

For a few dollars, this fund provides for the communication needs of all Americans, especially those who live in areas that may not otherwise be served by the wireless industry. This is especially important for providing services to rural areas with fewer customers. Without this fund, those fewer customers are treated as less than desirable. If this fund is to be ended, those customers would as a result be discriminated against. All men are created equal. Keep this fund to help provide services in areas that would otherwise go without!!!
