

SAVE THE INTERNET!!!

Net Neutrality is essential to free speech, equal opportunity and economic innovation in America. Since the FCC removed this basic protection in 2005, the top executives of phone and cable companies have stated their intention to become the Internet's gatekeepers and to discriminate against Web sites that don't pay their added tolls.

This fundamental change would end the open Internet as we know it. It would damage my ability to connect with others, share information and participate in our 21st century democracy and economy. The FCC must ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination.

Also I browse the internet all the time looking for information and fun. Why do you wish to take away my own personal time browsing the internet so some people can get even more richer?! Instead of figuring out ways to nickel and dime us they should be using that money to make the world a better place for our children and their children's children.

The internet is where most US citizens and citizens of other countries come together to share information, ideas, and culture. Why do you want to limit free speech on the internet? Ain't that what this country was founded on? Free speech for all? Now the internet has made it come true not just for Americans, but for EVERYONE!
