

No nickle and diming! Save Net Neutrality!

Net Neutrality should be a right, not something we have to pay for. It's not right that companies can nickle and dime us to death for everyone. Now they're going to start doing this to our internet too?

I'm sorry, but I'm for Net Neutrality. And if you like browsing your email, google, blogs, etc, at the same speed for the same price you currently pay, then you should support Net Neutrality too.
