

Before the  
**FEDERAL COMMUNICATIONS COMMISSION**  
Washington, DC 20554

In the Matter of

En-Touch Systems, Inc. Request for Waiver  
of 47 C.F.R. § 76.1204(a)(1)

CSR-7183-Z

**SWORN DECLARATION OF JASON BONE**

1. My name is Jason Bone. I am the Chief Engineer of En-Touch Systems, Inc. ("En-Touch"). I declare under penalty of perjury that the facts contained in this Declaration are true and correct to the best of my knowledge, information, and belief, and that I am authorized to give this Declaration on behalf of En-Touch.

2. Pursuant to paragraph 62 and footnote 252 of the Memorandum Opinion and Order ("Order") issued by the Bureau in this proceeding on June 29, 2007, En-Touch hereby accepts the conditional waiver from the integration ban for devices that do not include High Definition output or Digital Video Recorder capabilities. Accordingly, En-Touch publicly commits to the following plan by this sworn declaration: it will (1) move to an all-digital network on or before March 31, 2008, except as noted in paragraph 3 below; (2) notify all of its analog customers of its plans to go all-digital at least six months in advance of that event, and submit a sworn declaration to the Commission confirming that such notice has been provided; and (3) ensure that, at least six months prior to its migration to all-digital, it has in its inventory or has placed orders for enough set-top boxes to ensure that each of its customers can continue to view its video programming on their television sets, and submit a sworn declaration to the Commission confirming that this is the case. Pursuant to footnote 252 of the Order, En-Touch submits that an additional 12-month advance notification is not necessary, and would only delay En-Touch's transition.

3. For some period after March 31, 2008, but in any event ending no later than February 17, 2009, En-Touch may provide a grace period analog transmission of local broadcast stations for the convenience of its customers that have not obtained set-top boxes for every analog television in their home.

Jason Bone  
Chief Engineer  
En-Touch Systems, Inc.
