

We support FreedomWorks mission for lower taxes, the FAIR TAX, less government, and more freedom. That's why we are writing to urge the F.C.C. to NOT regulate the Internet with new net neutrality rules.

These are 'price' controls on the Internet. They will mean less internet innovation and less investment in the infrastructure critical for the deployment of broadband to all Americans. We should let the market work and watch the future of Internet innovation, competition and technological progress. Private initiative, business entities and free enterprise should determine the future of the Internet, not federal regulators and politicians in Washington, D.C. This pertains to many other issues government and social engineers want to regulate and control as well.
