

As a subscriber and shareholder of xm and sirius, I believe it would be in the best interest of all parties to allow this merger. With the advent of ipods, HD radio, blackberrys, and multi-media cellphones, the landscape of media transmission has changed. Competition now permeates through all boundaries of media transmission. If this merger is not allowed to happen, it will be very difficult for xm & sirius to compete on an unbalanced playing field. I am in favor of this merger for the sake of competition and the consumer.
