

## Internet Madders...

I am a gamer, I've played about 20 online games over 200,000 times, and I enjoy it, but if they kill the internet, its not going to be fun! I know you can play OTHER computer games, but not with other people! I'm sure even LANs will be slowed down! So I look in the eyes of the internet stealers and say. "This isn't just my internet, its YOUR internet and it isn't yours to wreck! It is all of Earth's internet!"
