

Maintain Net Neutrality!!

Large corporations rarely have the public interest in mind. I urge you to consider that net neutrality is one of the most important issues of our time. We should not allow large corporations to have the final say in what internet content individuals are allowed to see. Neutrality is also essential to allowing innovators to flourish on the internet rather than simply allowing those who have the most capital the edge in competing on the internet.

Net Neutrality is essential to free speech, equal opportunity and economic innovation in America. Since the FCC removed this basic protection in 2005, the top executives of phone and cable companies have stated their intention to become the Internet's gatekeepers and to discriminate against Web sites that don't pay their added tolls.

This fundamental change would end the open Internet as we know it. It would damage my ability to connect with others, share information and participate in our 21st century democracy and economy. The FCC must ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination.
