

Why the FCC Should Uphold the Constitution.

While the Founders of our great Nation never could have imagined the progress of the internet-they did understand the Rights of Individuals to Life,Liberty and the Pursuit of Happiness. They also understood Rights of the Public to the Freedom of Speech. You have a duty to honor this and keep our net free!

True and open competition is good, but not at the cost of the telecommunication industries having a carte blanche roll in censoring and denying the public the right to view all content-not in conflict with laws(i.e. child porn, etc.,etc.) The parents of young children Only have the right to do this. We as individuals (adults) can decide for ourselves what we will view. We do not need to have the telecommunications industry dictating to us what can and cannot be viewed.

Yes, the internet is a wild and new frontier and like any frontier it must be tamed, but not at the expense of taking something so amazing and pure and destroying it. There doesn't need to be an Internet 2. This one is just fine. It's full of total and non-stop information that rivals the ancient libraries of Alexandria. There's enough laws to regulate this frontier.

We must at a society, at all times, tread carefully when concerning Free Speech of any kind. We have a right to all the knowledge out there. To let the telecommunications industry even have a glimmer of hope of being able to mold it in their image is very dangerous and very totalitarian. The best example is China-it has an iron grip on what they can view-which is wrong.

I implore to your good and kind hearts. Please keep our Net..not Neutral but Free. Regulate only what must be regulated. Do not overtax our purchases, do not let service providers make up pay for e-mails. Do not take this away from the People.

Thank You!

Kevin M.
