

Decentralization Works Against Monopolization

The policies of our country have stood for this basic idea. Please help preserve it and Net Neutrality.

Net Neutrality is an effective way to insure free speech, equal opportunity and economic innovation in America. Since the FCC removed this basic protection in 2005, the top executives of phone and cable companies have stated their intention to become the Internet's gatekeepers and to discriminate against Web sites that don't pay their added tolls. Please do not let this come to pass.

These companies are advocating a fundamental change that would end the open Internet as we know it. It would damage my ability to connect with others, share information and participate in our 21st century democracy and economy.

The FCC must ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination.
