

Concerning the Sirius-XM merger: I'm a Sirius subscriber (~3 years). I enjoy it very much, especially while commuting. In my home area, the terrestrial radio programming mostly ignores my taste in music, news and talk; satellite radio has been a blessing. The best part is the variety, I can always find something to listen to.

I feel the merger will increase my number of listening options. Reasonable increases (as presented by Sirius and X-M) in costs to get these choices is entirely acceptable to me.

I THEREFORE FULLY SUPPORT THE X-M/SIRIUS MERGER.

Thanks for hearing my opinion.
