

To whom it may concern:

I am employed by a telecommunications company and everyday hear the testimonies from people in our rural communicaties asking why service is not excellent in their area. I tell them that we have to build towers based on population in order to garnish a profit. There are areas in our surrounding community that are populated by the Amish or are just sparsely populated but heavily travelled. I would like to ensure the health and safety of these citizens by being able to have the funds to build towers in those areas. It has become a pressing need to be able to communicate whenever and wherever you can. By having the funds to make these build-outs possible we can ensure everyone is receiving the same oppurtunities no matter where they live or travel.

Please take these comments into consideration when you decide to cap or phase out the Federal Universal Fee Fund. We need these funds to ensure the equality of all Americans.
