

I would like to comment on the merger. I think that the merger would be in the best interest of the public because both companies have great content but not full content alone. If the companies were to merge then the entire content would be available to the public without having to subscribe to both services and dealing with both types of hardware receivers. I also think that the the satelite radio industry competes directly with terrestrial radio and all other music/talk media. Therefore - in my opinion the merger would not create a monopoly.

Please vote to allow the merger and let the companies do what they do best - deliver the programming that the public wants at an affordable price.

Thank you for your time -

Tim Atwell
