

I would like to register my opposition to the proposed XM/Sirius merger. As a subscriber to XM, I believe that the merger will undoubtedly lead to HIGHER rates and LESS content. It is currently technologically impossible to put all the stations of each company over the bandwidth that a single receiver can receive. Each company has maxxed out their bandwidth - meaning in order to offer "choice" or tiered pricing, they will need to curtail the number of channels. Monopolies do not make good business decisions for consumers.
