

I support the effort to make the internet neutral. If price controls will accomplish this and prevent the big moneyed boys from controlling the internet like they are controlling other forms of media, then that is what should happen. That's why I am writing to urge the F.C.C. to regulate the Internet with new net neutrality rules.

We have seen what market forces have done to the print and airwaves media. It has allowed propaganda and lies to supplant truth and reason. The boys with the gold buy the "truth" they want to hear. This has gotten us into an illegal war, made us hated around the globe, and made us a nation willing to allow torture and even pre-emptive war for the aggrandizement of big corporations.

Government should always act to provide a level playing field for its citizens.
