

I support the FreedomWorks mission of lower taxes for Americans, less government intrusion, and more human freedom.

Which is why I am writing to urge the F.C.C. to not regulate the Internet with new net neutrality rules.

These are price controls on the Internet, and they will mean less innovation, and less investment in the infrastructure critical for the deployment of broadband to all Americans.

Let's let the market work and watch the future of Internet innovation, competition and technological progress. Private business and free enterprise should determine the future of the Internet, not federal regulators and politicians in Washington, D.C.

Thank you for considering my thoughts on this vital subject.

Ed Mickol
