

Sirius and XM Merger...

As a consumer I am looking forward to having more choices without commercials. As a sports fan it will be a great benefit to have the MLB, NFL and Nascar all under the same provider. It will also be nice to see these companies be able to compete without killing one another with the likes of ipods, internet radio, wifi and all the other technology that is up and coming. I believe this merger is in the best interest of consumers as well Sirius and XMSR competitors.

The nice thing about a paid service is that you can cancel your subscription if you don't like it at any time!

Thank you for your time.
