this country - it belongs to US - not big business - THEY’VE TAKEN ENOUGH AND WILL KEEP TAKING AS LONG AS THEY ARE ALLOWED TO... It must end NOW. Why did they all die? For $$$$$$$. NO - NEVER.

Isn’t the whole point of media channels such as television, radio and broadband to exercise freedom of speech? To let it fall into the hands of these companies would only insure that this freedom would come at a great cost to the American people. Freedom of speech is freedom of speech for every American, not just those that will be able to afford it.

Jessica Hauge
Raleigh, NC 27616

Please look out for OUR assets and not monetize each and every opportunity that is available. Why not monetize water and air if that is where we are going.

Charles Ziegler
sausalito, CA 94965

A handful of large corporations already own more than 90% of our television and radio. The results are obvious...a lack of variety and alternative options. This must not happen to the internet.

The cell phone and internet access are no longer a luxury but a necessity in our lives, but the always upward spiral of their cost to the public is taking a substantial portion of a family’s income. The providers have made them like a rug that you cannot kick the habit. In my household alone, my family of 4’s phone bills, cable TV and internet access is in excess of $350+ per month. And on top of this, they don’t pass along the new features and technology advances without additional fees (I have Cox cable, phone and internet—there is now 2 different levels of internet speed available for a greater price—is this fair to charge more for an advancement that my subscription monthly fees gave them the money to perfect in the 1st place? The soo to be released bandwidth should not be sold to these providers, it should be provided to and used for the public good, maybe then these monopoly behemoths will truly realize what the real forces of competition were supposed to provide.

Kevin S. Clair

The fact that this isn't a major story on cable and network news is proof enough that this move needs to be stopped in its tracks! The news media is controlled by huge corporations and we don't need the same happening for the internet. Lets make wireless internet and the public airwaves competitive and available to all US citizens without companies like AT&T and Comcast lining their pockets with more government and consumer cash.
Monica Boyd

“Public radio is a free means of communicating American culture, art and information to all people. By commercializing any aspect of it, you do all Americans a huge disservice! It is necessary to keep our airwaves free!!

Jessica Doughty
Jamaica Plain, MA 02130

Public airwaves should be opened up to competition and innovation, not held hostage in government supported monopolies. If America wishes to remain close to the cutting edge of technological innovation, we must urgently reform the way we manage access to the internet. The future is coming quickly, and we risk being left behind so that a few rich companies can profit from our obsolescence.

Gabriel Rey-Goodlatte
Oakland, CA 94606

we don’t need monopolized airwaves!

Patricia Justice
dallas, TX 75211

The FCC needs to remember that the public airwaves are just that - public. This is not something that the government has the right to sell off to sell off to the highest bidder, allowing private companies to control what the public owns.

Stephen Boyle
Chicago, IL 60607

Paul R. Simpson-Jones
Sacramento, CA 95814

Zack Funkspiel

Dorothy Backstrom
Bloomington, MN 55438
Please do not allow big corporations to monopolize such a large spectrum of bandwidth for their own private gains.

Please keep our airways free and safe for the public who owns them.

We cannot allow corporate interests continue to dictate and define 'public interest.'

Please don’t allow Time Warner, MSN, Verizon, Comcast, etc. to become the defacto corporate equivalent of the Chinese government - restricting website access. These large corporations are not in need of any government assistance, but democracy, in the form of open and unfettered, uncensored - and, in fact FREE internet service is most desperately in need of government support.

John K Johnson Iii  
flemington, NJ 08822  

Verizon only allows certain types of phones with limited features on their network. That's why, after 13 years, I'll be changing cell phone providers in June. That's the scheduled release date for Apple's iPhone, which only AT&T will support. Why should any carrier dictate what features my otherwise uber-capable handheld device will be "allowed" to utilize? Please say NO! to the big boy gatekeepers and keep our markets open to the entrepreneurial "Small Fry" who bring so many innovations forward.  
Joel Ross  
Seatac, WA 98188  

As a senior on a fixed income, I thoroughly enjoy the internet. I sincerely hope that you do not give the big corporations control of this wonderful outlet.

The strength of our Democracy is losing ground to corporate and political power interests. The only tool available to our citizens is the dissemination of information and readily available communication. To that end the radio spectrum is a public natural resource and must remain available to the citizens of this country, not sequestered by special interests.

Hugh Sutherland
Goleta, CA 93117
For God’s sake, be Americans, and choose on the side of freedom. How could you give away this public property to a few giant corp.’s when we have Americans fighting and dieing to protect our freedom? Please, be Americans.

We need to slow the trend toward oligopolistic corporations buying up all competing resources. This is wasteful and undemocratic. The trend is reversing reforms begun 100 years ago by Progressives.

Not again. Does antitrust mean anything to you people?

Don Steiner
Sarasota, FL 34240

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market. Please heed this opportunity to stimulate the American people and our economy with new technology that would take advantage of this unprecedented opportunity!

Margaret Pennell
Sparta, NJ 07871

David Salmon
Van Alstyne, TX 75495

I am alarmed at the way resources held in trust for the good of the public – like the airwaves – are being turned over to the 'rapidly growing cancers' that are better known as 'the corporate media'! The public airwaves are our collectively shared 'commons'. The public needs access to 'our own' real news – our own real facts! The corporate media has been appealing to the lowest common denominator, because it's cheap and it's easy, and serves the immediate bottom line – not because their agenda supports the long-term health of our polis. Make sure that FCC policy ensures a responsibly informed and equally networked public, to safeguard an honest, effective democracy!

Corporations, hands off the Internet! Corporations have illegally usurped the public airwaves. American citizens no longer receive real news. Corporations actually do not have the rights of real citizens. Corporations got a tax break in exchange for expanding the Internet infrastructure. They stole the money by not keeping their end of the bargain. Some corporate executives should be spending a long time in jail.

We wholeheartedly believe in keeping our public airwaves separate from corporate mongels who’s interest is only to dummy public knowledge. If this country is to see a better future and progress for the good of all then we need major changes, but to hand over our public airwaves to big corporations, is certainly not proactive. Dian C. Mokler

Eric Olson
Minneapolis, MN 55405-3513
There needs to be more use of the airwaves by the real public and smaller local accesses.
Ralph Davis

PLEASE KEEP THE AIRWAYS FOR THE PUBLIC GOOD!!!!!!

Don Mears  
Dover, DE 19903

Ryan Harrison  
Tigard, OR 97223

I would like to see large corporations have less control of the airwaves, as well as other things that affect our lives. I particularly don’t want them controlling high speed Internet access, for then they probably would interfere with the content the public accesses by enabling the condition whereby only other large corporations could pay for the higher speeds. I and others of the public will not wait for slow Websites, but switch to a faster one, but hopefully these won't mostly be available from large corporate controlled Websites. In that case we would have the same Internet experience that we have with television and the news it provides. I call the television news "corporate news" as I'm certain it is filtered before it is aired. I find all kinds of news on the Internet that is not broadcast by television news sources.

Asher Golden  
Annandale, VA 22003

I want to use the airwaves for the public good - not for the profit of a few.

The FCC cannot sell public airwaves they hold in trust for the public any more than DOT can sell the highways it holds in trust. Politicians can. If the FCC is now composed of politicians rather than stewards of the public trust, we the people are in big trouble. I would encourage the members of the FCC to remember what the members of the DOE proposed at the urging of ENRON. DOE decided being a public guardian was not a good thing and now all Americans are paying for their malfeasance. Please keep the airwaves as a public trust; leasing with obligations has worked so far; don’t mess with what works.

Mary Welter
Chicago, IL 60616

Federal regulations all too often look to reward large companies, that are political contributors, rather than regulate in the interest of a broad citizenry.

Marion J. & Molly M. Rice
Athens, GA 30605

Dear FCC members,
I think it is critical that the public airwaves should be used to further the good of the public. Do not allow the upper hand to "corportate gatekeepers." Balance is so important. Paul B

Paul Bergman
Cincinnati, OH 45227

To Whom it May Concern:
I hope the motivation of the FCC is to promote issues for the PUBLIC GOOD not for big cooperate concerns. Please do your job and protect the people freedom to use the internet.
Sincerely,
Sue Zucker-Scharff

Steve Kern  
Westerly, RI 02891

Leslie Levine  
Golden, CO 80403

When it comes to allowing competition (against themselves), 'Corporate America' does NOT have an unbesmirched reputation. Has the F.C.C. already forgotten just how 'competitive' the telecommunications marketplace was under the MONOPOLY of 'Ma Bell'? Who amongst you, the F.C.C. commissioners, actually believes AT&T, et al, wouldn't use their control of *free* Internet bandwidth to Truly Control the content, or access, of any competitor, service, or other company THEY decide is a threat to their marketplace percentage? AT&T, Verizon, and Comcast canNOT be trusted to be fair, and the F.C.C. should no err in their favor.

It is no longer true that "What is good for General Motors, is good for the country." If it ever was true... Don't allow a handful of huge corporations take over these public airways and say that they are doing it "for" the public. They don't work that way. The Internet may be the last, best hope to keep freedom of speech protected. Since journalism and news media are increasingly outlets for "entertainment", rather than the 'free press' that the Founding Fathers envisioned, the Internet may well be the only remaining way that all of us Americans can hear what is really going on around us and also to be heard by our fellow citizens. Selling the airwaves is wrong. Don't do it.

We need to protect our country from economic monopolization! AT&T was directed by court order to end their monopoly several years ago and now by questionable business maneuvers they have managed to rebuild themselves as a monopoly again! Please do not ignore this important issue regarding our economy and democracy. We must allow small businesses to grow and thrive.
Sister Dianna Hughes Asc
Wichita, KS 67110

Mimi Evans
Seattle, WA 98121

As a part-time journalist, teacher and volunteer, I vehemently oppose the control of greater and greater segments of the press (both broadcast and print) by fewer and larger corporate interests. I have all but given up on TV as a source of news and informed opinion, read only sources such as the NY Times and Wash. Post (on-line) for print media, and listen to NPR and DemocracyNow! on the radio. The concentration of power, money, and control of the media has to stop NOW! I have voted in every national election since 1980 (except the 1984 election, when, as a college student, I found out that I had to register in my college town or get a mail-in ballot THREE MONTHS PRIOR TO THE ELECTION— but that is another story). I also participate on-line, sign petitions, call my state senators and congressional representatives regularly, and actively encourage others to do so. So listen up! The FCC and the federal gov’t needs to start breaking up corporate control of the media in this country, and not allow the “big fish” of the media to buy and consume the last of a dying and endangered species— independently owned and operated media outlets. In a bumper sticker phrase: JUST SAY NO TO THE RUPERT MURDOCHS OF THE WORLD! Darren M. Beal, former staff writer, Walla Walla Valley Times

Don’t let this become another reason for conspiracy theorists to say that this was just another incident of a corrupt government agency repaying the debt to those big companies that bought them.

Ed Teutsch

Abel Cavada
Corpus Christi, TX 78403

The cable we use is so expensive. There is only one company from which to purchase this service. With high gas and food prices, we are considering eliminating our internet. The internet connects us to the world. The internet helps to expand our grandchildren’s education. The internet takes us beyond the traditional way of learning and searching for answers. The internet enables us to go beyond our small world and see and hear what others do not want us to know. It contributes to our freedom. Gatekeepers controls our traveling, our thirst, our light, and whether we keep our bodies warm or cool. Do not take away control of our own minds...

Florence Frazier

If you want to sell or open for bid our airwaves that's fine as long as they are going to be used for the common good. Do not give our airwaves away to huge companies for free so that they can make more money. Make them pay for their usage and promise not to sit on them to stifle competition. Give them X number of years to develop the usage and then if they don't, pull the airwaves away from them and sell them to a company that will develop them for the common good. No refunds allowed, use it or lose it.

**FCC’s sale of our First Amendment Rights to the highest bidder may encounter constitutional problems during the next administration**

Collected by MoveOn.org Civic Action
The public airwaves should be for the use of everyone. To make short term gains by denying what could have long term benefits, you in the government are destroying democracy. You are playing nice with those who have the most money and not looking at who may be hired out as thugs by said families, namely terrorists and relatives of those families you’re playing nice with who have been paid to stay away. Do you want to recreate the 68’ democratic national convention? Is that what your ultimate gameplan is? Or maybe rather, undo what ”muckrakers” stood for? Well if not, that currently seems to be the strategy. It’s like the kids who graduated in the mid-80’s to challenge and defeat communism didn’t learn a thing. They’re still being led by the nose because of what blackmail their so-called ”friends” and former lovers have on them. That ain’t right. Who are we as a society to stand by and let this happen? If we’re nobody, then I guess it doesn’t matter if all us nobodies get together with all our money then. If what we do with it is our business, why should free market be run out in favor of international corporations and conglomerates? If ya can’t beat everybody, join us but leave your thoughts that cause snidely whiplash mustache twisting at the door. It’s thinking you can have it all like a friggin’ sociopath that causes universal frustration, dude! If it’s only in your heart and things begin at home, squash the violence.

John Wright
Vacaville, CA 95688

I have a small business in the edutainment industry. I am operating multimedia to market domestic and international sustainable foods. Tracking and operating multimedia is critical and access must become more robust in the U.S. We are behind other nations, even 2nd world nations in this aspect of the market. We have to play catch-up, not fall further behind.

keep public radio public

Jennifer Pierce
Bryant, AR 72022
I am a citizen of the United States of America. The public airwaves are my property, and yours. The corporations that want them are asking for publicly sponsored handouts. Is this nation socialist? Corporatist? You, the members of the FCC, will decide how our government operates in this case, and by what name our government ought to be called. The public will decide whether or not it likes the name, and the policy, and the future you choose, and make its electoral decisions accordingly. Support liberty and freedom. Do not hand them out to corporate thieves — leave our airwaves ours.

Gamelyn Dykstra

Ana Burleson
Visalia, CA 93277

Corporations and the government are already controlling most of our media. Cutting into freedom of the exchange of the information over the Internet brings us one step closer to a completely Fascist state. This is unacceptable.

Natalie Mannering
Gainesville, MO 65655
The economic health and competitive edge of our nation depend on innovation, now more than ever. It is your duty and obligation to protect the public airwaves for the American public.

Newly opened areas of the broadcast spectrum should be used to increase access for all Americans, not be purchased and help by private companies.

Keep it public and keep it under American control.

It is time to restore the public airwaves to the public. The must be used for public good, not for gains by huge corporations, which stifle communication rather than enhance it.
Competition needs to be kept alive, and some services are already overpriced.

Deborah Dittmann

Please keep the public airwaves open to the public good. Do not turn over the system to corporate gatekeepers who would monopolize the system and prevent innovation and entrepreneurial activities.

Sincerely,
Ken Staffey
Bridgeport, CT

Please do not give the air space to private companies. Keep it public.

why are you doing this for private companies and not for the whole of the USA?

Keep the public airways as public as possible. Some public assets should not be for sale but should be used for the public good without regard to profit and corporate gain. This is what government is for; protecting us from greed and unfair corporate practices.
Dear Sirs,

I think it would a very bad thing to allow big companies to "sit" on use of public airwaves just to keep other people from using them. The mere statement makes me ill. Its like a five year old bully buying all the candy in the candy machine just so that no one else can have it. How completely absurd. I urge you to further consider the long term effect on small growing businesses that might use those frequencies to help people. When all the wires rot and towers get blown down by hurricanes and so on, what will we use then? Public Wireless.

I am writing to express my support for keeping the public airwaves public. I think anyone could easily argue that if they remain public, more people will have access to news, and current information than would otherwise. The people who would probably be the most affected by this decision may be the poor and underprivileged, who may not be able to afford high internet provider fees. Unfortunately, these may be the very people that may need it the most for news, employment opportunities, and keep up to date with the more privileged world that they may not have many social channels into. Another point is that the more public the airwaves stay, the more integrity they will maintain.

Thank you for your time.

Matt Masarik
Fort Collins, CO 80521

John Horne
woodstock, GA 30188
I believe that the more competition we have for the use of the public airwaves the better. Selling at auction to the highest bidder assures that only the two or three biggest providers can afford the available frequencies. Even worse would be the case if large communications bought the frequencies but did not put them to use, denying the public the benefit of the airwaves that now belong to all of us. It would be far better for all of us if any company that had a market share of 10% or more of the cable, telephone or internet local or national markets were prohibited from bidding at auction in those geographic areas. The public would best be served if many, small firms and local governments were able to purchase the available frequencies to compete with the behemoths. The likely price reductions for telecommunications, cable and internet services caused by the competition of many small entities with the giant communications companies would likely result in more public benefit than might be lost by larger bids by the Comcasts, Verizons and AT&Ts of the communications world. I presently utilize Comcast for my cable, internet and telephone service. There is presently no effective competition for this service in my neighborhood. And unfortunately, my telephone and internet service has had frequent breaks in service. If there were more effective competition, not only would I be offered better pricing, but more importantly to me, the quality of the service would have to improve to meet the service of competitors.

Giving public airwaves to corporations is wrong. Some in politics are so out of touch with We the People, that they confuse global corporations with the people of America. They seem to think that freely handing everyone's resources to "the private sector" is somehow keeping government out of our lives. We are a government of the people, by the people and for the people. The airwaves are essential for the free exchange of ideas. The government nor corporations should run it. The people ARE the government. Anything less, in this case is fascism, in my opinion. Free enterprise, freedom of the press, and freedom of speech are entangled in this issue.

If everything has to be privatized, where is the commonwealth residing? Is it only residing within the corporation which then ‘trickles down’ the lower prices and more consumable goods to average Americans? Or is it more likely that these large, rich corporations donate to politicians who protect and enhance their vested interests, which keeps the power concentrated and in an ever shrinking circle? The media must be open and free, easy to access and relatively inexpensive for true democracy to flourish.

Enough is enough! The pursuit of corporate profit has monopolized every institution, including government, in this country and beyond. Let us keep at least, our air ways free!

Autumn Frnager
Chicago, IL 60626
This another fascist move by the Bush admin.
   Ed Pusch
   Omaha, NE 68134

These public airways are a national resource far too valuable to turn over to unregulated corporate interests. I believe we need to utilize these airways in a way that fosters innovation and competition. Achieving the communication potential of these frequencies is a challenge that requires continuous review from sources that represent public objectives not individual or corporate objectives. Please don't turn over this public resource to corporate control that will stifle future opportunities for all Americans.

It is high time that the public airwaves be put
to use for the public good. We don’t need more
companies stifling competition and innovation.

Jared Cram
Philadelphia, PA 19121

As a lifelong radio amateur, licensed since 1954,
I can testify that for most of its history the FCC
acted in the public interest as a scrupulous care-
taker of the radio spectrum.

Since the beginning of the Bush administration,
however, the FCC has evolved into a partisan
promoter of private interests at the expense of
the public interest and often in direct violation
of its own long-established regulations.

Some things by their very nature are free; the air we breathe, the radiation from the sun, the beauty of the oceans and as far as this emerging issue, the airwaves. Just because something can be bought and sold, it does not stand to reason that it should be bought and sold. Even our freedom is not free, we pay for that in a myriad of ways. Allow what has been free of charge to remain free of charge. This is an expensive enough economy for the working man. Please do not make it more so.

Business development is important to our country. However, it is better to be conservative in our approach to relinquishing control of a resource as valuable as our airwaves. Future public safety and public information needs cannot be clearly forecast, and it is important to preserve our public assets.

William Scheyer
Erlanger, KY 41018

Our elected "representatives" sold us out in 1996 with deregulation of communications. We have yet to see the promised competition and lower rates. Selling our public airwaves to these vultures will wipe out the last chance of ever seeing the promised competition and reduced rates. I know how many dollars are still being tucked into my "representative’s" pocket by the tele lobbyist. And, that certainly aces my lonely vote. But, just for once, it would be nice for my representative to really represent my interests instead of the campaign war chest and see that the airwaves remain there for my—the public—good. Should this happen, I might even choose to believe in Santa Claus again.

Carole
Fort Myers, FL 33907

The free nature of the internet has led to a revolution in technology, culture, and business. It has given everyone the chance to express themselves freely and to collaborate and share both technology and talent. Please allow the internet to be this free space.

I thought it was supposed to be illegal, or at least immoral, un-democratic, un-free, and counter-productive for the commons to be handed out to corporations. Doesn't anyone "up there" (in government) have any knowledge of Corporate Personhood and the evil it wroughts on democracy? Our forefathers knew better, but we've been fleeced.

You guys need to google corporate personhood, and visit the book: "Unequal Protection" by Hartmann.

Sincerely,
Kathleen Gilbert
Crowder, OK

We need diversity in our media, not bigger media hogs. The FCC should represent the national interest, not the interest of Big Media.

I urge you to keep our public airwaves open for the public good and not allow the big communication companies to use them for more profit. They already control a large portion and keep increasing monthly fees for the use of their services. If they are allowed to have control of more public airwaves, it will only cause the cost of these services to increase.

Thank you, Bettye Carlton
Bettye Carlton

Radio Spectrum is a non-renewable resource much like land. Not all of which should be auctioned off to the highest bidder, with the intent to make the most profit. I’ve been in the wireless business for over 20 years, and auctioning these frequencies off to the biggest two or three operators does not serve the public, only private interest.

its companies like these that dont care about the people only our money. in the constitution it states that if the government is out of control, it is the RESPONSIBILITY of the people who can make a difference in the govt, to step up and make that change. If that happens in these times, they'd get arrested.. Also it appears the people with the power to make the change are lining the pockets of our leaders.. to only benefit them. again the little people lose, yet we are the ones they are most dependent on. if we all stood up and fought back, they would have to listen, with out our money they have nothing.

Are we a capitalist country or what? Monopolies are not just a part of a board game!

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

More than a century ago, Americans agreed that monopolies should be abolished. We know the consequences of monopolies – not only do they facilitate price gouging and non-competitiveness but they hamper innovation. If we want to stay competitive in the foreign market we have to keep our market at home competitive. Please don't hand over the airwaves to these behemoth corporations. Instead, use this opportunity to foster an economy that will be nimble, affordable and globally competitive.

Barbara Mckenna

Romeoville, IL 60446-1026

Robin Deangelis Labolt
St. Louis, MO 63119

Let’s not give over our public airwaves to corporate profits. The people deserve a continued voice!

Kathy Roselli
Weed, CA 96094

Deborah Eichten
Chicago, IL 60614
I used to be a Comcast customer until Time Warner bought Comcast. Broadband for the Internet is great – but using the phone service was a disaster (Comcast – haven’t tried TW). I was glad I had a cell phone to call repair!!! I switched to what was then So. Cal. Bell (now AT&T) as fast as I could!

I firmly believe in the principles of the original Communications Act which declared the public airwaves must be used for the public interest. I do not see how turning over OUR airwaves to corporations for their profit, regardless of the public interest, serves American Citizens. What about Equal Time for political campaigns – both candidates and ballot measures?

I realize corporate America has bought the White House – but need it hold the Congress and all agencies hostage also?

The FCC’s first obligation is to the PUBLIC INTEREST and corporate profits don’t really work for us!

I urge you to hold true to the original principles governing use of the public airwaves.

Grace B. Foster
American Citizen, member of the Public
Grace B. Foster
Los Angeles, CA 90036-3244

I do not believe it is advantageous to privatize our airwaves. There should be a level playing field so everyone has access. Thank you.

Dale Mick Rittenhouse
Miamisburg, OH 45342-2755

Sharon D’Agostino
Ligonier, PA 15658

Charles Reinhart
Dorchester, SC 29437

Gisela Bengfort
San Jose, CA 95123

Reserve the airwaves for the public in order to increase business and progress.

Glenn Lanum
Menlo Park, CA 94025

Too much power in the hands of a few will be the end of democracy. Don’t head down the path that will eventually lead to a revolution one day. Keep the air waves open and available for the good of the majority not the good of a minority.

Christine Jensen
fremont, CA 94538

The airwaves must be free and not sold to corporations. There is too much government controlling the media as it is. Freedom for speech will be adversely affected.

It is unconscionable to have the private sector reap huge rewards at the expense of the public good...DO NOT ALLOW OUR PUBLIC AIRWAVES TO BE HELD HOSTAGE!!!

Claudia Alderman
Tacoma, WA 98422

Katie Parker
Denver, CO 80231

To allow big companies to control the internet is a crime. To keep anyone's voice from being heard based on the amount of money they shell out is unconstitutional. The airwaves belong to everyone - the voices, the artists, the intellects, the children, the people. Controlling that space, the airwaves, would stifle human communication and progress - again, all in the name of profit for a few in control

F. Daniel Kent

Upper Arlington, OH 43221

Joseph Colgan  
Kent, WA 98032

I am absolutely opposed to turning over the airwaves to big companies. This is a capitalist society, which means competition and innovation are good things. Big companies oppose both of those attributes, big companies stifle competition, innovation and will stifle the wireless internet revolution. The oil companies did it, which is the only reason we are occupying Iraq. They make horrendous profits, caring less for the people that buy their product. Enron cheated an untold number of people due to their greed. Bottom line you can’t trust large companies!!! John

The FCC should focus on protecting the interests of the population, not of the corporations. In our very wealthy country we have people who do not even have access to a telephone. By protecting the public access airwaves and encouraging competition, rather than monopolization, the FCC will avoid becoming just another puppet of exploitation of the struggling masses.

CUTTING FUNDING FOR LOCAL CABLE PROGRAMING IS ONLY THE BEGINING IF AT&T GETS TO CONTROL THIS MARKET

Clark Blomquist
West Bend, WI 53090

The decision made during your tenure will dictate the long term well being of the American citizen. Decisions that are made for corporate benefit at the cost of free trade go against the basic premise of the American dream. A free market need to remain free from government muddling for the benefit of a few at the expense of the populace in general. Think twice about the consequences of turning over public airwaves to a few large corporations who will inevitably use them for private enrichment instead of the public good.

Please keep public airwaves for the public good. We see too many large corporations in America regulating our every move. Everyone should have low-cost access to high-speed internet. Use this for the public good, not for big corporations that exist only for profit. The public airwaves should be reserved for the public not given away to large private corporations to sit on! The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market. The government should protect the airwaves for public use. Please protect grass roots democracy against the corporate oligarchy. Be a statesman, not a politician. That's why you got my last vote. - Kit Johnson

I am tired of constant increases in my cost.

Dan Peterson
Glassport, PA 15045

Ethel Fraase
Sun Lakes, AZ 85248

Gentlepersons:
Kapital requires either underpaid Labor or acquisition of natural resources without adequate compensation to the property holders (The People) to continue the currently-expected obscene rates of return to Kapital. Any amount in excess of 3% per annum, absent truly creative innovation, to continue to attract the property owners who have become inured to completely unjustified and obscene rates of return on Kapital cannot be rationally defended. Comsat was a mid-century boondoggle that heralded the microwave goldrush. It is far past time to abandon the gluttonous pandering to the Pirates of Kapital, and either make the price of this precious publicly-held resource commensurate with its true value, or tax the living (multi-billion dollar) hell out of the beneficiaries of the multi-trillion dollar largesse bestowed upon them. I prefer a price that reflects the true cost of a limited publicly-held resource, also reflecting the internal and external diseconomies of governmentally sponsored monopolies. The auction cost of each usable signal channel of such bandwidth should begin at $250 million per year per signal-channel, excluding multiplexed or otherwise subsidiary channels, which should be additionally valued, in 2007 dollars, according to their respective lesser bandwiths.

Respectfully submitted,
Michael Ganschow

This is the same situation as we had with the auto companies and public transportation services. The auto industry won and look at the cost in pollution, road maintenance, traffic congestion, fuel consumption and our dependence on foreign oil. Don’t give the air away for private companies to profit from. They are already strangling us. I already pay well over $100 a month for phone, cell phone and DSL. They just want MORE money. Protect us from them. It’s your job!

Dear FCC: If you are in the pocket of our President like so many other federal agencies these days, then my note to you is obviously irrelevant. I am, however, hoping that there is still some integrity left when it comes to the job of keeping America’s communication free from the facist corporate state which strives to gain control more and more each day. Surely you realize the power you wield...and without your help the average American doesn’t have a chance for holistic, unbiased coverage of what’s going on in the world. Please, keep our airwaves for all of us. We are America, and you should be loyal to us. Many thanks, and with hope, Catherine Moore, Portland, Oregon

Harvey Herr
Dallas, TX 75275
As a former Director of Quality Assurance for America Online and several others of the major High-tech companies currently in the internet market, I can state that it is never their intent to run programs for the public interest - unless that interest holds a promise of huge profits. Please safeguard the airways for all Americans - not just the privileged few that can afford the prices that corporations such as those currently under consideration will charge for access.

Examples: I was an AT&T customer for several years and they forced me to change to another service provider because they didn't want to invest in new equipment to service my area of California (the Serria foothills). Prior to that I was also a Verizon Customer for years and had to leave their service for similar reasons. This only goes to demonstrate my point - unless there is a profit high side to any technology, including updates and upgrades to existing technologies, they will not act in the public interest. I don't want the airways of America further subjected to this type of corporate tyranny.

   Jadene Felina Stevens
   Harwich, MA 02645
"Public" airways are supposed to be just that: public. We should keep them that way. If these airways are turned over to companies for auction, the American people will suffer a great loss. These airways could revolutionize the way we do business and could afford less privileged Americans access to the internet. Please keep these airways in the hands of the American people and out of the hands of big corporations who view Americans as dollar signs.

Matthew J. Salvas
2nd Floor, NH 03103-5421

It's all about greed and big money. The public airwaves should be used for the greatest good of the many, not the large corporate interests.

Stephen Kay
Severna Park, MD 21146

The corporations use these valuable assets for no cost. For example, the TV networks use an asset worth billions for no cost. ALL the airwaves should be rented, not given away.

Michael Bernkopf
New York, NY 10024

Please keep the airwaves open and free. Look what's happened to the oil companies! Big companies ate up the little ones and now, with very few competitors, they've run gas prices up to ridiculous levels. PLEASE DON'T LET THIS HAPPEN TO OUR AIRWAVES!!

Jeff Stevens
Columbus, OH 43201

Collected by MoveOn.org Civic Action
It is far too early in the development of these new technologies to be able to predict how they might evolve new and innovative uses. It is vitally important to keep access to the "airwaves" publicly and broadly available. An auction of these rights to large corporations with vested interests will offer a short-term cash gain that will serve a largely political and public relations interest to the current government while undermining vitality in the internet world for our common future. Please keep the larger and future interests in mind and don't sell off the potential of the internet to a few large and powerful corporate interests.

Thank-you

<td>Bunker Hill, IL 62014</td>
<td>Over the past 3 decades, both the form and amount of public air has been diminished - mostly as a consequence of dedicated commercialized means of transmission. Now on cable, we have many hours of Cspan, but no other offerings. With the boom in new media venues, especially internet related technologies, we need to consider expanding the proportional time/space/bandwidth to the public as well (as was done in the past for other media). Moreover, this portion should be considered being substantially increased as a means of fostering innovation.</td>

The state of high speed internet access in America is laughable. In nearly every case Americans have two choices only. Either DSL via a teleco monopoly or Cable Internet via a Cable monopoly. Wireless Internet providers can offer a way out of the broadband oligopoly, but only if the FCC reserves the airways for all rather then selling them to the same companies who hold the current stranglehold on the market.

Richard Rowell  
Grand Rapids, MI 49546

The Republicans have been trying to shut down Public Broadcasting for years – now they are trying to sell our public airwaves – our public land has been neglected – this administration has not taken very good care of the public trust we granted them.

The airways should remain free.

Percy Laube  
Buffalo Grove, IL 60089

Keep the airwaves open to the public. Thank you

Public Airwaves for the Public Good
Morten Schlutter
Iowa City, IA 52245

Dear FCC Member,
With corporations like NewsCorp and Clear Channel controlling such an extensive amount of American media, the Internet remains the only true way to obtain and share information from diverse sources. It is also an essential form of expressing public opinion that is all too often stifled in a big business environment. Please don’t take away this opportunity for America to actually be what it claims to stand for: A country based on free speech and healthy competition.

Nina Soka
Brooklyn, NY 11231

The current wave of mergers within the telecommunications industry is stifling competition and assuring future rate increases. Turning over the public airwaves to the giant telecommunications companies will further concentrate power and access to a few large companies. It is important to act for the public good in maintaining the airwaves for public good. The deregulation of the telecommunication industry in the 1980s was supposed to promote competition and lower rates. It has done exactly the opposite.

Barbara Apple
Toledo, OH 43620

Gary W. Logan

The net and other public airwaves must remain usable by the public at large. Privatizing will only serve to stifle competition and innovation.

Don't offer the public airways to the corporate communications cartel! Keep them for the public good!

Public television and radio, run by private companies, is NOT public and it is NOT in the best interest of keeping the American public informed in an unbiased, non-partisan way. Of course, the last thing the Bush White House wants is a truly informed public.

If the Bush White House keeps handing over control of every aspect of our country to corporate control, what will we have by the fall of 2008...Dictator George W. Bush? It would not surprise me in the least.
It is time to stop the corporate domination of our society for the public good. Please keep the internet free and available to the public for freedom of speech.
