I HAVE ABSOLUTELY NO TRUST IN BIG CORPORATION BUSSINESS & THIS IS ANOTHER PART OF SOMTHING MORE SINISTER FOR TOTALTARIAN DICTATORSHIP DIE ON MY FEET BEFORE I'LL LIVE ON MY KNEE'S!

Michael McIaughlin  
sutton, AK 99674

Some things should remain public, the more corporations that own our voices, the more likely the public will break out and fight back.

Natasha St. Peter  
Portland, OR 97298

Libby Weedman  
Austin, TX 78731
Turning a blind eye to an obvious ploy to limit internet competition, especially at the expense of our average Joe and Jane American is irresponsible and approaching the deplorable. I understand that there is a push to expand and maintain free-market standards, but sacrificing the well-being American citizens who will see none of the benefits does not correspond with the ideals of bettering of the lives of the American people.

I oppose further consolidation and limitation of media. This includes the internet. Media consolidation leads to censorship, in my opinion, since corporations are seemingly exempt from Constitutional limitations on invasions of freedom of speech. Yours, Robert Carr

Robert E. Carr
Leicester, NC 28748
are we really to return to a time when little choice was given to the public by mass companies controlling our ability to communicate with each other? i am old enough to remember how that was. the cost was prohibitive and service was so so. free commerce opened the door to cheaper rates, more communication between humans and better services. why change what works? greed? not a good reason.

Remember your mission—the Public Good, not the Private Interests!!!

I urge the government to make sure the public airwaves are used for the public good.

Don’t be afraid, the diversity of ideals is what makes it America.

Don’t give up our free airwaves to big business.

The public service that commercial broadcasters are supposed to provide is a farse. There should be a charge for profit based broadcasting.

This is the best hope of closing the digital divide. Act responsibly.
Our air waves are for the public good, not private profit.

Libbey Meister

Consider the mounting evidence of our competition worldwide with the EU and Pacific Rim investing in wireless technology to deliver innovation BECAUSE EVEN THIRD WORLD IS ABLE TO HAVE THIS, IT MUST BE ACCESSIBLE TO ALL IN THIS COUNTRY TOO TO COMPETE ACROSS ALL STRATA
Debora Dyrenforth
Upper Arlington, OH 43220

Collected by MoveOn.org Civic Action
What these cable and telephone companies are trying to do is stifle competition. I thought America was about competition and allowing the markets to decide who sells what and for how much.

If the FCC were to turn over the airwaves to just a few companies they would collude and conspire just as the oil, pharmaceutical, and insurance companies do, to drive up prices and turn off access to those companies that aren’t willing to pay them an arm and a leg. Public airwaves must be controlled by what their name states, the PUBLIC. I’m tired of seeing America fall behind the rest of the world simply because we allow the corporations to control everything and reap all the profits and benefits, while we hand over our cash like trained monkeys. Keep competition, keep innovation, keep technology in our hands, and stop the corporations from picking my pocket.

Carlos Romero

The advent of the internet has helped us realize a greater democracy than we could have ever imagined. For the health of our country and citizens, please keep these public airwaves public and out of the control of irresponsible corporations who have shown again and again that their loyalties are not to democracy but to profit.

Christian Pulver
Quincy, MA 02169
Please do not turn over air waves to the private companies. These should belong to the public, for the enrichment of all of our lives.

Linda Strugar

as a verizon and comcast customer, I also firmly believe in the protection of the public airwaves for the public good.

Virginia Greenman

as the Internet is just as an important part of our public infrastructure as highways, schools, and the electric grid - we have seen what state those are in. By giving stewardship of the Internet to private companies, we will restrict the meritocratic advantages and access that companies like Yahoo! Google, and YouTube had to allow for real innovation. Don’t give away such a valuable public resource!

Linda Strugar

as a verizon and comcast customer, I also firmly believe in the protection of the public airwaves for the public good.

Virginia Greenman

as the Internet is just as an important part of our public infrastructure as highways, schools, and the electric grid - we have seen what state those are in. By giving stewardship of the Internet to private companies, we will restrict the meritocratic advantages and access that companies like Yahoo! Google, and YouTube had to allow for real innovation. Don’t give away such a valuable public resource!

Stop screwing with us. We are totally aware of what you are doing and trying to do to the consumer. Everything to make the rich richer and the poor poorer. What happened to the premise that competition is a good thing?!?!?!?!?

Linda Quarles

Public airways are just that..for the public..that means the airways should not be owned by private corporations. We cannot auction off our freedom.

Gerry

WiFi access should be by the people for the people. Turning this over to corporations would disallow a very basic freedom for lower-income families and small businesses. Please keep the airwaves free for all.

Gerry

Stop screwing with us. We are totally aware of what you are doing and trying to do to the consumer. Everything to make the rich richer and the poor poorer. What happened to the premise that competition is a good thing?!?!?!?!?

Linda Quarles

Public airways are just that..for the public..that means the airways should not be owned by private corporations. We cannot auction off our freedom.

Gerry

WiFi access should be by the people for the people. Turning this over to corporations would disallow a very basic freedom for lower-income families and small businesses. Please keep the airwaves free for all.

Gerry

The internet, though it has many faults, is VITAL to the free world. And, to stay vital it has to remain free. The internet is what will truly bring freedom to the world. It allows anyone who can get access to feel they have a voice in this world. If those in power in the FCC really believe in America and what it stands for, if you're really PATRIOTIC, you'll vote to keep the internet free. Thank you for allowing me to still voice my opinion.

The public airwaves should belong to us. Since deregulation, I'm paying more and more for less service, AT&T had the nerve of charging me $30 for asking if the lines were down, they sent a repairman which I never asked for..the problem was in the area..I could never get the charge removed..I guess they feel they have the power (no pun intended) to do anything they please. Try to call customer service if you got at least half an hour of time.

Where is my America? Our interest should always be the public, not the profits of big business. They don’t share and it doesn’t drizzle down to us.

Lee Smith
California Hot Springs, CA 93207
Restricting public and free access to the open forum of the Internet cuts off a major portion of the people from open discourse and education, in this era of ratings-driven TV “happy news” and corporate-censored newspapers. Will you block the final channel for a free populace to discuss without corporate profiteering or government censoring?

"If a nation expects to be ignorant and free, in a state of civilization, it expects what never was and never will be. The functionaries of every government have propensities to command at will the liberty and property of their constituents. There is no safe deposit for these but with the people themselves; nor can they be safe with them without information. Where the press is free, and every man able to read, all is safe.” - Thomas Jefferson

We need to keep public airwaves public.

There is nothing in the First Amendment which prevents the Government from requiring a licensee to share his frequency with others.... It is the right of the viewers and listeners, not the right of the broadcasters, which is paramount.”

U.S. Supreme Court, upholding the constitutionality of the Fairness Doctrine in Red Lion Broadcasting Co. v. FCC, 1969.

There is more to the Public Good than simply getting the highest price at auction for a frequency allocation. The intended purpose of this bandwidth must also come into play. There may very well be more utility to the public by opening up some of this bandwidth to free public usage where manufacturers could develop wireless networking devices which consumers could purchase and use which could provide coverage to many areas not deemed sufficiently profitable by the big carriers. With modern spread spectrum/frequency hopping techniques the chances for destructive interference is disappearing and costs could get to the point of inexpensive routers for such devices. Please listen to the people and not just the big money interests.

Peter Gottlieb

It was the FCC that championed competition when it broke up AT&T’s monopoly. The FCC should be consistent in this effort to ensure that competition will be fostered and not squelched in the wireless arena. I am not a customer of any of these companies partly because cable has strangled competition wherever it goes. The principle of the thing counts—monopolies don’t serve the public in the long run.

</table>

Please do not preclude new technologies by allowing a few large corporations to monopolize public airwaves.

Please use the Public Airways for Public good.

The airwaves are public property just like air. For once, please put the people before the greed of giant corporations.

As a student I cannot overstate the importance of free airwaves.

We desperately need an independent (NOT DEPENDANT ON ADVERTIZERS) public forum dedicated to education, enlightenment and betterment of the human race.

You are supposed to be guardians of the public airwaves for the public good. Now's your chance to redeem yourself after the needless hyperventilating over Janet Jackson's nipple, which should have been a non-issuse. This, on the other hand, is a BIG issue. DO THE RIGHT THING FOR A CHANGE.

Quit stealing the assets of our grandchildren for your corporate give-a-way party.
The FCC is supposed to protect us against people who try and own the media, we are supposed to be a free nation, which MEANS: FREEDOM OF SPEECH, if the people in charge are allowed to control what we hear and see, than, this country is no more than, A DICTATORSHIP, please, don’t let our children and grandfathers who have fought in wars, to have died for nothing, free the Media, Mahalo Nui Loa!!

NO CORPORATE CONTROL OF OUR AIR-WAVES!!!!!

Sharon Pollis  
Lantana, FL 33462

Verizon, Comcast, AT&T, etc. did not develop the internet. I don’t see why they should inordinately benefit from it. If they offer better service, they’ll get the customers - isn’t that what free enterprise is all about?

Patricia A. Brech  
Baltimore, MD 21227

We must keep the airways available to all people because we are all EQUAL. Equal access for those who cannot afford regular service keeps their voice equal to those who can.

The current Internet service prices are above what they actually cost. Companies charge high prices simply because they can. Competition is needed in this realm to move forward to more affordable prices.

The airwaves should be free to bring the greatest amount of informational access to all people, not just the privileged few, and not just large companies.

Donna Lepley
Tucson, AZ 85705

Claudia Masko
Cleveland Heights, OH 44106

The big telecommunication conglomerates need to be balanced with more funding PBS and other stations that are for public entertainment and information. The big companies have already flooded our airways with enough advertisements and garbage programming.

Parker Word
St. Louis, MO 63121

I do not want our public airways privatized. I am already gouged by both Comcast and AT&T. Communication is an essential part of the public good and should not be up for sale.

Margaret M. Sequeira
Berkeley, CA 94709

Our leaders tell us that "they know best”. We are not unintelligent. We can connect the dots. At some point "we" as a group will demand something be left for us. We need to have a voice. If you cut that voice off, it will scream in ways you have not foreseen. At least let us "think” we are free.

The airwaves should be used to share information and expression, not line the pockets of corporations. Freedom of Speech has been curtailed enough by the practices of corporations and the FCC's willingness to go along. It's time to change this. Airwaves are public property, and should always be such.

I am dissatisfied with the lengthy contracts required by the cell phone companies which are expensive and difficult to change. I am also dissatisfied by the rising cost of cable TV and the bundling of channels. I live California where a huge amount of radio airwaves are now taken up with Spanish language programs leaving no English programs available.

I have already signed over the past few years several Petitions against this act, please stop FCC!

There is less and less spectrum available for public uses (including emergency services) and plenty for private uses. Considering the explosion of unlicensed spectrum wireless technology that is used in many homes and businesses why is there a rush to stop that by selling spectrum that could be put to use in new and innovative unlicensed ways.

the selling of the public's airwaves to these commercial behemoths is outrageous

Public supported airwaves must continue to serve the public and not major corporations.

Adeline Silverman
Sarasota, FL 34233

We must maintain network neutrality at all costs. The best way to do this is encourage competition for the flow of network traffic. This cannot be done by “agreement” between the government and established large corporations. It must be done by allocating a meaningful portion of the frequency spectrum to open competition among small companies.

Please PROTECT NETWORK NEUTRALITY

James Carolan
Clayton, CA 94517

Make the right decision.

Please do not sell America out to the corporate moneygrubbers!

Airways should be used for the public good. Innovation should be encouraged, and net neutrality must be ensured.

The airwaves belong to US citizens. Don’t let the corporations steal access!

The public airwaves are a public resource, and must be used for the common good, and not squandered for the great profit of the few.

Put this in the Do The Right Thing column. Free these airwaves for the good of the citizens for whom your positions exist to serve.

”We make the rules, pal. The news, war, peace, famine, upheaval, the price per paper clip. We pick that rabbit out of the hat while everybody sits out there wondering how the hell we did it. Now you’re not naive enough to think we’re living in a democracy, are you buddy?”  
–Gordon Gekko, WALL STREET

J. W. Matlack  
Nashville, TN 37214
Keep the public airwaves open!
Mary Moltmann
Bull Valley, IL 60098

This would be complicity, not regulation - You, at the FCC, are the only ones in a position to combat the increasingly apparent corruption and public manipulation in media: don’t let us down.
David
Columbus, OH 43205

Please do not do to the Internet, what has been done to Television, Radio, and Satellites (i.e. C-Band). Keep the airwaves open to the public, not control by corporations.
Raymond J Johnson
Tacoma, WA 98409

Public airwaves should stay public. It would be a horrible thing to let them fall into the hands of big companies who only want to make money.
Ben Stinnett
Gilbert, AZ 85233

Collected by MoveOn.org Civic Action
This is America. If we continue to "sell" it to the mega corporations vs allowing its people to benefit from the democratic (not capitalist) system, we won't have it for long. GREED and personal gain at the expense of the future, is not leadership or patriotic.

Jfostar823@Aol.Com
Carmichael, CA 95608

Please use this technology for everyone, not just business interests. I have a sister who cannot get ANY type of high speed internet because of her location. When she contacted the local cable company they said they had no plans to EVER offer that service...or any other...to her location. She's trying to run a website design business on DIAL UP. Help the people you're there to help...not just business.

Shari Heath
sun city, AZ 85373

Protecting our airwaves means insuring the integrity of capitalism in the United States.

Dusty Brooks
Albuquerque, NM 87111

Please leave things alone !!!!

James D Franks
Maynardville, TN 37807

I want the airwaves open to public information.

I personally have dealt with horrible customer service, including being hung up on, from managers with certain providers. Unfortunately large corporations do not care about their consumers, nor do they want to help when they have a problem "on their end". Please do not allow them to have additional control!

Serena Schodt
Erie, PA 16507

Brian T. Prugalidad
Anaheim, CA 92804

America is a land of diverse peoples, voices and opinions. I would rather that FCC give the airwaves to voices such as WBAI 99.5 FM in NYC that truly reflect "the other side" a sorely needed perspective that juxtaposes the rethreaded cacophonic views generally found on ABC/NBC/CBS/FOX

Yvonne Reynolds
East Orange, NJ 07017

Maureen Bradley
Vandalia, OH 45377

Just like the human genome cannot be patented, the "air-waves" should not be sold to and controlled by those whose only motivation is financial. They should remain free for all to use!

Shawn Mercy
San Diego, CA 92101

Anna-Karin Metz
Lerdala, WI 54017

We’ve had enough of corporate monopolies. We’re tired of being charged to death for every little thing. Please do not allow this travesty of justice.

Springfield, MA 01109

Rhonda Cowell
Toledo, OH 43620

The private sector has failed miserably in its obligation to provide any responsible public good with the broadcast bands it now controls (tiny or no public service messages, inane or irrelevant "messages", etc.) I am absolutely opposed to turning over any more public airwaves to private conglomerate telecommunication companies. The internet, above all else, should be a free and open public arena - not another corporate control on access. Please take the high road and support free speech, not corporate greed. I am also writing to Senators Levin, Stabenow, Reid and Pelosi, and Representative Stupak on this issue.

Please don't make my fear that the FCC is becoming the lapdog of the very corporations it was created to oversee a fact by handing over these airwaves that belong to the public to these money-hungry multi-media conglomerates.

Travis Finch  
Redondo Beach, CA 90277

Collected by MoveOn.org Civic Action 2187
This is a no-brainer, my friends at the FCC; what is currently owned by the public, and can be used for the public good, should be retained by the public. Are any of you fans of the series Star Trek, The Next Generation. A world where the needs of the many supersede the needs of the few (in this case the rich few, the corporations) is possible.

You are charged with protecting the public interest, not private corporations. Give these frequencies to the public.

| Dear Sirs,              |                  |
| Please consider the vast implications of delivering quality communications to every household in America versus handing the capabilities to large corporations that already make millions every day. Allowing public access to the airwaves will enact information and innovation sharing on an unprecedented level. America has always grown and thrived on an open exchange of information and ideas. To hand all of this opportunity and technology to corporate interests would be a travesty. Please do what is right for the American people. The corporations won't go broke anytime soon, but the amount and quality of information and ideas will surely increase with public access to the airwaves. Thank you for listening! |                  |
| Ben Watkins             |                  |

I think it’s past time for the FCC to be in the business of protecting the public’s interests, not those of business. I was a Reagan Democrat for both terms but I have to say I cannot imagine voting Republican again for any office any time in the future. The corruption, cronyism and self indulgence of this current administration is frightening. It is time for our government to go back to it’s mission of protecting the needs of all it’s citizens, not just those that can make large campaign contributions.

I am willing to bet the FCC ignore this plea for the public. As we have no where near as much money to offer campaigns as these larger firms do. But remember all those tax dollars you love come from us and they add up to a hell of alot more than big money from big companies.

Joseph Patrick Daniels
Austin, TX 78704

I highly object to turning over the public airwaves to a few big companies like AT&T, Comcast, Verizon, etc. This is a company by the people, not for profit to be realized by a few.

Lori Matson
Los Angeles, CA 90019

I do not want to pay more to some millionair that is so creedy that he will make it to expensive for me to go onto the internet i am disabled and live on very little and the computer is a cheap way for me to have fun and meet people from around the world.

Why would our Gov't of the people, by the people, and for the people turn over public airwaves and turn these completely over to private business?

If there is no actual market demand for these currently they should not be sold. It isn't good business for our government because it will go at lowest dollar and not good for the public because it creates an oligopolist economy.

Please do not give up the chance for public access just for corporate gains. It's already expensive enough, that most one income families struggle for even a dial up connection. Free internet is all they have at times, and to think some company will just buy up all these new airwaves... and then just sit on them, sickens me. Haven't we done enough damage to our freedoms? Please don't let this happen, use these airwaves for the public good, think of all the hope it could bring to even the lowest of income families.

   Joan Rodriguez
   san mateo, CA 94401

At one time in our country there was a better system of "checks and balances" because power corrupts and absolute power corrupts absolutely. The large businesses gobbling up others usually means the consumer and citizen ends up the loser.

   We must protect our fundamental rights and the public airwaves are an extremely important entity used to protect those rights. In the wrong hands, our country will continue to decline as our citizens continue to not receive all the information they need to make intelligent decisions.

It seems that the best course of action is to provide a service to people that others will not personally gain from. Giving control of this over to major capital corporations whose sole intent is to make money is contrary to this goal.

Nathan Dragun
Kalamazoo, MI 49008

The public airwaves should remain open to the public. While the media conglomerates claim that they will ensure access, we know that this is simply a lie. The FCC must not place the government stamp of approval on the gift of airwaves to these giants. The internet is the new public forum, and to limit the airwaves limits freedom of speech and effectively stifles freedom of speech. The FCC must not approve this gift to these private corporations.

The air waves belong to me and all of us.

Anne Rossi
Roslindale, MA 02131

These companies already have monopolies in many areas, and are totally unresponsive to customer needs, particularly in rural areas. The theory seems to be that since we do not live in metropolitan areas, we do not deserve things such as broadband internet service or cell phone service.

The last thing these companies deserve is a wider latitude to freely prevent wide dissemination of essential services to everyone. Please do not let these companies continue to assign us to a non-service ghetto!!

Carol J. Thompson
Chateaugay, NY 12920-2513

In the run-up to the invasion of Iraq, the media served as a cheerleader for the Bush administration. Rupert Murdoch was quoted as being for the "war" (the continuation of a massacre & destruction of a country, which began in 1991), because it would bring the price of oil down. Of course, he's a billionaire owner of a media empire; and like the rest of the "mainstream" media corporate owners, he & they are there only to advance the interests of the gov't, of those in power, which is to perpetuate the militaristic nature of our society, economy, & foreign policy; in other words, PNAC (the Project for the New American Century) will try to maintain the American Empire at any cost. Journalists cannot question those in power, so they only promote what those in power want: the "war" became a product sold to the American public. Upton Sinclair said that it was hard for him to be elected to Congress or to become Gov. of CA (in the 1930's he was quoted) because those who owned the newspapers would never allow him to be elected. The new media & journalism has become much more powerful & influential in the last 70 years.

I do not want public airwaves turned over to corporate interest. Keep them free.

David Lohoefener
Paola, KS 66071

Dear FCC,
First, funds get cut from the NEA, directly affecting public broadcasting, then cable companies start getting out of their community responsibility by not having to provide cable access channels—and now, we hear that corporations are unfairly taking control of the airwaves—I am an American who believes this undemocratic trend must be reversed to preserve our hard won freedom of communication, not connected to commercial exploitation and greed.

Please use the public airwaves for the public good instead of turning them over to large private companies

Patricia Twigger
Franklin, TN 37067

William C. Boyne
Rochester, MN 55906

Radio was supposed to be a boon to democracy and democratic communication. We lost that opportunity.

TV was supposed to be a boon to democracy and democratic communication. We lost that opportunity.

The Internet may be our last opportunity to build and maintain a truly democratic and free and/or affordable form of communication - I implore you to keep the Internet airwaves free and affordable and serving the public good. I implore you not to let large corporations own this communication system for private gain.

I have been a publicly active person all my life. I fought for the right for girls to wear pants in high school. I sued my school for making me take home economics and not allowing me to take wood shop or car shop. I have fought for trees, computers in schools and libraries, for non-discrimination policies, for smart growth, the list goes on. I do not consider anything more important to fight for than the need to keep the Internet free! The need to fight for the use of the public airwaves for the public good rather than private profit.

Have we learned nothing from the Telecom Act of 1996? Television and Cable companies did not use their new airwaves for the public good – why would this be any different? FCC commissioners - for once, think about the future for the people of this country rather than your own future in the telecom industry.

Beaumont, TX 77702  
I am a former NASA research scientist. I now have a small publishing business which I run completely on the Internet, through my website, emails, and long distance calls. All of my long distance calls go through the Internet. I have no phone service at all from any phone company. My largest expense is my cable Internet connection, which is a MONOPOLY. If I can receive high-speed Internet connection for a lower price, through FREE COMPETITION, that will substantially lower my cost of doing business. By all means, let us have FREE COMPETITION to replace FORCED MONOPOLY!

The FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

America’s economy, innovation, and people are already fast losing ground and competitive advantage to new-school foreigners who live in nations where hi-speed www is available for free to the public in taxis, airports, phone booths, and myriad public places in Taiwan, Korea, Singapore, China, Europe, etc. America’s leaders MUST act now to safeguard America’s technological advantage before small-minded and greedy monopolists at AT&T, Verizon, Comcast and their ilk slit the throats of America’s most innovative, creative, adaptable www-users. The www should be free, unshackled, unrestrained, and certainly not controlled by any small group of businesses. Don’t let these selfish, profit-obsessed firms shoot America in the head: protect the public good and the nation’s long-term interests, not short-sighted CEOs focused on short-term profits!

The internet is a great tool for uniting the people of the world. It is like an organic thing, as if the earth is an organ and the internet is the nerves and blood vessels. The internet is inexpensive and primarily in the hands of its users. If it becomes the property of big corporations and private “for profit” companies, it will be ruined. We will be one step closer to an Orwellian world, where what we read, listen to, eat, and choose to believe will be in the hands of a few people who will use it and us not for the common good, like it is, largely, now, but to further control our tastes and ways of life for their profit. As it is now, it is great for commerce, and is a way for individuals all over the world to communicate, and for media creativity. Please, for the sake of personal freedom, which is what our country is about, do not put this unique and valuable resource in the hands of a handful of greedy, powerful men.

Ralph Schuckett
Michael Head
Encinitas, CA 92024
If the companies that I am buying my services from will stifle progress simply so that they can continue to make money without progressing themselves, I will discontinue my services with them and tell everyone I know about what is being done and petition until this situation is resolved. It is not fair that progress and innovation and the public good should be opposed for a few companies’ private good.

Adam Bolton
Honea Path, SC 29654
I say NO to allowing or encouraging big business to usurp our public domain- without a voice we are nothing

Allen
Livermore, IA 50558

Tucker Chase

Patricia Ochman
stratford, CT 06614

Please stop this madness!

Pj Moynihan
Yountville, CA 94599

At this time in our history, it is especially important that we have a free exchange of information, ideas and dialogue. Former mediums like television and radio have turned from citizen-owned and operated into gigantic organizations. This is happening everywhere in our society. Out of the hands of the people, into the realms of the rich and powerful. If anything is going to save our democracy, it is a free exchange of ideas. The internet is unlike anything we've had before and is already making a tremendous impact on politics. If you take this away and put it into the hands of the rich and powerful, it will become just one more commodity that a lot of people can't afford, just like health care and all the other things that are the providence of the rich. Save our public forum and protect free speach.

Marilyn
Saint Paul, MN 55107

I strongly agree that the public airwaves should NOT be in the hands of a few providers.

Karen Henoch-Ryugo  
Baltimore, MD 21218

We’re urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves.

Joseph J. Morrow  
Rochester Hills, MI 48306

Nathan Soules

East Lansing, MI 48823

I believe it would be unethical to allow the current ”big” companies to sit on air space in a practice that prevents open competion. Although it does not create an ”exact” monopoly it only serves to keep the top companies on top and the new guys shut out. That is near enough to the definition of a monopoly that it should be considered to be against proper business ethics.

Haven't we addressed this issue once before under Michael Powell? In a rare show of bi-partisanship, congress thwarted a private takeover of the public airwaves in spite of Mr. Powell's repeated assertions that such a takeover was in the public interest. Let's keep the airwaves open and force telecom's to compete on a level playing field.

Mark Shuler

The public airways have served the public well for decades. The Bush Regime’s headlong rush to privatize every governmental function it can has lead to disaster in Iraq, as well as here at home in our National Parks. Virtually everything the Bush Regime has done has weakened the fabric of the Nation in the interests of Big Business. Keep the Public airways working for the Public Good. Keep them out of corporate control.

I reside several miles outside of a town with high speed internet cable service. The company involved has not provided service in my rural area. I have been given to understand it will not further extend its services unless it can obtain 20 customers per mile of such extensions. This leaves only a very slow dial-up service over rather low quality rural telephone lines. This service is so poor that many people have given up and gone to cell phones only. One neighbor tried satellite internet service and gave it up as inadequate. Hopefully, the airwaves approach will be better – if is not taken over by the big corporate charge a lot corporations. (Note: I checked and Skype and Vonage can’t be used on dial-up and apparently on some satellite internet services (due to a bandwidth problem.

Every time in the past where the government has opted to allow big business to do its thing in the name of more competition, more diversity, lower cost to benefit the public it has NEVER worked out that way. The only things that have happened is big business lines it own pocket to the benefit of a few and the detriment of PUBLIC. Keep our airwaves for the public good.

The only true method of progress is to allow twenty first century technology and innovations like the internet to be more accessible to everyone through airwaves. Socrates once said that "the only goodness is knowledge and the only true evil is ignorance." I urge lawmakers to promote the knowledge of goodness and have the integrity to NOT sell airwave technology to companies like AT&T or Verizon–companies that value materialistic and selfish goals that undermine what America stands for. Make the right decision.

I believe that it is the job of the FCC to protect the interests of the public by assuring that a competitive environment enhances Internet availability for all.

Shame on you if choose profits over public good.

Big business is taking over. Developing this technology for the benefit of the public, rather than as a private, profit-oriented business is counter to the 'airways are free' mentality that is crucial to access for all.

Stand up for the common good and tell the profit pigs no.

Let’s, for ONCE, please look at how we can benefit everyone, not just those who have deep pockets.

---

Collected by MoveOn.org Civic Action
My Comcast service is already spotty. With their current technological capability, I do not trust their reasoning that I should upgrade wireless equipment every "six" months at their profit.

We need public airwaves so many of our "average" citizens can avail themselves of this wonderful technology. The continued consolidation of large companies has occurred once again, even after they were de-regulated. Do not bend to the large companies. I voted for change last November. For me that also means looking to "average" citizens, not just the wealthy stockholders who continue to push we average and senior citizens aside. Dear FCC Commissioner,
Please do not sell our electromagnetic radio spectrum to private corporations! These are our Nations natural resource and should not be squandered by "for profit corporations" such as Comcast Inc, Verizon Inc, and AT&T Inc. We do not want or need another sell-off of OUR Nations Natural Resources.
Regards,
John Archambault, EE

Why in the world would you give yet another chunk of America to big business? How much money are the lobbyists throwing around in Washington? How far from our founding ideals we have fled. It seems, more and more, that all the FCC is good for is taking away more rights and levying fines. Please don't do this to the American people.

Beaumont, TX 77713
Back in the 1980’s, AT&T was broken up because it was a monopoly. It was broken up into several regional companies and that, supposedly, was going to bring back competition. The reverse seems to have taken place. AT&T, Verizon, and Comcast are now about to secure what will amount to a virtual monopoly on internet access. The business community constantly talks about competition but does everything to limit competition to the very large corporations. I urge you to stop the consolidation efforts of these large corporations. Instead, I think you should look at their efforts and then refer to Anti-Trust laws that were passed many years ago.

Charles E. Geitner
Naperville, IL 60540-5506

Internet access is a key reason for American competitiveness in the global market. Making spectrum available to people rather than corporations is necessary to foster innovation and combat monopoly.

Please vote NO!!!

Doug Clark
Sausalito, CA 94965

I feel that wireless net neutrality is critically important to the development of new, innovative technology and I request that the FCC keep these opportunities available to innovators and entrepreneurs by not auctioning off this set of frequencies to the highest bidder thereby allowing competition in this pioneering area to stagnate.

Thank you.

I think that *any* private ownership of the means of transmission over public infrastructure is a bad idea. It limits the effectiveness of public oversight with regard to anticompetitive practices involving pricing or innovation (smaller companies unable to fight copyright infringement against large corporate firms with dedicated legal teams). Concentration of media ownership has had a deleterious effect on news coverage on Radio and TV, while diminishing other important aspects of diverse presentation, such as local affairs programs and niche audience programming.

I live in Chicago. In the 1890's, there was commercial pressure to build on the lakefront. Mr. Aaron Montgomery Ward declared that the lakefront should "forever and always be left open for the public," and filed a lawsuit to ensure this. Chicago is recognized as a world city because of its lakefront. To this day, Chicago is the ONLY city on the Great Lakes with public access and no industry on the lake, and this is why Cleveland, Milwaukee, Detroit, and other cities do not compare to Chicago.

The public airwaves must likewise be left open for the public, lest they too become more Detroit than Chicago.

These airways belong to the public and are to be used for the public good and not for corporate manipulation. Do not sell our rights to the private sector as they will never again be available to us. I am an AT&T customer, not by preference, and an ATT shareholder of many years but I oppose their intention of privatizing public airwaves which are the heritage of and for the benefit of the public. You have the obligation to prevent this outrage from happening if you are managing our public resources as you should be doing.

The private companies have not made a sufficient effort to provide DSL or other high speed Internet technology to remote customers, and they have tried to stifle efforts by municipalities to provide community wireless Internet. Prices of high speed Internet access in the US are considerably higher, and service quality is considerably lower, than in countries like South Korea and Japan. All of these activities are bad for our economy and inhibit the spread and use of the Internet as well as innovation. We must reform the way the public airwaves are leased to private companies.

<td>As society becomes increasingly digitalized, internet access is one more factor that separates (disastrously) social and economic classes in America. It is in the economic interest of all–large corporations and small businesss–to have wireless access freely available. Letting corporations like AT&amp;T, Verizon, and Comcast control the airwaves for their profits cripples the US economy as a whole and it’s ability to be internationally competitive.</td>

The public airwaves already make billions for private companies and we get nothing in return. Cable is a monopoly. The government should not be enabling these types of situations. Open the public airwaves for the public good!

Stop catering to the Corporations and start thinking about the people you serve!!

Innovation has kept our country competitive. Let's not dilute that now.

Keep the Internet for the public good. Why would these private companies come in and take over? What gives them the right? It's nothing they discovered.

Please use the public airwaves for the public good. Or please mandate that big companies cannot stifle competition and innovation. thank you

Collected by MoveOn.org Civic Action
A free people are only free as long as they are informed. Allowing huge corporations to control the airwaves would limit news to what the conglomerates want us to hear. It's already happening on Fox News.

We are at a point in the evolution of our Democracy where we can protect the public good or turn our assets over to private enterprise for private greed. This is the line in the sand. This is the issue to take a stand and leave the public airwaves and their ownership to the public, not to corporations. Private corporations are successful only because they have the American people's resources (taxes) and ingenuity to bail them out when they fail. Stop this insanity... it will only lead to economic insanity.

The public airways need to be just that, PUBLIC. We all know what happens to products when big corporations "Help out". Look what the oil companies are doing to us now. High gas prices at the pump while corporate profits grow larger each quarter. The telephone companies. My bill has gone from $25 per month to over $70 per month, that's for the basic phone service. I can't afford any more "Help" from big business. They are doing all they can to me right now by bringing in and hiring the ILLEGAL aliens. Enough is enough. Pete

Use the public airwaves for the public good!!!
I am absolutely opposed to the federal government turning over a huge portion of our public airwaves to companies like AT&T, Verizon, and Comcast—who will use them for private enrichment instead of the public good!!!
The FCC’s mission should be just as much empathetic to enabling the communications infrastructure in favor of the public and the nation’s citizens as towards any other view!!!
The current administration of President Bush’s administration has given more assistance and tax breaks to big business and made harmful changes to the law, rules and regulations affecting veterans, Disabled American Veterans and the citizens of the nation than any other!!!
If this current FCC sides with big business over the public citizens it will be another slap in the face to the nation’s citizens!!!
Do not favor companies like AT&T, Verizon and Comcast over the citizen’s and the public’s enrichment of public airwaves for the public good!!!

Please don’t let the big dinosaur companies do what they’ve tried to do with cable internet for years now. Wireless internet has the most potential to give internet access to everyone, at low cost. A functioning democracy needs all citizens to have ready access to information. The internet is that access.

John
MI 48879

Public auction procedures must do two things: raise the maximum revenues for the government, and guarantee use it or lose it status. Together, these two items will help insure proper use of the public assets that are our airwaves.

Stephen C. Fox
Mountain Lakes, NJ 07046

Don’t let these big companies ruin what markets the greater good in our lives.

Brittany Swope
Saxton, PA 16678

Don’t turn our airways over to crooked big companies like ATT&T...!!!

Airwaves should allow innovation and be open to competition. The playing field should be level for all regardless of who is granted rights to them. the air waves don’t require the same type of capital investment as wired providers to benefit the public.

Franklin A. Drazen
Woodbridge, CT 06525

Clint Welsh
Chugiak, AK 99567-2571

Access to the internet is access to information just as is a library or school. All tax paying citizens should have a right to access the internet just as they have the right to access libraries and schools.

Rodney Goodwin
NAPA, CA 94558

Having 7 people own the airwaves obviously limits views. A license is received in order to keep the public fully informed - meaning informing all the positions, all the issues, all the sides. This is NOT being done, and has NOT been being done since 1996. And since Reagan took away the fairness act. If the airways are NOT opened totally for the public, then, you will be making us a fascist nation. Just because we have been one since 2000, does not mean we need to continue being one. Either we have rule of law and the Constitution preserved and protected or we are, then, Amerika.

Deborah Burns
Dayton, OH 45405

Scott Trombetta
surf city, NJ 08008

I urge you to keep the public airwaves public! It’s time that government really be for the people, not big corporations!

Muskegon, MI 49441

Leonora Nelson
Oceanside, CA 92057
The PUBLIC airwaves should belong to and benefit THE PUBLIC! They should NOT be yet another bonanza for private/corporate interests to use to line their pockets at the public expense. The internet is perhaps the most important democratic forum of our time. It will not remain democratic if it is turned over to big companies who will stifle competition, innovation, and the wireless Internet revolution. Competition and innovation must not be stifled by whoever wins this auction.

Elisabeth D. Somervell
Brasstown, NC 28902

The public airwaves should remain public–and not be used for corporate gain!

The internet as it stands is one of the few mediums left where the free flow of ideas can be shared. Connection to the internet should be the same—free or cheap for everyone, with access for everyone, as the most democratic means of communication the world has seen yet.

To have a free country you need your communications to have as broad a base as possible. China and the Muslim world do everything they can to keep communications controlled by an elite group of busybodies whose only goal is to stop politically and religiously incorrect opinions from being heard. We don't suffer from "islamo-fascism" in this country but we sure have to worry about petroleofascists, bureaucraticofascists, bornagainofascists, and bigbusinessofascists, all of whom would like to silence anybody questioning their so-called "truth". Don't think you can ram this through by calling Congressional votes at 2 AM on Sunday either--we've already seen that tactic. Alertly yours, Dave and Sandie

If it isn’t broke, don’t fix it! A few Corporations will dominate and privatize what has been accessible to all of the people. We do not need and we do not want this to happen. Keep the airwaves free as they should be.

Sincerely,
Helen Shondell
Oak Park, MI 48237

public airwaves are just that – public. Keep private enterprise out!

Mary C Montes
west hills, CA 91307

The Internet is true freedom of speech in action and must remain that way.

America’s march into the war in Iraq is all the proof you need to know that giving America’s corporations control of the flow of information is a recipe for disaster. Hundreds of thousands of needless deaths are directly attributable to America’s main stream media and the FCC’s removal of the fairness doctrine. The same mistake must not be allowed to happen again.

Kevin Cloyd
Silver Lake, IN 46982

Please don’t sell our information sources to huge corporations who will only be seeking their own gain.

Janet Al-Hadidi
Bloomfield Hills, MI 48304

We have lost the fourth estate to the corporatist interests. In order to maintain the semblance of a democracy, we must safeguard public airways to open exchange of ideas that are not conducive to big businesses.

If Rupert Murdoch is not enough of a warning—a homogenizer, lowering standards of his media enterprises to fit his own mindset—then no one can persuade this administration to consider their constitutional obligation to The People of the US for—but it is important to try. Media are critical in forming understanding and shaping the electoral process—keeping it an open forum, not an agenda-ized propaganda machine—is critical to democracy and our beloved freedoms.

Michael Swofford
Pacific Palisades, CA 90272

Collected by MoveOn.org Civic Action
Giving fewer companies control over our airwaves obviously reduces competition and creates more expensive markets for Americans. Surely you do not want to impose these restrictions upon perhaps the most important communication tool of our time. America is already falling behind in medical care for its citizens education on most levels. This will only add to a further and quickened delcine.

Larry

The internet NEEDS to stay neutral! Legislation like this will put our business and thousands like ours OUT OF BUSINESS.

Denyce Rusch
Fairfield, IA 52556
We need to keep radio and any other public communication in the public domain.

The public airwaves should be used for the public good. The government should protect the airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

Please preserve the airwaves for the public by keeping under Government ownership. Privatization is only interested in profit, not fairness, not justice, not restraint. Stop this now.

I am disgusted with the control big business has over this country and it's policies.

Collected by MoveOn.org Civic Action
these companies already control vast parts of our communications network. public airwaves need to remain in the hands of the public. if corporations are allowed to control any for of public communication I fear they will abuse it and use it for their own means. I fear a future where children look like walking billboards, covered head to toe in advertisements like some grotesque organic Nascar. and if these companies are allowed to control these airwaves we will be on step further in the towards the loss of public power to the corporate machine.

Allowing viable public domains to be bought and sold by those mega-conglomerates that already control so much power and money within our economy would be doing the American people an unforgivable dis-service and would ultimately lead to more economic and class strife, further splitting the upper and lower class, eliminating the middle-class and reducing hope for those pursuing better, brighter and more prosperous futures. Please, listen to the masses.

Think about what it means to serve the people well. Other countries are ahead of the US in terms of interconnectivity and they will win the communications war. Now that more and more of this country is on the chopping block think of saving something from corporate greed and of leaving it for future generations.

do not privatize the airwaves.
Eric Beeche  
Slingerlands, NY 12159

Please say no to the big communications corporations and yes to the American citizen!
Edwina Horn  
Asheville, NC 28805

Seriously, I can't even imagine a good reason for not passing savings on to the consumer. But this is a capitalistic society so I can't be surprised that the government and corporations are more interested in making a buck.
Sondra Showers  
Cheektowaga, NY 14215

Protect the public good by setting auction rules that prohibit anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves. And just as phone companies can't tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.
Susan Terwilliger  
Flushing, NY 11355

How can you even entertain the thought of giving any portion of our public airwaves to companies for their profit and our loss as citizens.

The Internet is the great information equalizer of our times, and has done much to contribute to the growth in our democracy. The fact that I have to pay for Internet, or that others have to for that matter, only limits my ability to participate in democracy, to access information, and to be a fully engaged and informed citizen in this day and age. I find it outrageous that the government would consider not protecting our airwaves by privatizing them. Please keep the wireless Internet market open and widely accessible. Thank you.

Sarah Moros

This is an obvious move to monopolize on communication throughout the US. What happens once they all become partners of the grandest media outlet, which stifles any kind of useful information that could be accessed by the average Internet user. The Web should always be evolving into a tool more useful for the benefit of all, not the few who are willing to hold back the future of its capabilities. This move would destroy all of what it has become, hence leaving it forever in a state of distrust and disrepair. A grave state for something that was once so promising. Do the right thing!

PUBLIC airwaves are for PUBLIC use. DO NOT, I repeat, DO NOT privatize PUBLIC airwaves. How simple can it be? Sylvia R. Post

Sylvia R. Post  
Rumsey, CA 95679

The public airwaves are the property of all people and all should have a right to them. It would be wrong for a few huge companies to be allowed to seize them for their own private purposes.

Fr. William Moisant  
Tualatin, OR 97062

I'm not aware specifically which frequencies are being considered for possible sale, but it is especially important to keep the FM frequencies reserved for use in schools for use with personal FM systems. These systems are extremely important to the academic performance of children with hearing, processing or attention impairments. The concerns also for the future of Internet to the general public are also important to consider. If too much is sold to private interests, we may not be able to reclaim important services in the future.

Brian Sawka  
Buffalo, NY 14214

Dear FCC
It is time that FCC works in the best interest of Americans and not benefiting corporations. FCC is to serve the people and not to serve the companies or corporations. It is time that FCC complies with the role that it was created for.

These newly available airwaves are a once-in-a-lifetime opportunity to all people and must be protected as public airwaves for the public good only. Do not turned them to the companies specially the big one or the one who will turn around and sell them to big company or get big latter by themselves. Stop the monopolization of airways. It must be treated as healthy air and oxygen for all people.

Television for one has become a vast wasteland of junk so called entertainment. It could become a wonderful tool for education of our young impressionable children. This is an area the FCC should also be forcing the so called major networks to comply with instead of allowing cartoons to be called educational. A review of this area should be considered along with all other airwaves.

The airwaves are like public roads - they must be open to everyone. Allowing corporations to bar access to competitors will strangle innovations and economic growth.

Please keep the airwaves open for all!

In a world where corporate media conglomerates control a large portion of information, the internet has been a great equalizer. Accessible to all for a reasonable fee from home or any public library, the internet has provided access to all regardless of class or economic circumstances. We all see where approval of such a bill will lead. The costs for fast-tracking websites will eventually be passed on to every single person accessing the internet. Those without a way to pay will once again be left behind. Do we really need yet another way for the rich to get richer and the poor to be denied access to information, education, and recreation? Do the right thing. Continue to keep this wonderful resource—ALL of them—available to all.

The airways need to stay in the public domain so that they can be used for the public good. Private companies only care about making money and they don’t care what the consequences. Information is power and the power of the airwaves needs to remain in the hands of the public, where true power in our democracy is suppose to reside.

Kevin Allen

I am absolutely against giving a portion of our airwaves to private companies. Especially since I am 100% certain that doing so would ensure benefit for the corporations at the expense of the individual.  

I am outraged that this Republican, incompetent and corrupt Administration can't wait to hustle (privatize) the resources of the American community into the hands of the corrupt corporations before they exit in '08. How outrageous that our govt is in bed with the corporations, advancing their interests instead of the public good! Isn't that Fascism? We don't even demand the royalties that we are due from the oil companies! What a give-away to the rich and the American corporations that offshore their offices so they can avoid taxes and pocket the monies that belong to the American Taxpayer. Do not give the public airwaves to the corporate criminals who advance their own interests and bow to King George the Incompetent.  

Don't sell public trust to private interests for their profit!  

This is one more way in which we are losing our rights as a nation.  

Please don't allow the corporate swine to rape our national resources.  

Collected by MoveOn.org Civic Action 2363
I remember when the idea that the airwaves are public property was sacred. Now it seems that nothing is sacred, the government is selling off America piece by piece to the big corporations. The troops can defend us against foreign aggressors, but who can defend us from that? America should belong to the people, and should be free, not for sale to anyone!

David Harpe
Sacramento, CA 95822

PLEASE KEEP THR PUBLIC AIRWAVES PUBLIC!!! It is America for crying out loud. Read your history books- keep us free.

FCC,
As you weigh the question of who should be the stewards of the airways, I only ask that you think long and hard about who will benefit the most from this decision. I only wish that someone in our great ‘democracy’ would consider the welfare of the whole population instead of only big business and the already wealthy elite (as usual). The internet has evolved into something of a necessity, much like a telephone. I am very concerned that if the FCC hands this prize over to the greedy corporate world the internet will return to being a luxury that people on an average income, or fixed income like myself, will no longer be able to afford. Please don’t allow this to happen.
Sincerely,
Judy Metzger

Jerry Kolstad
Cottage Grove, MN 55016

The public airwaves should be used for public good—free from government intervention and taxing, but also free from monopolies and big corporations from dictating and controlling the airwaves. Free enterprise and public freedom to access the best service at the best price should be the obvious solution at the best price should be the obvious solution without government and big corporations destroying the freedoms of the people.

    Xochitl Gill
    Tucson, AZ 85719

We have all been told time and time again that competition will keep our prices down. So far, that has not worked to the good of the consumer. When Adelphia in my area was bought by Comcast, my rates went up. I have given up a home land line to keep my communications costs down as much as possible. We are all being told we must convert to HDTV or not be able to receive signals. Who makes these demands???
The cell companies hide their comparisons behind multiple rate plans that are nearly impossible to compare side by side. Cable companies make long term deals with jurisdictions that strap consumers with one company which can raise rates on only the company’s terms. These enormous businesses, who make up to billions in profits each year and pay their top executives salaries and bonuses the regular person cannot even comprehend do not deserve to have these public airwaves under their control at the expense of the public good and the monetary expense of all the American people. Do not allow this!!

How much of what's important to the American people is going to be given away to corporations? Look what's happened to news and knowledge now that Disney owns ABC and General Electric owns NBC! Non-stop info-mercials for their own movies and music, rather than information the citizenry needs to stay informed.

Pam Brooks
Fort Ann, NY 12827

Collected by MoveOn.org Civic Action
To the Federal Communications Commission my name is Joshua Saunders and I am a law student at Golden gate University school of Law. The Internet as it presently exists has proven to be an ever-growing resource for information, commentary, and political expression. I am concerned that allowing big companies control over the Internet will suppress free expression of differing viewpoints in the same way that consolidating the media in a few companies has done so. Please consider my thoughts when you are making your decision and think about which Internet future you would prefer for yourself and your children.

Joshua Saunders
El Cerrito, CA 94530

Stop the corporate freebies at the public expense.

Brian Murphy
Washington, MI 48094

I recently watched a show detailing how far behind other countries the US is when it comes to wireless and high-speed internet technology. By allowing a couple of big companies to call the shots and bully smaller companies (and even towns as described in the documentary) we will do a great disservice to American innovation.

Marsha L. Hansen
Portland, OR 97208

America needs the airwaves for public good, not for private exploitation.

Daniel J Ward

Our government is seemingly working AGAINST us, the people—and SOLELY FOR corporations. Since that is not how government is designed to work, you have a unique commitment to us, the people of this country, to keep competition alive. Back in days past-1890ish-when we had leadership with actual foresight, the government knew that there were certain things—like antitrust laws—that would only stand to benefit the people because of free, open and healthy competition. Today, with all other prices escalating—and wages minimizing, you MUST do your part—as American citizens yourselves—to protect us from this by not allowing these companies the right to stifle healthy competition.

For once, please do the right thing—our government—Congress, the Senate, and especially the white house are allowing this country to become a corporate wasteland. Please do not allow this to continue—you actually have the ability to impact us greatly with doing the smart thing here. Think good and hard. Will this help America—simply laying down and allowing the corporations to walk all over us (again!)—or will preventing these airwaves from being misused benefit America? If you love America, you will want to benefit it, not act to further damage a country that is in such a fragile state due to what has happened since 2001.

Do I have faith you will do the right thing? Of course not. But you should. And you can.

There is a clear demand for the public airwaves to remain public and not put in the hands of corporate crooks to push their own agenda and political propoganda.  
There is a clear mandate of what is morally right to keep these sorts of assets public and not in the hands of corporations who are profit mongering greed driven evil. It would be nice for a change to be a citizen and treated with respect verses a faceless consumer entity that will be manipulated by the corporate machine.

Port Townsend, WA 98368

The wireless phone revolution of the past decade 
is a prime example of leaving the field open to 
the widest amount of competition. The strides 
made in the telecommunications medium have 
been huge due to the competitiveness of exploit- 
ing the technology. It’s lead to better pricing and 
far better service than it might have otherwise. 
To close off these additional airwaves will stifle 
that creative and competitive edge that leads to 
the highest standards of technological achieve- 
ment. Please don’t let big business close this off 
to fair & competitive development.

Jame A. Riley
Atlanta, GA 30318

I have read with grave and increasing concern over the past months about the de facto destruction of internet radio; this current debate is a further indication that rights to major communication spaces are finding their way into a smaller and smaller circle of more and more powerful interests. PLEASE do not let the largest bidder in this auction milk it to the nth degree.

What is this country coming to, I ask you? For God's sake, it's not enough that GWB is ruining this country with all sorts of ugly obnoxious junk that he puts through but now we have to contend with HIS administration controlling what we watch? As it is, they bring the wounded soldiers from Iraq back at night, so the press can't film it and nobody sees. DISGUSTING.

Paul Conley
West Hartford, CT 06117

Hasn't our society suffered enough because of the over-corporatized airwaves? The airwaves are intended to belong to the public, American citizens, not special interest corporations who lobby to seize them so they can increase their profits. Are any of our founders' values sacred? As a society, are we going to be stripped of all of the liberties and rights that set us apart as Americans? As the U.S.A.? How are we to spread democracy and freedom to other nations if the very fiber of our own democracy is taken away from the citizens and given to corporations for profit? Please make a decision that supports Americans and our rights and liberties instead of these corporations. We must have a balance or our "free" society will no longer be of the people, by the people for the people. It will be of the private business sector, by the corporation for the profit and that is not consistent with our core values, our constitution, nor our role as leaders of the "free" world. Please see past the special interests on this issue and maintain our public airwaves for the good of our democracy.

Sincerely,

Erinn Hall
Fort Worth, TX 76110

This is ridiculous. Give the channels to micro-transmitters instead (e.g. to licensees for low-wattage radio stations, and not, not licensees who are multi-million-dollar corporations)

The events of 9/11 and Katrina taught us that we must make sure America's communications for it's emergency responders is second to none. Giving these resources away for a price is absolutely wrong. It is only through extremely unfair pricing that these companies have the resources to buy the airwaves if they come up for auction. The public has paid enough. Since we are selling off public property, let's start with the White House.

I rely on FREE tv and internet. I have an antenna on my tv (NOT CABLE) and use the internet in the public library. I am a low income person, and could never afford cable tv or my own internet. All government programs require you to do things "on line", and you just CANNOT take this connection to the world and our nations resources away from the poor (like me.) I know you are all very wealthy, but if you do this, the gap between the rich and the poor will get MUCH wider. Please do not take free tv and internet away.

Douglas Dick  
Long Beach, CA 90803

The Federal Government should not auction off public airwaves to private corporations. The FCC should promote competition in the marketplace, which is desperately needed. Consider the fact that the US is far behind many nations with regards to high speed internet access, and this is partially due to the fact that our marketplace is highly anti-competitive and divided up into regional monopolies that fail to support their customer base (COMCAST! VERIZON! I could go on). I strongly urge the FCC fulfill its Patriotic Duty to act in the interests of the American People and honor this petition.

Alex Haslach

This issue isn't just about fairness to the consumer, although that concern alone should be sufficient to motivate the FCC to make sure that these airwaves are put to good use. It's also a matter of staying competitive in the global marketplace. The wireless revolution is enabling up and coming industrialized nations to skip a whole generation of infrastructure and instead embrace wireless directly. If we allow these corporations to strong arm us into continuing to rely on their outdated systems, we will be left behind, permanently. Act now while there is still time, please.

"Big business has too much influence and power now in television, newspapers and radio. In many markets there is virtually no competition. We don't need to add to their power and influence by selling them the public airwaves. Once again the ordinary citizen will get the shaft.

Again the public will receive less than superior service so that corporate america can gorge itself on our monies.

We finally have the great equalizer, the Internet. Please don’t hand it over to Corporate America. Let the real Americans have it.

The FCC would be criminal if it privatizes any aspect of our airwaves.

Dear FCC Members,
As guardians of the public interest, I urge you to consider carefully the negative impacts of consolidating all internet bandspace within the hands of a few large communications companies, which would stifle innovations and competition and potentially open the door to censorship. Please do not allow a few companies’ interests to outweigh those of the millions of Americans who rely on the internet everyday—and for the millions more who may also gain access if small, independent companies are allowed to use the unclaimed bandspace to provide more flexible and affordable service. I trust that you will act upon your consciences for the public good.
Sincerely,
Megan Harris

Please, please overlook big business and serve the public good.

The airwaves should remain the sole domain of the public. Corporations should not control such large segments of the airwaves. The last thing I want is having to pay more bills or taxes to support some corporation that has no business there in the first place.

Support free speech! Support citizenship with our tax dollars!

More and more, corporations are putting a stranglehold on the ideals of our society in the name of profit. I urge you to uphold the vows that you swore to protect the public good and protect our airwaves from corporate exploitation.

Dear Commission member:

Please, please, please be individuals who are trustworthy. The big boys do not have the public interest at heart... you must. Do not act in favor of their interest. Do not pass something that lets them screw the public.

Thank You,

Willard C. Marlow,
registered voter

We have almost entirely lost sight of a founding principle of our nation. At the center of almost every major city was a "commons" – originally a pasture area owned by and available to all citizens to share equally. The same was true of major natural resources, water rights, etc. The notion was derived from the fact that these were resources that existed naturally, not due to the efforts of a closed group who had exclusive rights to develop and exploit them. Further, these were to be held in the public ownership and interest in perpetuity as our common birthright.

We have long ago sold off almost all such common possessions and have lost their common good. It's time to stand for one of the few remaining commons – the access to information on the internet not controlled by big business interests. Please, do not let this happen.

Media companies, like Fox, MSNBC, ABC, etc are owned by a few people which sometimes include newspapers, also. We the people need to have some say and power over information, too. We need network neutrality on the internet, and a lot more availability for expanded, affordable internet connections. As you are Federal, you represent us, and we need for you to mandate that whomever will own these new airwaves will not stifle competition and innovation. Mandate that they will consider the public good. Thank you.

I strongly believe that our new communications airwaves need to remain available to the public. While I understand the desire for big corporations to monopolize such resources, I believe it is essential that our government allow the airwaves to be public in nature. Please do not allow companies such as AT&T, Verizon, Comcast, and others to monopolize our airwaves.
Stephen Benentt
Lexington, KY 40502

Public airwaves are for public good not corporate greed.

Our airwaves have not benefitted from privatization since the process began in the 1930s. There is so little bandwidth left for public interest that there can be no substantial benefit of handing them over to private companies. Public organizations like NPR and PBS provide a public good that private companies cannot, simply because they depend on advertisers, whom they must appeal to, not the public.

Rob Koss

read George Orwell’s book ‘1984’ and this is exactly what is happening. Following is a taken from Mondopolitico review. Owing largely to progress in communications and other technologies, governments and businesses today have more power than ever to monitor and influence what we buy, where we go, what we watch or read, and what we believe. Recent terrorist attacks in the United States of America (most notably, the destruction of the twin World Trade Towers in New York and the Pentagon, and the delivery of Anthrax spores to public officials and the media in the U.S.A.) has most citizens more willing than ever to give up more individual freedom and privacy in exchange for the promise of greater security. Long denied the right to violate basic individual rights and freedoms and privacy, the world’s law enforcement and surveillance communities and their governments are seizing the day, and making rapid steps to pass relatively permanent legislation giving the government powers which - prior to the acts of September 11, 2001 - would have been considered by the general populace to be powers properly unleashed only for temporary periods of national emergency.

In the process, questions are being raised as to whether the surrender of individual freedom will actually result in greater security, or whether we, in giving up freedom for security, are satisfying the aim of the terrorists to begin with: to undermine individual freedom of choice, equality under the law, and the dignity of every individual.

1984 has long been the first book to which we have turned for a vivid picture of a government that has used war to justify infringement on freedom; that has used speech codes to limit everyone’s ability to understand higher concepts or concepts that favour human individuality; that uses powerful media to build unwarranted consensus and rewrite history; and that has used technology to nip political opposition and individualistic or eccentric practices in the bud. Far from being a caricature, it insightfully and skillfully characterizes the tendencies and motivations of unlimited government power, and the horrifying, hopeless result of such government: humanity denied its freedom to think, to be rational, and to dissent...its freedom to be human.

Warren Getchell
Meadville, PA 16335

The public airwaves need to stay public! Please don’t let them go into the hands of corporate airwave mongers—they’ll just dole them out as they see fit and not keep the market open. Thanks!

These are called Public Air Wave which implies they belong to all the public. Only the public can decide what is proper and what is not (through our elected representatives). You cannot allow chosen monopolies to take this over. The government is best left as stewards of our public air waves.

Roberto Juarez
Ramona, CA 92065

In order for a democracy to survive, the citizens must be educated and have free access to all means of communication. The public airwaves must be kept public in order for the free flow of information and ideas that will help The United States, and indeed, the whole world benefit from innovations in ways to improve the standards of living and general well being of all peoples. We must not allow large corporations gain control over these airwaves thus blocking exchange of ideas between people who cannot afford the large sums they will require for use. The Federal Communications Commission must allow free public use of the wireless internet if we wish to maintain our democracy, freedom, and raise the world wide standards of living.

Allowing a few companies to bid on these bandwidths will result in a Nash equilibrium which is sub-optimal to our nation's best interest, with the only net increase in benefits to the increasingly smaller number of companies who are active in this space. Their risk aversion by over-paid executives and focus on short-term gains and quarterly shareholder reports will result in America continuing to fall behind countries like South Korea, Sweden, New Zealand, and others in terms of growing with the tranformation of our digital world.

The government should in this case act as a 'good shepherd' regulator and do what is best for the American people, not just a few select companies.

Hugo Mumphries
Houston, TX 77345

Why do you not want competition, look what happened when Cheney And Bush took over rule of the Oil Companies. You say they didn,t, look again

Dear Commissioners,

Because of the consolidation of media in the hands of a few large companies, more than ever we need to work to ensure that the public has control over the media by preventing further consolidation and also working to reverse this trend.

Thank you,
Daniel Seitz
Great Barrington, MA 01230

Corporations will always do what is right in their own best interests. That is OK for private markets but not OK when we are talking about public domains. Enron, Tyco, Arthur Anderson, WorldCom, Halliburton and the list goes on. They will NEVER operate for the public good. Only the government can even approach the level of public interest needed.

Please keep the airwaves public.
Thank you,
Joe Ogno

This government is getting too involved in public affairs. Keep your nose out of the public airwaves and leave them public, as they were intended. Don’t turn us into a Soviet Union!

Kristin Tregillus
Seattle, WA 98144-5523

Julie Qrys
Elmore, AL 36025
As a member of our rural Vermont town’s broadband committee, I know firsthand that big companies are not interested in underserved rural areas, despite the fact that telecommuting is now a totally viable work option for those in rural areas with broadband. We found a local company who were willing to establish a local wireless network that serves a combined population of about 2000 people in four towns at a reasonable rate, with a mission (based on the towns’ agreement with them) to find a way to serve every household that is technically possible. Large companies refused to extend cable lines or DSL access because it wasn’t “worth their while”- if we allow corporate giants to monopolize the airwaves, this same refusal of service will be widespread, and will cut off this very positive development for rural citizens. The people of the US, not corporations, own the airwaves and should be allowed to use them for their benefit, and not have them auctioned off to satisfy the monopolistic tendencies of giant companies.

Sarah Obrien
Plainfield, VT 05667

We have a chance to do something good for America and that’s to leave the internet in the healthy state as it exits. Are we really ready to give up something so precious as this to the same corporations which have smothered the airwaves of any public gain? Say no to the theft of an opportunity we have in educating the people of this nation with uncensored truth.

Donald Roome
monte Rio, CA 95462

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

Lijun Yang
Austin, TX 78749

This is a free country, what is happening with this organization to even begin thinking of controlling the air waves for the internet? We do not want our country to become another Nazi Germany country.

Virginia Bieren
St Paul, MN 55107

These corporations have a history of putting their interests ahead of their customers. If we allow free access and development of this spectrum instead we can create a new industry for greater long term benefit.

Noah Waller
Miami, FL 33179

Please require that the public airwaves be *used* for the public good. Internet in the US is already pathetic compared to many other countries. Please do not let the public airwaves be wasted just for profit.

What makes America great is that information can flow freely, that innovation has an environment where it can thrive. Big corporations are seemingly incapable to do so, and instead try to push legislation for an unlevel playing field. This is in nobody’s best interest, not even their short-sighted investors. America has been falling behind technologically precisely by valuing short-term earnings gains over sustainable growth. The proposed legislation should be a non-starter for any reasonable person.

Frank Schmeisser
Bellingham, WA 98229

As an employee at a small software company that depends on the web for its business, I know firsthand how important it is to give the public as much access to our services as possible. Put control of the network in the hands of a few telecoms could very well strangle our business and freeze the innovation that many small web-based businesses have been responsible for.

Peter Guarnieri
Arlington, VA 22201

Keep the public airwaves public. Do not let private enterprise buy them. This would cause another OPEC.

Airwaves are valuable public goods. There is no justification for turning control of them over to corporate interests. Free expression and civic discourse depend vitally on access to media. In the 18th century, it may have been sufficient to simply protect speech itself, pamphleteering after the model of Tom Paine, etc. Today, protection speech alone is not enough given the tremendous power of corporate media driven by technologies such as those found on the Internet. To truly protect speech, which is quite literally the cornerstone of our democratic aspirations as a country, we must also protect public access to the media which make speech possible. If the federal government fails in this mission, it fails to protect its most basic legitimating principle.

David Stucky
Eugene, OR 97405

One of the scariest and evil things that has happened these last 12 years under Republican leadership is the loss of the independent journalist voice.

The new avenue of independent voices and information free or free-er from big corporations control is the internet.

Congress, remember your VOW to represent the PEOPLE of your United States of America.

To: Federal Communications Commission.
From: Ned Ammari of Westerville, Ohio.

Dear Sirs/Madams,

As a concerned citizen about the future of Public Airwaves, I respectfully request the FCC to maintain Public Airwaves for the Public Common Good. As how to achieve that noble goal is up to the Commission in finding clean ways to do just that. Please consider this note as a reminder that your decision will effect millions of people. Thank you for reading this note.

Sincerely,
Ned Ammari

I have no problem allocating bandwidth for use by companies, but it should be leased with the agreement that require those companies provide public services in return, and the FCC needs to stand up for the public interest for a change.

Andrew Lewis
Phoenix, AZ 85050

For decades companies such as AT&T made profits by hoarding long distance phone service. Now they and theirs want to impose the same on the internet. The internet has the potential to have peoples of the world communicate as never before. How many of the world’s maladies have been borne from poor communication? Allowing these companies to control access will surely promote their ideas and profits at the expense of more misery from a lack of communication.

William Aross
Phoenix, AZ 85027

Please keep the airways in the hands of the people, not the corporations.

NO MORE MONOPOLIES!!!!!! I can state as a consumer of two of the three aforementioned companies (and I actually worked for the third company listed) that the prices are insane. Even with the insane prices, my service is/has been frequently interrupted, I've been pressed into legal disputes due to the disruption of service (account in good standing, paid in full, JUST NO SERVICE), so what am I paying so much for?? As a college student, I can barely afford to go to school (books, tuition, lab fees, equipment fees, locker fees, health fees, updated shots/immunizations, HOUSING, food, bills!) but in this age it is IMPOSSIBLE to have no internet and go to school or even work as a receptionist. Even my 12 year-old cousin knows that, and he's still in middle school. So how can we deny something so basic [at least our schools and jobs seem to think so] to our children? Are we PURPOSEFULLY retarding our future generation?? We are the leader of nations [aren’t we: AT&T, Verizon, Comcast?] - let's start acting like it. 

Rocha Dollar
Portland, OR 97202
I ask that you please keep our public airwaves out of the hands of private companies so that everyone in our nation can benefit from them.

Joshua Newton
Atlanta, GA 30315

We deserve a choice. Freedom of information via the internet and the airwaves should be affordable to everyone. Please do something for the people rather than backing the corporations that do not serve the people but rather feed from them.

Heather Fitzgerald  
Grand Rapids, MI 49534

I believe it is critical to keep wireless access to the internet free and not controlled by big companies. If we honestly believe in free trade then keeping wireless internet available without restriction will be better for trade and commerce than restricting it through subscriptions through companies. The internet should be available to all for the lowest possible prices to encourage and grow our economy. Please keep access unrestricted.

Holly Mahoney  
Sandy, UT 84094

Heather Perkins  
North Las Vegas, NV 89031

Matt Ramsey

Come on people, let’s do something for the people (your bosses, remember?) for a change eh?

Tim King  
Oakland, CA 94607

Christine C. Hopkins  
Whiting, NJ 08759

As a MAJOR participant in the FREE Internet, I must insist that the Internet REMAIN free. The uninhibited exchange of ideas, information, knowledge, and data are essential to maintaining the freedom this country professes to desire. If corporations are allowed to call the shots, then the people will be raped of their freedom.

Marc Rosen  
Glen Cove, NY 11542

Please keep the COMMON GOOD as one of the values of our American society. Keep the public airwaves public, not controlled by the giants. This is not Venezuela!

Rosemary Davis  
Springfield, PA 19064-1137

Please keep it free an open- FCC please do not sell american airwaves to these corporate hoars.

Michael Ackerman  
prescott valley, AZ 86314

Please keep the public airwaves for the public.

Carol T. Vanek  
New Port Richey, FL 34652

There is little enough competition in the world of telcos & telco Internet Service Providers. Conscripting the airwaves to large corporations will reduce options for businesses and individuals to a minimum – putting yet another obstacle in the way of access, free commerce and personal communication.

Mark Orr, San Jose CA  
San Jose, CA 95125

Keep Internet access and public communication out of Corporate control

Dennis Biggs  
CAMBRIA, CA 93428

Sarah Nugent  
Trumbull, CT 06611
Please remember to keep the public’s interest as your top priority as you make these decisions. We all suffer when good things are purchased for the sole purpose of eliminating competition.

I have begun to wonder lately just why Ma Bell was broken up because it was a monopolistic enterprise only to, in the last few years, have it reconstitute itself to what it was in the 60's & 70's. Where is our free press and media of all kinds guaranteed in the Constitution of the US? My heart is absolutely BREAKING for what is happening in this country to the point where I, and a couple of my grown children, are seriously considering leaving the US. It seems every day there is a new threat to the "free" country we all reference so frequently. "Operation Iraqi Freedom"? What about US Freedom? How can we help other countries have that which we no longer have?

Once upon a time we regulated monopolies. Since the Reagan years, we have seen the decline of regulation and the rise of monopolistic practices by giant corporations that keep growing larger. There was a reason for the regulation. Corporate greed stifles innovation far more than the regulations stifle corporations. The FCC, as the oversight body (supposedly) for the good of the public should be working with the interest of the people in mind. ATT, et al have plenty of resources to use in order to compete in the marketplace. They don’t need any more handouts. Our nation will fall far behind other nations if we let a few giant companies control the marketplace by growing even larger. Competition is good. So is an open market that allows innovation and a challenge to the status quo. Granting ATT, Verizon, and Comcast more of the public airways will not give us the future that we deserve. It will ensure that we are trapped in the past. Let us not become stuck like the former Soviet Union did. As a part of the government of, by, and for the PEOPLE your mission is to maintain a fair and level playing field. Do not be bullied by big media. It will hurt us all.

These airwaves are public property and must be auctioned in such a way as to help the American consumer...not huge telecom companies. Do the right thing: protect the integrity of free enterprise and allow smaller, more agile companies access to these airwaves. To leave this much power in the hands of the giant-few, is criminal.

Chris Bolin
Brooklyn, NY 11215

Use THIS taxpayer’s money to stop communication monopolies from forming. Don’t allow a select few business conglomerates to control what I see and hear via the media.

Dear Federal Communications Commission:
The public airways are just that, public airways. Public airways should not be sold to corporations who in turn would price these public airways too high for a lot of people. Availability of internet service in any place in the U.S. at affordable rates would benefit a large segment of the population vs a large benefit to the very few.

There already is a blatant abuse of consumers’ rights from the big companies monopolizing communications in the U.S, not to mention the use of records for commercial purposes when private information is sold to other businesses. The FCC should not allow them to increase their power over the consumer; telecommunication should be used for public good and kept away from such threats to consumer rights.

Mariam Abdelkerim
College Park, MD 20740

Michael Vangeli
dallas, TX 75230

A free and open Internet is an essential part of my daily life and will become even more important to me as I head into retirement in a couple of years. Accessibility to it must not be allowed to become controlled by commercial interests but needs to be held and protected in public trust: Public airwaves for public good. This issue matters to me!

Gerald Greenfield

I am no longer interested in working with the few companies that handle our airwaves. Either I have no choice or the choices have only to do with how much I pay. I want to open our airwaves to a broader population, freeing individuals and groups to come up with innovative solutions to connecting us all.
Elizabeth Gatti

Don't do this. Keep the airwaves free to the American public. This is our final frontier for personal freedom and free speech. The companies are doing this for their own interest. The freedom of the internet gives us the ability to freely connect with people, obtain things we want, form blogs and to feel free by reaching out the way we want. The companies are going to take it all away from us. Don't let them, for the sake of the American people, please don't let them!

DO NOT!! turn the public airwaves over to companies who will eliminate competition and innovation from our public airwaves. The U.S. government has turned over too much commerce and industry to big business. The citizens of the United States of America need to have a choice in what we listen to on the radio and see on television. Do not stifle the American Dream by selling out.

AT&T and others have not yet ‘built out’ broadband services, as they promised the last time they went to Congress for special tax breaks. This country is way behind many less developed countries in the build out of fast broadband facilities.

When is the FCC and the Congress going to SERVE THE PEOPLE INSTEAD OF JUST THE LARGE CORPORATOCRACIES?
WE WANT FAST, INEXPENSIVE BROADBAND CONNECTIONS ALONG WITH THE REST OF THE WORLD!

The large phone companies have proven time and again that they are anti-consumer anytime they have a chance to be (namely, in any region where little competition exists). The internet is possibly the only marketplace left where small business can survive. If we put the means of access to (and support of) that marketplace entirely in the hands of large companies, we risk losing the innovation and technological development the openness of its boundaries welcomes. This would be a devastating blow to consumers everywhere in an age where the mighty few control nearly every media outlet already.

To sell a percentage of public airwaves to large corporations, so that they could minimise competition would be a crime. The price of telecommunications in this country is already much higher, with less consumer options than many other countries. If the sale goes ahead, it will decrease consumer options even further, and there will be no going back. Don’t do it.
Catherine Nolan
venice, CA 90291

I want to cancel verizon local service & AT&T long distance because for example Verizon is RAISING my rates $24 per year just to remain connected. WHY DOES FCC PERMIT THIS?
M. Mclaren
New York, NY 10024

Jackson Reynolds
Concord, MA 01742

The more airwaves devoted to the public will elevate global consciousness to an awe-inspiring level.
The Internet cannot be held under corporate control. The future of communication, innovation, and development will happen via Web, but this can only occur if the public has space of representation.
Adam Cooper
Tucson, AZ 85701

Susan
menlo Park, CA 94025
To The Federal Communications Commission,
RE: Public Airwaves for the Public Good

Please stop this race of private money to control the public. Radio entities buying up public stock and going private. Stations formats shut down for political reasons to inferior marketing schemes that with greater marketing effort fail to equal the predecessors.

The FCC itself seems in the control of corporate interest over the well-being of the people. It seems to me your mandate should guide you to a neutral and OPEN use of the air waves. In the aftermath of 911 I see High Def. stations taking priority over secure government communications with department interoperability. It’s time to get the amoral money interest out of the government and the job done.

Please help keep the spirit of “Freedom of Speech” alive in this new millennium. PROTECT US from the extreme weight and influence of what is not our but the corporate interest.

Respectfully Thank You,
Tom J. Flahery
Flaherty Tom J.
Quincy, MA 02169

While corporate competition can fuel a certain degree of innovation, it pales in comparison with the need for affordable access to the Internet. In the coming years, more information will be available than could ever be feasibly taught, and levying fees on access services will deny the economically disadvantaged of the one resource that above all holds the keys to knowledge, employment and affordable entertainment in the modern world. Thank you for your kind attention.

Patrick Clough
Beaverton, OR 97006
Considering the rate at which technology is accelerating into the future, public airwaves and internet access should not just be for those with money. Some things are just too important to be given solely to those with private interests.

Hillary Varner  
Oak Ridge, TN 37830

The government should protect its citizens from the big corporations who monopolize all public services, such as the Internet, cable television, & telephone services, for their own profitable gains, which financially hurts the average consumer. In order to access any of these services, we must pay out big money to these corporations who dictate who, where, when & how much, in order to have access to such services. AND, we do not have a choice who we may use to provide such services. For example: Time-Warner has monopolized the cable service in this area (Upstate New York) & those of us who live on a fixed income cannot afford their high prices. Now, they tell us that by 2009, we MUST have HD, or else we won’t be able to watch any television!! That is so unfair, & it’s up to the government to put a stop to this nonsense.

Thank you,

Ms. Sally Jo Waugh

The Airwaves are owned by the public, NOT the media corporations, other investor interests or General Electric. We need to re-instate the Fairness Doctrine in order to control rampant bias, REQUIRE a certain percentage of commercial inventory to be used for Public Service Announcements about public health and education in order to provide information not based on pecuniary interests, increase oversight on the big Pharmaceutical companies in order to assure effective decisionmaking by the public, set controls on PAC access to commercial time and eliminate advertising by candidates to be replaced by a National Debate to be carried in Prime-Time (8-11pm on the coasts and 7-10pm in the heartland) for all candidates who run for President in order to assure qualified candidates fair access to the electorate. Failure to do so is either corruption or the appearance of corruption.

"Public" means the airwaves actually belong to the PEOPLE. ALL the people, not just corporations who would shape and control this public property to their own gain. The responsibility of the FCC is to PROTECT the rights of the public for the public good. Please fulfill this primary responsibility that you assumed when you took your place on the FCC.

Kate Macdonald
Cambridge, MA 02138

Corporate ownership needs to be limited- keep the airways from being monopolized.

Marika Kurzenberger
Trinidad, CO 81082

The first thing an occupying army has historically done is to take control of the communication system in the occupied land. How ironic that, not the people, but the military-industrial complex now controls the mass communication in the US. Give back our airwaves. We aren’t all blind and we do know what’s happening here.

Kathryn Davis
Yuma, AZ 85365

The public airwaves should be used for the public good.

Ronald Roppolo
Hialeah, FL 33015

We are in times that we need common sense more than ever. Even more than common sense we need truth, unbiased opinion for everyone. I’m afraid if we don’t, it threatens our democracy! Of the People, For the People. Let’s just refer back to the founding fathers, they were genius. They view on war was right-on also. They felt we should never get involved in (European) wars of course unless attacked. So what in the world has happened since WWII? In the past centuries Europe was always fighting over borders (I’m a descendent, I know this to be true), etc etc. Now we fight over oil.

Sharon Haley
Pawling, NY 12564

The first thing an occupying army has historically done is to take control of the communication system in the occupied land. How ironic that, not the people, but the military-industrial complex now controls the mass communication in the US. Give back our airwaves. We aren’t all blind and we do know what’s happening here.

Kathryn Davis
Yuma, AZ 85365

Just another drop in the bucket toward Corporate Fascism? Wake up!
Kent L. Andersen
Kent Andersen
WEBSTER, FL 33597

The FCC, like all government agencies, should stall making major changes that benefit giant corporations at the expense of American people for 19 months. The current administration has shown at every turn a bias for ultra rich corporate beneficaries over the general population. If it is indeed benificial for us to sell these newly available airwaves for entertainment or communication industry giants, let’s just wait until all issues can be fairly discussed and there is no undo pressure from the administration to make the deal at any cost.
Steve Cardellini
Corte Madera, CA 94925

Sarah G. Tuori

The increase in microwaves floating around may effect the bee's ability to find their way home. Do we really need more airwave traffic?

Julie Wittet
Santa Rosa, CA 95407

Henry Jakubiak
Potomac, MD 20854-2117

I do not want a bigger company or stronger duopoly in terms of internet access, phone and tv.

Sharon Cunningham
Framingham, MA 01701

Airwaves are finite and belong to the public. They should be used to improve the general well-being and competitive position of the nation. This can be done by using them to make modern internet technology and telecommunications available to the public. There is already too great a concentration of the media in too few hands.

G. Robertson Dilg

Keep the internet public. Don’t let it become another commercial interest.

Scott Slingerland
Nazareth, PA 18064

The United States should stay at the forefront of making internet access available to every citizen.

Norman Phillips
Merrimack, NH 03054

Speaking of Public Airwaves, why is the media dominated by corporations with profit and government interests? Should not the news be impartial? It should at least be diverse enough to give the public different perspectives to form independent, educated opinions. Our country has become one giant mass media blur for single reports from the press room releases. Our people are the laughing stock of the world; yes, we have freedom of the press and one news source making ours the stupidest populous on the planet. Give us back our airwaves.

May Peace Prevail,
Maria E. Hernandez
Los Angeles, CA 90048

I strongly agree that you must protect our airwaves from falling prey to media conglomerates. I want to see more, not less competition in the wireless Internet market.

Kate Fitzsimmons
San Rafael, CA 94903

Keep public airways open to all!

"Privatizing" is code for giving away the rights of the people, the public, for the profitable use of corporations and their ownerss. It is simple theft and flies in the face of a government conceived for the people, by the people.

Our forefathers fought to free the media from government control and allow speech to flourish. It's a disgrace that our modern government can't see that business in our modern world is just as effective at shutting out diversity and debate.

Public airwaves should not be restricted or censored by private companies.

Corporations have taken over enough of our lives. Enough is Enough!!!!

This will affect all Americans for generations to come. Leave the best legacy possible - history will judge us.

Eileen Carter
Edmonds, WA 98020
Furthermore, the government should work to create a free and open source of information for all Americans. We once had a populace involved in government, but by allowing such things as television, run and owned by private entities with their own objectives, they’ve steered the American people away from knowledge and towards mindless acceptance. Prove that you want more out of America than a mindless workforce and army.

**Airwaves are the public town hall. You cannot have democracy without freedom of speech in the public town hall. Keep airwaves public. CHARGE private corporations for their use. The money we earn will pay for public programming.**

**"The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market."**

**I ask that the FCC use its power to protect our public interest in the unhampered development of the public airwaves to the benefit of ALL people. This means preserving the open access for developing new tools for communication and education, and not sell out the public by delivering the rights of the airwaves to the highest bidder. The airwaves should belong to all of us, to be used for the public good. The public airwaves are like the national parks – they should belong to us all, for everyone to use and enjoy, not be sold off so that somebody can maximize their profit.**

**I am sick and tired of this country having monolithic corporations run our airwaves....it’s time to have fair competition!**

**I sure don’t want the likes of comcast in control of the airwaves!**
Is there any part of the U.S. government that has a concern and care for the common good of people? Is the bottom line mentality (which is a euphemism for greed) the only rationale for governing?

**Keep the airwaves free!**

Please do the right thing and allow smaller companies to have a chance to bid. Don't let the big giants close them out!

**Enough Corporate Welfare! Stop It!**

If we value competition so much, why stifle it? Capitalism requires ease of entry in to the market and the plan to give privileges to corporations will promote monopoly power. This is blatantly un-American and anti-free market.

**The airwaves are, and should be viewed as, a natural resource, and they should not be squandered for a quick buck. This would be the equivalent of selling the ocean to fishermen, or selling all our mountains to miners.** It is in the interest of a public and open democracy to leave as many resources as possible in the public domain for as long as possible.

I live in a wilderness area, I can’t do my work because these monopolies have interfered with my ability to broadband. They’ve already proven to be bad actors by fighting against a la carte TV programming and their profits border on the obscene. Please end this corruption.

Larry Willits, CA 95490

Wireless internet will can help drive future commerce. We must not stifle its growth!

You, the FCC, are not serving the public well. When cable television was first proposed its rationale was that since viewers paid the costs there would not be commercials, or very few. This is one very obvious example of your failure to protect the public interest. There were supposed to be regulations governing the number of minutes devoted to commercials per hour. What happened to that?

Margaret Blue
Austin, TX 78746-6680

Please do the right thing for a change!!!

History repeats - Look what happened to public transport (in LA for example) when the auto companies went in and eliminated the public transport system available at the time. Money talks, and considering the monster bucks at stake here, this time money will just sweep us all away in a flood of legislature. And, guess what, it's our money. I do political cartoons - this situation is so 'big brother/big company' it's almost already drawn. Big brother is at the door, no, he's in your den, no, he's right here in front of me, now. Hello, Brother Monitor... We are getting closer to the 'Matrix' set up all the time, hooked up, entertained, soothed, internet-dated, who needs to leave the house? Well, I do... Stop the grid, I want to get off....... (Check me out at myspace feralwomyn)

Terry Hollowell
Woodland, CA 95695

Rob Brown

<td>I am a citizen of Guam. I dislike and distrust this very sudden release of public protection of what we listen to or watch on our airwaves. The number one priority of a private corp. is profit for their shareholders and their employees. The last thing that will be on the agenda for this huge proportional release of our airwave space and freedom is someone else to make a profit out of taxpayers. Innovative it may be for the service that will be provided by these telecommunicative conglomerates or television but is congress willing to sacrifice the loss of more taxpayers who will lose their businesses and jobs because the big boys are trying to take over the airwave space. Shame on Congress. Shame on you Republicans or Democrats who support this. People may say times are changing and people must do as well but this can mean the destruction of livelihoods. Next thing we know, AT&amp;T will be the next president of the US. I sincerely ask the FCC to make the right decision and save the little people. The big boys can more than fend for themselves. If nothing will convince you, then surely you are a bunch of phonies sitting on chair making a decision not for your brethren who need your protection.</td>

Help keep the public airwaves free and public.
Harold Joly
Florence, AL 35634

In order for the United States to move forward into the next revolution and set the global standard for democracy with regards to our uncensored internet usage, the government must protect our airwaves from corporate control. Corporations will only stifle innovation, lead to abuses and manipulation and limit the freedoms a public airwave provides. PROTECT PUBLIC AIRWAVES FOR PUBLIC GOOD!
Sincerely,
Frank Goldman

Once upon a time the FCC looked out for the interests of ordinary people in this country. But now the FCC just wants to ignore ordinary people and give away what is rightfully theirs to the phone companies (that they also have let once again become monopolies) without extracting anything for the people. Lets not make this a true fairy tale story by giving these monopolies even more of our public airwaves than they have already been able to lay claim to!

You are a Government Tax funded agency that was created to be of service to, and look at for, and help the U.S. Citizen.
You have sworn oaths of office to uphold the law of the United States and its Citizens. So please do not sell us and yourselves out to the Corporations.
This is suppose to be a Democracy. With Corporate control of our airways - we will lose freedom of the Media and Press. Will only get what the spin doctored information that the Corporate interests decide is best to show us according to what is best for there Bottom Line report to its stockholders, not what is best for our Country, or its people. If you do believe in this great Country of ours - do the right thing - and don't give control our public airwaves to companies like AT&T, Verizon, and Comcast.
First they come for the intelectuals, then they burn the books and take over the airways. Have you folks look aroung you lately - do you agree what is happening in our Country today. "Do the Right thing", no amount of money can take the place of our hard fought for FREEDOMS in these UNITED STATES.
-respectfully submitted: Keith Lynn Wright ( a very concerned Citizen )

At a time when internet access is becoming more and more important to moving ahead in society, it absolutely crucial that the FCC/government do all it can to allow an environment where people of all economic classes be able to have affordable internet access. Private companies can not be trusted to do the right thing. It is absolutely necessary that the FCC not give free reign to a private company; that it step up and act on behalf of the American public.

Collected by MoveOn.org Civic Action
Dear Sirs: As a concerned citizen of the United States of America I request that you thoroughly consider the humble opinion of one man. That opinion is that by allotting technological resources to be held in the hands of corporations such as major telecommunication companies, it will hinder the progress of a more integrated and better accessible America. This sense of futurity is often lost in the moment, a sad product of the Democratic institution which our Open Society demands and loves. Yet, with monumental cases and hearings such as this, the perspective of a single individual, or better yet a collective of extremely concerned citizens who are well informed and possess a sense of futurity for a greater nation, can be heard to speak a bit of sense: poignantly via electronic distribution.

Reasons for not approving this measure:
1) Restricted access to the internet impairs the average man from being in constant contact; communications is one of the fundamental traits of the future.
2) Internet access, due to the necessity of communications, should be at a significantly lower price to facilitate access: this is better accomplished by opening the markets to numerous alternatives, unlike the basic monopolies of service goods barely opened within the last decade (i.e. phone lines and DSL lines).
3) Due especially to the limitations which have been requested by companies, it is necessary to demonstrate a solid policy that the internet, unlike cable which took upwards to sixty years to finally diversify product and hence provide a worthy service (which, and I hope, dear sirs, that someone reads this with the utmost attention, is still a frankly worthless and mind-numbing device due to "moral" regulation and complacency of production).

Thank you for your time.

i believe both the government and the named big corporations have absolutely no interest in the people's privacy and especially our freedoms. this is all about money that exchanges hands between the lobbists, payoffs to the government reps involved and the corporate scum that will profit from this sale.
there is nothing here to enhance liberty for the people as usual since the taking of states rights and the modern trampling of the u.s.constitution.

It is imperative that the FCC do everything in its’ power to protect the access to the internet. With fewer and fewer players controlling more and more of our access to independent news and information the internet must remain protected and not turned over to media giants who will use it for their own monetary gain. Please take your time and think long and hard on this one. Consider the long term affects of your decision. Think outside the box.

A related point of interest .... Read Mike Elgan’s blog in Computer World weekly. http://www.computerworld.com/action/article.do?command=viewArticleBasic&articleId=9021498

In closing he states: "I attended a meeting in Washington last week, and many of the attendees were based in New York. Most of them took flights to get to the meeting. But I asked them: "If the train offered Wi-Fi," would you still have flown? It was unanimous: All said no. Free Wi-Fi is the cheapest and easiest way I can think of to motivate commuters and business travelers to use public transportation.

Whether Wi-Fi wants to be free or not is hardly the question. A better question is: What right do business owners and governments have to choose who gets access to Wi-Fi networks that pass through public airways, private cars and even our bodies? And how can we use free Wi-Fi to reduce the "digital divide" and also help the environment?"

Definitely points to ponder.

Dear Feds,
You are all whores.
You have raped and piledged this country since the Supreme Court stole the election for Bush. What country wants a president named Bush? Kate Bush, maybe.
Anyway, this crap continues to discust me.
Pigs choke.
The country is asleep.
My photo of the Vietnam Moratorium is going to be famous because you a holes planned to invade a country that only had a dictator.
Abnd maybe, just maybe, even allowed 9/11 to happen.
SHAME ON YOU!!!!!!!!!!
Use that thory and we can be in plenty of hot water (not that we aren't already).
Can you hear me China?
I am a Vietnam Vet. A child of the 60’s.
The pussification of this country makes me wanna puke.
Oh, and by the way, those entitlement kids coming up are only going to sink us further down the drain faster.
Education. That's what will make us a third world country faster than anything.
They get it. We don't.

The United States in already so far behind the rest of the world as far as having citizens access to high speed internet service. ANY further laws which allow corporations to own airwaves or rights to high speed internet access will only cost the AMERICAN people to get further behind in technology. The internet must be kept free and unobstructed for all citizens. Information is power!

W.Richard Roecker
Chicago, IL 60640

I beg the federal government not to auction the public airways to AT&T, Verizon and the like. Allow these airwaves to remain accessible to the public.

Wally Burr
Valley Village, CA 91607

A free democracy needs a free Internet. Ultimately no one is served if we allow private enterprise to monopolize the newly available airwaves – least of all American businesses. The US was once the most Web savvy nation on the planet. Today we are being left behind by nations that embrace the value of open networks.

Margaret Dimond
Rockville, MD 20853

The idea of giving our airways away from the public is un-American. Don’t do it please.

Saran Kirschbaum
Los Angeles, CA 90035
Please keep these airwaves open for the free-thinking and independent minds that from its conception have been part of the fabric of our great country.

Ian Bunker
Greensboro, NC 27410

these big companies have been at our throats long enough.

Alexander Watt
Grand Rapids, MI 49546

We travel quite a lot. Wireless would be a big help to us when we are away from home.

Robert Guelzow
Green Valley, AZ 85614

PLEASE do not allow this valuable resource, i.e. public airwaves to be in the hands of a private corporation. It would be an appalling plummet into the corporate abyss for you to allow the airwaves to be purchased by a few well-heeled buyers. Instead require broad public access to the airwaves to help our country retain our freedom.

Eileen Mitro
Ukiah, CA 95482

We travel quite a lot. Wireless would be a big help to us when we are away from home.

Robert Guelzow
Green Valley, AZ 85614

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.”

One of the greatest collective accomplishments in the history of civilization is the technology which allows access to information on a scale previously unimaginable. Information used to be a commodity only the wealthy could afford. Just a hundred years ago, a home library was something only the rich could amass, let alone read. Now, almost anyone can own books or borrow them from a library. Education is essential in the pursuit of happiness, and as such should be seen as a basic right. The cost of a dearth of knowledge and the ability to access it is ultimately greater, in dollars and any other measure, than any benefits derived from the profits incurred by already-rich service industries. We are not a socialist people, and I hope we never will be. However, allowing these airwaves to belong to the public is a sure investment which transcends political ideology. A nation of better-informed people is a stronger and more efficient nation. Access to internet data exponentially increases anyone’s ability to educate and inform themselves, as well as entertain. Would you also begin charging exorbitant prices for books at public schools? Then don’t take away public airwaves for a few more dollars in the already vastly deep pockets of these companies. Thank you.
We, the public, don't have much that we don't have top pay for; please let us have this. Milt Luminais

The concept of public airwaves being sold to commercial companies is almost heretical. The airwaves belong to the PUBLIC and should remain so. Especially now with all the internet possibilities being transmitted via public airwaves in a way that could provide universal access, the anti-competitiveness of large telecoms owning those waves would be against the public interest.

Arlene Kossoff

Asheville, NC 28801

Collected by MoveOn.org Civic Action 2576
In order for the United States to continue to enjoy the same level economic prosperity it does now, the nation must transition to an innovation economy. In allowing giant telecom companies to hoard airwaves and artificially make them scarce or nonexistent, you would be putting the United States at a great disadvantage compared to other nations who have embraced the need to foster an innovation-nation philosophy. In this time of economic transition, we must not handicap our long-term success by allowing telcos or other companies to stifle our ability to be creative and innovative.

Coming from a background in radio in the years when it was entertainment AND a service to the community in which it was licensed, I strongly protest any action that would remove the airwaves any further from what the intended purpose has been. Profit can be enjoyed with out greed.. and monopolies. What happened to the restrictions of the number of radio and TV stations that can be owned by one company. That worked,,, the current situation is dangerous.!!!

P.L. Temple  
PL.Temple

Advances in technology are reducing the need for large chunks of airspace previously sold to corporations. For example, HDTV uses less bandwidth that analog signals. When the country converts to HDTV the excess channels should be reclaimed by the federal government. Some of this should be retained for free public use and other parts should be auctioned.

Vincent B. Fernandes

For those of you that remember the price of gas for the home was very low years ago. They promised to keep it that way. After many people converted from oil to gas, the price for gas is higher than oil. The same happens with phone, internet, etc. Customers get locked in with very few options to make a deal or save a little money. What worries me is that if the big companies take over everything and this country gets more in debt with foreign countries, it would be easy as pie for another country to bid or buy out any one of our big guys. Then we will have no control or any leverage for our own economic growth and especially stability as one nation. We would basically have forfeited yet another large piece of our country and our freedom. It doesn’t take a genius to figure this out.

Our land, banks, companies are being sold and bought by foreign investors all over. Maybe I should run for Congress!!

Elizabeth Bodurtha
Ayer, MA 01432

I would like to urge the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves. Without access to the public airwaves, wireless innovators can’t enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auctionand then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks. Please safegaurd public resources for the public!

As my life becomes increasingly on-line, I do not want to have to be lining the pockets of huge corporations even more than I do now. While I do not presently own a handheld wireless device, I plan to acquire one soon. Please use the public airways for the public good. Many cities and towns are installing wireless, in part to facilitate their own operations, and saving the cost of using commercial networks. They are able to provide the service to citizens at little to zero cost because of the robust character and capability of the public networks. This is how to go. Don't preclude this.

Joan F. Moeller  
Minnetonka, MN 55343

Collected by MoveOn.org Civic Action 2599
It is time that the Federal Government remembers that its duty is to serve the American People as a whole, not the special interests and pocketbooks of Large Corporate America.

The very basis of this society and government is that of Free Speech and the open and unrestricted flow of ideas that comes with it. For the FCC to allow Corporate America to monopolize the ability to access and use new and existing technology and bandwidths is tantamount to saying that the First Amendment of the Constitution is for sale to the highest bidder. It is NOT!!

Allowing the sale of these bandwidths to private concerns will just place us that farther behind the rest of the world in enabling our citizens the ability to become part of the global community. I say these things as a life-long Republican who is disgusted that my Party, and our Government, has sold out its ideals to the highest bidder time after time in recent years.

The lack of competition in the cable TV industry is outrageous; please don't allow corporate fat cats to take over the airwaves that belong to all of us, not just to rich folks with connections. Thank you.

Please save us from monopolizing companies taking over our airwaves. Don't let these companies do to Americans what the oil companies are doing.

Please protect all of us by making sure that use of public airways benefits the public, not private business!

Let us keep at least THESE airwaves public.

I am not interested in my government privatizing our public airways. Not a good idea.

Don't make our media corporations even more powerful. Save the public airwaves for the public good.

I strongly urge my elected representatives and the FCC to act in the interests of average citizens, not special interests from the phone and cable industry. Reserve the public airways for cheaper and freer high-speed internet access for all citizens.

Stop selling us out. The airwaves belong to the public. How can you think of making them private?

With the corporate takeover of most news outlets in America, it is important to protect the internet as a truly free information source.

The Internet needs to be free and open to the public, not saved for the highest bidder.

Please use your influence to protect the airwaves and to deliver internet access to all of America.
Allowing more monopolization of the airwave by corporations is not in the interest of America. We must allow the most common American to be able to create new programming that fits our culture.
The bottom line for corporations trumps our aspirations and children's mindset.

James Johnson
Reading, PA 19606

The public consists of people, not corporations. To sell to corporate interests, for sequestration, what could be better used by the public NOW is not reprehensible, it is criminal.
We, in the land where the personal computer originated, have now fallen greatly in truly high-speed access to the Internet. If I didn't know better I would think this particular administration had a interest in making sure that the public remained uninformed. Ignorant, but contented, one might say.
But perhaps I am wrong? Do you expect to sell these rights for enough money to substantially decrease the cost of Mr. Bush's Iraqi War of Agression??

Keep the net neutral and open to all!

Please protect our rights to free speech and open enterprise by keeping our airways open.

If the public airwaves can be sold to the highest bidder then there will not be any public interest, only stockholders’ interest.

Don’t sell out to the big corporations! Or if you do make sure they won’t end up screwing us (again!!).

The absolute control of the public airwaves must remain public, as they are national assets, and as such are enjoyed in other countries such as France and Japan. Public domain is public domain by definition!

Hello FCC,
This decision that lets the people of America have the benefit of the airways, not just big companies is very important to me. Hopefully you people have some kind of conscience and sense of fairness. It would be a shame for the FCC to give away a valuable resource that should be kept away from the corporations who are too greedy, big, and monopolizers. Thanks for your attention.

Private companies already own more than enough of the airwaves - maintain a balance!
Public airwaves are essential to access for everyone - and that is what a democracy should provide. If the FCC allows private companies to purchase these airwaves, they will have proven that we live in a capitalist republic - NOT a democracy. And, of course, rates across the board will go up for everyone because there will not be a low/no cost alternative to provide true competition.

My biggest concern for this new free market is will there be at least some small set of standards for these new buyers like quality and trust worthiness. My fear is having a market out of control with just anybody buying up space - and then its the public that suffers if they don’t intensely research the safety and reliability of these new and endless services. And if there will be any sort of stats and regulations to help keep things from going from quality to - consumer confusion and frustration. I believe in expanding the market "for the good of the public" - as long as that is what it truely means and will be held to.

Please protect public airwaves. Allowing corporate purchase will restrict access to information to very few. The internet is a great source of information and education. Please protect our access. Thank you.

Rhonda Cimino
Tijeras, NM 87059

Please don’t simply hand over these airwaves. We can create public wireless internet across the nation. That could allow those who can’t afford the high price of a monthly broadband connection to have internet.

Paul Mcdonough
Garden Grove, CA 92840

Keep public airwaves public.

David Sanchez
Glendale, CA 91204
Big corporations should not be able to buy these available airwaves. This matter is critical because the increased access to digital information that the available airwaves provides will surely be a great asset to the public at large. The large companies are only interested in monetary purposes and that will result in an inefficient waste of this potentially great tool. It will basically be a monopoly since all current access to digital information is practically purely corporation controlled. If you have ever desired to make a positive impact on the world then please, use this opportunity!

Lyndon Forrester
grand terrace, CA 92313

Brian Phillips

Keep our public airways free of influence and open to competition.

Leta Albright
Oswego, NY 13126

Commissioners,
I am concerned the US is falling behind other countries with respect to key technological advancements (such as widespread availability of wireless Internet) that are key to maintaining our competitive advantage. I believe it’s important for the public airwaves to be available to a wide variety of organizations and entrepreneurs, rather than concentrated in the hands of a few. Thank you for your consideration.

Very truly yours,
Robert Mather

The public airwaves should be used for public good, not private profit.

Kathleen Wold
Shorvoew, MN 55126

Public airwaves belong to us, the public, & should not be seized for sale to private interests.

Janice Gore
Los Angeles, CA 90036

The airwaves legally belong to the public, not the corporations, and the FCC has a responsibility to ensure that the airwaves are used in the public interest.

Amber Mcchesney-Young
San Francisco, CA 94117

To whom it may concern:

Competition is the backbone of this nation. Giving over these airwaves to corporate America is tantamount to creating a monopolistic society within the communication world. Now is the time when every person regardless of socioeconomic background should be able to access a global communication network in order to enrich their lives. By giving over the power to compete to corporate communication entities we are only delaying a time of communicative equality. Please think of those with little in their pocketbooks rather than those with millions.

Thank you for your consideration,

Beth Thomas

Internet access is a great tool for education and for communication. People who do not have access to the internet are at a huge disadvantage. By making the internet more accessible to the public (as many people today do not have access to the internet), the government will be helping create equal opportunity for education as well as employment (much research, applications, etc are now done online) and promoting free speech. By closing these airwaves from the public, the government would be making a choice that is detrimental to American society. The internet should be made as readily available as possible. Just as libraries are free to the public, the internet (which is in itself a library) should be freely available to the public.

Dominique Caron  
Brooklyn, NY 11216

Please protect our freedom of speech, our constitutional right. This is one of the big reasons the USA is such a good place to be.

Lisa Land

Subject: You say you want a revolution...  
Clicking here will add your name:  
"The public airwaves should be used for the public  
good. The government must protect our airwaves  
from corporate gatekeepers who would  
stifle innovation and competition in the wireless  
Internet market.”

Dear MoveOn member,

The federal government is on the verge of turning  
over a huge portion of our public airwaves  
to companies like AT&T, Verizon, and Comcast  
who will use them for private gain instead of the  
public good.

These newly available airwaves are a once-in-a-  
lifetime opportunity to revolutionize Internet  
access by beaming high-speed Internet signals to  
every park bench, coffee shop, workplace, and home  
in America at more affordable prices than current  
Internet service. Phone and cable companies  
don’t want this competition to their Internet  
service—they’d rather purchase the airwaves at  
auction and sit on them.

In June, the Federal Communications Commis-  
sion (FCC) will make a major decision: Use the  
public airwaves for the public good, or turn them  
over to big companies who will stifle competition,  
innovation, and the wireless Internet revolu-  
tion.

The FCC is only accepting public comments for  
a few more days. Can you sign this petition to  
them today, and send it to your friends?

"The public airwaves should be used for the public  
good. The government must protect our airwaves  
from corporate gatekeepers who would  
stifle innovation and competition in the wireless  
Internet market.”

Ninetta Adorn Violante  
Decatur, GA 30030

Collected by MoveOn.org Civic Action
We need free and honest airwaves, not propaganda. Think about the countries who have controlled the airwaves in the past. I don't think we want what we saw happening to entire countries because the leaders controlled what the public heard and were made to believe.

Do not stifle competition, innovation, or the internet. Do not turn over our public airwaves to companies like AT&T, Comcast, or Verizon. They will only use the airwaves to enrich themselves rather than for the public good.

I urge you to listen to the people. We want to walk and think freely, not goose step like senseless automatons. Do you want to live among people or in a vault surrounded only by coins or bills?

Wake up FCC and listen to your fellow human beings who are the people of this country--do not destroy our airwaves. Mandate that whoever wins the auction is not to stifle competition and innovation.

Thank you,
Patricia Cavallaro
Vienna, VA 22181-6008

Corporations do not own the public airwaves! It is hard to find true journalism in any medium now. So we all suffer when it comes to receiving quality journalism. The control of radio extends to real unslanted news, music, opera, and special interest programs. More and more the planet has been subjected to a dumming down in all areas of emotional and intelligence quotient due to the profit making agendas of transnational corporations. Even public radio is not what it used to be except in a few places, like the struggling stations of the Pacifica network. Real radio, the first true wireless mass communication process given to the public in the early 20th century, always has belonged to the public.

Please work to keep the airwaves free for the public and keep them free from commercial corporate monopolizing and control.

Thank you -
Jay Purselley
Hammond, LA 70403

Freedom advocates want the internet to remain free and unfettered or controlled by self-serving private interest, because they form monopolies and do not compete fairly. If it was truly free market competition for these airwaves that would be different. But the FCC must not grant "special privilege" to benefit a "special few" businesses!!!! FREEDOM!!!!!!!

Don't let the airwaves be controlled by Corporate America!!!!!
Gary L Hanson
Oley, PA 19547

Access to knowledge and information is vital to a true democracy as is real competition and a free marketplace. Corporations that use stifling innovation as a business practice should not be rewarded with more access to what should be public.

Victoria Pueschel
Makawao, HI 96768

I am on fixed income and can only now afford an internet connection through a limited-time offer. In my city, we have only Comcast and Verizon, the latter which does not offer VIOS. Please do not cut off low and middle income Americans from high speed internet service. Since television and newspapers have been co-opted by large corporations and the world is quickly moving into cyberspace, selling our last public airwaves to the top corporations would be criminal.

Kathryn L. Watkins
Cambridge, MA 02139

In this country, we believe in public access to knowledge. Knowledge is not something that is the property of the wealthy. Rather it is the right of all people to equally share in the wealth of knowledge that exists. Please, let's work together to make these idealistic goals a reality.

This is as important as any anti-trust law for ensuring fair competition in the future.

Moses Goldstein
charlotte, NC 28205

If it turns out that by not keeping this technology provides a winfall for corporate giants where otherwise the public would gain from free usage, then I will remember those who voted to sell the rights and vote against them in every election. And everyone I know will be aware of this as well.... so do the right thing. if AT&T, Verizon and Comcast can still survive without being granted rights, then terrific, we all win!

Ken Greenwood
new york, NY 10003

Please recognize that the opportunity for our country to catch up with the rest of the world's technology infrastructure requires the opportunity for smaller companies and the free-market to become more heavily involved in the advancement of internet, wireless, wi-fi and other technologies. This is also of great service to the consumer and economy. It creates jobs, inspires technological development, risk-taking and the promotion of the American spirit. It serves to benefit everyone if you do not allow the continued monopoly of technical services that a few major players have latched on to already.

I think it’s a mistake to turn public airwaves over to private corporations to use as they please. The one thing that will happen for sure is that the prices to consumers to access the resources available on these airwaves will be higher and continue to raise at every opportunity. Cable television is a great example. The prices continue to rise faster than inflation while cable companies continue to report higher profits every year. I suppose they think this is for the public good? The airwaves belong to the public and should be used for the public good. They corporations that use these public airwaves should be monitored by the public representative the FCC and Congress, otherwise the public will never get a fair deal.

Edward Lewis
Lombard, IL 60148

I do not want these services given to any of the companies now serving us. I am with AT&T now and I can not get Broadband to my house. It is available just 2 miles from my house but, AT&T has not been able to tell me when broadband will be available to my area for the last 3 years. They still can’t tell me when it will be available. I am one block from the largest city in Arkansas.

Barbara Waymire
Alexander, AR 72002

Privatizing the public airwaves for the profit of a few rich corporations will not further democracy, nor employment. It will just further the fascistic corporate media monopoly.

David Siegel
Hayward, CA 94541

If, indeed, the RF spectrum is a public property, it is the public that should dictate how it is to be used, and not those companies or institutions whose interests are a narrow subset of the public good. No private organization should be permitted to dictate the limits of usage by the public. International communications standards offer the possibility of “communications without borders”. Let the commercial entities compete with the rest of them, and for that matter, the world. Communications is too important to be left to a small number of very, very special interests.

Corporation have too much power and to many mergers have made to many large powerful corporations and they do not need more help. Competition and innovation happen in the open and unregulated environments. Do not give away our airspace to them.

Louis Fiquet
Bevier, MO 63532
here's what innovation and competition in the wireless world means for regular people:
Families would no longer be forced to choose solely between high-priced phone and cable Internet. A new wireless market including lots of competition within that market would mean more affordable Internet access for families.
Poor and rural communities which phone and cable companies never bothered to wire with high-speed Internet access could now have high-speed Internet signals beamed directly into their homes.
Blackberry and other handheld wireless users are currently blocked by phone companies from accessing Internet-based phone service and other innovative services.2 The FCC could stop these anti-competitive, anti-consumer practices by mandating wireless Net Neutrality.
Socially responsible buyers could someday go to a store, scan the bar codes of products with an Internet-equipped cell phone, and find out which items are socially responsible. Phone companies can currently block such innovations from working with their devices (they often try to shake down innovators into giving them a massive cut of their profits) but the FCC can prohibit such practices on these newly available airwaves.
Technology consumers in America are currently denied all sorts of cutting-edge technology that people in other countries have like using Internet-equipped cell phones to buy products, transfer money, or give to charity. By opening the doors to competition and innovation, the FCC can change that.

The greatest evil of our day is that the rich are getting richer and the poor are getting poorer, with untold suffering in the wake of this inequity. If you have any conscience at all, you will respond to this petition.

Is there any piece of public property that we won’t privatize?

The public airwaves are just that: for the public and not for the enrichment of corporations at our expense.

We already have too many false "commodities" that should be in the public domain.
Too many huge companies already have bought up and have too much control over our newspapers and radio stations across the country. I as an American citizen and responsible voter, and I do not want to see any more companies buy up the airways and take more away from the American people. It seems to me that all the of the US citizens just keep paying and paying and paying with little return.

The FCC has a mandate to keep public airwaves public and not to sell them off for private gain and use.

David Greetham
New York, NY 10027

The airwaves are already saturated with advertisements and there are not enough programs for the listener, these companies are only going to continue the trend and shut out smaller groups who gain their livelihood from this. A radio station isn’t a big deal to a corporation, not to mention these corporations already have more than enough money, but some of these smaller independent stations mean a lot not only to the people who work for them, but also their audiences that have grown through lots of hard work and personal connection. Please don’t undermine these thoughtful audience members and employees. Thank you, Ins Garcia

Censorship is not your job!

Linda Macgilchrist
Fresno, CA 93704-1918

It is clear that innovation and price competition only comes from having many competitors. The continuing trend of consolidation of many aspects of commercial life today have proven to be only beneficial to the bloated executives of large corporations. DO NOT continue this trend by allowing public airwaves to be monopolized by a few large companies.

Handing over large portions of the public airwaves to a few large companies will stifle the economy more than it can help it. Allow start ups, communities, counties, and states to use this free air as a way to boost productivity in their communities without the fear of higher internet bills.

The highest priority constitutional write is the first one: freedom of speech. Not freedom of speech only for those who can afford it. Not freedom of speech for those provided we can monitor and censor what they speak. A right from our Creator: freedom of speech. The internet is where it happens best, and most productively. We all do better when we ALL do better, so please do not support any legislation that restricts access to internet and thus restricts free speech.

The public airways should remain public. Free enterprise is not always free, especially when large corporate interests buy up space and then keep them more for the purpose of preventing other interests from utilizing them.  
Stan Osmunson  
Indianapolis, IN 46234

Collected by MoveOn.org Civic Action

The FCC has failed in their mandate to keep the airwaves serving the public good, at this time they serve only the interest of media conglomerates that are bent on subverting the very democracy that have allowed them to prosper. Not only should the wireless internet market be free from their grasp. But the broadcast media conglomerates that stifle the free-flow of information should broken up and media ownership be dispersed.

Syd Flatt
Westminster, CA 92683

Dan Wiencek
Colorado Springs, CO 80909

The public airwaves must be reserved for the public good. Please do not auction these off to those who would exploit this resource to the detriment of more affordable access to the internet in particular.

Mike Luderitz
Westmont, NJ 08108

Farihah Khandaker

Do not let only the privileged few run this country.

Lucy Powers
Minnetonka, MN 55345

Keep the public airwaves for the public!

Karen Greenleaf
Denver, CO 80212

When corporations gain control over something prices go up instead of down, service gets worse instead of better, and the consumers are always the ones who pay the price. These corporations are not vying for control so they may offer us more choices or better value. They are vying for control because they are greedy. Never in history has it been otherwise.

Paul Mumford
Vernon, CT 06066

Freedom means not letting corporations oppress the market place by giving them control of what is not theirs to control.

Jeff Ramirez
Colorado Springs, CO 80922

More affordable internet access would be a great benefit for every one.

Do not allow the huge corporations to get ahold of these airwaves - we want them for public use and do not want them controlled by big business. They control us and our buying needs enough. the rich keep getting richer as we bow to their wealth and control. Please mandate that these airwaves must be won by a corporation or entity that will not stifle competition and creativity and hope for a future which offers fair marketing and pricing. The giants do not need to control this as well. They have enough of our money.

The weakening of anti-trust laws and the increased concentration of wealth and power in fewer and fewer hands is slowly – but very, very surely – providing fuel for a grassroots resistance. I am an anthropologist and a reporter who speaks to working people on the ground about what they believe and how they interpret politics. Public opinion is swinging against the full-scale corporitization of things that are important to the public like healthcare, political responsibility, the environment, and corporate irresponsibility. Stop this further degradation of people's access to social space, rights, and services now.

There used to be a law in this Country against monopolies. Whatever happened to that? There's 1 cable co in our town; 2 major food-chains, 1 phone co, 1 utility co.,and on it goes. One eats up another and it's allowed. Competition always allowed for two really good results: competitive prices and a CHOICE of products. Not anymore. I am totally against handing over any more power, control, and MONOPOLY to the "heavy eaters!"

It is imperative that you keep these airwaves out of the hands of Corporate Media/communications giants. Our Democracy is dependent upon independent airwaves. Please, I beg you, do not fold under the horrific pressures of these corporations and their politicians, as we are now aware, many of our "elected representatives" hold no loyalty to their constituents. Thank you very much for helping to keep our nation free by keeping these airwaves free.

J. D. Adam
American Canyon, CA 94503

Please don't allow yet another corporate takeover of public property.

Public Airwaves for the Public Good — NOT CORPORATE!!!!

Modesto, CA 95357

The airwaves are really a part of the commons that should be kept free and open for the public good. This certainly won't happen if they are assignhnen to a very few marketeers. We will be subjected to whatever their views are. In fact the present setup with the so-called public airways are being commandeered to the whims of the present officials. You can see it by the dirth of information presented of the governments actions. No negative news.

Norman Flis
Gibbonia, PA 15044
To many things in this world are owned by a few men. Somethings should be cheap or free for all.

Casey Morefield
Panama City, FL 32413

This version of the FCC has done nothing less than sell the public good to a few companies who have no intention of doing any good except making profits for their shareholders. This latest opportunity for communication companies to put a stranglehold on true public discourse will not be passed up by the few and powerful if permitted by the FCC. I'm not just another liberal when I say that truly, the Founding Fathers would be ashamed of you—including Hamilton.

David C. Clemans
Portland, OR 97236

No one individual or company should be allowed to 'own' the airwaves - the could however be able to lease a small section within a band for a period of time - same one year at a minimum - this would allow others to compete within the same band but not cross over into anothers.

Charles Weichler
Keystone, SD 57751

Keep the airwaves public! Free, unfettered information exchange is the cornerstone of a resilient democracy!

2704
There are many innovative companies jumping at the opportunity to forge ahead with the wireless Internet revolution bringing us high-speed wireless networks from coast to coast and all sorts of innovative wireless devices. But the old phone and cable companies are aggressively trying to block this progress. They've spent billions laying wires, and they enjoy having their customers locked in with few alternatives. Without access to the public airwaves, wireless innovators can't enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auction and then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks. We're urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves. They also shouldn't be able to tell their wireless Internet customers which websites they can access as they do now. And just as phone companies can't tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.

The opportunity to revolutionize the Internet and wireless world is at our fingertips. The only question is whether our government will embrace it, and fight for the public who put them where they are.

I teach information technology at the college level, including telecommunications and networking. Let's not make the mistake of allowing corporate greed to stifle competition in this industry. We made that mistake with the telephone company in the early 20th century and it took 80 years to open that market. The technology of the Internet was developed largely through taxpayer funding, and it properly belongs to all citizens. I say, let's keep the airwaves free for competition and innovation.

Corporations can afford to take care of themselves. Handing over all the airwaves without careful regulations will lead to a monopoly on the communication industry. It's not fair for a select group of people to control so much of the media. This is America! Everyone should have a fair chance to take advantage of wireless internet—both for the expression of beliefs and opinions and for the sake of running a successful business.

I can't even get my local channels via Satellite
TV requiring me to install a separate antenna.
Cable is not available, Verizon FIOS is not avail-
able either in the area outside Churchville, VA
in Augusta County. I can some local channels
if I pay more money to the Satellite company
but two local channels have strong signals via
the airwaves so I have to have an entire separate
antenna for two local stations. It is unfair that if
cable was available I could get all the local chan-
nels in two different metropolitan areas, but I
can't get a complete set from the Satellite com-
pany because the local stations will not permit
it. I am told I can ask for a waiver but that the
local stations like NBC will never grant it. If our
national airwaves could be used to provide inter-
et and tv access without being held hostage by
companies and arcane federal regulations that is
what I want as an American. Verizon, Comcast,
as well as the other carriers and cable companies
already provide arrogant monopolistic type ser-
vice. In my town you can only get cable from
one cable provider, to me that's a monopoly in
anyone's book!
Stop screwing the American people out of their
life savings and college funds, make internet and
TV stations freely accessible to all Americans re-
gardless of whether they live in an urban or rural
environment.
Thank you.

I am a HAM radio operator. HAMs, through the internet (VOIP), are able to talk with people worldwide - and also be of service in national and international emergencies - not to mention building rapport and creating more innovative modes of communication. The airwaves MUST remain in the public domain - not just because it is wrong to let a few control such power (and it is); but also because all of us would lose a national and international treasure - freedom. The internet is the modern-day equivalent of the right to freedom of speech. Defend us from those who would silence our thoughts and censor our knowledge.

Marjorie Powers

Why do we have to pay such ridiculous prices for services that should be available at much more realistic (or free, in the case of wireless internet)? My family of 4 pays nearly $400/mo for cable tv & our cell phones (basic family plan + text plan). What is wrong with this picture???

Please help the working families of America.

The current system of frequency allotment has not changed to reflect the new technology and the new landscape of the internet. Don’t let the system remain in the hands of the old time companies. Embrace technological diversity.
Brad Seiler
Cambridge, MA 02138

Please consider the rights of future generations to strive, dream and develop their ideas and creativity. If you allow a few corporations to control the portals to those dreams, to decide which have merit and which do not you will be helping to expand the second ”dark (dumb) ages” Bush has already begun. Keep the airwaves free so future genuises can soar on them, taking all humanity to brave new heights!

The public airwaves should not be auctioned off to corporations that will not use it for the common good.

Jake Hackett
Orland, CA 95963

Competition and diversity are what helped make this country great. We are already in the grasp - if not the control - of mega-corporations whose only interest is their bottom line and NOT what's best for the American people.
Keep the PUBLIC airwaves PUBLIC!!

Jim Poston
Thornton, CO 80229

Large corporations, such as AT&T, Verizon, and Comcast, have failed repeatedly to demonstrate the requisite qualities of responsibility and openness to innovation that were so important in the creation of the internet as we know it. We stand on the verge of a revolutionary leap in connectivity, with the potential to radically invigorate our intellectual commons and our democratic principles. Please do not put our intellectual and entrepreneurial future into the hands of a few irresponsible companies.

I want the public airwaves to be used for the public good rather than corporate gatekeepers!

The airwaves belong to all of us not just the shareholders of some corporations. They should be used to promote the general welfare of all americans.
The internet can be both an amazing tool to share information and connect people, but these benefits are too often limited to only those who can afford to pay high prices. As a teacher placed by Teach for America, I see how many of my students, whose families are low income, have severely limited access to internet at home. This is a wonderful opportunity to provide my students and many others the access to knowledge and information at the click of a button. For me, this is an issue of educational equality.

The U.S. media's role as a megaphone for the U.S.-led war on Iraq is now unmistakable. Repeating the lines over and over without challenging them: "Saddam has weapons of mass destruction," "we will pay for the reconstruction of Iraq and for the war with Iraq's oil revenues," "the White House has hard evidence that Saddam Hussein has weapons of mass destruction," ad infinitum....

There is no democracy without a free and critical media. We now have ample evidence that our media is far from free and critical and that, therefore, our democracy is in great peril.

Kevin Coleman  
Terre Haute, IN 47803
As a retiree, I am finding the price of internet access to be unaffordable. With the growth of the internet as a way of doing business, and reduced availability of telephone-accessed information, internet is becoming a necessity in our homes. I believe that internet service should be made available to every home and person free of charge, enabling all to function fully in today’s communication and business world.

Catherine M. Lloyd
East Middlebury, VT 05740

Why would the government even think of turning over our airwaves to corporations? Will this government stop at nothing for money?

It is essential that the public airwaves be used for the public good. Corporations are not, by their inherent nature, capable of serving the good off all who wish to use them. It is imperative that these airwaves be kept open and available for all people of the world as well as the United States for the betterment of humanity. Anything is else is self-serving and unacceptable to an educated, thoughtful or caring person.

For once, the FCC should do something that favors the public, the US citizen over private, business interests. Everything these days approved or inacted by a government agency is done so for the benefit of big business, ignoring the interests of the public, the citizen, and often times at the determinant of the public. Its time the US Citizen benefits from a decision made by the FCC.

I think this is against everything America stands for. What happened to for the people by the people? The public air waves should not be controlled by private enterprise.

Alexa Cipollina  
Smithtown, NY 11787

Naomi Rowden  
Woodinville, WA 98072

There should be the opportunity for individuals to compete in an open marketplace. The Federal Government broke up the "baby bells" back in the 80s, is history repeating itself. Recently the internet and phone companies have been complicit with the Federal government in improperly violating individual's privacy. The consolidation of these communication companies would only make it easier to turn our country into a police state

These corporations should not regulate the wireless world. Public airwaves should stay public airwaves and not be another tool in corporate America's arsenal.

Joshua Menigoz
Mesa, AZ 85208
My own experience AT&T was frustrating and ugly. We had another carrier, and we lost our service two or three times for several days over a period of perhaps a year. Then our above ground outside telephone line leading into the house was cut. AT&T trucks were parked nearby for several weeks during this period, so perhaps others in my neighborhood may have had the same experience. I paid to have the cut line repaired and contacted the Michigan Public Service, the agency that handles such things as I suspected it was AT&T. The Michigan agency was sympathetic and said it appeared I could be correct about the cut, but there was not sufficient evidence for them to take action. I live with my daughter and she didn't want any more telephone problems, so she switched over to AT&T for telephone. I kept my dial up internet and approximately two months into our contract with AT&T, we received a notice from AT&T that I was using their lines for dial up internet and would be charged 10 cents a minute while on the internet or email. So we switched to AT&T internet. I am well aware that I should have resisted using AT&T, but I don't know what the alternative could have been. I am most pleased you are taking on this issue.

I use the internet every day of the year. Without the internet blogs the Iraq war would be played out behind a curtain and much of info re: Bush's government would be an unattainable. My own first hand experience with AT&T revealed how helpless I was in that situation.

This should be preceded by the previous ruling on Public Access channels on cable television. There need to be public bands set aside for use by the public. The wireless access provided today is broken. The technology is out there to provide access to every area on the planet, but the only thing in the way of this is anti-competitive efforts of the major communications providers, who benefit greatly from their monopolies. Thank you for your attention to this!

Please don't give away public airwaves. don't sell our airwaves to big companies. let us use them for our own stuff like better LANs and better wireless for free. big companies have plenty of money.

Gyawa Miller
mobile, AL 36618

Allowing private corporations to have legal rights over public airwaves would be a deeply egregious offense to future generations of Americans. The right to transmit digital electromagnetic signals over public airwaves is the modern day equivalent to having the 18th Century right to free speech, and giving a monopoly right to any group of corporations will not only stifle innovation, but is an assault on our basic rights. By continuing to erode these very basic privileges of American citizenship, the FCC would continue to destroy the same push for citizen accountability and responsibility.

Were I to write a letter on Crane’s paper, it wouldn’t mean that my friend Charlie Crane gets to read my mail. The same principle should apply to internet service which is merely the medium and not the message. If the message is private we are entitled to our reasonable expectation of privacy. What may seem reasonable to the FCC may not be reasonable to most Americans whom it is intended to serve. While the internet serves commercial interests well, its ability to allow a higher variety of communication on a private basis should be maintained and even expanded. We now pay double or triple what we used to pay for regular phone service and we ought to continue to get our money’s worth. Do the right thing. Keep the internet a free speech and free expression zone - protect copyrights where that applies and above all protect the privacy of the individual user by allowing for high quality communication that will become faster, use less wattage and be fairly priced.

Nicholas Binion

Please protect our airwaves for public good. We are already paying too much to large monopolistic corporations for telecommunications. We were expecting competition, but we have seen nothing but high prices and extremely poor and arrogant services.

As U.S. consumers, we are told by our European friends that we are many years behind them as far as the state of communications. They seem to enjoy so many more advantages over what we are getting, mainly because of the large U.S. corporations power over consumers. Our public officials should the American people first and foremost. Please do not disappoint us any more!

companies these days are just becoming monopolies again. It’s not fair what they are trying to do. Paul Wronkovich Norton, OH 44203

The internet was developed for the free exchange of information - first, of scientists, then on the general public. To now turn large portions of it over to big business so that the public can be exploited and its voice stifled is nothing short of theft. There must be a rider in any contract of sale that specifies that there be no restrictions on internet access. Bethany Staelens Long Island City, NY 11106-3405

Free speech has been stifled enough in this country. Marketplace competition has been stifled enough in this country. Giving the public airwaves and internet control to a small number of corporations with continue to keep America on the path to sliding behind the rest of the world, terms of freedom, free-enterprise, and economic strength. Cable and internet companies, like all other businesses, must learn to agree to operate in a competitive marketplace....they did not "invent" cable or the internet, and thus have no claim to deserve a monopoly on the product, nor do they have any right to use legislation to create and protect their monopolies. Cable has already flexed muscle to keep out competition in our area, and it is time that we have a free marketplace in all areas of communication.

Airwaves should be public and not owned by companies looking to stifle their competition in order to save themselves money at the public’s expense. This could be the most significant advance in communication in history and it would be a step back to allow big corporations to block it in the name of money in their pockets at the public’s expense.

Peter Hamel
Greenacres, FL 33463

I am currently stuck with a dishonest local cable company (Charter) for internet service. I was promised a low intro monthly service charge, which I am not getting because someone misquoted me, even though I have it in writing. Cable and utility companies are already monopolies, which is unconstitutional. They shouldn’t be given any more power; they already have too much. Other companies should be allowed to compete in the marketplace to keep prices fair.

Louisa
Kure Beach, NC 28449

How about public airwaves for the citizens, rather than for the media corporations and their financial gain?

Shannon Tolson
Kelseyville, CA 95451

Dear FCC, I definitely want the airwaves used for the good, and a standard held up to that request. I have had a hard time in this country raising 4 children to be enthusiastic, moral, ethical, educated persons for the good of this country, and the world. Please give us a little help here. The media is running America right now. News is non-existent on most stations, just mundane facts, no discussion or suasion. You have families, I am sure, help strengthen our families, our lives, our country, by caring how and what is put in front of our citizens.

Sincerely, Diane Haggerty, Hillsborough, Ca

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

Joshua Nissenboim
North Charleston, SC 29405

The cable companies in this country have done little but continually raise rates since the technology was popularized. If there is an opportunity to keep more of our communication infrastructure open vice sinking it into the corporate trust, then I'm all for it. Investment into wireless systems will reduce costs and allow for development of faster, cheaper, more reliable communications through all levels of industry, government, and education. Wireless technologies are branching out with more applications developed daily, adding security, speed, and diversity while subtracting cost and infrastructure. This arena needs to be open to innovation, not merely those making decisions based on quarterly profit projections.

Kevin Mcnamara
Charleston, SC 29492

Mere ability to pay a higher price for the spectrum should be much less significant than proposals which make the most beneficial use of the spectrum by changing the way we all live (rather than doing more of the same).

Dale Larson
San Francisco, CA 94107

Mary Roohan
Burlington, VT 05401

Well the government is not controlling monopolies in health, energy (fossil fuels), and other areas where business has proved over and over again that they do things to make them money and benefit them not the consumer - taxpayer; so if you do this there is about a 100% chance we will see history repeating itself again and the consumer - taxpayer will once again get the shaft.

Paul Horne

Dear FCC:
You represent the people of the United States. Respect the public’s access to the airwaves. 

Steve Schmidt
menlo park, CA 94025

Last time I looked, this was still a democracy. The people of America have been ripped off long enough by big business. I’m a single mother struggling to buy food let alone extras like internet access. That’s not good for me or for my kids. We need more affordable access to information and the “big boys” don’t have the right to keep it from us.

Robin Robins
Colorado Springs, CO 80909

The Internet was made for the public. The public has a right to have access to anything, anywhere and at anytime on the net. It should not go into the hands of big companies/corporations to do with it as they please.

Kim Schultz
Galesville, WI 54630

Media conglomerates and near-monopolies already pose far too great a threat to our Democracy as it is. Allowing corporations to own or control what is manifestly the property of the public, the airwaves and that virtual world which is the last bastion of freedom, the internet, is - in the first place - inherently UNDEMOCRATIC. In fact, such action by its nature, feeds oligarchy.

That said, to then add insult to injury by allowing these corporations to narrowly skirt antitrust laws and prohibit competition is obscene, legally suspect - if not flatly illegal - and must NOT be allowed to happen.

Michael W. Gray
Tucson, AZ 85719

The public air waves belong to the people!
Margaret M Axwell
Franklin, MA 02038

Please for the public good instead of having a handful of people try to control everything and then have people continually search for loop holes to go around and have people revolt against the big name companies. Please let the US take back the technological lead again over competing countries. Sincerely, M

Selmer, TN 38375

The Internet has become an absolutely indispensable tool. Many rural areas (such as the one in which I live) are held back by the lack of access. To reduce access, such as the proposal before the FCC now, is unconscionable. The last six years of privatization (or more aptly, "piratization") has demonstrated that in EVERY instance, prices have skyrocketed, quality of service has diminished and people who need the newly-privatized services are being denied access.

The FCC’s role should continue to be good stewardship of airwave and Internet resources, rather than to part them out for the profit of a very select few.

James Westley-Farrell
Yanceyville, NC 27379

Please donâ€™t privatze the new airwaves. Maybe the public services will help me afford these technologies as I can’t right now.

I refuse to subscribe to cable because of the high cost, and of course the corporation monopoly.

Susan Berkley
denver, CO 80205

The public airwaves should stay out of corporate hands. We have already seen what AT&T & Comcast will do to the public. They cannot be trusted at all. Competition is needed to keep a myriad of choices available to the consumer. Increasing Comcast, AT&T & Verizon’s stranglehold is not serving the public good. The prices we pay in the United States are so much higher than in Europe and the services we receive are dismal compared to the rest of the Industrial World. Please don’t sell off the public’s assets to greedy competition stifling Corporations. They already have a monopoly and look what they have done. Lousy service & high prices.

Kevin Kellogg
Cumming, GA 30041

why do you politicians always favor the corporations over the good of the people are you not a part of us or are you a part of something else????

Victor B Pichardo
Seattle, WA 98105

Corporations are making enough money already.

William Tuckerman
San Diego, CA 92126

No this should not happen. We are a democratic country and we don’t need the federal government controlling the airwaves. We should have the freedom to watch, hear and see what we want and not have it controlled. I am already seeing radio stations taking off news shows and only having music. I love music but I like to hear the news too. Especially CNN and now some of local radio stations are stopping anything to do with CNN. I think it is because they are telling us what we need to know and they don’t want us to hear it. This has to stop. We are a free country not like Venezuela.

Too long have large companies taken advantage of consumers. We just had our cable tv bill go from $99 to $160 per month. We now have satellite TV for less.

ENOUGH IS ENOUGH!
Mary Oberer
Madison, WI 53704-5815

I use COMCAST, and they are a good example of "charging what the market will bear" They have no competion here in Tupelo Ms. and we pay a MUCH higher rate for less channels and for internet than larger metro areas, like Memphis Tn. I presume COMCAST will try to buy up as much of the new airwaves, just as other companies will. I feel they have too much control already. Alan Lucas

Don't sell our heritage. No price in return is worth it. Save our future assets, for future yet unthought of uses by all, not just the corporate world!!!!

Doug Earle
Dewitt, MI 48820

I think that big oil has taught us a valuable lesson on helping corporate interests in America as the car industry or any other for that matter they only care about profit period. They have left this country an empty shell. I also think that the concept of public trading is good but it has become a paper ocean filled with pirates because greed will always seep into man's endeavors please don't make this another on the list.

Public airways need to be for the public good. Do not give them away to corporations that do not have our interests at heart.

Susan Gallegos
Tucson, AZ 85712

There is far too much corporate greed and interference in the market place. We need safeguards that will allow everyone affordable access and not for the benefit of the "bottom line". Please keep the priority on the public good in this most important place, the public airwaves. Thank you for listening to the citizens’ voices.

Gloria Holzman
Southfield, MI 48076

If you can reserve the airways for the public, you will be able to develop new innovative means of communication. If you give them away to these few corporations, you will limit the inventiveness of americans to utilize the airways in new and innovative ways.

Bob Williams
Sahuarita, AZ 85629

Corporate America already owns too much of this country. Why shouldn't the average American have a break in this country? We work too hard to have to continually give money to corporate America.

</table>
The internet should be an open and free-space to create, interact, learn. This should be for the public good like water, food, and clothing. Please protect the people from profit companies that have their own interests in mind.

I urgently recommend the air above us and beyond be, as it has been, reserved for the public good. We have commercialized too much of our environment and have begun to recognize the folly of over absorption. Please recognize the need for continued freedom of expression in newly developed forms.

Please don't hand over our public airwaves to corporate vultures. They have too much power over all of us already.

will someone please make high speed internet less expensive! i feel raped by Comcast for the $50 a month i pay for internet access, on top of the $100 i pay per month for cable TV! internet service should be free b/c to get it you have to have cable TV service!!! so not right. i’d get DSL but there’s no service in my area so i’m suck with Comcast as my high speed option. this needs to be fixed. there needs to be more competition in my area!

STOP MONOPOLIZING OUR UTILITIES!!!!!

This is not acceptable. America’s competitive advantage is deeply seeded in its entrepreneurial spirit. This would be greatly hindered by a small handful of large, powerful companies controlling more and more of the pathways and access to information.
The internet is meant to be open.
Please do not give away these public airwaves to these large telecommunications conglomerates.

Take, take, take. When will it stop? It needed to stop a long time ago. The American people have given away too many of their rights already and I am begging you to stop this trend here and now. The federal government is on the verge of turning over a huge portion of our public airwaves to companies like AT&T, Verizon, and Comcast who will use them for private gain instead of the public good. How about considering the public good for a change.

Carl Miller

The monopolization of our access to public airwaves and internet must stop. Much like our limitations to service from ONE cable company for a given area, these service providers are trying to limit options for consumers to prop up prices artificially. It sounds good when they tell you they can develop this area better and faster than anyone else, but there is huge incentive for them NOT to keep that promise. Please don't trust them and their private agendas.
I feel that selling public "property" to the private sector without properly and thoroughly informing the public is not only unconscionable but illegal. Unless a majority of the public votes to allow this sale to go through, then the FCC has no right to sell out airwaves to the private industries.

Bees are disappearing. I think radio traffic confuses them so they can't find their way home; "jams" their ability to navigate by the earth's natural magnetic field. Radio saturation may be the "lead plumbing" of the 21st century. Remember Rome and and the brilliant innovation of indoor plumbing? The lead pipes poisoned everyone in the city, so insanity was "normal." Nobody knew they were insane (unless you were visiting from out of town, in which case "Don't drink the water!!!" Way too much radio already. We need to DECREASE ALL AIRWAVES for the public good.

Stephen Carnefix

It is in the best interest to the people of our nation, and that of the nation itself, to allow for technological innovation that could better serve all people. This makes economic sense for our country, makes sense as an investment in developing technologies, and allows people in our country the opportunity to innovate those developing technologies. Opening the newly available airwaves to the public instead of a private interests is a clear decision for a capitalist economy such as ours, effectively open-sourcing innovation within our borders and beyond. It just makes sense.

something as vast and important as the internet [or public airwaves in general] should NEVER EVER be in the hands of just a few. the decisions you make affect MANY and what you decide should be in favor the the public NOT for corporations. this business-uber-alles mentality is not only tiresome, but very, very dangerous. please see that the policy you set benefits the many by keeping healthy competition going and keeping the internet, et. al., free of corporate gatekeepers who do NOT have the public’s interest in mind. thank you.

Public airways need to remain public. If the FCC turns over the airways to a few large companies, competition and innovation will be stamped out. Not out of malice, but simply as a matter of business practices of every large corporation which is obligated by its shareholders to protect and expands its markets. Innovation and competition by their very definition are a threat to the profit margin. As consumers, we rely on these forces, among others such as your regulatory power, to keep the playing field even.

Though availability of substantive news and other information is sadly lacking in the major networks and most of cable television, as well as in radio "news," a corporate take-over of the airwaves could indeed be a further stifling of information and so-called competition. Therefore I sign on to the above petition.

Sincerely, Ted Shakespeare

This is the government’s chance to do the right thing with the internet. I know more regulation makes more bureaucracy, but that's the way it goes: if all people behaved legally and morally, we wouldn’t need government at all, and we could all be libertarians living in Utopia. Abuse on the internet is rampant – all kinds of fraud, pornography, criminal activity, and all because the government stayed "out of it" at the internet’s inception.

Well, the black and evil cat is out of the proverbial bag, but it's not too late to stop total corporate take-over of the internet, which would be yet another blow against the public good. please don’t allow a few companies to control the internet for the rest of us. If the government (e.g. the FCC) wants to regulate (not in the way Hugo Chavez is censoring in Venezuela) according to the Constitution and the public good, then it's actually STILL possible to go back and reverse course; but ceding control to corporations would be a huge blow for us, the people of this country.

Companies like AT&T/Bellsouth have already determined which people are ”worth” offering DSL service to and which are not–my parents’ neighborhood [they and their immediate neighbors have lived there since 1965] is an example of economic discrimination by such firms. Companies cannot be trusted to act in the public welfare–please don’t give them any more power.

Sharon Mooney
Mountain Home, AR 72653-7544

The rules should favor small broadcasters, non-profits, NGOs, educational entities and local governmental organisations. The rules should, also, prohibit big corporate interests from mothballing broadcast bands or licenses that they might obtain. Also, "fair use rules" need to be reinstated with strong protection for, US, the general public.

Charles Trebes
NC 28043

Nancy Ingalls
Parker, CO 80138

Selling the public airwaves to companies like AT&T, Verizon, and Comcast, would be a mistake, they will do nothing with them, and make sure no one else will either, so the public will have no choice but to buy their services, and products at inflated prices, and I believe we have enough of that going on with the gas prices, so please don’t sell them the public airwaves, and leave them for the public to use, and make innovations with, thank you.

Stop selling the public assets to big business!
Keep the airways free. Big corporations like to monopolize for control and profit. It eventually squeezes out the little businesses.

Remember who you work for... the People doesn't include corporations who dubbed themselves "persons;" I am sure that you can tell the difference.

Keep the public airways public, for the benefit of all americans, not just the shareholders of the telecom companies.

Please do not destroy the intellect of our nations people more than it has already been destroyed.
This is ridiculous. Keep public property public and do not empower the phone/cable companies anymore than you have. They are abusing their monopolies.

Anthony Agovino

I live in a fairly well populated community - not a sparsely populated rural area. The only option available to me now for internet access is with a dial-up modem on antiquated copper phone lines that were put down in the 1940's. I have been on a waiting list for DSL service from AT&T for over 10 (TEN) years. Repeatedly they tell me that they have plans to offer DSL ”sometime next year” - but next year never gets here. I am fed up with the system as it exists today. If American companies cannot get on the ball and lay the infrastructure to provide me with a high-speed internet connection then chuck them to the curb and get the Japanese over here to do it. Sad to have to say that but it is the truth.

Michael Childress

Smita Mahajan
Chicago, IL 60631

In an increasingly global world, quick, reliable, and cheap forms of communication are an asset. We should not allow this asset to fall into the grasp of corporate greed. Please allow this to remain in the public domain away from those who would abuse it for personal gain.

Brian Myers
East Northport, NY 11731
I am appalled you should be thinking of turning over our, this country’s people’s, airwaves to *anyone*, but especially that you should contemplate doing so to corporations that have already demonstrated time and time again that they are quite simply incompetent to run a bath, let alone internet services.

I bought a year with Verizon, and it was the worst internet service I had ever had in my life ... any my experience of the internet goes back to when you accessed it using DOS. In the end, in desperation, I just wrote off the last few months of my subscription to sign up with a server, *any* server, that didn’t treat its customers like sh*t.

Friends who’ve joined Comcast have told me of exactly similar experiences. And we all know enough about AT&T and their exploitation of their monopolies ...

The actions you take today will be judged not by today’s chattering classes, or even by today’s ordinary Americans (whom you obviously think it safe to ignore), but by the historians of tomorrow, who will record your treachery. Lest you think that’s unworryingly abstract, remember that those historians will be your kids and your grandkids.

Why is it that first world nations seem to look out for their people when it comes to technology and communications. Why is it that in the US everything has to be for profit of the big corporations? I protest handing over an important block of communications spectrum to AT&T Cingular. This spectrum should be public domain for free fast unincumbered access to the internet. It is time that the USA changes it’s attitude towards the benifit of our citizen we deserve to have services that are not controlled by big business. Please reconsider this proposal and work for the citizens of the USA that pay your salaries, not AT&T or Cingular.

Richard Natole

Although the FCC over-sees the airwave, it does not have the right to "sell" it to any entity that is not actively working for the public good and needs. DO NOT allow yourselves to rape and pillage the American Public’s airwaves like the Republican are to the Open Spaces and National Parks of the American Public. Profits that do not go to the people, but are selfishly horded for private interest.

It is time to stop destroying the USA!!

AIRWAVES BELONG TO THE PUBLIC NOT THE CORPORATE WORLD

Kristine Velasquez  
PORT RICHEY, FL 34668

George Lewis  
Ridgewood, NJ 07450

Donna Tongue  
Londonderry, NH 03053
Hello,
My name is Nichole Jacobsen and I am an announcer for a public radio station. Public radio gives the people alternate information that they wouldn’t ordinarily get on corporate radio, whether it’s music, news, politics, etc. It gives us another outlet to learn and to speak out.
If our public airwaves are taken over by corporations, it will rob us of our right to seek different and new information for the benefit of ourselves and others.
How will we be any different from sheep if we are only allowed to view one perspective; one bias opinion? How will the people be able to make their own decisions if they have no other choices displayed in front of them?
To allow corporations to buy out the public airwaves is to submit to an unjust and unethical situation.
This is not supporting freedom of speech and will be oppressive toward the healthy growth of our society.

I use the internet for knowledge and don’t want any more unwanted advertisement for companies who products that I don’t use. I have paid my fair share in taxes and I don’t feel the Federal Government should be shipping off to private companies anything that I paid for without my permission. It’s something that I part in and my decision is no it’s not a good thing for me or others who feel that same as I do.
A concerned taxpayer

The public airwaves need to be kept free. For many people this is the way they receive information and news. As a librarian, I strongly believe in an individual’s right to access information. Otherwise we will have true access only for those wealthy enough to afford it and everyone poor won’t have full access.

I am sick and tired of the Federal Communications Commission taking public assets and giving them to CORPORATE INTERESTS WITH NO INTEREST IN FURTHERING OR BETTERING THE CHANCES OF DEMOCRACY. I particularly HAVE A PROBLEM WITH AT&T and VERIZON because they have broken the law, using PUBLIC ASSETS, by allowing the NSA TO SPY ON AMERICANS WITHOUT ANY WARRANTS, and you want to give them MORE ACCESS TO PUBLIC ASSETS???? I think you folks need to pull your collective HEADS OUT OF YOUR ASSES AND KNOCK THIS CRAP OFF!!!!!!!

We need the government to keep a handle on airwaves. Not only for the big businesses but also if the claim that bees are affected by these airwaves and not able to find their way home because of them; therefore they are dying rapidly - we definitely need to keep them under some kind of control. Bees are key to our survival and until further research is done...we absolutely should not be just allowing airwaves to be owned by big business.

Please keep the airwaves public and not private. This is better for us all.

I believe this should not happen—we (the working class) barely get by on our salary the way it is—don’t limit us more to have to depend on someone else for something like this!! We already have to pay enough in taxes etc. Why give some big shot more control?!! We are not the ones who can give ourselves a bigger salary overnight and sit back and smile upon it!!!

Robyn L. McCann-Cookeville, TN
I do not want you to vote yes on this bill. I already pay the highest price for the lowest internet service I receive now because I live in a rural area and there is only one company that can provide service to it. They have bought out the competition already. I think something should be done about this. Because if they keep going up on their price then there will be a lot of people giving up what little internet they can afford; which should be free in the first place, just like TV airwaves. People should have a choice which to choose; free or paying, not the companies deciding who is entitled to it at a price only. Besides that is what our country was based on; freedom of choice, so please give us a choice! The government has already taken enough of our choices away from us already because of the mighty dollar instead of the backbone of the workers which this country was founded on in the first place!

Over the past century we have seen more new technology created and innovated. The possibility of big companies purchasing airwaves and "blocking" the usage of these airwaves is preposterous. There must be public airwaves. We live in a new age. The public should be allowed to use the airwaves. These corporations are stifling communication development for so many people. There are millions of people that can not afford internet access. A free nation wide wireless network is very necessary for these people to be involved in the 21st century. This is internet is the highway to so much information. It is a portal through which to find employment. It is a new way of purchasing. It should be available to everyone. The FCC should not allow the wealth to stop access to these airwaves. The government is supposed to look out for the interests of ALL the people, not just the ones with ALL the money. Thank You.

brockway, MI 48097
This very important issue is the perfect vehicle for the FCC to prove that it is doing the job for which it was created – TO SERVE THE PUBLIC GOOD – and not be swayed by big business and/or well-paid lobbyists. The airwaves belong to the public and it should remain that way.
Bob & Lee Fill
E. Rutherford, NJ 07073
Please do not allow major companies to gain an even larger and more strangling hold on the airwaves.

NC 28602

Robert Francis
Powder Springs, GA 30127
Companies like Verizon, AT&T and Comcast are very large. There is no reason that the government should in any way allow these companies to get larger and generate even greater profits by selling public air waves to them. Let the government implement a very low tax for the public to use these airwaves for an unlimited amount of time, and then the governemtn can keep the public happy, and generate some more money as well.
Brian
Crystal Lake, IL 60014
Save our democracy. Let freedom ring–literally!
Jamal Jaddaoui
Wheeling, IL 60090
FCC, for once, let the public airwaves be used for the good of the public.
Karla J Fischer
Baldwin, NY 11510

Doris Loeser
bozeman, MT 59715
I live in a rural area and would be hard pressed to pay the big companies their high prices and then add the taxes like telepone companies have to collect from everyone that has a hand in this. i have to pay $98 before i make the first phone call every month just because of federal and state taxes. it is a shame. good luck in stopping this.

This is America!! Why wouldn’t we want to have the best for the people?? Who would want to be a part of this stifling? Remember that after we are long gone, our children and grand children will be here to deal with what the greedy corporations of today have dealt them. Is there anyone out there who con think of the future and look beyond today? Ist there anyone with guts and fire to make positive things happen?? I believe that the airwaves should be put to good use for the people of America! The pricing and availability of these airwaves will be exponentially wonderful for everyone!!!

Love & Light,
Rebecca Foster

I think the public should have the access to the airwaves. That’s what makes this country great is that we can have these things. The ruin of this country would be in letting corporations like these run free doing whatever they want to the rest of us, with no justice in sight regarding it.

Lisa Rayburn
Portsmouth, OH 45662

Stop letting corporate giants run your government offices and stop letting them line your pockets. Listen to the PEOPLE.

My personal opinion is that if someone is trying to block certain images or sites from minors, maybe they should be more worried about the parents. What kind of society are we living in that we punish others for the ignorance and irresponsibility of parents? Perhaps we should be punishing the parents instead of the public.

I am very disappointed that our cell phones have been opened to telemarketing. This the above mentioned issue makes it clear that The FCC is interested more in corporate money than serving the populace. It is my belief that our government should be made to serve the people before the corporate dollar. I understand and support capitalism, but I know there are boundaries that are crossed all too often for the cause of profit at the expense of our rights, privileges and freedoms. Not a fan of the lobby system (Abramoffs), and campaign fund raising and will be more and more vocal and vigorous in my efforts to correct these ridiculous abuses of power.

The rising cost of living has outpaced most people's incomes, so therefore it is in the best interest to keep the market competitive.

James Black
beaumont, TX 77705

The airwaves were intended to air all points of view on the issues of the day - not just those that benefit the corporations that own the stations. Start doing you duty on behalf of the American people.

John Blackman
Sherman Oaks, CA 91403

unable to get high speed internet at home because phone company tells me by law all they have to provide is phone good enough to communicate with. Nothing in the law to have to provide people with lines good enough for internet! Now tell me why big companies should have to power to become "more" of a controller? NO....you need to let those airwaves be for the good of the public.

Valoa Schneider
Roseburg, OR 97470

Profit is only useful if it expands opportunity for those who make no profit. This does not accumulate wealth, but it is the only moral use of wealth.

Michael Wollman

Elliot Shuford  
Portland, OR 97202

Pamela R Egwuonwu  
Boise, ID 83704

Competition is what keeps America strong, and everyone knows that without a mandate in place stating that no matter which big company wins, they cannot stifle competition and innovation. For big companies will make it so others will not be able to introduce their new technology to the public, and this mandate will also keep the prices from skyrocketing out of control. Because as long as they know they have competition they will strive to keep cost down, and give better service.

Keith Schemmel
liberty, MO 64068

There are many innovative companies jumping at the opportunity to forge ahead with the wireless Internet revolution bringing us high-speed wireless networks from coast to coast and all sorts of innovative wireless devices. But the old phone and cable companies are aggressively trying to block this progress. They've spent billions laying wires, and they enjoy having their customers locked in with few alternatives. Without access to the public airwaves, wireless innovators can't enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auction and then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks.

We're urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves.

The federal government is on the verge of turning over a huge portion of our public airwaves to companies like AT&T, Verizon, and Comcast—who will use them for private enrichment instead of the public good.

This type of behavior by this two term lame duck congress is deplorable and treasonous to the free enterprise of the US. Our present congress has perfectly displayed it’s ineptitude in dealing with serious problems facing the people of US, healthcare and S.S. just to name two upfront. Congress, in your stupidity, continue to shackle the innovative and inventive pathways for the american people to better express themselves for the good of all you will surly trigger a domestic revolution of immense proportions.

Support the use of this valuable public resource be guaranteeing that it is not locked away by the communications cartels that currently exploit other portions of the radio spectrum. Just as the DeBeers diamond cartel controls price and competition in diamonds by buying up and warehousing the world supply; the near monopolies that exist in the US communications market will do the same to public airwaves. Force buyers to use it or lose it and include ENFORCEABLE contract terms to prevent legal maneuvering to create delays in utilization of this resource.

Please do the right thing and allow all Americans the right to access the internet, not just the folks who can afford it.

Laura Creager
Lawrence, KS 66044

I live in a region where there is one and only one option available for high-speed Internet. I believe that it is unfair that individuals, families, small businesses, and non-profit organizations who cannot afford the costly monthly fee to this company should be put at the great disadvantage of having to go with low-speed or no Internet access. In this day and age where information is king, network access is crucial to not only one’s personal education and career opportunities, but to the operational success of the small business. Stifling decent access to the Internet for all people is bad for society and for the economy as well.

I live in a rural area that has no access to high speed internet except through high cost satellite signal. Corporations have not done a good job of bringing high speed internet to people outside of urban centers. Allowing large companies to own the public airwaves will only mean less service then we already have. They have no incentive to compete or innovate because they will monopolize the airwaves. Auction off to them and the dream will die.

William Christenson
Wausau, WI 54403

We pay enough already give the little guys a break like me. We are already thinking of dropping one of our phones we are just trying to figure out either wireless or land line. Why pay for both right with the gas prices going up we have to cut back somewhere. The internet is a good tool it saves gas by checking out stuff on line. Thank you for letting me speak.

Greg Jacobs
Green Bay, WI 54304

Don’t take public airwaves away from the public ...

Kelly Czyzewicz
Madison, WI 53705

Donna Patton

<td>Cable and then satellite, in turn promised a wide array of public use of their bandwidth and was only to charge for non-commercial premium services. As soon as the FCC allowed the cable companies to utilize that bandwidth all plans of multiple public access channels and only charging for channels with no commercials went to the way side. Fool me once, shame on you, fool us twice or three times, than someone at the FCC must be taking bribes. Do not allow private media companies unfettered use of this space to drive up corporate profits at the taxpayer/consumer's cost. That space belongs to all US citizens, and the FCC has a fiduciary obligation to preserve it best use for the citizenry.</td>

How absolutely heartbreaking to know that such a decision must even be contemplated! Thought are free-flowing like the airwaves which MUST stay that way if fresh, new ideas are to make their way into our lives and like so many small ideas grow into life-changing tools. This happens so much more when people are allowed to create because they wish to create not because they were lucky enough to find a job ”creating.” Please, for the sake of the ART that is the Internet, keep the airwaves free.

Please keep our airwaves out of the hands of those corporations who would control them.

Bonnie Wilson  
Cave Creek, AZ 85331
Our country was originally a free country where individuals were free to do business with each other. Now the government controls so many of our personal and business lives, this has to stop. We are quickly becoming a near dictatorship - where the big guys in government have control. If the big guys take away "Public" airspace, we American citizens have lost just that much more of our freedom and independence. In addition, the phone company was broken into smaller ones to stop their monopoly. We can't let a few big guys monopolize the airways. Separate the country further into the haves and the have nots. NOT a good idea.

Sala Chapman
Albuquerque, NM 87106

Lorna A. Doone
Skowhegan, ME 04976

No matter what company I use or why I use it, I believe that the lack of competition amongst our largest corporations is detrimental to our lives and country. Look what has happened to our tv/radio/paper news outlets. Look what has happened to our gas prices. Keep the airwaves open.

How many of our freedoms are you Skull and Bones covers going to take from us before we openly rebel You who are supposed to be our government are getting ready to turn over a huge portion of our public airwaves to the evil AT&T, and Verizon, and Comcast so they can use them for their personal enrichment. You are thinking of bartering and selling our freedom, little by little or all at once. Have the courage not to participate in this evil and further line the pockets of the billionaires. They are already profiting off the deaths of our sons in war, as always, the sociopaths. We know what this is really about; it is so that the hidden government can go on and on with their multigenerational plan of getting control of the world. Only a complete nut would want to get control of the world. FCC, do not hurt us by selling out the airwaves to these evil companies..

Gail French
Lubbock, TX 79411

Do not let Corporations take over the airwaves for profit.

Landes Good
sausalito, CA 94965

Do not stifle competition by allowing Verizon, AT&T or Comcast control public airwaves. I have been an Internet user since 1994 (in four different states) and I have been consistently disappointed and upset over the lack of alternate choices for internet carriers. Customer service has historically been mediocre to bad, due to the inability to change carriers. There are a multitude of family and friends across all age levels who are not able to afford high-speed internet access. This hinders educational, social, economic and political growth and contributes to the "Digital Divide". If you have any further questions, please do not hesitate to contact me at abrambrown3@hotmail.com

Abram Brown Iii

I am concerned about the auctioning off of these airwave rights to big business and the potential impact that might have to stifle creativity of other companies, and the impact on increased costs for Internet Services. Cable is a mess today because there is insufficient competition, and all cable companies are trying to minimize future entrants to the marketplace.

It has to be enough already that Corporate America has taken over everything, leaving the middle and lower classes with nothing. You must please, please think carefully about this decision which could change forever the last free airwaves left to the public. Thank you in advance for your fair and thoughtful decision.

Valerie Cantone
New York, NY 10016

Public airwaves need to remain just that PUBLIC. Allowing any organization to purchase these airwaves would stifle competition, innovation and completely negate our free-market economy. We need to allow our free market system to function thereby allowing the consumer to choose what product or service best suits their needs and their price point, thus forcing companies to develop better products and services.

Jill Mannaioni
MI 48073

I think public airwaves should be used for the good of the public!

Don't sell out!
L Sawyer
Wichita Falls, TX 76306
Now that we established a competitive telecommunications environment, we need to maintain this environment. Please set up the auction so that these companies will not have a monopoly on access to them. I worked through the AT&T divesture in 1983-84 and now that the floodgates of options is open, it must be maintained for the good of consumers! Even though we now have more options in telecommunications, we have already given up customer service for the sake of "market share".

DO NOT Turn these airwaves over to these big companies. They will charge everyone for this and we are already paying enough for internet and gas usage both. They have no business controlling the airwaves and will have no restrictions for piracy, porn, language etc. You need to keep control of the airwaves and do not turn them over to any company except for the Federal Communications Commission. Keep the airwaves FCC.

The public airwaves should be used for the public good, and should be kept available for public use. The government must keep corporations from taking over the airwaves, corporations would lock up the market and stop or reduce competition in the wireless Internet market.

Collected by MoveOn.org Civic Action
The public airwaves are to be cherished like the air we breathe. They must not be sold to the highest bidder!

Daniel Kirkdorffer  
WA 98052

Please back the proposals by MoveOn.org, as they are speaking for me.

John C. Harris  
La Mesa, CA 91941

I believe that the public airwaves should be used for the public good! Big business needs competition otherwise it becomes a monopoly situation.

Wendy Mclaughlin  
Argyle, TX 76226

The public airwaves should be used for the public good. Why should American people keep taken another fall back.

Steve  
IL 60446

It is my solomn belief that to turn over these airwaves to corporate interests is NOT in the best interest of the public, nor the nation as a whole. Between this, and bpl technology, I see many problems arising, and believe that the F.C.C. should harken to the voice of the people, and not corporate interests in these regards. Please DO NOT give our airwaves over to a few corporate interests who will stifle innovation, bury competition, and in general help to bring this country to ruination. I, as not only a private citizen, but also as an amateur radio operator urge you to consider other options before coming to a decision on these matters.

Sincerely,

Keep the public airwaves for the public good  
Billee Mott  
Springfield, OH 45502

To whom it may concern:  
I do not agree with allowing the phone companies to have control of the airwaves, like they have control of the land lines. AT&T (SBC) is the local phone service for my area and has control of all the land lines in the area. I filed a complaint with your organization in January 2006, when I moved into a new home development. Because of the bureaucracy of getting the land line connections made - it took 1-1/2 months and the intervention of my congressman and local government to have phone access in my home to be able to call 911 and be able to activate my home security system. This was while a major crime spree was taking place in the surrounding 19 cities. This should not happen with the airwaves. Private industry should not be able to control public assets.

Lisa Marinelli  
Mentor, OH 44060

Terrie Sparks

at&t and mtn bell were split and look at all the good that came from that.

Do not turn over our public airwaves to huge conglomerates who will use them for private enrichment instead of the public good....Competition is necessary to keep prices down, especially where wireless telephone and internet services are available. Please listen to your public and people. Thank you.

As evidenced by private corporations stifling of cellular industry in the United States (as compared to European or Asian markets), turning over portions of the public airwaves to private corporations would only hurt the citizens - the consumers. Private corporations have only 1 goal, profit. They do not look out for any interests other than the bottom line. The US is on the verge of a wireless breakthrough, to stop now would be bad.
as legislators you have a choice: Either serve the public and the public interest or sell-out to the moneyed interests. the people can only be fooled for so long-nad we have long memories. Make the aforsaid companies comply to the public interest or face forfeiture. Reasonable profit is fine but "gouging" as with the oil companies will not be tolerated.

Dwight R. Boness
Glen Elyyn, IL 60137

Do you think you (federal government) can do something intellectual for a change. Don't turn over portions of our public airwaves to these companies. They already have us in a corner where we're stuck until someone with a brain can get us out.

Josie Chiodo
Phoenix, AZ 85080

As a person who works in a rural community I know that many of the people in this community would like to have high speed internet access but cannot get it without purchasing and installing high priced sattelites or actually paying to have lines run (as my company had to do). It is important to make something as important as internet access (and it is vitally important in this day and age) available and AFFORDABLE for all individuals.

It is imperative that the air waves be open. As it is, my DSL service is mediocre at best as it constantly goes down. In the age of de regulation, why would a government agency now allow only a few businesses to have access to the air waves. Actually, when one thinks of it, this would be a violation of freedom of speech.

Respectfully,
Gale F. Walker
Dallas, TX 75287
I can't let this happen: the people of this great nation deserve to have the OPTION to one day start a business utilizing the airwaves in question to provide a much more affordable public service! this is our right as a country of capitalism.

Phoenix, AZ 85054
There are many innovative companies jumping at the opportunity to forge ahead with the wireless Internet revolution—bringing us high-speed wireless networks from coast to coast and all sorts of innovative wireless devices. But the old phone and cable companies are aggressively trying to block this progress. They’ve spent billions laying wires, and they enjoy having their customers locked in with few alternatives. Without access to the public airwaves, wireless innovators can’t enter the marketplace. So the strategy of companies like AT&T, Verizon, and Comcast is to buy the administrative rights of our airwaves at auction and then use those rights to block competition. They also stifle the development of new wireless devices by only letting their own endorsed products work on their networks.

We’re urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. If the government auctioned off the right to maintain a public highway to Ford, we would certainly not let Ford block Toyotas from the roads. Likewise, big phone and cable should not be able to keep innovative companies off our airwaves. They also shouldn’t be able to tell their wireless Internet customers which websites they can access as they do now. And just as phone companies can’t tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.

The opportunity to revolutionize the Internet and wireless world is at our fingertips. The only question is whether our government will embrace it, and whether regular people will fight for it.

Michelle Smith
Sullivan, IN 47882

I can’t believe some of the things our government does....this is one of them. There must be some personal gain for someone or multiple someones, if turning over ”PUBLIC AIRWAVES” to private companies, seems like a good idea. ”PUBLIC AIRWAVES” SHOULD BE USED FOR THE PUBLIC GOOD!!! As if the private companies don’t have billions of dollars already, they have to suck every dime possible out of the regular average Joe and Jane, busting their hump just to make it by!!! It’s all the rich greedy people out there that are ruining dreams and hopes, of those not so lucky to have billions of dollars!!! I say screw the big companies!!!!!

Having 4 school aged children, require use of the internet anymore. We have been fortunate to at least have the luxury of owning our own computer as well as having internet. Currently, I have dial-up, because that is all we can afford. I can’t even get Verizon High-Speed in my area, which would be an affordable thing for us. Instead, I am paying outrageous amounts of money to have my internet service that I have (AOL), plus I have to pay extra to the phone company (Verizon) to be able not to miss important phone calls as well as pay extra to our IEP. As a matter of fact, my lovely plan that I have with my phone company, just increased $10 a month, plus my internet decided to jack their prices up as well! I can’t understand why, considering neither the phone/internet provider I have has improved in their quality and service! There needs to be more variety to the average consumer at affordable rates and quality service. These huge companies have gotten huge egos and apparently do not think of the average consumer. As a certain commercial states how awful dial-up is, is absolutely true! With my children needing to do constant research for school, it is very difficult and time consuming. By the time they have finished finding the information they need, it is practically their bed time, and any calls I have needed to make, I am unable to make because it is so late/there are other priorities that have to be met. So, as a person of the general public, I plead with you all to make more companies be able to share with us the knowledge and services that they can provide!

Mark Hermanson  
CO 80011

Margaret Short  
CLEVELAND, OH 44108

"Sitting on them" is like hording them. Hording will not serve the public good. And the opportunities these corporations may be hoping for may never materialize. All that bandwidth will have gone without use, in that case, for a good long while. That would be a tragic waste, in the interest of corporate gain/greed, while denying the public access to something it could likely use well.

Bill Mcfarlin, Jr.  
Upland, CA 91786

Phone and cable companies already have a monopoly and don't need any help. Save the airwaves for other new companies wanting to provide internet and telecommunication services.

The liberals and an activist Supreme Court have shaved the rights of upstanding citizens and ceded more concessions to outright criminals and other elements opposed to the furtherance of our Nation’s basic principles. During the same 60 years, established laws have been ignored, not used, or subverted and rendered worthless by foolish or conscienceless forces. Please DO NOT pursue this self-defeating path in this matter of FCC usage permits. MANDATE for what these new airwaves may be used, and that they MUST be used. And SPECIFY a time frame (LESS THAN 3 YEARS) in which this must be implemented.

Dear Human Beings at the FCC... here is the
message I forwarded to my friends:
   Dear Friends,
   I beg of you to sign this petition. I can think
of nothing that threatens democracy's principles
more than this intended action. The fourth es-
tate (independent media) is your safest and most
important guardian of liberty. D.
   Please, please, please pass it on!

I want the public airwaves used for the public good and do not want them to be turned over to big companies who will stifle competition and innovation and the wireless internet revolution. I do not want the FCC to auction off airwaves and stifle competition and innovation. The public has been damaged badly but the lack of competition in the media and marketplace by buyouts.

Toby Tuckman
Kendall Park, NJ 08824

Please don’t let the airwaves and internet be dominated by the corporate interest and interfere with citizens free access to the power of the world wide web.

YOU SHOULD THINK OF THE PUBLIC BEFORE YOU THINK OF FILLING YOUR OWN POCKETS HOW CAN YOU THINK ITS BETTER TO MAKE A PROFIT THAN TO MAKE PEOPLE HAPPY????
Amber Shotter
Lakewood, WA 98499

Public means just that open to all. I'm a Private Investigator and use/need wireless tech. to keep my business running. My running cost are too high to make a $$$ freedom as is. Keep the air wave public, the struggling small biz owner, the student starting to make his/her way... open to all Give us a chance to make the $$$ we need for freedom and not big biz that all ready has it. We are on the verge of becoming sometime great as a society. Who know maybe that open air give a student the information to take to the next level, if say the student gets can't afford the service and a discovery goes unfounded... we all lose.

Amber Shotter
Lakewood, WA 98499

national public radio is a part of the american identity. It's too bad that commercial organisations wish to profit off the one last form of media that has not be commercialised and/or sold out for a profit. NPR is the one last entity that has not been soiled by the greed or agendas of these companies and what they want to put on the airwaves. America is a free market society to a point, but without public radio we deny a voice to millions of americans who will NOT listen to NPR if it is to be bastardized by the greed and free market agendas of these organisatins.

Please be fair with the rights of the little people, and the people who don’t make $1 million a year!!! If this happens, it’s just another example of how free America IS NOT!!!

Don’t you think that these “mega companies” have enough control of our lives already? Competition drives our marketplace to a healthy equilibrium and selling off these airwaves to companies of this magnitude will eliminate competition rather than encourage it because smaller companies will not be able to compete.

You can’t let a few monopolies decide what America wants or needs.

I agree! It’s about time for a change & stop the cable/Internet increases by these Cable/Internet Tycoons!

the airwaves belong to the public, not to a few private corporations; it’s simple: your job is to keep it that way, for the citizen’s highest good and not shareholders of these companies.

do what’s right for a change!

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

Freedom of choice is very important to all Americans. Do not allow the voice of America to fall into the hands of just a few.

Collecting signatures is one thing. Making sure the government has to listen is another. We can’t let the government get away with ignoring your objections.

Your politics and dictatorial actions over the past decades require you to get the good of the people back at the top of your priorities and rule accordingly. The big buck only helps those of you who "do the favors" so end those "favor" decisions now in the best interest of the public! Democracy is going to return if it takes running all of you and your political cronies out of office.

Too much corporate greed is going to put this country in a bind and, send the US toward a direction that may not be reversed. This move to capitalize on major corporate control of Internet access, is just one more example. Competition is better than government and corporate giants holding hands. I think if you read the Constitution it states government is for the people and by the people. Is it going to amended to say "For wealthy and by the wealthy? Is this the case, then maybe Congress should amend the Constitution, which in effect is like telling the middle class to GET READY FOR POVERTY.

I am urging the FCC to protect the public good by setting auction rules that prohibit this anti-competitive behavior. Big phone and cable should not be able to keep innovative companies off our airwaves. They also shouldn't be able to tell their wireless Internet customers which websites they can access as they do now. And just as phone companies can't tell customers what phones can be plugged into a wall jack, cell and wireless companies should not be able to dictate which phones or wireless devices people use on their networks.

Don't continue to give away our freedoms. We have only a few things left that do not erode our freedom...I remember that Eisenhower warned us about the military industrial complex...he may have lumped corporations of every elk into "industrial". If it was true in the 50's, and again in the 80's and again in the 21st century...maybe we should be getting the lesson. Did we not break up AT&T once...only to allow it to become stronger.

Even though I am a customer of Verizon and like to see them succeed as a business, I don’t feel that stifling communication advancements is the answer. I support very much keeping the airways public and I feel strongly that Verizon will do just fine.

How are we ever going to excel if someone is holding us back. Please let us use the airwaves. Do not let industries like AT&T or Verizon have them. Thank you,

NOBODY has the RIGHT to DICATE how we do anything in America im sing this because i think its a good idea to but limitation on big companies. if we can help the little guy (and iam a little guy)shouldn’t we help make life easier and cheaper!!!Thank You for your time John Carrier
we do not want the airwaves controlled in the same fashion as the oil companies control fuel. the government and its subsidiaries have been put into place to protect and serve the people and their best interests. you (the government) have failed time and time again in that respect, do not fail us (the people) again by allowing self indulgent companies to control us like some kind of stalin wannabes. dont make us further regret the power given to the likes of you. we can take what we so freely give.

John Mensing

I think that the government should step in to a lot of things, but you have to see who is in office. You know he won’t do anything because he wants the rich to get richer and the poor to get poorer. He’s too worried about getting more money from the hard working Americans to fund it than he is in the economy and the competition of companies to keep the prices down.

I’m sick and tired of our government placing every corporate interest above that of the taxpayers. We can only expect escalation of pricing, as with the oil market, for something that has become just as important to us for everyday usage. Just how much is this going to cost us this time!!!!!

Debra Mcclure

Large conglomerate corporations are already holding too much interest in media. You are allowing too many monopolies and thusly put a stranglehold on free enterprise which is one of the rights of the American people. Last time I checked it was "...for the people, by the people...” Not for the business giants by the mega corporations. Remember whom you ultimately serve, as a governmental entity. The PEOPLE.
Mara
NM 87107
It was written at the time that, at the close of the Constitutional Convention of 1787, Benjamin Franklin was asked whether we now had a Republic or a Monarchy. He was quoted as replying "...A Republic, if you can keep it."

An essential component of retaining this Republic is the availability of publicly accessible communication modes, that are not limited to those with the money to pay for access. We have enough of that already, and its corrosive effect on our system of governance is apparent. It’s time to draw the line.

The public airwave should be used for public services. Just like the doors were open for small phone companies to get in on the phones service so should the same be done for the internet and the other services. Why should the big companies be able to keep the big piece of the pie? Didn't your parents teach you to share and that there is enough for everybody? The problem with these big companies is "greed" and "selfishness"

Any reason to stifel knowledge and the publics rights are motives for progress to Big Business. To be the home of the free and land of the brave, it would be courageous for anyone from afar to want to live here then to find out that this lad is far from free. To exemplify the outrageously profound truth that it takes money to even die in this country, now given these elements of practice that Big Business has shown throughout history and the current atmosphere of fear of market saturation and profits plummetting and Executives churning out absurd revenue from these companies and having the customers and the entry line employees foot the bill, how can America continue to be prosperous...?

Mo Delgado

This would just get so far out of hand......no good can possibly come to the end user, the American public! More job losses....we can't handle much more....Thanks.

Please make the decision to turn over the public airwaves to the public......not corporate America!!! I am getting tired of paying top dollar ($50 every month) just for internet service plus another $54 a month for basic cable. The prices that the cable company charges (Time Warner) for internet, phone, and basic cable are out of control and just keep going up!! Time Warner is the only cable and broadband internet provider in my area and they know it.....they have a monopoly and they know it! That is why they can get away with charging outrageous prices for phone, internet, and basic cable services. My monthly bill for just internet and basic cable is now $107!

The public interests lie in "unlicensing" access to the airwaves. Turning the airwaves over to media companies will only result in the business needs of these companies being met. Why stifle the public's right to a voice different from that of the media? And in the name of free enterprise, why set up a regulated framework that allows media companies to stifle competition and innovation?

Carla Gentry
Philadelphia, PA 19122

Jill Brier
Scranton, PA 18510

FCC - guess what - they call you a "valued customer" when you call for assistance as did I when I tried to get my radio license renewed...VALUED CUSTOMER HOW DID THEY TREAT YOU - well TREAT ME FINE HERE - and Kee the people's airwaves FREE....forgive the pun.....FREE FREE FREEDOM of the PRESS FOR THE PEOPLE and ALL I HAVE IS A WEBTV......further why don't you go to work demanding these PRESIDENTIAL CANDIDATES MADE USE OF PBS AND PROVIDE THEM WITH FUNDING and - thus, EQUAL PROTECTION OF PRESIDENTIAL CANDIDATES FROM THE SYNDICATES, CRIMINAL SYNDICATES SOME OF THEM, FROM INFLUENCING AND BUYING OUR OVAL OFFICE....FOR THAT OFFICE IS THE ONLY ONE IN THE UNITED STATES OF AMERICA AND THE WORLD - WHERE THE HEAD HONCHO ANSWERS UNTO US......and when we are through as said - I have nothing again, but a webtv...but i am in full support of - MOVE ON on this issue, thought I know not much of their activities in general.

I surely would appreciate having wireless high-speed internet access here in rural Montana. Our dial-up is so slow that I seldom use the internet at all. People in rural areas are more-or-less disenfranchised when it comes to modern technology. We should be able to have nationwide wireless access like a lot of other countries do. Please don't sell the public airwaves to the big communication companies who will prevent us from having this important improvement in our service.

Thank you

We need unbiased news sources that are not influenced by sponsorships and public figures' personal politics. PBS is the only place to receive actual real unbiased news. Overseas they have news that is NOT influenced by money, there is a tax. That is preferable to misinformation.

Aren't you folks at the FCC yourselves tired of the miserable way we in this country have mishandled the public airwaves. Will you please take a look at how this is handled in other democratic countries around the world. We are the most technologically advanced country and yet existing technology and the public airwaves are parceled out to us with only corporate profits in mind. In this regard around the world the USA is a joke and the FCC is the punchline. PLEASE CHANGE!

As the big telecoms eat up the little ones (Cingular is now AT&T, etc.) there are again, fewer and fewer choices. Public Airwaves belong to the PUBLIC. Keep the marketplace competitive, so that controlling interests do not dominate the governments information flow (anymore than they already do) as they with the oil production, energy and foreign policy.

Thank you!

It is expensive enough now to get internet access with cable. Just imagine what the price would be if there was no competition.

Karen Ellinwood
Sylmar, CA 91342

Way too much of what gets done in our world today is done for personal and private gain. The idea of doing anything thing for the general welfare or public good is almost a foreign notion. Nobody wants a tax increase to rob them of 'their money' when they wouldn't be able to make 'their money' without countless public, tax-supported systems. We will evolve no further as a society and as a culture until we become less selfish and self-interested. We need to more focused on the public good, not where the opportunities for profit are.

Scott Elliott
Ypsilanti, MI 48197

Collected by MoveOn.org Civic Action
As one of the wealthiest countries in the world, we should also be leading the world with education and literacy rates. However, we do not. By taking further steps to cut off education to our nation’s disadvantaged, we will only continue to set the world back. By allowing more people access to the Internet at better rates, we can educate more people at a more rapid pace. The more educated people we have, the more advances are to be made in multiple fields, including science, literature and language, technology, communication, the possibilities are only limited to what we limit ourselves. The way to advance is not to deprive people of education, this can only hinder progress. In order to make the world a better place, people must be empowered with the resources to achieve this. Limiting these resources, such as the Internet and public radio waves is not the answer. There are a lot of untapped resources in the American brain and we should do all that we can to encourage new ideas and learning. What good is stifling the education of the child who could discover the cure for AIDS, cancer, etc? This only hurts humans – on a global effort. Who knows, a person empowered by the education that could be gained from using these radio waves could be the person who develops a new technology that makes AT&T, Verizon, or Comcast a billion dollars. We’ll never know if the possibility is never realized.

It is shameful that you would privatize such an important public resource. These companies have no interest in innovation; they will never explore the multitude of useful things that could be done with this. It is near-sighted and greedy to view this as anything other than a public space. The lack of creativity that this administration - and their lackeys at the FCC - allows will place us further behind international competitors.

Please keep the competition open and in the greatest number of hands

Dennis Tardan
Victoria, TX 77901

We currently have little or no say as to what happens with these airwaves and these major companies do not need to have more power to charge us more money. Each item that we give to corporate America as power hurts families...not just individuals. Please don't allow this to take place, let the young families have a chance today to keep some of their money that they make. This may only be one little corner of the world to you but it's big to us out here. Please use these airwaves for the public good with cost that are fair and just to the people, not to Corporate America...they have enough money to work with. You can tell them I said to get better Customer Service, as that is no longer in existance in any company!!?? Everything is about the almighty dollar, sad but true.

The free flow of information represented by the Internet is the lifeblood of modern democracy. Free spread of ideas, culture, and knowledge must not be inhibited. The internet access in this nation should in all honesty be a publicly owned entity, but in lieu of that, it should at the very least be permitted to remain free of corporate control, which values by preference and law the welfare of their stock holders over the common and public good. Keep the internet free. Information needs to be free.

If you want the public to care and support you, then first you must not take more than your fair share greedy corporate scum if you (AT&T, Verizon, Comcast) take our airways I will stop giving you money and encourage everybody I know to do the same and that is no lame threat you will end up losing, my friends.

What happened to a government responsible for the welfare of the people didn’t we learn after the great depression do you want us to view you as we once viewed the hoover administration you are losing a lot of respect from the people as it is, stop digging yourself into a deeper hole.

Juliet Maskell

When the public wants to know why you stopped innovation at a time when it could make connections cheap and simple, we will know who did the right thing.

Andrew Mowery

Stop catering to Big Business. The public airwaves belong to the people NOT Big Business. The Internet should be available to every person on Earth. If you give the Public Airwaves to Big Business then very few people will be able to afford access to the Internet.

Janet Douglass
KS 67220

This is a huge opportunity to bring internet access and information to the people! Please don't turn these airwaves over to the corporations!

Sirena Masket
Oakland, CA 94618

Remember, the people elected you not the corporations. Do what is in the best interest of the people, and the spirit of democracy.

Jessica Lewusz
Portland, OR 97206

Isn't it time this administration did SOMETHING for the public good instead of for corporate enrichment for a change?

The government must protect internet neutrality, integrity, affordability, and accessibility. It is a public good that has revolutionized human thought and existence. Major corporatization of the airwaves without substantial government oversight will put internet users—growing exponentially as we speak—at the mercy of monopoly pricing practices and in turn potentially prohibitive costs. The internet is a work & educational tool that serves as a conduit for people of all economic strata seeking up to the minute information, information that improves our livelihood oftentimes and broadens our understanding of the world around us always. This is possible with internet usage as is, evolving on its own based on free market forces, fair & healthy competition, and user satisfaction.

Thu-Trang Tran
CA 92708

John Nagro
Boston, MA 02120
Airwaves are public property and should remain so. It is the government's job to protect public property for the public. We are as free a society as long as access to information is free, and giving airway rights preferentially to big corporations is antithetical to why this country was founded. We were founded to protect common people from big corporations! Our only hope for real freedom is for free, equal and easy access to information. This can only happen if airwaves are continually protected for the public good. Turning them over to AT&T, Verizon, Comcast and the like will help to destroy our democracy.

THESE COMPANIES HAVE TOO MUCH POWER ALREADY! PLEASE DON'T HAND THEM MORE! lease turn iver these air wavves to the public. the public use of the internet is a link to democracy. Do not stifle the free exchange of ideas. Open the airwaves to all people. allow for more and better free internet connectivity. We want more competition and innovation.

Comcast raised our rates...then Time Warner took over...raised our rates.....now I am receiving very poor service...they act if they don't really care. I have been dealing with the same problem for six months...they tell me tape the channels when they mess up. In the past three years, I have taped 8 to 9 tapes.....are they going to fix the problem?....or, are they going into used tapes sales????

It seems to me that the American people are already charged for things that these large corporations have no need to profit from. Do they really need more? How much money is enough for these folks? The middle class can no longer afford to live in comfort. Limiting public access by ability to pay also limits a large population of the American citizenry without access; therefore, opportunity to further educate themselves. If the government does not begin investing in it's citizenry again then they are squandering the greatest asset of any nation - it's citizenry. Certainly our leadership is not demonstrating a commitment to once again becoming and retaining our world power leadership status. It is quite obvious to the world at large that this great nation has sold its integrity, and thus, solidarity to the highest bidder. None of these ideals nor actions are in alignment with the constitution and the great thinkers in leadership when our great nation was founded. Why not initiate a positive action towards rebuilding American pride again via working to make life good for all the people that make up your constituency. Personally, I want to be proud of my country again. I am proud of its citizenry but I have great doubts about its leadership when they choose to line the pockets of corporations and/or their own personal jackets. It is such an embarrassment to those of us who truly believe in freedom and solidarity. Give us something to believe in once again. Please, retain public airways for the citizenry of America as originally intended!

Do not allow the public airwaves to be bought by corporate gatekeepers who would stifle innovation and competition in the wireless Internet market. The public airwaves should be used for the public good.

Bill Bache
Portland, OR 97227

I work in the film/music video industry. Passing this legislation will stain the entertainment industry forever.

Kip Mcdonald
Nashville, TN 37209

Sharon Matsie
Warner Robins, GA 31088

While I am a strong believer in commerce, I am certain that an increase in access to information via the combination of new technology and these public airwaves will lead to a commensurate growth in intellectual capital and hence innovation. This is a crucial component of the long-term health of the American economy which should not be allowed to auctioned off to the highest bidder for the equivalent of a quarterly gain.

Paul Mondesire

Catherine Munson
San Marcos, CA 92078

Joyce Couvillion
Houston, TX 77077

Stop this corporate giveaway for the gain of political fundraising money at the expense of the average American. Show some caring for the non-corporate tax contributors who pay your salaries less the perks you get from the lobbyists from big business. They get no votes I get One and I will vote against every politician who screws the public. Remember, you are a "PUBLIC SERVANT."

Dr. Donald Paul Wyman

Todd J. Shelley
Leawood, KS 66206

Kierstin Reszka
MI 49686
Public airwaves are just that, and must not, under any circumstance, be fully privatized, seeing as how information etc. will be one manner by which 21st century American Citizens will help the world save itself, environmentally, financially, and, to some extent, spiritually; the internet is neither good nor bad; still, it a tremendous framework by which certain democratic principles may executed.

By the way, there should/will be a U.S. Department of Peace.

Please be aware that we broke up the phone company from being a monopoly. It is time to break up the monopolies once again.Example. Bell south became At&t. Cingular is now AT&T. We need competition to lower our prices and give us options.

Gary Feuer
Coram, NY 11727

Angela Holm
Milwaukee, WI 53204

Sandy
Lake Charles, LA 70605
As a Verizon customer, I have first-hand experience of Verizon's profit strategies. These strategies boil down to restricting features and facilities so as to squeeze every possible penny from every possible revenue stream. One can point to the free enterprise system and say "just go to another company for your services." But when the "other companies" are few and when the other companies adopt similar profit maximizing strategies that do NOT work to the benefit of consumers, there is no true alternative. There is no true free market. The airwaves are nobody's property. They should be safeguarded and protected by the government for the benefit of all.

Richard Merwin

Big companies are taking over everything, strictly for their own profits. Giving private industry public air bands is like selling off national parks to logging companies.

Is not the greed of corporations stifling our whole free enterprise system? Do NOT let them take over.

Public airwaves should be for the protection of the health and wellbeing of people and planet
Preserve our freedom, and our access to public airwaves. Corporate greed will not serve the people of the United States.

We also need controls on the Internet to keep information from our children that will decrease their ability to develop mentally, physically and spiritually for their good and the public good. Some sites are addictive, a waste of time, and lead viewers away from doing good for themselves, those close to them and society.

Ha! And they make out like Hugo Chavez is scary!

Do something good even for just once!

Please do not sell the public airwave to no corporation under any circumstances

I fundamentally oppose the FCC turning over the public airwaves to commercial interests like AT&amp;T, Verizon and comcast. This is just another Republican outrage committed on the American people, another giveaway to "private enterprise" for corporate profit. The FCC is supposed to protect the public interest, not compromise it to greedy corporate interests. I will support any Congressional efforts to prevent this, or reverse it if the FCC doesn't heed its mission of trust for the American people. I'm contacting my Congressional delegation now.

Use the public airwaves for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market. Do not turn over our public airwaves to companies like AT&T, Verizon, and Comcast who will use them for private gain instead of the public good. These newly available airwaves are a once-in-a-lifetime opportunity to revolutionize Internet access by beaming high-speed Internet signals to every park bench, coffee shop, workplace, and home in America at more affordable prices than current Internet service. Phone and cable companies don’t want this competition to their Internet service—they’d rather purchase the airwaves at auction and sit on them.

I am always concerned when the government allows any big business to take over a domain. Business is never concerned about the general welfare of the public which should be a concern of our government. I want the public airwaves to be used for the public good and not turned over to big companies for their financial gain.

Delores Lashley
Caldwell, OH 43724
The airwaves must remain under public control to ensure the free exchange of information and expression that is vital for a functioning democracy.

Keep our public airwaves public. We already have enough control by big business.

James Schneider
Bloomfield, MI 48301

Shannon
Portland, OR 97225

Over the last 20 years, the rest of “our” traditional media has cemented its monopoly on the free flow of information and ideas. The effects are clearly demonstrated by the appalling ignorance of our public. Fortunately, we citizens OWN the internet, which is an effective tool for the free and unfettered exchange of democratic ideas and principles. Anyone commissioner, senator, or representative who cares about the longevity of our democracy should do all they can to preserve this last bastion of expression, and they should oppose ANY and ALL privatization of the internet. Thank You.

Kelly Londry
Ann Arbor, MI 48105

The newly available airwaves should be made available to the public - not to companies - internet usage is paramount to individuals with home-based businesses like mine - increased availability will spawn more public access therefore allowing the small business owner to increase their bottom line.

Too little is being saved for the public good but instead has been/is being sold not at a market value, or leased with revenue coming in “for the public good”, but at bargain basement, auction prices. Once in private hands they tend to become monopolies and the public has to pay through the nose. Keep freedom of information alive and keep avenues for such available for the benefit of all and not that of giant conglomerates who will stifle it and charge the public outrageous fees while doing so.

The internet as it is now offers people the truest sense of equality. Individuals from all walks of life, every race, creed and color can voice their opinions, chat about fixing their cars, recommend their favorite cookie recipes, learn about sickness and famine in Africa and work together to fight it, and more importantly to you, learn who is responsible for giving "monopolistic" communications companies our internet. Isn't the monopoly on our gasoline enough revenue and corporate ego massaging for you power mongers. Leave the internet alone.

It is not in the public interest to sell our public airways to private companies. Other governments support public access and public airways. We need time to develop sound, fair wireless access for all. Stop taking from the public to support corporations. I pay enough to Verizon already!

There are enough monopolies and big business in this country. We need to encourage competition so that capitalism can work.

Also, as much as I pay in taxes, the common folks should get something back from it, instead of helping only big business even more and only the poor, or cut our taxes even more.

To turn these airways over to private industry would be to deprive us, the public, of a needed resource.

Stanley Rinehart  
Katonah, NY 10536

First you force us to digital TV to make more channels available, then you give those channels to the corporate powers that be to fill with more sex and violence and advertising. What are you thinking? The airways belong to the entire populace and your job is to protect them for us. Keep them free for individual innovation, not for corporate waste.

I oppose turning over control of airwaves to private companies. They have been extremely aggressive in their opposition to municipal efforts to foster fiber optic or wireless access and slow to provide service in our area. The U.S. needs to improve Internet service and these companies have not done so. And they are avaricious.

To the Federal Communications Commision, I'd like at this time to voice my concern about our Public Airwaves and attempts to "Privatize" to companies such as AT&T, Verizon and Comcast. I do not feel it is right to sell off what is the deemed public and for that matter not even asking Americans, "The Public", to vote on the matter. The air waves are the People’s Air waves and should remain as such. Thank you for your time and consideration.

Sincerely,
Darlene Wolfe
Brooklyn, NY 11201

There is far too much monopolization of the airwaves currently by a small number of large corporations. Do not take the last bastion of public space and should not be turned over to corporate control!

Freedom of expression relies on this medium to help spread information. To have big companies own them destroys the freedom that this country values and is known for. Please don’t allow these companies to control our freedom or worse, take it away.

Please stop taking advantage of every nook & cranny of the American public’s finances. No wonder we are such an indebted nation.

I am appalled that we continue to privatize communications industries with no real protection for the citizen who is the true owner of the airwaves. The FCC is only the Custodian or Trustee of the airwaves for us. Do not do it.

Don’t sell the airwaves in perpetuity. There is no way to know where new technology will take us. Don’t sell it all. Feel free to sell/lease some of it, free enterprise needs the opportunity to flourish.
Not everything is about money. I know that's hard to understand with the GOP in charge of the White House, but it's true. There used to be something called 'goodwill' that was an estimatable balance sheet item for accountants. This meant people felt good enough about an organization that you could put a dollar amount on it. Don't lose the goodwill of the American people worrying too much about profit.

Kip Reitz
Columbus, GA 31909

Douglas Turner
North Little Rock, AR 72118

Public airwaves should be used to produce and inform the public, it's simple really. Commercial interests and business profits are not in the equation.

I hope the Fed realizes that if this happens, it will take us back three decades to where MA Bell, held a monopoly of the telephone lines. Soon, like before, the cost of doing business, running your life will be limited to your resources, instead of the public be enabled to use the airwaves for the good of all Americans.

James Kosaka

Alexandra Land
Avondale Estates, GA 30002

The governments FIRST responsibility is to protect and serve the public good. There is a moral imperative to protect our public utilities. Please consider that these decisions will have long-lasting and residual effects on our society.

Courtney Knipp
Baltimore, MD 21202

Those who made the internet available to the public in the first place years ago could have decided to make this a commercial enterprise even then...but saw a greater good in making it available to everyone FOR FREE!!!...and this is how it must stay!! I am against the management of these airwaves by corporate overseers!!!!

Liza Dousson
MA 01201

We have enough private interests with huge oil/gas companies making astronomically enormous profits at the expense of the general public. Don't make the same mistake by selling public airwaves to private enterprise who already make more than enough profit off the rest of us. Look what cable TV has already done to our old standard channels' programming. Aaargh!

**Messages:**

- Keep the public airways, public.
- Do not allow the turnover of the new public airways to corporate owners such as AT&T, Comcast, Verizon, etc.
- Remember the “public good” is for the public, not for private interest to become even more wealthy.
- Keep our airwaves free and accessible.
- Stop giving my property away to corporations who then are making me pay for them three times over and more! You guys better start reporting for work – we-uns are startin to get hot!
- Technology is on the verge of a major breakthrough in the way the internet is used. Do NOT lock it into the old model.
- They should be used for the public good!
This is very important to me!

Use airways for public good

Parween Qazi  
Nitro, WV 25314

I would hate to see the rights of the American Public be commodified by Corporations wanting to make an even bigger profit off of what has been & always should be free to the people. These companies are already making huge profits off of the same service- Internet Service. Anything else would seem to be a double dip. Should we start charging to check out books out of the libraries depending who wrote them and if they authors have paid their sponsors? I think not. This is simply ridiculous and should NEVER be allowed to happen. The "airwaves" should remain PUBLIC, ***NOT PRIVATE EVER***.

For what reason would the Government want to exploit information getting to the people??? Why is this even on the table? It's an OUTRAGE and I'm OUTRAGED that this idea is even an option.

Need we remind you- the GOVERNMENT IS FOR THE PEOPLE.... NOT TO BE EXPLOITED BY BUSINESS... Stop the madness. What would a government of integrity do?

Kathryn Lippert

These newly available airwaves are a once-in-a-lifetime opportunity to revolutionize Internet access – beaming high-speed signals to every park bench, coffee shop, workplace, and home in America at more affordable prices than current Internet service. Phone and cable companies don’t want this competition to their Internet service—they’d rather purchase the airwaves at auction and sit on them.

Our airways should be used for public good, NOT make private companies wealthier.

— Our airways are called public for a reason!!!!!!!!!! NOT GOVERNMENT!!!!!!!!!!

— Jonathan Gang
The airwaves have been public property for many years because they are a trademark of our freedom, our values. Selling or giving them away makes no sense and it outrages my sense of pride in America to even propose such a preposterous idea. No, our freedoms have been abridged enough in the past decade, eroded by politicians who think they know better than the American people. The will of the people, rather than control of public opinion.

It's time that the Federal Gov't act in behalf of its citizens and not cater to the special interests of the communications industry and its lobbyists. If the public airwaves are handed over to the telecommunications giants it will be yet another example of more government give-aways to big contributors and their cronies. I'm an fed up with the feds and their shannigans, including this current administrations catering to the wealthy and big business, whether it's AT&T or Merc, or Exxon, etc. The country is sick of this.

Fran Scannell

It's bad enough that the FCC determines what is viewable or not, if all the large corporations control the radio airwaves it's quite possible they can control the content of their stations broadcasts. I am opposed to this type of dictatorship. Broadcasters should be left to their own devices for the purpose of diversity in voice and song. C'mon, who's gonna want 10 easy listening/classic rock stations on their dials?? Not ME!!!!!

Collected by MoveOn.org Civic Action
The federal government is on the verge of turning over a huge portion of our public airwaves to companies like AT&T, Verizon, and Comcast—who may very well use them for private enrichment instead of the public good. These newly available airwaves are a once-in-a-lifetime opportunity to revolutionize Internet access – beaming high-speed signals to every park bench, coffee shop, workplace, and home in America at more affordable prices than current Internet service. Phone and cable companies don’t want this competition to their Internet service—they’d rather purchase the airwaves at auction and sit on them.

In June, the Federal Communications Commission (FCC) will make a major decision: Use the public airwaves for the public good, or turn them over to big companies who will stifle competition, innovation, and the wireless Internet revolution. I am urging the FCC to mandate that whoever wins the auction cannot stifle competition and innovation.

Every time you put the interests of large corporations above the interests of individuals, you make America a worse place to live. Please refrain from screwing the American people any further.

Cost of internet services should be lower, selling to companies will not accomplish this.

We own the airwaves and this country not the government. Remember, we pay your salaries!

These airwaves are for the public. Quit selling out to big money.

This decision will affect generations to come. Do you really want your names associated with a further eroding of our freedom of speech?

If yes, vote to hand these rights to large companies.

If no, align yourself with a positive future for this country.

Intention is worthless – it’s action that counts.

George C. Roese
Manhattan Beach, CA 90266

Allowing the corporate takeover of public airwaves is in direct conflict with the FCC’s mission: "The FCC’s mission is to encourage competition in communications and to promote and support access for every American to existing and advanced telecommunications services"

Please note that "the public" is not the same as a corporation–even a publicly held one because it is specifically a business entity, whereas the public interest is far broader than that. Selling the airwaves to corporations therefore limits the "public" interest to commerce and nothing else.

This once great country has been on a steady course of taking away the rights of the constitution as well as the need for a free press. As Warren Buffet says, ” It is the rich against the poor and the rich are winning”. This once great and proud country is slowly imploding from within. Hopefully, on this one issue the masses will win the 3-2 vote and the public airways will not be handed over to private companies.

Jack Evans
carmichael, CA 95608

I have seen what's happened to radio stations with large companies buying out local stations. THIS IS WORSE. The people need public airwaves, otherwise our general population and traveling workers will be at a huge disadvantage obtaining information and being able to communicate. The phone and cable companies are already killing us with high fees and charges...and their "bundling practices" rather than ala carte...not to mention the extraordinary high Federal & State taxes on each monthly bill!
I resent MY government trampling over my best interests for the benefit of private industry alone. There is no trickle down benefit in this issue to the general public.

The public airwaves should always be unregulated and shielded from monopoly. The phone companies have really done us a dis-service by obstructing other companies from implementing the latest high speed internet and fiber optic data links. The US is way behind some asian countries in that aspect. Let's not underrate the spirit of open market any more.

By now it should be readily apparent that private industry has no conscience when it comes to making money. I do not wish to see private enterprise gobble up the airwaves for monetary gain. The airwaves need to be regulated otherwise we will see and hear Howard Stern and those like him in every media. Hasn't anyone in today's generation seen the movie 'Network'? It should be REQUIRED viewing for every member of the FCC.

Lets keep our Government (the people)free and if we lose our freedom by the greed of Corporate America we all will fall from grace. Yes, greed and intrusion will destroy this once great nation. How much is ever enough especially for those that have most all? Keep the airwaves for the good of the public.

Mike Barna
Steelton, PA 17113
It seems to me that you need to understand the Public good vs. big company wants. We the people are sick of this stuff and you should be listening to us.

Sherilynne Ploughman
Arvada, CO 80005

freedom is key
Jason Clearfield
Pittsburgh, PA 15213

If the government continues to pander to big business at the expense of the public good, there will be a revolution at the polls in 2008.

Randal Peart
Eau Claire, MI 49111

Dear FCC - Please don't give in to corporate pressure; the public has a right to these airwaves!! Why should people have to pay more for wireless services because our government gave away the store and helped create a monopoly devoid of competition? Don't do it!! It was already bad enough when the FCC changed its rules on TV station ownership, creating huge media monopolies and affecting the quality of news coverage for everyone in the U.S.

Jimy S. Tallal
Malibu, CA 90265

I am not excited that we have invisible EMF in our environment, but technology is not going to stop expanding and we all deserve the freedom of use just as much as the air we breathe

Amy C. Nelson
NM 87701

It would defy common sense to limit public goods to private ownership. It is the responsibility of our government to protect access to information via a variety of competitive providers. Allowing a few private companies to monopolize on new, growing technology would be a mistake for other businesses, and the American consumer at large.

Sean
WI 53706
Dear Commissioners,

Please preserve these few remaining airwave bands for the public good. Once they are given out to large corporations there is no way to make sure that they are used for the benefit of the entire U.S. population present and future. Thank you taking the long-term view on these important matters. Regards,

Jim Lauer
St. Charles, IL 60174

The public airwaves should be used for the public good. The government must protect our airwaves from corporate gatekeepers who would stifle innovation and competition in the wireless Internet market.

I am appaled at what is allowed on our airwaves. The propaganda machine of the republican party is obscene. There are blatant lies being said, especially on Fox "news" programs that are deliberately misleading the people. And as troubling, the important news, such as the story of Card and Gonzoles going to the hospital to have Ashcroft sign off on illegal wiretaping, is not even mentioned. These are the public airwaves. We own them. They do not belong to any political party or corporation. We want our airwaves back.

Please...increasingly in our country, public entities are becoming privatized. Our airwaves belong to us...the public...and they shouldn't be for private gain.

This should be used for public good, not private enterprise!

Further control of public wares will only drastically stop innovation and discontinue technological advancements.

Public airwaves are for all - the government actually has a responsibility to all people in the U.S. not to turn the country into a corporate kingdom. Truthfully, it's bad enough as it is. There seems little journalism and media freedom currently in America. Thank you for taking this all Americans into consideration, not just those who will pay to control others’ freedom.

Internet access has become almost a necessity since its inception. A nationwide wireless internet access system would equalize internet technology so it would be available to rich and poor. The founding fathers felt so strongly that free exchange of ideas is essential to a functioning democracy that they put it at the top of our Bill of Rights. Please do not let the major corporations control how Americans communicate with each other and the rest of the world.

I live in a small town where the only internet access is through the phone line (very expensive) or via satellite (even more expensive). I am a senior citizen on a very limited income and cannot afford the satellite. Better communication options would be a godsend to people like me.

I am against public airwaves being sold to internet providers or cable companies. What about keeping some things free the way they have been. If a company wants more shows on their venue then let them create a place and sell additional airtime where it is free going. I guess going to the highest bidder who will contribute money to campaigns that are already out of control.

Please use the airwaves for the public good. I enjoy listening to WCPE, The classical music station, while I'm working on my home computer. I get very little in return for my taxes. Please do not take away one of my few pleasures in life.

Carolyn H. Hampton
Greenville, NC 27858

Please keep the public airwaves accessible to the public— in other words: FREE OF CHARGE.

Kathleen Manwell
Saginaw, MI 48603

Please keep the public airwaves accessible to the public— in other words: FREE OF CHARGE.

This country is currently ranked 16th in terms of wireless availability, behind South Korea! We need to expand access to the internet across the country, and this is the perfect opportunity to do it. We can expand free enterprise and internet-based businesses by providing internet access to rural areas and other locations that lack high-speed internet access. Let's bring our country into the 21st century!

Auren Kaplan
MI 48104

Give it to the people that can use it and need it more. Not to the big companies that just wanna make more money from this. This is a problem with the United States everything is about making money for the rich and keeping the poor, poor.

Jerry Harper
Clarksville, TN 37042

let the public airwaves remain public

Morgan White
morro bay, CA 93442

The public airwaves should be available not just to private concerns who can do with them as they wish, but for various public and private purposes. The notion that free enterprise solves all problems and creates all opportunity and creates an adequate or natural balance of public and private interests is obsurd. Private enterprise, especially when using the public airwaves, needs to tempered and so that pubrlic purposes are served too.

Local public purposes of the airwaves need to be fulfilled as well as state and national purposes.

Hakim Abdal-Khallaq

The major communications companies are entrenched in hard wired connections and if they are allowed to monopolize these airwaves as well competition stops. As it is they choose ‘where’ to provide service leaving much of America without any internet access at all at any price. The other issue is the lack of high speed internet to areas that are not densely populated urban areas. They bring in fiber and then sit on it without deployment, further stifling competition in the provision of high speed access to most of the population.

Excerpt from following Capitalism 3.0 review by David Morris of the Institute for Local Self-Reliance.

Rather than relying on government, Peter Barnes (author of Capitalism 3.0) argues for the creation of a new institution, a commons trust, based on a new property right in the Commons. Unlike government policies, he maintains, property rights tend to endure, as do the institutions that own them. When government is deciding what to do with a public asset like the broadcasting spectrum, or the national parks, or the air, Barnes’ advice is, ”Propertize, don’t privatize”.

Barnes briefly lists many kinds of possible trusts: watershed trusts, air trusts, children’s opportunity trust, an American Permanent Fund (all conceptually based on EXISTING Alaska Permanent Fund) based on a waste absorption tax on corporate profits.

These new trusts would serve as stewards of the Commons for future generations, and would distribute revenue gained from creating a property right in the Commons. Barnes argues that a trust could conceivably generate large sums, which, if distributed on a per capita basis, could ameliorate poverty. Not only would there be a redistribution from rich to poor within countries, but an even larger redistribution between richer and poorer countries when the Commons in question is global, like the atmosphere.

A significant test for this new approach to the Commons may come as we develop strategies to combat global warming. Europe and, several American states, are beginning to embrace a cap on carbon emissions, ratcheting the cap down over time to eventually reach a point where no further global warming from human activities would occur.

Such a cap creates an environmental market value for carbon. How should this new value be distributed? Europe distributed carbon emission credits in proportion to the amount of pollution a company emitted! The result? Billions of dollars in increased corporate income with little or no reduction in pollution. The new Governor of New York, Eliot Spitzer, has suggested that 100 percent of the credits created by a New York carbon cap on electricity generation should be auctioned off.

Barnes would consider this a major step in the right direction, but he would go further. In Capitalism 3.0, and in his previous book, Who Owns the Sky? Barnes argues that carbon emission credits should be distributed on a per capita basis. We might issue a certificate to every person that allows him or her 5 tons of annual carbon emissions. Corporations, and households that generate higher carbon emissions would have to buy credits. Each five years, as governments ratchet downwards the carbon cap, increasing the market value of an individual credit rises, creating a higher incentive for companies to improve energy efficiency and shift to no and low carbon energy sources and a greater income to individual households.
No additional bandwidth should be given to any telecom until they make good on their promise to enhance the current internet service beyond its current low bandwidth. Europe currently enjoys higher bandwidth and lower prices for landline internet service. Why should we the inventors lag behind? The telecoms got concessions to increase the bandwidth and have done nothing. The airwaves should be restored to the public for greater participation not for more cell phone service.

I strongly oppose giving the large phone companies any more "free rides" on the public property of the citizens of this country. If the members of this commission haven't checked their phone bills lately personally, they need to do that now. These companies are already getting away with highway robbery with their overcharges on everything they market, and the states and federal government are tacking on taxes right and left on anything to do with those bills. It is time to stop this nonsense and give the people of America back some of the "free air" we are supposed to be enjoying. AT&T was so famous for buying up patents for a song and then holding them without using them so they wouldn't have to upgrade their facilities that the US govt finally had to step in and break up Ma Bell as a monopoly. That will happen again if you let these companies buy up these air rights and hold them out of service to keep down the competition. Or they will turn around and sell them back to the public at outrageous prices and make a profit again at public expense.

The sale of public airwaves to large companies for a song is one of the biggest scandals in the public arena, and has been almost since its beginning. These companies then turn around and make a fortune off these licenses by selling access to them to advertisers (and the public). It is well past the time when the buyers of these air waves should pay a fair price for these licenses instead of making a mint off the public. It would help lower the deficit and cut into some of their overblown profits at the same time. Paying for the use of public property should not be a license to bilk the people of their fair profit on their own property.

Emily Doherty

Today’s government has been way too lax on capitalism and not for the small business. Why make it easy for big business to have the monopoly on everything. Do not pass the bill that will allow airwaves go up for auction so that big business can control the airwaves. These newly available airwaves are a once-in-a-lifetime opportunity to revolutionize Internet access – beaming high-speed signals to every park bench, coffee shop, workplace, and home in America at more affordable prices than current Internet service. Phone and cable companies don’t want this competition to their Internet service—they’d rather purchase the airwaves at auction and sit on them.

What did our government fought for in the 1800’s and 1900’s to get away from monopoly’s? We don’t need to have AT&T, Verizon, and Comcast to have any more than the public. They are a pain as it is without them getting any more than what they have. Leave the public airwaves alone. I’m tired of their gimmicks for just a couple of months and wham up goes the money and for what? Lousy service at times.

Valerie D. Dutter

I thought we just broke up the big comglomeates and now we are putting them back to gether & wanting to sell them air waves? We need to stop this.

Pat Gardner
San Jose, CA 95124

Alan Miller
Silver Spring, MD 20906

Keep the public airwaves public!

Jason Barth
Westminster, MD 21157

Is everything for sale in this country? Because if so, I’d like to put a bid on my habeas corpus rights before they’re sold to Starbucks or Wal-mart or AOL/Time-Warner.

Susan G Gibbons
Charlottesville, VA 22903

By their nature, the airwaves are public – the public owns them. The public in effect ceases to own them to the extent they are assigned to Corporations bidding on them or otherwise controlling access to them. These companies are less capable of (and/or willing to) creatively develop the uses of these airwaves than the public itself, and this is evident with ordinary use of the internet as it has developed thus far. Don't let the internet get as heavily oriented to helping big companies make a profit as has happended with the TV & Cable industries.

Nancy Dituri
denver, CO 80224

I do not like the restrictions that are put onto my internet service uses since AT&T merged w/Bellsouth. I get thrown out of even my e-mails constantly. AT&T will not let me use choices w/what I have always used - has to be what they support. This is not right! They should not be able to stop me from using available ways to handle my e-mails / internet support.

Beverly Kraft

Timothy Wojtaszek
Palo Alto, CA 94306
The Internet is the greatest invention ever for the sharing of our knowledge and cultures. It is the peaceful watering hole for all the people of the world. I don't see any value in selling or licensing private corporations to regulate its content or access. In fact the opposite. I vote in every election, watch c-span and am very opposed to the idea of allowing this. Please do not pass legislation that affects net neutrality or unfairly allows control of this wonderful invention by private companies.

Sincerely,
Scott Thomas

"Public airwaves" are for PUBLIC use and not for private profiting.

Profit Isn't everything, When in America are "WE the PEOPLE” going to stop this downward spiral harming the very best parts of what we are. We need a revolution in the country to stop rampant greed. Perhaps we need to explore the use of a Constitutional Convention to abolish this government and then maybe the 80% of us not being represented could actually live an American dream that is being taken away by Robber Barons.

This is another fine example of stealing from the people and giving to the rich. Please stop this!!

Stephen Gemmel
NC 27513

One of the primary principles of a capitalist society is that a small business has as great a chance at making a profit as a large corporation. As such, please remember that the larger the corporation, the less focus on consumer support, the more focus on profit and eliminating competition. This could be the next great revolution. Please do not stifle it.

Kevin Atkinson
Santa Fe, NM 87507

I quote from the internet—eloquent support of free internet access for all:

The broadcast airwaves are limited, and regulation is necessary to prevent everyone from trying to use the same frequencies, thus making none of it really useful to any but the biggest, strongest, and most expensive transmitters. Because the airwaves belong to the public, broadcasters are in theory required to serve the public interest—by keeping us informed and giving us a voice. In practice, however, broadcasters have always limited the range of expression they will allow, with the connivance of the FCC. Americans were largely accepting of this level of conservatism as long as it meant the far right and far left were equally excluded.

However, as the far right has taken control of the airwaves, even mainstream liberal voices are being squeezed out, replaced by more and more fanatical right-wingers who now almost completely dominate broadcast radio. Television news and news-talk shows "balance" coverage by showing a narrow range of centrists, along with a broad range of moderate right-wingers and far rightists; left-liberalism and the far left are largely unrepresented. Indeed, much of mainstream liberalism - the sort that most Americans agree with - is left off the schedule most of the time.

Many Americans are unaware that the Fairness Doctrine is no longer any real part of our system of checks and balances. Most do not know that the "respectable" press does far less fact-checking than it used to, in the wake of a 1984 decision in a libel case involving The Washington Post, in which Ken Starr himself let them off the hook. Even our Newspapers of Record no longer care if they spread egregious lies.

For many, the Internet has held out hope as an antidote, but media corporations are trying to foreclose on this freedom, too. Control of music, which helps drive radio listenership, can shut down much of Internet radio. Cable companies are fighting to be able to dispense with Usenet, our rapid-fire one-to-many communication system. Weblogs will survive only if Internet providers permit us the freedoms we have so far enjoyed. Censorship and other pro-corporate regulation drive prices up for individuals as well as interfering with content. Free speech must not become a privilege for only the most wealthy and powerful.

A democracy cannot thrive without an informed public, which is why the press is called The Fourth Estate - the citizens' facility for oversight of their government. The founders of the United States of America understood this, and so enshrined a free press in our Constitution's Bill of Rights. You will not retain that right unless you fight for it.
Please do not allow my rights to be usurped and sold to the highest bidder, the corporate monoliths who pay you to rip off my future access to free, uncensored media, via wireless internet.

Please remember to keep our public airwaves PUBLIC!!!

Please listen. This is a chance for everyone in the USA to benefit from public access internet.

I’m the sysadmin of a wireless coop in western Sonoma County where DSL and Cable are not available (and some places where they were not available when we started the coop). We need more spectrum as the 802.11b wireless space is so full that we receive much interference. Expanding the unlicensed space by a large amount would help us and other organizations that currently use the limited ISM spectrum for public good. Although our coop charges a modest fee to cover the backhaul, we have no paid staff, all technical and administrative functions are covered by volunteers. I urge the Commission to consider that expanding unlicensed spectrum would encourage competition as there are many groups such as ours in both rural areas as well as very dense metropolitan areas, serving populations that are not interesting to commercial operators either due to population density or revenue expectations.
AIR WAVES ARE FREE AND NOT BE CONTR-

Comcast and similar cable-internet-phone companies are basically monopolies, which offer so many services at "temporary" discount prices that completely destroy any hope of competition. If the FCC does approve this, it another step dividing the people with money; the government, corporations & Entertainers and those without money; the people who work to help support the government, corporations and Entertainers. This country every year is destroying the middle class people. NO MORE PRIVATIZATION of public media.

Ricardo Khan

It is paramount that the internet remain untaxed, unregulated, and un-dominated by a few powerful mega-media corporations. We must preserve this vehicle for information and keep it equally accessible by all segments of society.

Nick Zedd
brooklyn, NY 11211

Bruce Aden
Milford, DE 19963

Public airwaves belong to the public and should be used to benefit all the people, not just those who can afford to pay for services. We already have far too few choices for internet and phone service. The FCC should be using the many communication taxes (e.g. on my phone bill, and others) to open up the airwaves to public access internet.

Gina S.
MA 01867

Let's keep the public airways public! I am not in favor of corporations owning or using any of them.

Please vote to use the airwaves for the public good. We are very low income and if you turn the airwaves over to the big companies, they will stifle competition, innovation, and the wireless Internet revolution. Which will keep the prices up so high that people like us will never be able to afford a wireless phone or internet....

Judith Reichenbach
Cave Junction, OR 97523

William Sanders
Palm Harbor, FL 34685

Everyone needs to own at least some of the airwaves, the large corporate has plenty to work with the average person needs representation.

Subject: You say you want a revolution...
Hi,
I just learned about a really important issue, and signed a petition about it. The federal government is on the verge of turning over a huge portion of our public airwaves to companies like AT&T, Verizon, and Comcast—who will use them for private enrichment instead of the public good.

These newly available airwaves are a once-in-a-lifetime opportunity to revolutionize Internet access—beaming high-speed signals to every park bench, coffee shop, workplace, and home in America. Phone and cable companies don’t want this competition to their Internet service—they’d rather purchase the airwaves at auction and sit on them.

You can sign the petition I signed here - urging the government to make sure the public airwaves are used for the public good:
http://civic.moveon.org/airwaves/?r_by=10433-6684744-6iBdhm&rc=paste

Thanks!

Please make the airwaves public. Do not make this a matter of profit and sell to the big 3 telennetwork companies! If you make these airwaves public, it will allow the common office worker to work in more situations and more locations, increasing productivity. With an increase in that also comes an increase in a company’s profits, which in turn means an increase in the taxes they pay you! It will become beneficial and profitable for everyone in the long run if these airwaves become public!

As our rights as US citizens continue to erode, you, the Federal Government, continues to support special interests instead of the people who put you in office. We voted you in, and we can vote you out. Please, make the right decision so that we may have some small sliver of our rights preserved.

Jeff Ernst
Vancouver, WA 98661

The Federal Government needs to understand that we realize their potential to harm us citizens of the United States by passing policies and regulations that further enhance their own lucrative business deals or their social lives. I see no advantages in making our public airwaves property of businesses such as AT&T, Verizon, and/or comcast. Once government gets back to representing the people and not corporations then maybe faith can be restored in politics.

Jennifer Coon
Chesaning, MI 48616

Open access by all is what has allowed the Internet to be the hotbed of innovation that it has been. This lesson must be applied to radio spectrum licensing if we are to have innovation there as well.

Mark Duffy
Lexington, MA 02421

Hello, my name is Terrance Wilson and I am a proud citizen of the USA. Let me give you a little personal background. I am 26 years old, married and a father of 2 little girls. I am a 30% service-connected disabled veteran of the US Army. I have also spent 7 out of the last 12 months unemployed and dependent on social services to keep my family fed while I spent 6-10 hours a day applying to jobs in-person and online. These days, I finally found work as a retail store security guard and earn $8.25/hr which isn’t much but is enough to keep us going and pay the rent.

Now, in today’s culture, having internet access is a necessity not a luxury. Right now, I am a customer of Time Warner Cable (and not by choice as they are the only cable provider in the Dallas area since buying out the area from Comcast.) Between cable television and internet services, I give them about $80 every month to keep Sesame Street and Noggin on for my daughters and to stay connected with my family in California. For those without calculators, that amounts to nearly one thousand dollars a year that company gets out of my family. If the FCC is now in a position that could lower our monthly bills by a measly $10 per month, that is an extra $120 per year we will have in our pockets that could be used for better things, like books for our girls. I know the FCC doesn’t really care about my family on a personal level, but I feel that it’s a good example of what a good portion of America is like at this time, and I feel that this is something that should be done for the public interest instead of the shareholders’.

Please, do what is right and keep the telecommunications giants from quashing imagination and innovation that could be capable of making everyone’s lives a little better.

Thank you for your time,
Terrance Wilson

The benefits in internet are enormous in a democracy. Don't just do things for money, do it for the public good. Improve life, don't make already rich companies richer at our expense.
David Dishongh
Fredericksburg, TX 78624

The internet is something that is revolutionizing the world in the way we access information, communicate, and view others around the world. The use of the internet is becoming a widely necessary thing, as seen at college campuses such as the University of Texas at Austin, where I am a student, where registration, financial transactions, homework assignments and personal communication with professors are all performed online. We should embrace the internet as a necessary tool for the continuing progress of advancing our society, and there for should make it available everywhere to everyone.

Please do not do this! Don’t help eliminate the essential check the public provides to the media! Stop living in the pockets of big corporate companies. Encourage competition. Encourage federal and public ownership. Be a democracy for god’s sake!!

It is time that opportunities stop going to large companies so that they can make a profit. What about the average consumer? When are they thought of?

Consolidation of the media has been enough of a disaster to our culture and innovation. It is paramount that the internet remain untaxed, un-regulated, and un-dominated by a few powerful mega-media corporations. We must preserve this vehicle for information and keep it equally accessible by all segments of society.

i just don't understand why the govt is so against free access to the airwaves....other than blind political ambition and greed on the part of large corporations. what is the government so afraid of...having free airspace?? or have you been misdirected by the administrations hack appointments to "lead" the FCC....or were you just bought off.....it is a mystery to us, we the people.

Public resources belong to the public. Corporations should be allowed to use them as long as they also provide benefit to the public. Please set this up so that a review is required and it is possible for non-corporate users such as public interest groups have access.
