

While no one likes additional charges on their cell phone bills,
I much prefer reliability to saving a few pennies.
I like to drive in the country in the spring and fall.
I like to travel in the summer with my family on vacation.
The areas I travel to and through are peaceful country settings.
I want to be able to use my cell phone if we have an emergency.
These areas do not have large population bases that can pay
for cell towers. If we don't pitch in to help build these areas,
we will lose the reliability we have come to depend on.
Please do not cap, cut, or in any way further restrict the USF fund.
