

Please allow the XM and Sirius Merger. I feel that the merger will greatly expand programming, and keep the rest of the competition on their toes. (standard radio, CD's, IPODs, etc) This will allow the combined efforts of two companies to increase what the public is already demanding, less commercials, greater choice in programming. Secondly, whether the merger goes through or not this Sirius and XM both create less car accidents due to listeners not having to constantly change cd's, tapes, or from commercial ridden stations. Please approve this merger.
