

I am the Sales Manager for US Cellular in a rural market. Capping the USF would be devastating to our market and other rural markets throughout the country. Please consider the small communities throughout the United States that would be greatly affected by the cap. Not only affecting the service that customer's receives as well as the employees. Capping the fund would also make the wireless job market in rural areas weaker in turn affecting the rural economy. Thank you for your time.

Amy Darst

sales Manager

Cellular Plus (Authorized US CELLULAR AGENT)

726 E Jackson St.

Macomb, IL 61455
