

## People Power

It would be a blatant violation of the interest of the American public to give anymore power to any corporate interest at all. I am deeply disappointed that by now our Congress people still can't get it figured out that all they have to do is do the opposite of all corporate lobbyists requests!

The internet has already been horribly spoiled by corporate adware, spyware, and new laws to allow them to intimidate ordinary citizens and cow them into being spending machines. They even have found way to legally take our own computers from us by installing malicious software under the guise of protection etc. Messages constantly popping up trying to scare us into purchasing more unneeded software when if we knew where to look we could find more friendly freeware versions. EXcept that the more democratic way seems to be getting gradually choked out as the corporate companies steer the average unknowing consumer in the other direction.

The internet needs to be MORE open and MORE ACCESSIBLE. NOT LESS!

DO THE RIGHT THING FOR ONCE!!!!!!!!!!

after that maybe you'll be inspired to end the unjust war (even more so than VIET NAM) and try and get some of our civil liberties back....

But I'm sure that if you even ever read this you'll realize it's in your own personal interest to do what the lobbyist want because you are a fucking bourgeois PIG!!!! All politicians are, even the partially good ones like Al Gore, are corrupt by the very nature of the system which has been long hijacked by corporate interests. The very existence of and the way the farming, pharmaceutical, energy, entertainment and now private military (Black Water) industries work with government help is PROOF!

Don't try and argue just go hang yourself!

Get a fucking clue stupid upper class shit heads!!!!

We DO know how much you lie and we know how much everything in the media is a lie. Give the power back to us before we rise up and TAKE it BACK someday in the not too distant future.
