

The Internet Is The Last Frontier in Fascist USA!

If you mess with the Internet and change access or create any kind of censorship you are dealing a death blow to the last bastion of freedom in America! I will know you contributed to this death should the Internet change and then I will destroy my computer by taking it to the shooting range and blowing it up with my 30:06 high powered rifle destroying, the hard drive in particular, the monitor and the printer. I will not be arrested for being a terrorist because that is what all bloggers will be when the change comes! Do nothing and you have done a lot.
