Public Notice: **can be obtained on the Internet at:**  
<http://www.sbc.com/gen/public-affairs?pid=3137>

**Network Change:**

AT&T will be adding 3 new CIR's (Committed Information Rates) to the current Opt-E-MAN product offering. These new speeds can be provisioned over copper or Fiber facilities, where facilities permit and at the Telco's discretion.

**Description of Type of Changes Planned:**

AT&T will be adding 3 new CIR's (Committed Information Rates) to the current Opt-E-MAN product offering. These new speeds can be provisioned over copper or Fiber facilities, where facilities permit and at the Telco's discretion. These enhancements will be available in all AT&T 13 state regions/MSA's where Opt-E-MAN is available today.

**Description of Reasonably Foreseeable Impact of the Planned Changes:**

AT&T will offer 3 new CIR's (Committed Information Rates) to the current Opt-E-MAN product offering. The new speeds will consist of 2mbps, 4mbps, and 8mbps. These new CIR will provide the customer with additional, lower speed choices. These new lower speeds can be provisioned over copper or fiber, where facilities permit and at the Telco's discretion. This new copper provisioning enhancement improves installation intervals for these CIR options when fiber facilities are not available.

**Location of Change:**
