

I request that you do not pass any legislation that would place a cap on Universal Service Fund (USF) for cellular carriers. Living in a rural community and spending my free time out in the country places a premium on my cellphone service. Cellsites in the country are expensive and do not provide the same return to the cellular company as do cellsites in the cities and main commuting highways. I think it is very important for us rural people to be able to have the same cellular coverage as those living in the cities. Please look out for us who do not live in the cities and keep the tax on the USF the same as it is so we don't get left high and dry out in the sticks. Thanks for your time. Tom Sarazin
